# Carrier Notification SN91086064

Date: March 30, 2006

To: Competitive Local Exchange Carriers (CLEC)

Subject: CLECs – (Documentation/Guides) - Update to the BellSouth Local Ordering Handbook (LOH) Version 22.0, New Local Service Ordering Guide 6 (LSOG 6) and EDI Local Mechanization Specifications 06 (ELMS 6) for Release 22.0

This is to advise that BellSouth will implement the following changes to update documentation in the LOH Version 22.0, for ELMS 6, Release 22.0.

CCP Number	Description Of The Change		
	Star98 Access: Update Situation exhibit #1 to remove 'RCYC#' entry associated with the FEATURE DETAIL entries in the General Local Ordering chapter.		
2358	Partial Move: Update the Partial Moves information in the General Local Ordering chapter under LSR Considerations to add "The Existing Account Telephone Number field must be populated with the current main account number" and update existing note to reference the "AN field" instead of 'REMARKS Section'.		
	Combining REQTYP CB and BB When NPT=D: Add new header for "Combining REQTYP CB and BB When NPT=D" in the General Local Ordering chapter.		
2359	Remove Jack Code USOCs: Remove all Jack values from IWJK and JKCODE fields in DIDDODPBX, LS, LSNP, PS and RS Forms/Screens sections in the Data Dictionaries.		
2360	Fields on LSR 'Supplements': Add a Business Rule in the LOH Data Dictionary for the CC, SC, NC. NCI, SECNCI, EAN and EATN fields indicating that each of these fields cannot be changed on a supplement (ie: The 'field name' The CC field cannot be changed on a supplement).		
2361	EUA field: Update Conditional Usage Note 1 to remove the wording 'otherwise prohibited'.		

Please refer to the attachments for specific details of the changes listed above.

These changes will be reflected in the next update of the ELMS 6, Release 22.0/LOH, Version 22.0A, scheduled to be posted on Friday, April 14, 2006.

A summary of all changes within this document will be listed in the **Summary of Changes** section.

This update can be found on the BellSouth Interconnection Services Web site in the Local Exchange Ordering (LEO) Guides located at:

http://interconnection.bellsouth.com/reference\_library/guides/html/leo.html#loh

Please contact your BellSouth local support manager with any questions.

Sincerely,

# **ORIGINAL SIGNED BY KRISTEN E. SHORE**

Kristen E. Shore – Director Business Markets

# CCP 2358 Attachment Listed Below

CRB: 4856 CCP 2358 Release 22.0A MAP: ELMS06 General Local Ordering

# Star 98 Access

# **Description:**

Allows a subscriber to access their local voice mail service when they dial \*98 from the phone line on which the voice mail service resides.

The Star 98 access connects the customer to the local voice mail box to which their calls are forwarded via a version of Call Forwarding Don't Answer.

# **Ordering Considerations:**

None

# Service Restrictions:

- Applicable to Residential and Business service type
- Provisioned on a per line basis and functions only from a line provisioned with this feature and the appropriate auxiliary calling features
- Not available on ISDN, Prestige®, Foreign Central Office (FCO)/Foreign Exchange (FX), Coin, RCF, Internet Call Waiting, Centrex -type services or DID/DOD/PBX service
- Must have a line equipped with a version of Call Forwarding Don't Answer
- Applicable in all 9 BST states.

# LSR Restrictions:

- Limited to Non-Complex REQTYP E or M
- Limited to ACT of N, C, V, W or T
- Utilize the Non-Complex REQTYP E or M R/C/O tables for the applicable service type for completing the LSR.

# **Service Order Restrictions:**

None

# **Tariff Reference:**

A13

# **USOC References:**

The USOC's below are unique to Star 98

• S98AF - Star 98 Access, Residence per line

# **BELL**SOUTH®

#### Attachment SN91086064

- S98CP Star 98 Access, Voice Mail Companion services package, per business line equipped
- S98PK Star 98 Access, Voice Mail Companion Services Package, CSP per line equipped
- S98VM Star 98 Access, to BellSouth Voice Mail, per line
- GCJ Call Forwarding Don't Answer
- GCJRC Call Forwarding Don't Answer Ring Control (Where available).

# **FID References:**

# Situations / Exhibits:

This section includes one or more ordering situations specific or unique to this product/process. The exhibit is not intended to depict an LSR package in its entirety. The situations below do not depict actual field formatting the customer should review the field data dictionary for business rule and field application.

# Situation 1:

New residential line (Non-Complete Choice) with MemoryCall® Service (BellSouth voice mail) wants Star98 Access. This situation depicts only what is unique to Star 98. For this scenario we will make the following assumptions: REQTYP E ACT=N LNECLS SVC=1FR LSR/EU has been populated with applicable fields

```
TNS=4045551212

LNA=N

LNECLS SVC=1FR

PIC=XXXX

LPIC=XXXX

LNUM=00001

FA=N

FEATURE=S98VM

FEATURE DETAIL=CFND 404XXXXXXX

FEATURE=GCJ

FEATURE DETAIL = CFND 404XXXXX/RCYC#
```

# Situation 2:

Existing residential line (Non-Complete Choice) with Star98 (Non-BellSouth voice mail) access. Request is for new Call Forwarding Numbers. This situation depicts only what is unique to Star 98.

For this scenario we will make the following assumptions: REQTYP E ACT=C LNECLS SVC=1FR

LSR/EU has been populated with applicable fields

TNS=4045551212 LNA=C LNECLS SVC=1FR FA=C FEATURE=S98AF FEATURE DETAIL=CFND 404XXXXXX/RCYC# FEATURE=GCJ FEATURE DETAIL = CFND 404XXXXXX/RCYC#

# **Related Topics / Information:**

Voice Mail Custom Calling

#### CRB: 4859 CCP: 2358 MAP: ELMS06 RELEASE: 22.0A General Information.

BellSouth Local Ordering Handbook Section 3 - Ordering LSOG6 / ELMS06

# Partial Move Order Request - REQTYP E & M, Non-complex

# **Description:**

A partial move request occurs when a customer is requesting to move lines from an existing account at one location to a new location, but wishes to leave at least one (1) working line at the old location.

# **Ordering Considerations:**

None

# **Service Restrictions**

• Limited to manual ordering

• Dual service is not applicable

# LSR Considerations

# The customer must submit multiple LSR packages and use the RPON and NOR fields to associate the LSRs.

• The first LSR should be submitted with an ACT C, LNA D for all lines that are moving to the new location, or are simply being disconnected at the time of the move.

• The second LSR should be submitted with an ACT N, LNA N for all lines that are being installed at the new service address. Additional lines (that did not exist at the previous address) may also be added on this LSR using LNA N.

• The RPON field should be populated with the PON from the lead LSR, on **all** LSRs involved with the partial move request.

• The NOR field, for the lead PON, must be 01-XX, where XX is equal to the total number of LSRs involved with the partial move request. Each subsequent value for this field must be increased by one digit with XX data remaining the same.

• The customer should follow the REQTYP E (NON-Complex) R/C/O tables for ACT of C and ACT of N for completing an LSR for a partial move order on a resale account.

• The customer should follow the REQTYP M (Non-Complex) R/C/O tables for ACT of C and ACT of N for completing an LSR for a partial move order on Port/Loop combination residence/business.

 The Existing Account Telephone Number field must be populated with the current main account number.

• If the existing Account Telephone Number is moving to the new location, the new Main TN must be indicated in the ATN Field REMARKS section of the LSR.

CRB: 4862 CCP: 2358 Release: 22.0A MAP: ELMS06 General Local Ordering

# Combining REQTY CB and BB when NPT = D

# **Definition:**

Provides a LNP work around process for combining REQTYP CB and BB using a single LSR when the NPT=D. The LNP GUI will not accept fax or electronic (EDI/TAG) Issue 9 or ELMS06 LSRs unless each LNUM includes cable ID and channel pair.

The most common scenario for combining REQTYP CB and BB is a request to port out an account that includes a Ringmaster number. Since there is not a loop associated with the Ringmaster, the porting request cannot be included on the LSR to port out the main telephone number with loop unless the CLEC wants to disconnect the Ringmaster number

# **Ordering Considerations:**

• REQTYP: B

• ACTTYP: V

• MI: A, B, C, D

• LNA: V

• R/C/O Tables: Follow and use the appropriate REQTYP B Product Guidelines

## Service Restrictions:

None

# LSR Restrictions:

The following section provides detail information to assist you in filling out certain fields on LSR

The following information must be entered on the loop service with number portability tab:

Porting telephone number LNA=V Cable ID and Chan Pair for loop

The information for the telephone number porting out without loop is entered on the loop service with number portability tab:

Porting telephone number(Ringmaster) LNA=V Cable ID= **P000 or V000** Chan Pair= **000**

# **JK CODE**

Jack Code RS Form / Screen LSOG6 / ELMS06

## Definition

Indicates the standard code for the particular registered or non-registered jack used to terminate the service.

# **Definition** Notes

Note 1: Familiarization with the FCC's registration rules is requisite for all parties involved for the determination of the proper jack code for a given registered service.

Note 2: Registered jacks used to terminate category 1 and 3 services begin with the designation RJ.

## Valid Entries

None

Valid Entry Notes

Note <u>1</u>: JK CODE is allowed once per LNUM.

#### **Data Characteristics**

5 alpha/numeric characters

## Examples

RJ21X

#### **Conditional Usage Notes**

- Note 1: Required when the NIDR field is populated with Y, otherwise prohibited.
- Note 2: Prohibited when the REQTYP is E and the LNA is P, L or B.
- Note 3: Prohibited when the REQTYP is E and the 2nd character of the TOS field is H, and the LNA is P, L or B.
- Note 4: Required when JK NUM or JK POS field is populated

# CC

Company Code LSR Form / Screen LSOG6 / ELMS06

#### Definition

Identifies the Exchange Carrier requesting service.

#### **Definition Notes**

Note 1: A four alphanumeric character code structure available for all Exchange Carriers in North America and certain U.S. Territories maintained by National Exchange Carrier Association (NECA).

#### Valid Entries

None

Valid Entry Notes

Note 1: The numbers 9417 (in this order) are prohibited in this field.

**Data Characteristics** 

4 alpha/numeric characters

#### Examples

1234

**Conditional Usage Notes** 

None

#### **Business Rules**

Rule 1: For REQTYP = A for Non-Designed Loops, and ACT = W, the CC field cannot match the 4 character code following the MAN FID on the CSR.

Rule 2: Also known as the four-digit Operating Company Number (OCN).

Rule 3: Carrier Identification Code (CIC) is prohibited in this field.

Rule 4: The CC (Company Code) on the LSR must always match the CC on the Billing Account Number (BAN).

Rule 5: When the request is for WLNP this field must be populated with the provider NECA OCN when the NECA OCN and the NP (Porting OCN) SPID are the same.

Rule 6: When the request is for WLNP this field must be populated with the provider (Porting) OCN when the NECA OCN and the NP (Porting OCN) SPID are the same.

Rule 7: The CC field cannot be changed on a supplement.

#### **Electronic**

Rule X: [BULK Option1] Multiple CCs are prohibited for Reqtyp B UNE to UNE Bulk.

Deleted: 7

# SC

Service Center LSR Form / Screen LSOG6 / ELMS06

#### Definition

Identifies the Provider's Center.

#### **Definition Notes**

None

#### Valid Entries

LCSC = BellSouth® Local Carrier Service Center LCSL = BellSouth® LNP to Resale UNE-P/WLP Migrations

#### Valid Entry Notes

Note 1: An entry of "LCSL" is the only valid entry when the REQTYP "E", "M", "N", "P" and the ACT is "V" and the request is for an LNP to Resale UNE-P/WLP Migration

Note 2: An entry of "LCSC" is prohibited when the REQTYP is "E", "M", "N", "P" and the ACT is "V" and the request is for an LNP to Resale UNE-P/WLP Migration

#### **Data Characteristics**

4 alpha characters

#### Examples

LCSC LCSL

Conditional Usage Notes None

#### **Business Rules**

Rule 1: The SC field cannot be changed on a supplement.

#### <u>Manual</u>

Rule X: SC is LCSL is valid when requesting an LNP to Resale or UNE-P/WLP migration request for REQTYP E, M, N or P and ACT of V.

## NC

Network Channel Code LSR Form / Screen LSOG6 / ELMS06

#### Definition

Identifies the network channel code for the circuit(s) involved.

#### **Definition Notes**

Note 1: The network channel code describes the channel being requested.

#### Valid Entries

First Two Characters = Alpha Characters Third and Fourth Characters = Alpha characters or Hyphen ( - )

#### Valid Entry Notes

Note 1: The first alpha two characters are the channel service code which identify the channel service.

Note 2: The third alpha/numeric character identifies the type of conditioning required on the channel. If there is no conditioning required, then this position has a hyphen ( - ).

Note 3: The fourth alpha character indicates optional features, such as bridging. If no options are required, then position has a hyphen ( - ).

Note 4: When the 2nd character of the TOS field is P or R, the only valid entry for this field is SWXX.

Note 5: When the REQTYP is B, this field must begin with TY, LY, LX or TX.

#### **Data Characteristics**

4 alpha/numeric characters

#### Examples

HCE-

#### Conditional Usage Notes

Note 1: Required when the REQTYP is A and the ACT is N, C, D, T, W or V.

Note 2: Required when the REQTYP is B.

#### **Business Rules**

Rule 1: When the REQTYP is A (Non-Design Loops) and the ACT is W, the system will validate that the first two characters of the NC field are appropriate for the Class of Service on the CSR.

Rule 2: Designed services must be compatible with NCI and SECNCI when required.

Rule 3: On requests for a non-designed loop, the NC code must match the Loop type for the basic class of service on the CSR.

Rule 4: When the REQTYP is A (Non-Design Loops) and the ACT is D or T, the NC code must match the basic class of service type on the CSR.

Rule 5: When the REQTYP is A (Designed Loops) and the ACT is T or W, the NC code must match the NC code values of the loop on the existing CSR.

Rule 6: When the REQTYP is A (Non-Design Loops) and the ACT is D, the NC code must match the basic class of service type on the CSR.

Rule 7: When the REQTYP is A (Designed Loops) and the ACT is D, the NC code must match the NC code values of the loop being disconnected.

Rule 8: For REQTYP B - EELS the [SPEC / NC / NCI / SECNCI] combination must be one of

the following to request EELS: [UNCVX / LY-- / 04QB9.11 / 02LS2] or [UNCVX / LY-- / 04QB9.11 / 02GS2]. Rule 9: The NC field cannot be changed on a supplement.

## <u>Electronic</u>

Rule 🔀: [BULK Option 1 and Bulk Single LSR Arrangement Option 2] The same NC for all	Deleted: 9
Loops is required.	
Rule X: For REQTYP B - EELS ordered in the Single LSR BULK Arrangement (Option 2) the	Deleted: 10
[SPEC / NC / NCI / SECNCI] combination must be one of the following to request EELS: [UNCVX	

[SPEC / NC / NCI / SECNCI] combination must be one of the follow / LY-- / 04QB9.11 / 02LS2] or [UNCVX / LY-- / 04QB9.11 / 02GS2]

# NCI

Network Channel Interface Code LSR Form / Screen LSOG6 / ELMS06

#### Definition

Identifies the electrical conditions on the circuit at the ACTL / Primary Location.

#### **Definition Notes**

None

#### Valid Entries

NCI Code Format:

This field consists of up to a twelve character code where the:

First two numeric characters (position 1 and 2) are required and represent the physical conductors, which describe the number of wires that traverse the point of termination (POT).

Next two alpha characters (position 3 and 4) are required and identify signaling and/or transmission characteristics.

Next alpha/numeric character (position 5) is required and describes the impedance with which the customer / end user will terminate the channel for the purpose of evaluating transmission performance or to indicate if the circuit is fiber.

Next character (position 6) is a period (used as a delimiter) only if additional characters will follow.

Next three alpha / numeric (position 7, 8, and 9) describe the protocol options.

Next character (position 10) is a period (used as a delimiter) only if additional characters will follow.

Next alpha character (position 11) describes the transmission level to be received at the customer / end user interface from the provider.

Next alpha character (position 12) describes the transmission level to be transmitted from the customer / end user interface to the provider.

#### Valid Entry Notes

None

#### **Data Characteristics**

Minimum of 5 alpha/numerics and Maximum of 12 alpha/numerics

#### Examples

02LS2 (This example indicates closed end of local loop at end user location.) 02QC2.00D (This example indicates open end of loop start circuit at central office.) 04QC2.00E (This example indicates a central office termination (closed end of station) loop start circuit.)

C2QA2.10 (This example indicates service is multiplexed at the servicing wire center, DSO local loop to end user.)

#### **Conditional Usage Notes**

Note 1: This field is required when the NC field does not begin with TY or TX.

- Note 2: This field is required when the SECNCI field is populated.
- Note 3: This field is prohibited when the NC field begins with TY or TX.

#### **Business Rules**

Rule 1: Transmission Specifications may be described in provider tariffs and/ or in technical

reference publications.

Rule 2: This (NCI) field must also be compatible with the NC field on the request.

Rule 3: Currently, two optional features are ordered through the specification of the NCI code set for the protocol option field: S = Sealing Current Conditioning, RR = Selective Signaling Arrangement

Rule 4: When the REQTYP is A (Designed Loops) and the ACT is T or W, the NCI code must match the NCI code values of the loop on the existing CSR.

Rule 5: When the REQTYP is A (Designed Loops) and the ACT is D, the NCI code must match the NCI code values of the Loop being disconnected.

Rule 6: For REQTYP B - EELS the [SPEC / NC / NCI / SECNCI] combination must be one of the following to request EELS: [UNCVX / LY-- / 04QB9.11 / 02LS2] or [UNCVX / LY-- / 04QB9.11 / 02GS2]

Rule 7: The NCI field cannot be changed on a supplement.

#### <u>Electronic</u>

Rule **8**: [BULK Option 1 and Bulk Single LSR Arrangement Option 2] The same NCI and SECNCI for all Loops is required.

Rule 2: For REQTYP B - EELS ordered in the Single LSR BULK Arrangement (Option 2) the [SPEC / NC / NCI / SECNCI] combination must be one of the following to request EELS: [UNCVX / LY-- / 04QB9.11 / 02LS2] or [UNCVX / LY-- / 04QB9.11 / 02GS2]

# SECNCI

Secondary Network Channel Interface Code LSR Form / Screen LSOG6 / ELMS06

#### Definition

Identifies the electrical conditions on the circuit at the secondary ACTL or end user location.

#### **Definition Notes**

None

#### Valid Entries

SECNCI Code format:

This field consists of up to a twelve character code where the:

First two numeric characters (position 1 and 2) are required and represent the physical conductors, which describe the number of wires that traverse the secondary ACTL or end user location.

Next two alpha characters (position 3 and 4) are required and identify signaling and/or transmission characteristics.

Next alpha/numeric character (position 5) is required and describes the impedance with which the customer / end user will terminate the channel for the purpose of evaluating transmission performance or to indicate if the circuit is fiber.

Next character (position 6) is a period (used as a delimiter) only if additional characters will follow.

Next three alpha / numeric (position 7, 8, and 9) describe the protocol options.

Next character (position 10) is a period (used as a delimiter) only if additional characters will follow.

Next alpha character (position 11) describes the transmission level to be received at the customer / end user interface from the provider.

Next alpha character (position 12) describes the transmission level to be transmitted from the customer / end user interface to the provider.

#### Valid Entry Notes

None

#### **Data Characteristics**

Minimum of 5 alpha/numeric characters and a Maximum of 12 alpha/numeric characters

#### Examples

02L02 (This example indicates an open end of loop start circuit at end user location.) 02LS2 (This example indicates closed end of loop start circuit at end user location.)

#### **Conditional Usage Notes**

Note 1: When the REQTYP is A this field is: Prohibited when the 4th character of the NC code is M; Prohibited when the NC code begins with TY or TX; Otherwise required.

Note 2: Required when the REQTYP is B and the NCI field is populated.

#### **Business Rules**

Rule 1: When the REQTYP is A (Designed Loops) and the ACT is T or W, the SECNCI code must match the SECNCI code values of the loop on the existing CSR.

Rule 2: When the REQTYP is A (Designed Loops) and the ACT is D, the SECNCI code must match the SECNCI code values of the Loop being disconnected.

# **BELL**SOUTH<sup>®</sup>

Note 1:	The following USOCs a	are valid for all other R	EQTYP B (INP or LNP)
	products not listed in Va	alid Entry Notes 2, 3, 4	, & 5: RJ11C, RJ11W, RJ11D,

RJ14C, RJ14W, RJ12C, RJ12W, RJ13C, RJ13W, RJ17C, RJ18C, RJ18W, RJ19C, RJ19W, RJ25C, RJ61X, RJ31X, RJ32X, RJ33X, RJ34X, RJ35X, RJ36X, RJ37X, RJ38X, RJ71C, RJ2EM, RJ2FM, RJ2MZ, RJ21M, RJ2DM, RJ2GM, RJ2HM, RJ22X, RJ23X, RJ24X, RJ21X, RJ2DX, RJ2FX, RJ2HX, RJ2GX, RJ41Q, RJ41Z, RJ45Z, RJ45Q, RJ16X, RJ48Z, RJ41S, RJ45S, RJ26X, RJ26S, RJ27X, RJ48C, RJ48H, RJ48M, RJ48S, RJ48T, RJ48X, RJ26M, RJ27M, RJ48Y, RJ48A, RJ48B, RJM3X, RJM4X, RJ1DC, RJ2EX

# *Electronic*

Note 2: When an LSR is submitted electronically for REQTYP B (LNP) with LNAs of N, or V, whereservice types are: LNP - Designed Analog Loop, LNP - Non-Designed Analog Loop, LNP -UCL-ND, LNP - EELS, the NIDR field is populated with 'Y', the JK CODE (Jack Code) field must be submitted with the following: Voice Jack Type USOCs: RJ11C, RJ11W, RJ11D, RJ14C, RJ14W, RJ1DC, RJ12C, RJ12W, RJ13C, RJ13W, RJ17C, RJ18C, RJ18W, RJ19C, RJ19W, RJ25C, RJ61X, RJ31X, RJ21X

Note 3: When an LSR is submitted electronically for REQTYP B (LNP) with LNAs N, or V, where service types are: LNP - UCL-D, LNP - xDSL, LNP - ISDN, and NIDR field is populated with 'Y', the JK CODE field must be submitted with the following: Data Jack Type USOCs: RJ14Q, RJ41Z, RJ45Q, RJ45Z, RJ16X, RJ48Z, RJ41S, RJ45S, RJ26X, RJ26S, RJ27X, RJ48C, RJ48H, RJ48M, RJ48S, RJ48T, RJ48X, RJM3X, RJM4X, RJ26S, RJ21X

# <u>Manual</u>

Note 4: When an LSR is submitted manually for REQTYP B (INP and LNP) with LNAs of N, or V, where service types are: INP - Designed Anaolg Loop, INP - Non-Designed Anaolg Loop, INP - UCL-ND, LNP - Designed Analog Loop, LNP - Non-Designed Analog Loop, LNP - UCL-ND, LNP - EELS; the NIDR field is populated with 'Y', the JK CODE (Jack Code) field must be submitted with the following: Data Jack Type USOCs: RJ14Q, RJ41Z, RJ45Q, RJ45Z, RJ16X, RJ48Z, RJ41S, RJ45S, RJ26X, RJ26S, RJ27X, RJ48C, RJ48H, RJ48M, RJ48S, RJ48T, RJ48X, RJM3X, RJM4X, RJ26S, RJ21X

Note 5: When an LSR is submitted manually for REQTYP B (INP and LNP) with LNAs N, or V, where service types are: INP - UCL-D, INP - xDSL, INP -ISDN, INP - DS0, LNP - UCL-D, LNP - xDSL, LNP - ISDN; and NIDR field is populated with 'Y', the JK CODE field must be submitted with the following: Voice Jack Type USOCs: RJ11C, RJ11W, RJ11D, RJ14C, RJ14W, RJ1DC, RJ12C, RJ12W, RJ13C, RJ13W, RJ17C, RJ18C, RJ18W, RJ19C, RJ19W, RJ25C, RJ61X, RJ31X, RJ21X
