FIDS

- 28.7 Standard Selectable Featureswith required FIDs
- 1A Standard Selectable Features that require FID information from CLEC

Feature	USOC	FID	Format
Automatic Line/Direct Connect	M4BAC	HLN	Followed by a seven or ten digit number. If the number is long distance the format should be a ten digit number preceded by a 1 (one).
Call Forward Don't Answer	M4NFC M4NFC CENLK M4NPF	CFND/RCYC	Consists of the actual digits the subscriber dials to reach the forward number
Call Forward Busy Line-Fixed	CENLA M4JFC	CFNB	Consists of the actual digits the subscriber dials to reach the forward number
Call Forwarding Multiple Simultaneous	M2JR4	SFG,GSZ info provided by Bellsouth	Must provide number between one (1) and ten (10), indicating the number of calls to be forwarded simultaneously. Maximum paths=ten (10)
Call Pickup	M4UBC	CPG	Indicates Group Number
Call Pickup	M4UBC	CPG	Indicates the Group Number
Speed Calling Long	M3YAA M3Y30	SCG	Floated Group Numbers one to ninety-nine (1-99) may be used

5ESS Standard Selectable Features that require FID information from the CLEC

Feature	USOC	FID	Format
Automatic Line/Direct Connect	M4BAC	HLN	Followed by a two to twenty-three characters consist of actual digits dialed.

			If the number is long distance the format should be a ten digit number preceded by a 1 (one), and separated by a comma..
Call Forward Don't Answer	M4NFC M4NFC CENLK M4NPF	CFND/RCYC	Consists of the actual digits the subscriber dials to reach the forward number
Call Forward Busy Line-Fixed	CENLA M4JFC	CFNB	Consists of the actual digits the subscriber dials to reach the forward number
Call Forwarding Multiple Simultaneous	M2JR4	SFG, GSZ info provided by Bellsouth	CLEC must provide number between two (2) and ten (10), indicating the number of calls to be forwarded simultaneously. Maximum paths=ten (10)
Call Pickup	M4UBC	CPG	Indicates Group Number. CPG can be a one or two digit number. When number is in more than one group separate group by comma.
Call Pickup	M4UBC	CPG	Indicates the Group Number can be a one or two digit number. When number is in more than one group separate group by comma.
Speed Calling Long - Per Controlling Line (30-number shared) Speed Calling Long - Per Additional Line	M3Y30 M3YAA	SCG SCG	SCG - followed by TN of controlling station link
Speed Calling Long - Per Controlling Line (40-number list)	M3Y40	SCG	SCG - followed by TN of controlling station link
Speed Calling Long - Per Controlling Line (50-number list)	M3Y50	SCG	SCG - followed by TN of controlling station link
Speed Calling Long - Per Controlling Line (60-number list)	M3Y60	SCG	SCG - followed by TN of controlling station link
Speed Calling Long - Per Controlling Line		SCG	SCG - followed by TN of controlling

(70-number list)	M3Y70		station link
Speed Calling Long - Per Controlling Line (80-number list)	M3Y80	SCG	SCG - followed by TN of controlling station link
Station Restriction - Full Denied Origination	M5ROC	TGS2	2Station Restrictions are done showing data following the FID TGS after the station link. This data may have three
Station Restriction - Full Denied Termination		TGS2	elements:
	M5LTC		Character
			Definition
tation Restriction - Full Incoming			FID
			1st
Station Restriction - Full Incoming and Outgoing	M3RC2	TGS2	Originating Station Restriction
			U = Unrestricted
	M3RF2		F = Fully
			S = Semi
			***2nd ***
Station Restriction - Full Outgoing		TGS2	Termination Station Restriction
			U = Unrestricted
			F = Fully
Station Restriction - Semi-incoming	M3RG2		S = Semi
			3rd
			Error Treatment - Optional
Station Restriction - Semi-Incoming and Outgoing	M3RH2		T = Tone
			A = Announcement
		TGS2	N = Overflow Number
	M3RJ2		
Station Restriction - Semi-Outgoing		TGS2	
	M3RK2		
		TGS2	

DMS Standard Selectable Features that require FID information from the CLEC

Feature	USOC	FID	Format

Automatic Line/Direct Connect	M4BAC	AUL	FID AUL followed by the destination number. The destination number can be an internal or external number. The FID data can be 1-23 characters. Characters * and # are not allowed.
Call Forward Don't Answer	M4NFC M4NFC CENLK M4NPF	CFND/RCYC	Consists of the actual digits the subscriber dials to reach the forward number. RCYC can be 2-5
Call Forward Busy Line-Fixed	CENLA M4JFC	CFNB	Consists of the actual digits the subscriber dials to reach the forward number
Call Forwarding Multiple Simultaneous	M2JR4	SFG, GSZ info provided by Bellsouth	The FID CFSO is required. The values that will follow this FID is one of the codesets below NCFU: Number of Calls to be forwarded through call forwarding variable NCFB: Number of Calls to be forwarded through call forwarding busy NCFD : Number of Calls to be forwarded through call forwarding don't answer.
Call Pickup	M4UBC	CPG	Indicates Group Number. CPG can be a one or two digit number. When number is in more than one group separate group by comma.
Call Pickup	M4UBC	CPG	Indicates the Group Number can be a ten digit number.
Speed Calling Long	M3YAA M3Y30	SCG	The data following will include the telephone number of the controlling station link.
Call Transfer	CENDS	CXRO(originating) ,CXRT (terminating)	Data following both FIDs are: AC : Calls to attendant Inter: Intergroup.

			Intra: Intragroup
			Trater: Inter or Intragroup
			NOCXFER : No Call Transfer
Call Transfer	CENDS	CXRR	The codeset following this FID is: Y = Yes N = No 12 to 120 = # of seconds
Calling Name Display	M2NDD	CNDI	First 1-15 characters represent the calling Name

DCO Standard Selectable Features that require FID information from CLEC

Feature	USOC	FID	Format
Automatic Line/Direct Connect	M4BAC	HLN	Followed by a seven or ten digit number. If the number is long distance the format should be a ten digit number preceded by a 1 (one).
Call Forward Don't Answer	M4NFC M4NFC CENLK M4NPF	CFND/RCYC	Consists of the actual digits the subscriber dials to reach the forward number
Call Forward Busy Line-Fixed	CENLA M4JFC	CFNB	Consists of the actual digits the subscriber dials to reach the forward number
Call Forwarding Multiple Simultaneous	M2JR4	SFG,GSZ info provided by Bellsouth	Must provide number between one (1) and ten (10), indicating the number of calls to be forwarded simultaneously. Maximum paths=ten (10)
Call Pickup	M4UBC	CPG	Indicates Group Number
Call Pickup	M4UBC	CPG	Indicates the Group Number
Speed Calling Long	M3YAA M3Y30	SCG	Floated Group Numbers one to ninety-nine (1-99) may be used

EWSD Standard Selectable Features that require FID information from CLEC

Feature	USOC	FID	Format
Automatic Line/Direct Connect	M4BAC	HLN	Data following is actual digits dialed, 2-23 characters. The #(pound sign) is allowed when a customer has assumed dial 9 and the number is within the Centrex. A space must be between the # and TN following the FID HLN. A 7 digit TN is allowed within the Centrex. Where 9+1 is required to dial a long distance number the data must be separated by a comma following the Fid HLN.
Call Forward Don't Answer	M4NFC M4NFC CENLK M4NPF	CFND/RCYC	Data following must be minimum of two characters maximum of 23 Must be a 10 digit number (Area Code, NPA,NXX) * and # are allowed to indicate intra-system dialing Must be terminal 1 in a multilane hunt group. In a multilane hunt group allowed on terminal 1 only
Call Forward Busy Line-Fixed	CENLA M4JFC	CFNB	Data following must be minimum of two characters maximum of 23 Must be a 10 digit

			number (Area Code, NPA,NXX) * and # are allowed to indicate intra-system dialing Must be terminal 1 in a multilane hunt group. In a multilane hunt group allowed on terminal 1 only
Call Forwarding Multiple Simultaneous	M2JR4	SFG,GSZ info provided by Bellsouth	The GSZ is followed by a numeric character between 1 & 10 indicating the number of calls to be simultaneously forwarded. Maximum number of paths allowed is 10.
Call Pickup	M4UBC	CPG	Indicates Group Number In a multilane hunt group cll pickup is allowed on terminal 1 only.
Speed Calling Long	M3YAA M3Y30	SCG	The data following SCG should be 7-10 digit TN (no hyphen)
