**Carrier Notification
SN91086080**

Date: April 13, 2006

To: All BellSouth Interconnection Services Customers

Subject: All BellSouth Interconnection Services Customers – (Tariff) - Enhancement of BellSouth Ethernet over SONET Service to add BellSouth Customer Network Management Capability

This is to advise that on May 2, 2006, BellSouth will enhance its BellSouth Special Access Tariff FCC No. 1 to allow customers to add Customer Network Management (CNM) capability to their BellSouth Ethernet over SONET (EoS) service. This enhancement will allow customers to add CNM for Surveillance, or Reconfiguration and Surveillance to their BellSouth's EoS services. CNM for Surveillance will allow a customer to track alarms and get performance reports, and Reconfiguration will allow the customer to rearrange its network on the portion of the service that is reconfigurable. Reconfiguration may not be ordered without subscribing to Surveillance or ordering Surveillance coincident with Reconfiguration.

To take advantage of this enhancement, customers can order Special Access CNM of Ethernet over SONET from BellSouth's Tariff FCC No. 1 via the normal Access Service Request (ASR) process after negotiations with your BellSouth account team. Your BellSouth account team will make sure that the ordering and provisioning will be handled to your specifications.

If you have any questions, please contact your BellSouth account team representative.

Sincerely,
