Atlanta, Georgia 30375

Carrier Notification
SN91087061

Date: April 12, 2007

To: Competitive Local Exchange Carriers (CLEC)

Subject: CLECs – (Documentation/Guides) - Update to the Local Ordering Handbook (LOH),
              Version 24.0C, New Local Service Ordering Guide 6 (LSOG 6) and EDI Local
              Mechanization Specifications 06 (ELMS 06) for Release 24.0

BellSouth Telecommunications, Inc. d/b/a AT&T Southeast (AT&T) will implement the following
changes to update documentation in the LOH, Version 24.0C, ELMS 06 for Release 24.0.

CCP Number	Description Of The Change
2483	IWT & IWTQ fields: Update to remove the electronic-only indicator '(e)' in the R/C/O tables in the LOH-Ordering and remove any electronic-only field reference for the IWT and IWTQ fields in the LOH-Data Dictionary.
2484	ACT field (DL Form/Screen): Add Business Rule to LOH-Data Dictionary per UR [User requirement item] 38889.0100 (DACT field).
2485	AN and ATN fields (LSR Form/Screen): Update Conditional Usage Note 1 to read: "Excluding REQTYP = C, required when the ATN field is not populated" for the AN field; and "Excluding REQTYP = C, required when the AN field is not populated" for the ATN field. Also: Move AN & ATN fields from 'Required' to "Optional" for REQTYP C-INP R/C/O Tables. Move AN & ATN fields from 'Conditional' to "Optional" for REQTYP C-LNP & WLNP R/C/O Tables.
2486	LD1 LV1 fields Manual Business Rule (EU Form/Screen): Add manual business rule for EU address fields LD1 LD2 LD3 LV1 LV2 LV3: Rule 1: When REQTYP=J and ACT=N, or when REQTYP=J and EUMI is populated, if the main address on the EU form is RSAG valid and the supplemental address is not valid, then the LSR must be submitted manually.

Please refer to the attachments for specific details of the changes listed above.

These changes will be reflected in the next update of the ELMS 06, Release 24.0/LOH Version 24.0D,
scheduled to be posted on Friday, April 13, 2007.

A summary of all changes within this document will be listed in the **Summary of Changes** section.

This update can be found on the BellSouth Interconnection Services Web site in the Local Exchange Ordering (LEO) Guides at:

http://interconnection.bellsouth.com/reference_library/guides/html/leo.html#loh

Please contact your AT&T local support manager with any questions.

Sincerely,

ORIGINAL SIGNED BY KRISTEN E. SHORE

Kristen E. Shore – Director
AT&T Southeast

DIDDODPBX.LSNP, PS, RS and EU (Form/Screen) Data Dictionary

IWT

Inside Wire Type
DIDDODPBX Form / Screen
LSOG10 / ELMS10

Definition

Identifies the type of inside wiring to be used.

Definition Notes

Note 1:   This field is repeatable per RNUM in the Trunk Section.
Note 2:   This field is valid for electronic ordering only.

Valid Entries

A = Plenum 4 pair or less
B = Non-Plenum 4 pair or less
C = Plenum 25 pair
D = Non Plenum 25 pair
E = Reuse and test existing wiring

Valid Entry Notes

None

Data Characteristics

1 alpha character

Examples

A
C

Conditional Usage Notes

Electronic

Note 1:   Required when the IWO field is populated.

Business Rules

None

* * * * * * * * * * *End of definition for field IWT* * * * * * * * * * *

IWTQ

Inside Wire Type Quantity
DIDDODPBX Form / Screen
LSOG10 / ELMS10

Definition

Identifies the quantity of inside wire types requested.

Definition Notes

Note 1:　This field is repeatable per RNUM in the Trunk section.
~~Note 2:　　This field is valid for electronic ordering only.~~

Valid Entries

01 - 99

Valid Entry Notes

~~Electronic~~

Note 1:　When the entry in this field is 16 or greater the PROJECT field must also be populated.

Data Characteristics

CCP 2484 Attachment Listed Below

LOH-24.0-ELMS06

DACT
Delivery Activity
DL Form / Screen
LSOG6 / ELMS6

Definition
Identifies the delivery activity for this request.

Definition Notes
None

Valid Entries
N = New Directory Delivery

Valid Entry Notes
None

Data Characteristics
1 alpha character

Examples
N

Conditional Usage Notes
Note 1:   Prohibited when the CC or the NNSP field is populated with a wireless OCN.
Note 2:   Required when any other field in the Delivery Address/Information section is populated.
Note 3:   Prohibited when the 4th character of the TOS is R.
Note 4:   DACT is required when ACT=V and an N order will be generated, when the service address is unnumbered. (Example: Partial migration to a new account).
Note 5:   DACT is required when ACT=V and a C order will be generated, when the existing directory delivery address on the customer record is not fully formatted, and the service address is unnumbered. (Example: Full migration to a new account).

Business Rules
Rule 1:   DACT allowed once per LSR.
Rule 2:   When the DACT field is not populated ACT = N or T, then the directory delivery name and address will default from the fields on the EU form for end user name and service address.
Rule 3:   When ACT=V, and when an N order will be generated, and the existing directory delivery address on the customer record is not fully formatted, and the service address is not unnumbered, the name will default from the EU form and the address will default from the existing end user service address. (Example: Partial migration to a new account).
Rule 4:   When ACT=V, and a C order will be generated, and the existing directory delivery address on the customer record is not fully formatted, and the service address is not unnumbered, the name will default from the EU form and the address will default from the existing end user service address. (Example: Full migration to a new account).
Rule 5:   For REQTYP "J", with ACT=R, when the DIRQTYA or DIRQTYNC field is populated the DACT must be "N".
Rule 6   When REQTYP=J and ACT=R and EUMI is populated and DACT is not populated, the directory delivery name

and address will default from the fields on the EU form for the end user name and service address.

Reqtyp C
INP

Product Listing

Number Portability (NP) is a part of local competition that provides end users with the ability to retain their phone numbers when they change service providers, change from one type of service to another, or move from one physical location to another. There are two types of number portability:

Interim Number Portability (INP)
This is a temporary solution for porting numbers which involves two telephone numbers to route calls to the serving wire center using one of the following methods:
Remote Call Forwarding
Direct Inward Dialing
Route Index Hubbing.
Local Number Portability (LNP)
This is the long-range solution and includes the following characteristics:

Uses only one telephone number

Requires significant network architecture hardware and software upgrades
Uses the Advanced Intelligent Network (AIN) requires new routing methodology to send calls to the wire center of the company currently providing the local service.

- Ordering Forms/Screens
- The following chart illustrates the required, conditional and optional forms/screens for ordering this service. Detailed information will follow to assist you in filling out each of these forms/screens.
-

Forms/Screens Number Portability – INP										
LSR	Hunting	EU	DL	RS	DRS	PS	NP	LS	LSNP	RPL
R		R	O				C [1]			
R = Required C = Conditional O = Optional										

[1] - The NP form/screen is required only when ACT = C, or V. Otherwise, the NP *form/screen is not required.*

Completing the DL Form/Screen
If directory listings are required, refer to **REQTYP J** for more information on completing the DL form/screen.

Completing the LSR and EU Forms/Screens

Account level activities (ACT) <u>apply to the entire account.</u> A complete list of ACTs and their definition can be found in the Data Dictionary entry for ACT.

The following chart shows all of the valid account level activities for this service.

Valid Account Level Activities Number Portability – INP										
N	C	D	T	R	V	S	B	W	L	Y
-	X	X	-	-	X	-	-	-	-	-
Note: "X" denotes valid account level activities. A dash (-) indicates a non-valid account level activity.										

The Required, Conditional and Optional (R/C/O) fields on the LSR and EU forms/screens will be given for every valid ACT code in the **ACT Tables** section.

Completing the NP Form/Screen

The Number Portability (NP) form/screen may be required or invalid depending on the account level activity. Each account level activity has valid Line Level Activities (LNAs). These LNAs determine how, or if, the NP form/screen should be populated. A complete list of LNAs and their definition can be found in the Data Dictionary entry for LNA.

The following chart gives the valid LNAs for each account level activity (ACT) and the associated NP form/screen usage for this service.

If REQTYP is:	And ACT is:	Then LNA is:	And NP form/screen is:
C (INP)	C	C, D	Required
C (INP)	D	Prohibited	Not Require
C (INP)	V	D, V	Required

The Required, Conditional and Optional (R/C/O) fields for the Number Portability (NP) form/screen are listed according to the Line Level Activity (LNA) in the **LNA Tables** Section.

RCO Tables

The following tables show the Required, Conditional and Optional (R/C/O) fields on the valid forms/screens for this product. All unmentioned fields are either invalid, not applicable, prohibited or not supported. When fields are populated which are not supported by BellSouth, these not supported fields will be ignored. Populating any other fields may result in a fatal reject or a clarification of the service request.

Please note the following codes:
- Optional fields marked with an asterisk (*) force at least one of the conditional fields to become required when populated.
- Fields used only for manual orders are followed by (M).
- Fields used only for electronic orders are followed by (E).
- For fields marked with a DOUBLE asterisk (**) please refer to the Data Dictionary for clarification.

See the Data Dictionary Section for additional information on each field.

LNP

Product Listing

Number Portability (NP) is a part of local competition that provides end users with the ability to retain their phone numbers when they change service providers, change from one type of service to another, or move from one physical location to another. There are two types of number portability:

Interim Number Portability (INP)

This is a temporary solution for porting numbers which involves two telephone numbers to route calls to the serving wire center using one of the following methods:

- Remote Call Forwarding
- Direct Inward Dialing
- Route Index Hubbing.

Local Number Portability (LNP)

This is the long-range solution and includes the following characteristics:

- Uses only one telephone number

- Requires significant network architecture hardware and software upgrades

- Uses the Advanced Intelligent Network (AIN) requires new routing methodology to send calls to the wire center of the company currently providing the local service.

Ordering Forms/Screens

The following chart illustrates the required, conditional and optional forms/screens for ordering this service. Detailed information will follow to assist you in filling out each of these forms/screens.

Forms/Screens Number Portability – LNP										
LSR	Hunting	EU	DL	RS	DRS	PS	NP	LS	LSNP	RPL
R		R	O				R			

Completing the DL Form/Screen

If directory listings are required, refer to **REQTYP J** for more information on completing the DL form/screen.

Completing the LSR and EU Forms/Screens

Account level activities (ACT) <u>apply to the entire account</u>. A complete list of ACTs and their definition can be found in the Data Dictionary entry for ACT.

The following chart shows all of the valid account level activities for this service.

Valid Account Level Activities Number Portability – LNP

N	C	D	T	R	V	S	B	W	L	Y
-	-	-	-	-	X	-	-	-	-	-

Note: "X" denotes valid account level activities. A dash (-) indicates a non-valid account level activity.

The Required, Conditional and Optional (R/C/O) fields on the LSR and EU forms/screens will be given for every valid ACT code in the **ACT Tables** section.

Completing the NP Form/Screen

The Number Portability (NP) form/screen may be required or invalid depending on the account level activity. Each account level activity has valid Line Level Activities (LNAs). These LNAs determine how, or if, the NP form/screen should be populated. A complete list of LNAs and their definition can be found in the Data Dictionary entry for LNA.

The following chart gives the valid LNAs for each account level activity (ACT) and the associated NP form/screen usage for this service.

If REQTYP is:	And ACT is:	Then LNA is:	And NP form/screen is:
C (LNP)	V	V	Required

The Required, Conditional and Optional (R/C/O) fields for the Number Portability (NP) form/screen are listed according to the Line Level Activity (LNA) in the **LNA Tables** Section.

RCO Tables

The following tables show the Required, Conditional and Optional (R/C/O) fields on the valid forms/screens for this product. All unmentioned fields are either invalid, not applicable, prohibited or not supported. When fields are populated which are not supported by BellSouth, these not supported fields will be ignored. Populating any other fields may result in a fatal reject or a clarification of the service request.

Please note the following codes:
- Optional fields marked with an asterisk (*) force at least one of the conditional fields to become required when populated.
- Fields used only for manual orders are followed by (M).
- Fields used only for electronic orders are followed by (E).
- For fields marked with a DOUBLE asterisk (**) please refer to the Data Dictionary for clarification.

See the Data Dictionary Section for additional information on each field.

Wireless LNP (WLNP)

LSR Restrictions and Limitations:

The following information is applicable to WLNP
- REQTYP = CB
- ACT = V
- LNA = V
- NPT = D

LSR's may be submitted via the following methods:
- LENS
- TAG-XML
- EDI
- FAX (Manual Ordering only)

Restrictions:

Unless specific business rules are documented in the data dictionary, WLNP will use current REQTYP C business for applicable fields.

Ordering Forms

REQTYP CB WLNP	LSR	EU	NP	DL
ACT = V	R	R	R	C*

*The Directory Listing (DL) form/screen may be submitted when adding, deleting or making changes to directory listings on a request accompanied by a request to port a wireless or wireline service.

(LSR) Package Entry Screens:

The following chart illustrates the required, conditional and optional forms/screens for ordering this service. Detailed information will follow to assist you in filling out each of these forms/screens.

REQTYP / SERVICE TYPE	Account level*	Line level**
C Wireless Local Number Portability	R	R

R = Required C = Conditional O = optional

* = per EATN
** = per PORTED TN

Completing the (LSR) Package Entry Screen:

The Required, Conditional and Optional (R/C/O) fields on the (LSR) Package Entries will be given for the valid REQTYP/ACT combination in the Section.
The following chart shows all of the valid account level activities for this requisition type.

REQTYP	ACTIVITY LEVEL
C Wireless Local Number Portability	V

ONLY VALID ACT is V

Account level activities (ACT) <u>apply to the entire account</u>. The ACTs are defined below:
V = Conversion of service as specified to new Local Service Provider (LSP), includes Wireless Local Number Portability

Line level activities (LNA) <u>apply to the specified line</u> only. The valid LNAs are listed below:

V = Conversion or Migration to new LSP as specified (specify only those changes from existing service), includes Wireless Local Number Portability

The following chart gives the valid LNAs for each account level activity (ACT) and the associated LS form/screen usage.

If ACT is:	Then LNA is	Line Level (Entries) :
V	V	Required

The Required, Conditional and Optional (R/C/O) fields for the **Wireless Local Number Portability** (LSR) Package is listed according to the LINE Level in the **Line Level Table(s).**

RCO Tables

The following tables show the Required, Conditional and Optional (R/C/O) fields on the valid forms/screens for this product. All unmentioned fields are either invalid, not applicable, prohibited or not supported. When fields are populated which are not supported by BellSouth, these not supported fields will be ignored. Populating any other fields may result in a fatal reject or a clarification of the service request.

Please note the following codes:

LOH-24.0D-ELMS06

AN
Account Number
LSR Form / Screen
LSOG6 / ELMS6

Definition
Identifies the main account number assigned by the NSP.

Definition Notes
Note 1:   Identifies a non-standard account number.
Note 2:   Identifies an account number that is not a dialable number (e.g., miscellaneous account number).
Note 3:   Use this field when listing request is for an 800 service listing or an interstate foreign listing or foreign listings in independent territories.

Valid Entries
Electronic

valid Miscellaneous Account Number or Billing Account Number
Manual

N = New Account Number
valid Miscellaneous Account Number or Billing Account Number

Valid Entry Notes
Note 1:   Hyphens are automatically inserted by the BellSouth electronic interface system.
Manual

Note 2:   When REQTYP B or C, NPT is D (LNP); the valid entry of N is prohibited.

Data Characteristics
Electronic

10 alpha/numeric or 13 alpha/numeric characters
Manual

1 alpha or up to 20 alpha/numeric characters (excluding optional hyphens)

Examples
Electronic

404M231234
404M231234123
Manual

404M231234123
404-M23-1234-123
N

Conditional Usage Notes
Note 1:   **Excluding REQTYP=C,** ~~R~~required when the ATN field is not populated.
Note 2:   Prohibited when the REQTYP is J with ACT of R and the EATN field is populated.

Business Rules

Rule 1:   A CABS billing account number is valid only when the REQTYP is A or B.

Rule 2:   For REQTYP J, with ACT of D, when this field is populated the class of service on the Customer Service Record (CSR) must be MSA or MHT.

Rule 3:   The same Miscellaneous Account number cannot be assigned for different end users.

Rule 4:   When REQTYP is A or B (Designed Loops) the AN and BAN1 fields must match.

Rule 5:   When the REQTYP is A or B (designed) loops, this field is to be populated with the CABS account number.

Rule 6:   When the REQTYP is A or B (non-designed) loops, this field is to be populated with a CRIS miscellaneous account number.

Rule 7:   When the REQTYP= A (Designed Loops) and the ACT = W, the data in the AN field cannot match the data in the EAN field.

Rule 8:   When the REQTYP= A (Designed Loops) and the ACT = W, the system will validate that the first 10 characters of the AN field is a valid working CABS account.

Rule 9:   When the REQTYP= A (Non-Designed Loops) and the ACT = W, the system will validate that the first 10 characters of the AN field is a valid working CRIS account.

Rule 10:   When the REQTYP= A (Non-Designed Loops) and the ACT = W, then the first 10 characters of the AN field must match the first 10 characters of the EAN field regardless of the total number of characters.

Electronic

Rule 11:   [BULK Option 1 and Bulk Single LSR Arrangement Option 2] For LSRs with a BOPI, the Account Number is required once for each EATN.

Manual

Rule 12:   (ULUE)-For LSRs with a BOPI, the AN field is required once for each ECCKT.

* * * * * * * * * * *End of definition for field AN* * * * * * * * * * *

ATN

Account Telephone Number
LSR Form / Screen
LSOG6 / ELMS6

Definition

Identifies the account telephone number assigned by the NSP.

Definition Notes

Note 1:   The ATN is a dialable telephone number.

Valid Entries

Electronic

a valid Account Telephone Number

Manual

N = New Account Telephone Number or a valid Account Telephone Number

Valid Entry Notes

Note 1:   Hyphens are automatically inserted by the BellSouth electronic interface system.

Data Characteristics

Electronic

10 numeric characters

Manual

1 alpha or 10 numeric characters (excluding optional hyphens)

Examples

Electronic

2015551212

Manual

2015551212
201-555-1212
N

Conditional Usage Notes

Note 1:   <mark>Excluding REQTYP=C, R</mark>~~r~~equired when the AN field is not populated.
Note 2:   Excluding REQTYP B, PROHIBITED when the AN field is populated.
Note 3:   When the REQTYP is B, NPT is D (LNP) and LNLN field is populated, this field is required.
Note 4:   When the REQTYP is C, NPT is D (LNP) and the LNLN field is populated, this field is required.

Note 5:   Required when the REQTYP is J with ACT of R and the EATN field is populated.

Manual

Note 6:   Prohibited when the REQTYP is E and the 4th character of TOS is S or W.

Business Rules

Rule 1:   When (NON-COMPLEX) REQTYP is E or M / ACT is T this field is used to indicate the MAIN
            ACCOUNT NUMBER for the service at the NEW LOCATION. This field does not have to match
            the existing account number shown on the current Customer Service Record (CSR).

Rule 2:   When the ATN is changing (ATN differs from existing account number), a DL page is
           required for any additional listings that include the existing account number (including foreign
           listings, alternate calls, etc.).

Rule 3:   When the REQTYP is J and the ACT is R, and the EATN field is populated, the EATN and ATN
           fields cannot match.

Rule 4:   When the REQTYP is E (Non-Complex) or M (Switched Combination RES/BUS) with ACT of C
           and the request is changing from business to residence the existing main account telephone
           number must change in all states except Florida and North Carolina.

Rule 5:   When the REQTYP is E (Non-Complex) or M (Switched Combination RES/BUS) with ACT of C
           and the request is to change from a business class of service to a residence class of
           service and the request is being generated for order activity in the state of North Carolina,
           the existing main account telephone number must change only when the following conditions
           occur: YPH data on the existing CSR is anything other than 999001 Listing Instruction Code
           (LIC) data on the existing CSR is anything other than LNR.

Rule 6:   For REQTYP J, with ACT of D, when this field is populated the class of service on the
           Customer Service Record (CSR) must be LNPBL, or LNPRL.

Rule 7:   When REQTYP = J and ACT = V or W, the ATN must match the EATN.

Electronic

Rule 8:   When the ATN and NATN fields are both populated, the ATN and NATN fields must contain
           different Telephone Numbers.

Manual

Rule 9:   When REQTYP is E or M (Non-Complex) and ACT is C or V and LNA is G, V, or X and the
           main account number is changing, the ATN field is populated with the new MAIN ACCOUNT
           TELEPHONE NUMBER.

Rule 10:   When a Wireless Type 1 Provider requests a Port In on a REQTYP C, NPT = D , and the NPDI
           is populated , the ATN will be the Wireless Type 1 Provider's 10 digit account number where
           the Port In number will migrate.

Rule 11:   When a request is received for REQTYP J ACT N and a live account is found, where the first
           ten digits of the Account Telephone Number exactly match the data in the ATN Field, and the
           existing class of service is not LNPBL or LNPRL, the request will be returned to the
           originator as invalid.

Rule 12:   When a request is received for REQTYP J ACT N and a live account is found, where the first
           ten digits of the Account Telephone Number exactly match the data in the ATN Field, and the
           existing class of service is LNPBL or LNPRL and the originator of the request owns the
           existing account the request will be returned to the originator as invalid.

Rule 13:   When a request is received for REQTYP J, ACT N and a live account is found, where the
           first ten digits of the Account Telephone Number exactly match the data in the ATN Field, and
           the existing class of service is LNPBL or LNPRL and the originator of the request does not
           own the account, BellSouth will disconnect the old listing account and establish a new listing
           account.

REL: 24
EU Data Dictionary

LD1

Location Identifier 1
EU Form / Screen
LSOG6 / ELMS6

Definition

Identifies additional specific information related to the address (e.g. bldg)..

Definition Notes

None

Valid Entries

BLDG = Building
WNG = Wing
PIER = Pier

Valid Entry Notes

None

Data Characteristics

Up to 4 alpha characters

Examples

BLDG

Conditional Usage Notes

Note 1:　Required when LV1 field is populated, otherwise prohibited.
Note 2:　Prohibited when the 4th character of the TOS is R.

Business Rules

Rule 1:　Must be RSAG valid.
Rule 2:　When REQTYP = J and ACT = V or W, and the EU address fields are populated on the LSR, the system will ignore the data input and will instead use the service address of the existing CSR for generation of the service order.

Manual

　Rule 3:　When REQTYP=J and ACT=N, or when REQTYP=J and EUMI is populated, if the main address on the EU form is RSAG valid and the supplemental address is not valid, then the LSR must be submitted manually.

Location Identifier 2
EU Form / Screen
LSOG6 / ELMS6

Definition
Identifies additional specific information related to the address (e.g. floor).

Definition Notes
None

Valid Entries
FLR = Floor

Valid Entry Notes
Note 1:   BellSouth allows only one valid value for this field.

Data Characteristics
Up to 4 alpha characters

Examples
FLR

Conditional Usage Notes
Note 1:   Required when LV2 field is populated, otherwise prohibited.
Note 2:   Prohibited when the 4th character of the TOS is R.

Business Rules
Rule 1:   Must be RSAG valid.
Rule 2:   When REQTYP = J and ACT = V or W, and the EU address fields are populated on the LSR,
           the system will ignore the data input and will instead use the service address of the existing
           CSR for generation of the service order.

Manual

Rule 3:   When REQTYP=J and ACT=N, or when REQTYP=J and EUMI is populated, if the main
           address on the EU form is RSAG valid and the supplemental address is not valid, then the
           LSR must be submitted manually.
