| BellSouth currently is developing the billing capability to mechanically bill the recurring and non-recurring Market Rates in this section except for nonrecurring charges for not currently combined in AL, FL and NC. In the interim where BellSouth cannot bill Market Rates, BellSouth shall bill the rates in the Cost-Based section preceding in lieu of the Market Rates and reserves the right to true-up the billing difference. |               |  |  |                                                                                                     |  |         |       |       |       |           |              |       |                         |                                  |                                      |                                                          |                                                            |                                                               |                                                                 |
| The Market Rate for unbundled ports includes all available features in all states.                                                                                                                                                                                                                                                                                                                                                        |               |  |  |                                                                                                     |  |         |       |       |       |           |              |       |                         |                                  |                                      |                                                          |                                                            |                                                               |                                                                 |
| End Office and Tandem Switching Usage and Common Transport Usage rates in the Port section of this rate exhibit shall apply to all combinations of loop/port network elements except for UNE Coin Port/Loop Combinations which have a flat rate usage charge (USOC: URECU).                                                                                                                                                               |               |  |  |                                                                                                     |  |         |       |       |       |           |              |       |                         |                                  |                                      |                                                          |                                                            |                                                               |                                                                 |
| For Not Currently Combined scenarios where Market Rates apply, the Nonrecurring charges are listed in the First and Additional NRC columns for each Port USOC. For Currently Combined scenarios, the Nonrecurring charges are listed in the NRC - Currently Combined section. Additional NRCs may apply also and are categorized accordingly.                                                                                             |               |  |  |                                                                                                     |  |         |       |       |       |           |              |       |                         |                                  |                                      |                                                          |                                                            |                                                               |                                                                 |

Features shall apply to the Unbundled Port/Loop Combination - Cost Based Rate section in the same manner as they are applied to the Stand-Alone Unbundled Port section of this Rate Exhibit.                                                                                                                                                                                                                                                                                                                                                                                                                                                               |                                                                                                   |         |      |       |       |           |              |        |                         |                                  |                                      |                                                          |                                                            |                                                               |                                                                 |
| 3. End Office and Tandem Switching Usage and Common Transport Usage rates in the Port section of this rate exhibit shall apply to all combinations of loop/port network elements except for UNE Coin Port/Loop Combinations.                                                                                                                                                                                                                                                                                                                                                                                                                                  |                                                                                                   |         |      |       |       |           |              |        |                         |                                  |                                      |                                                          |                                                            |                                                               |                                                                 |
| For Georgia, Kentucky, Louisiana, Mississippi and Tennessee, the recurring UNE Port and Loop charges listed apply to Currently Combined and Not Currently Combined Combos. The the first and additional Port nonrecurring charges apply to Not Currently Combined Combos for all states. In GA, KY, LA, MS and TN these nonrecurring charges are commission ordered cost based rates and in AL, FL, NC and SC these nonrecurring charges are Market Rates and are listed in the Market Rate section. For Currently Combined Combos in all other states, the nonrecurring charges shall be those identified in the Nonrecurring - Currently Combined sections. |                                                                                                   |         |      |       |       |           |              |        |                         |                                  |                                      |                                                          |                                                            |                                                               |                                                                 |
| 5. Market Rates for Unbundled Centrex Port/Loop Combination will be negotiated on an Individual Case Basis, until further notice.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |                                                                                                   |         |      |       |       |           |              |        |                         |                                  |                                      |                                                          |                                                            |                                                               |                                                                 |
| UNE-P CENTREX - 5ESS (Valid in All States)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                   |         |      |       |       |           |              |        |                         |                                  |                                      |                                                          |                                                            |                                                               |                                                                 |

|                                        | NOTE: (1) Electronic Service Order: CLEC should contact its contract negotiator if it prefers the state specific electronic service ordering charges as ordered by the State Commissions. The electronic service ordering charge currently contained in this rate exhibit is the BellSouth regional electronic service ordering charge. CLEC may elect either the state specific Commission ordered rates for the electronic service ordering charges, or CLEC may elect the regional electronic service ordering charge.                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                |             |      |             |        |           |              |       |                         |                                           |                                               |                                                                          |                                                                            |                                                                               |                                                                                 |       |
|                                        | NOTE: (2) Any element that can be ordered electronically will be billed according to the SOME C rate listed in this category. Please refer to BellSouth's Business Rules for Local Ordering (BBR-LO) to determine if a product can be ordered electronically. For those elements that cannot be ordered electronically at present per the BBR-LO, the listed SOME C rate in this category reflects the charge that would be billed to a CLEC once electronic ordering capabilities come on-line for that element. Otherwise, the manual ordering charge, SOMAN, will be applied to a CLECs bill when it submits an LSR to BellSouth. |                                                                                                                                                                                                                                                                                                                                                                                                                                |             |      |             |        |           |              |       |                         |                                           |                                               |                                                                          |                                                                            |                                                                               |                                                                                 |       |

Cost Based Rates are applied where BellSouth is required by FCC and/or State Commission rule to provide Unbundled Local Switching or Switch Ports.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |       |                                                                                                |          |      |       |       |           |              |       |                         |                                  |                                      |                                                          |                                                            |                                                               |                                                                 |       |
| 2. Features shall apply to the Unbundled Port/Loop Combination - Cost Based Rate section in the same manner as they are applied to the Stand-Alone Unbundled Port section of this Rate Exhibit.                                                                                                                                                                                                                                                                                                                                                                                                                                                               |       |                                                                                                |          |      |       |       |           |              |       |                         |                                  |                                      |                                                          |                                                            |                                                               |                                                                 |       |
| 3. End Office and Tandem Switching Usage and Common Transport Usage rates in the Port section of this rate exhibit shall apply to all combinations of loop/port network elements except for UNE Coin Port/Loop Combinations.                                                                                                                                                                                                                                                                                                                                                                                                                                  |       |                                                                                                |          |      |       |       |           |              |       |                         |                                  |                                      |                                                          |                                                            |                                                               |                                                                 |       |
| For Georgia, Kentucky, Louisiana, Mississippi and Tennessee, the recurring UNE Port and Loop charges listed apply to Currently Combined and Not Currently Combined Combos. The the first and additional Port nonrecurring charges apply to Not Currently Combined Combos for all states. In GA, KY, LA, MS and TN these nonrecurring charges are commission ordered cost based rates and in AL, FL, NC and SC these nonrecurring charges are Market Rates and are listed in the Market Rate section. For Currently Combined Combos in all other states, the nonrecurring charges shall be those identified in the Nonrecurring - Currently Combined sections. |       |                                                                                                |          |      |       |       |           |              |       |                         |                                  |                                      |                                                          |                                                            |                                                               |                                                                 |       |
| 5. Market Rates for Unbundled Centrex Port/Loop Combination will be negotiated on an Individual Case Basis, until further notice.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |       |                                                                                                |          |      |       |       |           |              |       |                         |                                  |                                      |                                                          |                                                            |                                                               |                                                                 |       |

**Network Interconnection: Call Transport and Termination**

The Parties shall provide interconnection with each other's networks for the transmission and routing of telephone exchange service (Local) and exchange access (IntraLATA Toll and Switched Access) on the following terms:

**1. Definitions**

**Dedicated Transport.** Dedicated Transport is defined as transmission facilities, including all technically feasible capacity-related services including, but not limited to, DS1, DS3, and Ocn levels, dedicated to a particular customer or carrier, that provide telecommunications between wire centers owned by incumbent LECs or requesting telecommunications carriers, or between switches owned by incumbent LECs or requesting telecommunications carriers.

**Interoffice Channel Dedicated Transport.** Interoffice Channel Dedicated Transport is defined as a switched transport facility between a Party's designated Serving Wire Center and the first point of switching on the other Party's common (shared) network.

**Local Channel.** A Local Channel is defined as a switched dedicated transport facility between a Party's Point of Interconnection and its designated Serving Wire Center.

**Dark Fiber Transport.** Dark Fiber Transport is defined as incumbent LEC optical transmission facilities without attached multiplexing, aggregation or other electronics.

**Shared Transport.** Shared transport is defined as transmission facilities shared by more than one carrier, including the incumbent LEC, between end office switches, between end office switches and tandem switches, and between tandem switches, in the incumbent LEC networks.

**Fiber Meet.** Fiber Meet is an interconnection arrangement whereby the Parties physically interconnect their networks via an optical fiber interface at which one Party's facilities, provisioning, and maintenance responsibility begins and the other Party's responsibility ends (i.e. Point of Interconnection).

**ISP-Bound Traffic.** ISP-Bound Traffic is defined as telecommunications traffic delivered to an information service provider ("ISP"). ISP-Bound Traffic is not considered Local Traffic subject to reciprocal compensation but instead is classified as information access.

**Local Traffic:**

**CLEC Local Traffic.** CLEC Local Traffic is defined as any telephone call that originates in one exchange and terminates in either the same exchange, or other local calling area associated with the originating exchange as defined and specified in Section A3 of BellSouth's General Subscriber Service Tariff. As clarification of this definition and for reciprocal transport and termination compensation, CLEC Local Traffic does not include ISP-Bound Traffic. As further clarification, CLEC Local Traffic does not include calls that do not transmit information of the user's choosing. In any event, neither Party will pay reciprocal compensation to the other if the "traffic" to which such reciprocal compensation would otherwise apply was generated, in whole or in part, for the purpose of creating an obligation on the part of the originating carrier to pay reciprocal compensation for such traffic.

**Wireless Local Traffic.** Wireless Local Traffic is defined for purposes of reciprocal compensation under this Agreement as: (1) any telephone call that originates on the network of Sprint PCS within a Major Trading Area ("MTA") and terminates on the network of BellSouth in the same MTA and within the Local Access and Transport Area ("LATA") in which the call is handed off from Sprint PCS to BellSouth, and (2) any telephone call that originates on the network of BellSouth that is handed off directly to Sprint PCS in the same LATA in which the call originates and terminates on the network of Sprint PCS in the MTA in which the call is handed off from BellSouth to Sprint PCS. For purposes of this Agreement, LATA shall have the same definition as that contained in the Telecommunications Act of 1996, and MTA shall have the same definition as that contained in the FCC's rules.

**Serving Wire Center.** For purposes of interconnection, a Serving Wire Center is defined as the wire center owned by one party from which the other party would normally obtain dial tone for its Point of Interconnection.

**Transit Traffic.** Transit Traffic is traffic originating on Sprint CLEC's network that is switched and/or transported by BellSouth and delivered to a third party's network or traffic originating on a third party's network that is switched and/or transported by BellSouth and delivered to Sprint CLEC's network.

**Wireless Intermediary Traffic.** Wireless Intermediary Traffic is defined as the delivery, pursuant to this agreement or Commission directive, of local or toll (using traditional landline definitions) traffic to or from a local exchange carrier other than BellSouth; a CLEC; or another telecommunications company such as a CMRS provider other than Sprint PCS through the network of BellSouth or Sprint PCS from or to an end user of BellSouth or Sprint PCS.

**Tandem Switching.** For the purposes of this Attachment, Tandem Switching is defined as the function that establishes a communications path between two switching offices through a third switching office (the Tandem switch), pursuant to 47 CFR § 51.319 (c) (2).

**End Office Switching.** For the purposes of this Attachment, End Office Switching is defined as the function that establishes a communications path between the trunk side and line side of the End Office switch.

**Physical Point of Interconnection.** A Point of Interconnection is the physical telecommunications interface between BellSouth and Sprint's interconnection functions. It establishes the technical interconnection and point of operational responsibility and defines the point at which call transport and termination reciprocal compensation responsibility begins. The primary function of the Point of Interconnection is to serve as the termination point for the interconnection service.

**Virtual Point of Interconnection (VPOI)** is defined as the Point of Interconnection specified pursuant to Section 2.8.1.1 for delivery of BellSouth originated traffic to Sprint CLEC from which Sprint CLEC agrees to pay BellSouth for Interoffice Dedicated Transport for BellSouth to transport Local Traffic and ISP-Bound Traffic over BellSouth facilities from the VPOI to the Physical Point of Interconnection designated by Sprint CLEC. A VPOI may be established in any BellSouth basic local calling area (1) to which Sprint CLEC has assigned a Sprint CLEC NPA/NXX, (2) which meets the criteria in 2.8.1.1, and (3) to which Sprint CLEC does not want BellSouth to establish a Physical Point of Interconnection as set forth above. Compensation for said transport is as set forth in the Interconnection Compensation section of this Attachment.

## 2. Network Interconnection

- 2.1 BellSouth shall provide interconnection with BellSouth's network at any technically feasible point within BellSouth's network.
- 2.2 Network Interconnection Methods (NIMs) include, but are not limited to, Physical Collocation Interconnection; Virtual Collocation Interconnection; Leased Facilities Interconnection; Fiber Meet Interconnection; and other methods as mutually agreed to by the Parties. One or more of these methods may be used to effect the Interconnection in each LATA, or as otherwise agreed between the Parties. Requests to BellSouth for interconnection at other points or through other methods may be made through the Bona Fide Request/New Business Request process set out in the General Terms and Conditions of this Agreement.

- 2.2.1 Using one or more of the NIM's herein, the Parties will agree to a physical interconnection architecture plan for a specific geographic area. Sprint CLEC and BellSouth agree to interconnect their networks through existing and/or new interconnection facilities between Sprint CLEC's switch(es) and BellSouth End Office(s) and/or Tandem switch(es). The physical architecture plan will, at a minimum, include the location of Sprint's switch(es) and BellSouth's End Office switch(es) and/or Tandem switch(es) to be interconnected and the facilities that will connect the two networks. At the time of implementation in a given local exchange area the plan will be documented.

## 2.3 **Wireless Network Interconnection**

- 2.3.1 There are three appropriate methods of interconnecting facilities: (1) interconnection via purchase of facilities from either party by the other party; (2) physical collocation; and (3) virtual collocation where physical collocation is not practical for technical reasons or because of space limitations. For FCC licensed CMRS providers only, Type 1, Type 2A and Type 2B interconnection arrangements described in BellSouth's General Subscriber Services Tariff, Section A35, or, in the case of North Carolina, in the North Carolina Connection and Traffic Interchange Agreement effective June 30, 1994, as amended, may be purchased pursuant to this Agreement provided, however, that such interconnection arrangements shall be provided at the rates, terms and conditions set forth in this Agreement. Rates and charges for both virtual and physical collocation may be provided in a separate collocation agreement. Rates for virtual collocation will be based on BellSouth's Interstate Access Services Tariff, FCC #1, Section 20 and/or BellSouth's Intrastate Access Services Tariff, Section E20. Rates for physical collocation will be negotiated on an individual case basis.
- 2.3.2 BellSouth and Sprint PCS will accept and provide any of the preceding methods of interconnection. Reciprocal connectivity shall be established to at least one BellSouth access tandem within every LATA Sprint PCS desires to serve, or Sprint PCS may elect to interconnect directly at an end office for interconnection to end users served by that end office. Such interconnecting facilities shall conform, at a minimum, to the telecommunications industry standard of DS-1 pursuant to Bellcore Standard No. TR-NWT-00499. Signal transfer point, Signaling System 7 ("SS7") connectivity is required at each interconnection point after Sprint PCS implements SS7 capability within its own network. BellSouth will provide out-of-band signaling using Common Channel Signaling Access Capability where technically and economically feasible, in accordance with the technical specifications set forth in the BellSouth Guidelines to Technical Publication, TR-TSV-000905. BellSouth and Sprint PCS facilities' shall provide the necessary on-hook, off-hook answer and disconnect supervision and shall hand off calling party number ID when technically feasible. In the event a party interconnects via the purchase of facilities and/or services from the other party, the appropriate intrastate tariff, as amended from time to time will apply. The cost of the

interconnection facilities between BellSouth and Sprint PCS switches within BellSouth's service area shall be shared on an equal basis. Upon mutual agreement by the parties to implement one-way trunking on a state-wide basis, each Party will be responsible for the cost of the one-way interconnection facilities associated with its originating traffic.

2.3.3 BellSouth and Sprint PCS will establish trunk groups from the interconnecting facilities of subsection 2.3.1 of this section such that each party provides a reciprocal of each trunk group established by the other party. Notwithstanding the foregoing, each party may construct its network, including the interconnecting facilities, to achieve optimum cost effectiveness and network efficiency. BellSouth's treatment of Sprint PCS as to said charges shall be consistent with BellSouth treatment of other local exchange carriers for the same charges. Unless otherwise agreed, BellSouth will provide or bear the cost of all trunk groups for the delivery of Local Traffic from BellSouth to Sprint PCS's Mobile Telephone Switching Offices within BellSouth's service territory, and Sprint PCS will provide or bear the cost of all trunk groups for the delivery of traffic from Sprint PCS to each BellSouth access tandem and end office at which BellSouth and Sprint PCS interconnect.

2.3.4 BellSouth and Sprint PCS will use an auditable Wireless Percent Local Usage (PLU) factor as a method for determining whether wireless traffic is Local or Non-Local. The Wireless PLU factor will be used for wireless traffic delivered by either party for termination on the other party's network.

2.3.5 When BellSouth and Sprint PCS provide an access service connection between an Interexchange Carrier ("IXC") and each other, each party will provide its own access services to the IXC. If access charges are billed, each party will bill its own access service rates to the IXC.

2.3.6 The ordering and provision of all services purchased from BellSouth by Sprint PCS shall be as set forth in the BellSouth Telecommunications Wireless Customer Guide as that guide is amended by BellSouth from time to time during the term of this Agreement.

## **2.4 Physical Collocation Interconnection**

2.4.1 When Sprint provides its own facilities or uses the facilities of a 3<sup>rd</sup> party to a BellSouth tandem or end office and wishes to place its own transport terminating equipment at that location, Sprint may interconnect using the provisions of physical collocation as set forth in Attachment 4 of this Agreement.

## **2.5 Virtual Collocation Interconnection**

- 2.5.1 When Sprint provides its own facilities or uses the facilities of a 3<sup>rd</sup> party to a BellSouth tandem or end office and wishes for BellSouth to place transport terminating equipment at that location on Sprint's behalf, Sprint may interconnect using the provisions of Virtual Collocation as set forth in Attachment 4A of this Agreement.

## **2.6 Interconnection via Leased Dedicated Transport Facilities**

- 2.6.1 For purposes of call transport and termination, Sprint CLEC or BellSouth as the originating party may obtain Local Channel and Interoffice Channel dedicated transport facilities to interconnect with the terminating Party as set forth below. The Parties shall utilize dedicated transport facilities if the traffic destined for that facility exceeds the equivalent of a DS1, unless otherwise mutually agreed to by the Parties. The Parties shall charge for such facilities as set forth in Exhibit A to this Attachment. The portion of such facilities utilized for Local Traffic shall be determined based upon the application of the Percent Local Facility Factor (PLF). If Sprint CLEC, pursuant to 47 CFR §51.711(b) demonstrates that its costs support rates for trunks and associated dedicated transport other than as set forth in Exhibit A, upon approval by the appropriate state commission, such other rates shall be included within this Agreement to be applied prospectively from the effective date of the Commission approval.

- 2.6.1.1 Sprint CLEC or BellSouth as the originating Party may obtain Local Channel dedicated transport facilities from the terminating Party from the originating Party's Point of Interconnection to the Serving Wire Center.

- 2.6.1.2 Sprint CLEC or BellSouth as the originating Party may obtain Interoffice Channel dedicated transport facilities from the terminating Party from the Serving Wire Center to the terminating Party's switch to which the originating Party desires interconnection.

## **2.7 Fiber Meet Interconnection**

- 2.7.1 Fiber Meet Interconnection between BellSouth and Sprint CLEC can occur at any mutually agreeable, economically and technically feasible point between Sprint CLEC's premises and a BellSouth Tandem or End Office within a LATA.
- 2.7.2 If Sprint CLEC elects to interconnect with BellSouth pursuant to a Fiber Meet, Sprint CLEC and BellSouth shall jointly engineer and operate a Synchronous Optical Network ("SONET") transmission system by which they shall interconnect their transmission and routing of Local Traffic via a Local Channel facility at technically feasible transmission speeds as mutually agreed to by the Parties. Sprint CLEC and BellSouth shall work jointly to determine the specific transmission system to permit the successful interconnection and completion of traffic routed over the facilities that interconnect at the Fiber Meet. The technical

specifications will be designed so that Sprint CLEC or BellSouth may, as far as is technically feasible, independently select the transmission, multiplexing, and fiber terminating equipment to be used on its side of the Fiber Meet. Neither Sprint CLEC or BellSouth will be allowed to access the Data Communications Channel ("DCC") of the other Party's Fiber Optic Terminal (FOT).

- 2.7.3 There are two basic Fiber Meet design options. The option selected must be mutually agreeable to both Sprint CLEC and BellSouth, but neither shall unreasonably withhold its agreement to utilize a Fiber Meet design option. Additional arrangements may be mutually developed and agreed to by Sprint CLEC and BellSouth pursuant to the requirements of this section.
- 2.7.3.1 Design One: Sprint CLEC's fiber cable (four fibers) and BellSouth's fiber cable (four fibers) are connected at an economically and technically feasible point between Sprint and BellSouth locations. This Interconnection point would be at a mutually agreeable location approximately midway between the two. The Parties fiber cables would be terminated and then cross connected on a fiber termination panel. Each Party would supply a fiber optic terminal at its respective end. The POI would be at the fiber termination panel at the mid-point meet.
- 2.7.3.2 Design Two: Both Sprint CLEC and BellSouth each provide two fibers between their locations. This design may only be considered where existing fibers are available and there is a mutual benefit to both Sprint CLEC and BellSouth. BellSouth will provide the fibers associated with the "working" side of the system. Sprint CLEC will provide the fibers associated with the "protection" side of the system. Sprint CLEC and BellSouth will work cooperatively to terminate each other's fiber in order to provision this joint point-to-point linear chain or fiber ring SONET system. Both Sprint CLEC and BellSouth will work cooperatively to determine the appropriate technical handoff for purposes of demarcation and fault isolation.
- 2.7.4 BellSouth shall, wholly at its own expense, procure, install and maintain the agreed upon SONET equipment in the interconnecting BellSouth wire center.
- 2.7.5 Sprint CLEC shall, wholly at its own expense, procure, install and maintain the agreed upon SONET equipment in the interconnecting Sprint wire center.
- 2.7.6 Sprint CLEC and BellSouth may mutually agree upon an economically and technically feasible Point of Interconnection outside the interconnecting BellSouth wire center as a Fiber Meet point. BellSouth shall make all necessary preparations to receive, and to allow and enable Sprint CLEC to deliver, fiber optic facilities into the Point of Interconnection with sufficient spare length to reach the fusion splice point at the Point of Interconnection. BellSouth shall, wholly at its own expense, procure, install, and maintain the fusion splicing point in the Point of Interconnection. A Common Language Location Identification ("CLLI") code will

be established for each Point of Interconnection. The code established must be a building type code. All orders shall originate from the Point of Interconnection (i.e., Point of Interconnection to Sprint CLEC, Point of Interconnection to BellSouth).

- 2.7.7 Sprint CLEC shall deliver and maintain Sprint CLEC's fiber optic facility wholly at its own expense. Upon verbal request by Sprint CLEC, BellSouth shall allow Sprint CLEC access to the Fiber Meet entry point for maintenance purposes as promptly as possible.
- 2.7.8 Each Party shall provide or lease its own, unique source for the synchronized timing of its equipment. Each timing source must be Stratum-1 traceable. Both Sprint CLEC and BellSouth agree to establish separate and distinct timing sources which are not derived from the other, and meet the criteria identified above.
- 2.7.9 Sprint CLEC and BellSouth will mutually agree on the capacity of the FOT(s) to be utilized based on equivalent DS1s or DS3s. Each Party will also agree upon the optical frequency and wavelength necessary to implement the Interconnection. Sprint CLEC and BellSouth will develop and agree upon methods for the capacity planning and management for these facilities, terms and conditions for over provisioning facilities, and the necessary processes to implement facilities as indicated below. These methods will meet quality standards as mutually agreed to by Sprint CLEC and BellSouth.
- 2.7.10 Sprint CLEC and BellSouth shall jointly coordinate and undertake maintenance of the SONET transmission system. Each Party shall be responsible for maintaining the components of its own SONET transmission system.
- 2.7.11 Each Party will be responsible for (i) providing its own transport facilities to the Fiber Meet, and (ii) the cost to build-out its facilities to such Fiber Meet.
- 2.7.12 Neither Sprint CLEC or BellSouth shall charge the other for its portion of the Fiber Meet facility used exclusively for non transit Local Traffic (i.e. Local Channel). Charges incurred for other services including dedicated transport facilities from the Fiber Meet to the point where the facilities terminate if applicable will apply.

## **2.8 Points of Interconnection**

- 2.8.1 A minimum of one Physical Point of Interconnection shall be established in each LATA in which Sprint CLEC originates, terminates, or exchanges local traffic or ISP-bound traffic and interconnects with BellSouth. The location of the initial Physical Point of Interconnection shall be established by mutual agreement of BellSouth and Sprint CLEC. In selecting the initial Physical Point of Interconnection, both BellSouth and Sprint CLEC will act in good faith and select

the point that is most efficient for both BellSouth and Sprint CLEC. Sprint CLEC and BellSouth shall each be responsible for engineering and maintaining the network on its side of the Physical Point of Interconnection. Establishment of an initial Physical Point of Interconnection will be initiated by written request and will be based on traffic volumes and patterns, facilities available, and other factors unique to the area. If Sprint CLEC and BellSouth are not able to reach mutual agreement on an initial Physical Point of Interconnection within 30 calendar days of the date of the written request, Sprint CLEC may designate a POI for the delivery and receipt of traffic at any existing Sprint Interexchange Carrier (IXC) Point of Presence (POP) location or, if not at an existing Sprint IXC POP, at a location that is within five (5) miles of a BellSouth tandem or end office. In the event that Sprint CLEC designates a POI that is not in a BellSouth office, Sprint CLEC and BellSouth acknowledge that this Agreement does not include rates that Sprint CLEC would charge BellSouth for BellSouth's collocation of equipment necessary for interconnection at such non-BellSouth locations including charges for space, power or other infrastructure-related elements. It is not Sprint CLEC's intent to charge for such space, power or other infrastructure-related elements; however, Sprint CLEC reserves the right to open negotiations with BellSouth with respect to such charges in the future and to enter into such negotiations with BellSouth pursuant to Section 252 of the Act.

2.8.1.1 Additional points of interconnection in a particular LATA may be established by mutual agreement of Sprint CLEC and BellSouth. Additional points of interconnection may be either Physical Points of Interconnection or Virtual Points of Interconnection. Absent mutual agreement, in order to establish additional points of interconnection in a LATA, the traffic between Sprint CLEC and BellSouth at the proposed additional point of interconnection must exceed 8.9 million minutes of local or ISP-Bound traffic per month for three consecutive months. Additionally, any end office to be designated as a point of interconnection must be more than 20 miles from an existing point of interconnection. A Physical Point of Interconnection will not be designated at a Central Office where physical or virtual collocation space or BellSouth fiber connectivity is not available. In no event shall Sprint CLEC or BellSouth be required to have more than one point of interconnection in a single local calling area.

2.8.1.2 Upon written notification from BellSouth or Sprint CLEC requesting the establishment of an additional point of interconnection, the receiving party has 45 calendar days to analyze, respond to, and negotiate in good faith the establishment of and location of such point of interconnection. If the receiving party disagrees that the traffic and mileage thresholds set forth herein have been met, then such party may utilize the dispute resolution procedures set forth in Section 14 of the General Terms and Conditions of this Agreement.

## 2.9 Interconnection Trunking

- 2.9.1 BellSouth and Sprint CLEC will work cooperatively to establish the most efficient trunking network in accordance with the provisions set forth in this Attachment and accepted industry practices.
- 2.9.2 Any Sprint CLEC request that requires special BellSouth translations and other network modifications will require Sprint CLEC to submit a Bona Fide Request/New Business Request via the Bona Fide Request/New Business Request Process set forth in the General Terms and Conditions.
- 2.9.3 All trunk groups will be provisioned as Signaling System 7 (SS7) capable where technically feasible. If SS7 is not technically feasible multi-frequency (MF) protocol signaling will be used.
- 2.9.4 Where available and upon the request of the other Party, each Party shall cooperate to ensure that its trunk groups are configured utilizing the B8ZS ESF protocol for 64 kbps Clear Channel Capability (64CCC) transmission to allow for ISDN interoperability between the Parties' respective networks, and such 64CCC must be specified by Sprint CLEC on the order.
- 2.9.5 All terms and conditions, as well as charges, both non-recurring and recurring, associated with interconnecting trunk groups between BellSouth and Sprint CLEC not addressed in Exhibit A shall be as negotiated by the Parties. Until such rates are established, the interim rate shall be as set forth in the appropriate BellSouth intrastate or interstate tariff for Switched Access services. Once the negotiated rate is established, it will be applied retroactively to the date requested.
- 2.9.5.1 For two-way interconnection trunking that carries the Parties' Local and IntraLATA Toll Traffic only, excluding Transit Traffic, and for the two-way Supergroup interconnection trunk group that carries the Parties Local and IntraLATA Toll Traffic, plus Sprint CLEC's Transit Traffic, the Parties shall be compensated for the nonrecurring and recurring charges for trunks and facilities at 50% of the applicable contractual or tariff rates for the services provided by each Party. Sprint CLEC shall be responsible for ordering these two-way trunk groups.
- 2.9.6 One-way and Two-way Interconnection Trunking
  - 2.9.6.1 One-Way Interconnection Trunking
    - 2.9.6.1.1 One-way interconnection trunking for Local and IntraLATA Toll Traffic may be established by Sprint CLEC from its end office or switch to deliver such traffic to BellSouth access tandems, end offices, and local traffic to BellSouth local tandems. Likewise, BellSouth may establish one-way interconnection trunking from its access tandems, Local tandems and end offices to deliver Local and IntraLATA Toll Traffic to Sprint CLEC's end office or switching center.

- 2.9.6.1.2 The establishment of one-way interconnection trunking to a Party's end office provides for the delivery of the originating Party's Local and IntraLATA Toll Traffic to the terminating Party's end users served by such end office.
- 2.9.6.1.3 Sprint CLEC's establishment of one-way interconnection trunking to a BellSouth Local tandem provides for the delivery of its originated Local Traffic to the BellSouth end users served by BellSouth end offices subtending such BellSouth Local tandem or other BellSouth local tandems within the same local calling area according to the provisions in the Local Tandem Interconnection Trunking section of this Attachment.
- 2.9.6.1.4 Unless multiple tandem access is ordered, Sprint CLEC's establishment of one-way interconnection trunks at BellSouth access tandems provides intratandem delivery of Sprint CLEC's originating Local and IntraLATA Toll Traffic to the BellSouth end users served by such BellSouth access tandem.
- 2.9.6.2 Two-Way Interconnection Trunking
  - 2.9.6.2.1 Two-way interconnection trunking may be utilized by the Parties to transport Local and IntraLATA Toll Traffic between Sprint CLEC's end office or switch and BellSouth's access tandem or end office. Two-way interconnection trunking may also be used to transport Local Traffic between Sprint CLEC's end office or switch and BellSouth's local tandem. Upon determination that two-way interconnection trunking will be used, Sprint CLEC shall order such two-way trunking via the Access Service Request (ASR) process in place for Local Interconnection. Furthermore, the Parties shall jointly review such trunking performance and forecasts on a periodic basis. The Parties shall mutually agree upon the quantity of trunks and provisioning shall be jointly coordinated.
    - 2.9.6.2.1.1 Florida, Georgia, Kentucky, Louisiana, North Carolina and Tennessee
      - 2.9.6.2.1.1.1 BellSouth will provide two-way interconnection trunking upon Sprint CLEC's request. Once two-way interconnection trunking is established, BellSouth must use such two-way trunking for BellSouth-originated traffic.
        - 2.9.6.2.1.1.2 The selection of the Point of Interconnection for two-way trunking will be pursuant to Section 2.8 of this Attachment.
        - 2.9.6.2.1.1.3 Additional one-way interconnection trunking will be at the mutual agreement of BellSouth and Sprint CLEC once two-way interconnection trunking has been established.
      - 2.9.6.2.1.2 Alabama, Mississippi and South Carolina

- 2.9.6.2.1.2.1 BellSouth will provide two-way interconnection trunking upon Sprint CLEC's request.
- 2.9.6.2.1.2.2 The selection of the Point of Interconnection for two-way trunking will be pursuant to Section 2.8 of this Attachment.
- 2.9.6.2.1.2.3 BellSouth and Sprint CLEC use of two-way interconnection trunking for the transport of Local and IntraLATA Toll Traffic does not preclude either BellSouth or Sprint CLEC from establishing additional one-way interconnection trunks within the same local calling area for the delivery of its originated Local and IntraLATA Toll Traffic to the other Party.
- 2.9.6.2.2 The establishment of two-way interconnection trunks between the Parties' end offices provides for the receipt and delivery of the Parties' Local and IntraLATA Toll Traffic between the Parties' end users served by such end offices.
- 2.9.6.2.3 The Parties' establishment of two-way interconnection trunking to a BellSouth local tandem provides for the receipt and delivery of the Parties Local Traffic between the Parties' end users served by such end offices.
- 2.9.6.2.4 The Parties establishment of two-way interconnection trunks between a Sprint CLEC end office and a BellSouth access tandem provides intratandem delivery of Sprint CLEC's originating Local and IntraLATA Toll Traffic from Sprint CLEC end users served by such Sprint CLEC end office to the BellSouth end users served by such BellSouth access tandem.
- 2.9.6.2.4.1 Furthermore, such two-way interconnection trunks between a BellSouth access tandem and a Sprint CLEC end office allows BellSouth to deliver BellSouth originated Local and IntraLATA Toll Traffic from BellSouth end users to the Sprint CLEC end users served by such Sprint CLEC end office.
- 2.9.6.3 Both Parties will use the Trunk Group Service Request (TGSR) to request changes in trunking. Both Parties reserve the right to issue ASRs, if so required, in the normal course of business.
- 2.9.7 Transit Trunk Groups
  - 2.9.7.1 Transit trunk groups may be established by Sprint CLEC to deliver and receive, and thus are two-way trunks, Local and IntraLATA Toll Transit Traffic from third parties such as Independent Companies and other CLECs at BellSouth access tandems and Switched Access traffic from Interexchange Carriers at BellSouth access tandems. Establishing such trunks at BellSouth access tandems provides intratandem access to the third parties also interconnected at those tandems.
  - 2.9.7.2 It is the responsibility of Sprint CLEC to enter into arrangements with each third party carrier (Independent Companies (ICOs) or other CLECs) to deliver and/or

receive Transit Traffic. Sprint CLEC agrees to use reasonable efforts to enter into agreements with third-party carriers as soon as possible after the establishment of interconnection trunking arrangements.

### 2.9.7.3 Toll Free Traffic

2.9.7.3.1 If Sprint CLEC chooses BellSouth to handle Toll Free database queries from its switches, all Sprint CLEC originating Toll Free traffic will be routed over the Transit trunk group.

2.9.7.3.2 All originating Toll Free Service (Toll Free) calls for which Sprint CLEC requests that BellSouth perform the Service Switching Point (“SSP”) function (i.e., perform the database query) shall be delivered using GR-394 format over the Transit trunk Group. Carrier Code “0110” and Circuit Code (to be determined for each LATA) shall be used for all such calls.

2.9.7.3.3 Sprint CLEC may handle its own Toll Free database queries from its switch. If so, Sprint CLEC will determine the nature (Local/Intra-LATA/Inter-LATA) of the Toll Free call based on the response from the database. If the query determines that the call is a BellSouth Local or IntraLATA Toll Free number, Sprint CLEC will route the post-query Local or IntraLATA converted ten-digit local number to BellSouth over the Local or Intra-LATA trunk group. If the query determines that the call is a third party (ICO or other CLEC) Local or IntraLATA Toll Free number, Sprint CLEC will route the post-query Local or IntraLATA converted ten-digit local number to BellSouth over the Transit Trunk group. In such case, Sprint CLEC is to provide a Toll Free billing record when appropriate. If the query reveals the call is an InterLATA Toll Free number, Sprint CLEC will route the post-query Inter-LATA call (Toll Free number) directly from its switch for carriers Interconnected with its network or over the Transit trunk group to carriers not directly connected to its network but are connected to BellSouth’s Access Tandem. Calls will be routed to BellSouth over the Local/IntraLATA and Transit trunk groups within the LATA in which the calls originate.

2.9.7.3.4 All post-query Toll Free Service (Toll Free) calls for which Sprint CLEC performs the SSP function, if delivered to BellSouth, shall be delivered using GR-394 format for calls destined to IXCs, and GR-317 format for calls destined to End Offices that directly subtend the Tandem.

### 2.9.8 Access Tandem Interconnection Trunking

2.9.8.1 When Tandem trunks are deployed, Sprint CLEC shall route appropriate traffic (i.e. only traffic to End Offices that subtend that Tandem) to the respective BellSouth Tandems on the trunk groups defined herein. The LERG should be referenced for current routing and tandem serving arrangements. Likewise,

BellSouth shall route appropriate traffic to Sprint CLEC switches based on the tandem serving arrangements referenced in the LERG.

2.9.8.2 SuperGroup Interconnection Trunking

2.9.8.2.1 Supergroup interconnection trunking may be utilized by the Parties to transport the Parties combined Local, IntraLATA Toll, Transit, and Switched Access Traffic on a two-way interconnection trunk group between Sprint CLEC's end office or switching center and a BellSouth access tandem. Upon determination that Supergroup interconnection trunking will be used, Sprint CLEC shall be responsible for placing the orders for such two-way trunk groups via the Access Service Request (ASR) process in place for Local Interconnection. Furthermore, the Parties shall jointly review such trunking performance and forecasts on a periodic basis.

2.9.8.2.2 Florida, Georgia, Kentucky, Louisiana, North Carolina and Tennessee

2.9.8.2.2.1 BellSouth will provide Supergroup Interconnection trunking upon Sprint CLEC's request. Once Supergroup Interconnection trunking is established, BellSouth must use such Supergroup trunking for BellSouth-originated traffic.

2.9.8.2.2.2 The selection of the Point of Interconnection for Supergroup Interconnection trunking will be pursuant to Section 2.8 of this Attachment.

2.9.8.2.2.3 Additional one-way interconnection trunking will be at the mutual agreement of BellSouth and Sprint CLEC once Supergroup Interconnection trunking has been established.

2.9.8.2.3 Alabama, Mississippi and South Carolina

2.9.8.2.3.1 BellSouth will provide Supergroup Interconnection trunking upon Sprint CLEC's request.

2.9.8.2.3.2 The selection of the Point of Interconnection for Supergroup Interconnection trunking will be pursuant to Section 2.8 of this Attachment.

2.9.8.2.3.3 BellSouth and Sprint CLEC use of Supergroup Interconnection trunking for the transport of Local and IntraLATA Toll Traffic does not preclude either BellSouth or Sprint CLEC from establishing additional one-way interconnection trunks within the same local calling area for the delivery of its originated Local and IntraLATA Toll Traffic to the other Party.

2.9.8.2.4 The Parties' establishment of SuperGroup interconnection trunking between a Sprint CLEC end office and a BellSouth access tandem provides intratandem delivery of Sprint CLEC's originating Local and IntraLATA Toll Traffic from Sprint CLEC end users served by such Sprint CLEC end office to the BellSouth

end users served by such BellSouth access tandem, as well as intratandem Transit Traffic between such Sprint CLEC end users and third-party network providers also interconnected to such BellSouth access tandem.

- 2.9.8.2.5 Additionally, SuperGroup interconnection trunking transports Sprint CLEC originated intertandem Transit Traffic which transits a single BellSouth access tandem but is destined for a third party tandem, such as an ICO tandem.
- 2.9.8.2.6 Switched Access Traffic shall not be double-tandemed, therefore, SuperGroup interconnection only provides for the intratandem receipt and delivery of Switched Access Traffic.
- 2.9.8.2.7 Furthermore, such SuperGroup two-way trunks between a BellSouth access tandem and a Sprint CLEC end office allows BellSouth to deliver BellSouth originated Local and IntraLATA Toll Traffic from BellSouth end users to the Sprint CLEC end users served by such Sprint CLEC end office.
- 2.9.8.3 When Sprint CLEC establishes interconnection trunking at a single point in the LATA, the trunk terminations shall be at a BellSouth access tandem. To the extent Sprint CLEC desires to terminate Local and IntraLATA Toll Traffic to BellSouth and Transit Traffic to third parties served by BellSouth access tandems within the LATA, other than the one Sprint CLEC has established interconnection trunking to, Sprint CLEC shall establish an interconnecting trunk group to such access tandems.
- 2.9.8.3.1 Sprint CLEC shall establish interconnection trunking to all BellSouth access and local tandems in the LATA where Sprint CLEC has assigned or homed NPA/NXXs. Sprint CLEC shall assign or home NPA/NXXs on the BellSouth tandems that serve the Exchange Rate Center Areas where the subscribers who use such NPA/NXXs are located. The specified association between BellSouth tandems and Exchange Rate Centers is defined in the national Local Exchange Routing Guide (LERG). Sprint CLEC shall enter its NPA/NXX access and/or local tandem homing arrangement into the LERG.
- 2.9.8.4 Switched Access traffic will be delivered to and by IXC's based on Sprint CLEC's NXX Access Tandem homing arrangement as specified by Sprint CLEC in the Local Exchange Routing Guide (LERG).
- 2.9.10 BellSouth Local Tandem Interconnection Trunking**
  - 2.9.10.1 This interconnection arrangement allows Sprint CLEC to establish interconnection trunking at BellSouth local tandems for: (1) the delivery of Sprint CLEC-originated Local Traffic transported and terminated by BellSouth to BellSouth end offices within the local calling area as defined in BellSouth's General Subscriber Services Tariff ("GSST"), section A3 served by those BellSouth local tandems,

and (2) for Local Transit Traffic transported by BellSouth for third party network providers who have also established interconnection trunking at those BellSouth local tandems.

2.9.10.2 When a specified local calling area is served by more than one BellSouth local tandem, Sprint CLEC must designate a “home” local tandem for each of its assigned NPA/NXXs and establish interconnection trunking to such local tandems. Additionally, Sprint CLEC may choose to establish interconnection trunking at the BellSouth local tandems where it has no codes homing but is not required to do so. Sprint CLEC may deliver Local Traffic to a “home” BellSouth local tandem that is destined for other BellSouth or third party network provider end offices served by other BellSouth local tandems in the same local calling area where Sprint CLEC does not choose to establish interconnection trunking. It is Sprint CLEC’s responsibility to enter its own NPA/NXX local tandem homing arrangements into the Local Exchange Routing Guide (LERG) either directly or via a vendor in order for other third party network providers to determine appropriate traffic routing to Sprint CLEC’s codes. Likewise, Sprint CLEC shall obtain its routing information from the LERG.

2.9.10.3 Notwithstanding establishing interconnection trunking to BellSouth’s local tandems, Sprint CLEC must also establish interconnection trunking to BellSouth access tandems within the LATA on which Sprint CLEC has NPA/NXX’s homed for the delivery of Interexchange Carrier Switched Access (SWA) and toll traffic, and traffic to Type 2A CMRS connections located at the access tandems. BellSouth cannot switch SWA traffic through more than one BellSouth access tandem. SWA, Type 2A CMRS or toll traffic routed to the local tandem in error will not be backhauled to the BellSouth access tandem for completion. (Type 2A CMRS interconnection is defined in BellSouth’s A35 General Subscriber Services Tariff.)

## **2.9.11 Direct End Office Interconnection Trunking**

2.9.11.1 Direct end office trunks terminate traffic between a Sprint CLEC switch and a BellSouth end office and are not switched at a tandem location. Overflow from either end of the direct end office trunk group will be alternate routed to the appropriate tandem. The overflow will be based on the homing arrangements displayed in the LERG.

2.9.11.2 All traffic received by BellSouth on a direct end office trunk group from Sprint CLEC must terminate in the end office, i.e. no tandem switching will be performed in the end office. Where end office functionality is provided in a remote end office of a host/remote configuration, Interconnection at that remote end office is available where technically feasible. The number of digits to be received by the BellSouth end office shall be mutually agreed upon by the Parties.

- 2.9.11.3 If a BellSouth tandem through which the Parties are interconnected is unable to, or is forecasted to be unable to support additional traffic loads for any period of time, the Parties will mutually agree on an end office trunking plan that will alleviate the tandem capacity shortage and ensure completion of traffic between Sprint CLEC and BellSouth subscribers.
