

# Table of Contents - Volume II

## 1. General

- 1.1 Purpose
- 1.2 Versioning
- 1.3 Organization & Structure
- 1.4 Forms Provided

## 2. Definition of Terms

- 2.1 LSR (Local Service Request)
- 2.2 HGI (Hunt Group Information)
- 2.3 EU (End User)
- 2.4 Loop (LS)
- 2.5 Loop w/ Number Portability (LSNP)
- 2.6 Number Portability (NP)
- 2.7 Resale (RS) - (Includes non-Complex and Complex)
- 2.8 Resale Private Line (RPL)
- 2.9 Centrex Resale (CRS) - (Includes Centrex ISDN)
- 2.10 Digital Trunking Resale (DTR)
- 2.11 DID/PBX Resale (DPR)
- 2.12 Resale ISDN PRI (IRS)
- 2.13 Unbundled Local Switching (PS) - (Includes ISDN BRI)
- 2.14 DID/PBX Port or Port w/ Loop (DPU)
- 2.15 Centrex Port or Port w/ Loop (CUS)
- 2.16 ISDN PRI (IUS) - (Includes REQ TYP 2 and Y)
- 2.17 Digital Trunking (DTU) - (Includes DS1 and Port)
- 2.18 Directory Listing (DL)

## **3a. FORM DESCRIPTION**

- 3.1 Field Representation Definitions**
- 3.2 Request Type & Activity (Codes)**
- 3.3 ACT (Activity) Definitions**

## **3b. REQTP/ACT Form Requirements**

- 3.4 Form Requirements**
  - FORM/ACT Matrix Charts

## **3c. Alphabetic/Numeric Cross Reference Index - Form Fields**

## **4. Electronic Gateway**

- 4.1 Extensible Markup Language (XML)**
  - 4.1.1 XML Common Header Fields

## **5. AT&T Local Responses**

### **5a. AT&T Response Overview**

### **5b. Alphabetic/Numeric Cross Reference Index - Local Response Fields**

#### **5.1 Billing Completion Notification (BCN)**

1. AAN - Associated Account Number
2. ALI - Alphanumeric Listing Identifier Code
3. AN - Account Number
4. ATN - Account Telephone Number
5. BAN1 - Billing Account Number 1
6. BAN2 - Billing Account Number 2
7. B11 - Billing Account Number Identifier 1
8. B12 - Billing Account Number Identifier 2
9. BOPI - Bulk Order Package Identifier
10. CABLE ID - Cable Identification

11. CABLE ID2 - Cable Identification 2
12. CC - Company Code
13. CCEA – Cross Connect Equipment Assignment
14. CCNA - Customer Carrier Name Abbreviation
15. CFA - Connecting Facility Assignment
16. CHAN/PAIR - Channel/Pair
17. CHAN/PAIR2 - Channel/Pair 2
18. CHC - Coordinated Hot Cut
19. CKR - Customer Circuit Reference (Service Group Section)
20. D/TSENT - Date and Time Sent
- 20a. DACONT INT - Name of Contact at Providing Company (Directory Service)
- 20b. DACONT TN - Directory Contact Telephone Number (Directory Service)
21. DD/CD - Due Date/Completion Date
- 21a. DDQTYR - Number of Delivery Segments Received (Directory Service)
- 21b. DEMARC - Demarc Designation
- 21c. DISC ECCKT - Disconnect ECCKT (Services Section)
22. DISC NBR - Disconnect Telephone Number (Service Group Section EU)
23. DISC NBR - Disconnect Telephone Number (Service Group Section LS)
- 23a. DISC ORD - Disconnect Order Number
- 23b. DLCI - Data Line Connection Identifier (SECLOC)
- 23c. DLCONT INT - Name of Contact at Providing Company (Directory Service)
- 23d. DLCONT TN - Directory Contact Telephone Number (Directory Service)
24. DLNUM - Directory Listing Reference Number (Directory Section)
25. DLORD - Directory Listing Order Number
- 25a. DLQTYR - Number of Listings Received (Directory Service)
26. DNUM - Disconnect Line Number
27. DOI - Degree of Indent
- 27a. DOR - Date of Receipt (Directory Service)
- 27b. DRTN - Distinctive Ring Telephone Number (Service Group Section)
28. DSGCON - Design/Engineering Contact
29. DSGCON TEL NO - Design/Engineering Contact Telephone Number
- 29a. DSN - Dialable Station Number
- 29b. DSTN - Disassociated Telephone Number
30. EAN - Existing Account Number
31. EATN - Existing Account Telephone Number
32. EBD - Effective Bill Date
- 32a. EC VER - Exchange Carrier Version
33. ECCKT - Exchange Company Circuit ID (Services Section)
34. FDT - Frame Due Time
35. FNUM - Facility Line Number
36. FOC/CN REMARKS - FOC/CN Remarks
37. HA - Hunt Group Activity
38. HID - Hunt Group Identifier

- 39. HNUM - Hunt Number
- 40. HTN - Hunt Telephone Number
- 41. HTSEQ - Hunt Sequence
- 42. IBT - ISDN BRI Type
- 43. INIT - Initiator Identification
- 44. INIT TEL NO - Initiator Telephone Number
- 45. ISPID - ISDN Service Profile Identification (Service Group Section)
- 46. IWBAN - Inside Wiring Bill Account Number
- 47. LACT - Listing Activity Indicator (Directory Section)
- 48. LEAN - Line Existing Account Number
- 49. LEATN - Line Existing Account Telephone Number
- 49a. LEGNUM - Multi-point Leg Number
- 50. LISTADR - Listed Address (Directory Service)
- 51. LISTNM - Listed Name (Directory Service)
- 51a. LNEX - Line Number Extension Number (SECLOC)
- 52. LNEX - Line Number Extension Number (Services Section)
- 52a. LNUM - Line Number (SECLOC)
- 53. LNUM - Line Number (Services Section)
- 54. LOCNUM - Location Number (Hunt Group Section)
- 54a. LOCNUM - Location Number (SECLOC)
- 55. LOCNUM - Location Number (Service Group Section)
- 56. L-ORD - Loop Order Number (Service Group Section)
- 57. LPHRASE - Listing Phase (Directory Service)
- 57a. LSPAN - LSP's Authorization Number
- 58. LSR NO - Local Service Request Number
- 59. LST - Local Service Termination
- 59a. LST - Local Service Termination (SECLOC)
- 59b. LTC - Line Treatment Code
- 60. LTEXT - Line of Text (Directory Service)
- 61. LTN - Listed Telephone Number
- 62. LTXNUM - Line of Text Reference Number (Directory Service)
- 63. LTXTY - Listing Text Type (Directory Service)
- 64. LTY- Listing Type (Directory Service)
- 65. MATN - Main/Alternate Telephone Number (Service Group Section)
- 66. NAN - New Account Number
- 67. NATN - New Account Telephone Number
- 67a. NID - Network Interface Device
- 68. NNSP - New Network Service Provider Identification
- 69. NOR - Number Of Requests
- 70. NOTYP - Number Type (Service Group Section)
- 71. NPORD - Number Portability Order Number (Service Group Section)
- 71a. NSP DSGCON - Network Service Provider (NSP) Design/Engineering Contact
- 72. NSTN - Non-Standard Telephone Number (Directory Section)
- 72a. ONSP - Old Network Service Provider Identification

- 72b. OOR - Out of Range Indicator
- 73. ORD - Order Number
- 73a. ORDL - Line Level Order Number (Service Group Section)
- 74. OTN - Old Telephone Number (Service Group Section)
- 74a. PG\_of\_ - Page\_of\_
- 74b. PGI - Pair Gain Indicator
- 75. PID - Personal Identifier (Service Group Section)
- 76. PON - Purchase Order Number
- 77. PORTED NBR - Ported Telephone Number (Service Group Section)
- 77a. RCODE - Reason Code
- 77b. RDET - Reason Jeopardy Code Detail
- 77c. RDLCI - Related Data Link Connection Identifier (SECLOC)
- 77d. RDT - Response Date
- 77e. RDY - Response Days
- 77f. RECCKT - Related Circuit ID (SECLOC)
- 78. RELAY RACK - Relay Rack (Service Group Section)
- 79. REP - Provider Contact Representative
- 80. REP TEL NO - Representative Telephone Number
- 81. RESID - Response Identifier
- 81a. RT - Response Type
- 82. RTI - Route Index
- 83. SAT - Subscriber Access Telephone Number (Service Group Section)
- 84. SCFA - Secondary Connecting Facility Assignment
- 85. SHELF - Shelf (Service Group Section)
- 86. SLOT - Slot (Service Group Section)
- 87. SLTN - Shared Line Telephone Number (Service Group Section)
- 87a. SPORT - Slot Port
- 87b. SQTYR - Service Address Quantity Received (Directory Service)
- 87c. ST - Switch Type
- 88. STATUS CODE - Status Code
- 89. STATUS MSG - Status Message
- 90. STYC - Style Code (Directory Service)
- 91. SYSTEM ID- System Identification (Service Group Section)
- 91a. TDTR - Ten Digit Trigger Response
- 92. TER - Terminal Number (Service Group Section)
- 93. TERS - Terminal Numbers (Service Group Section)
- 94. TEST PROD INDICATOR - Test Production Indicator
- 95. TLI - Telephone Line Identifier
- 95a. TNC - Telephone Number Change
- 96. TNS - Telephone Numbers (Service Group Section)
- 97. TOA - Type of Account (Directory Service)
- 98. TRANS ACK TYPE - Transaction Activity Type
- 99. TRANS SET PURPOSE CODE - Transaction Set Purpose Code
- 99a. UNIT - Unit
- 100. VER - Version Identification

## 101. WPP - White Pages Products (Directory Service)

**5.2 Completion Notification (CN)**

1. AAN - Associated Account Number
2. ALI - Alphanumeric Listing Identifier Code
3. AN - Account Number
4. ATN - Account Telephone Number
5. BAN1 - Billing Account Number 1
6. BAN2 - Billing Account Number 2
7. BI1 - Billing Account Number Identifier 1
8. BI2 - Billing Account Number Identifier 2
9. BOPI - Bulk Order Package Identifier
10. CABLE ID - Cable Identification
11. CABLE ID2 - Cable Identification 2
12. CC - Company Code
13. CCEA - Cross Connect Equipment Assignment
14. CCNA - Customer Carrier Name Abbreviation
15. CFA - Connecting Facility Assignment
16. CHAN/PAIR - Channel/Pair
17. CHAN/PAIR2 - Channel/Pair 2
18. CHC - Coordinated Hot Cut
19. CKR - Customer Circuit Reference (Service Group Section)
20. D/TSENT - Date and Time Sent
21. DD/CD - Due Date/Completion Date
22. DISC NBR - Disconnect Telephone Number (Service Group Section EU)
23. DISC NBR - Disconnect Telephone Number (Service Group Section LS)
24. DLNUM - Directory Listing Reference Number (Directory Section)
25. DLORD - Directory Listing Order Number
26. DNUM - Disconnect Line Number
27. DOI - Degree of Indent
28. DSGCON - Design/Engineering Contact
29. DSGCON TEL NO - Design/Engineering Contact Telephone Number
30. EAN - Existing Account Number
31. EATN - Existing Account Telephone Number
32. EBD - Effective Bill Date
33. ECCKT - Exchange Company Circuit ID (Services Section)
34. FDT - Frame Due Time
35. FNUM - Facility Line Number
36. FOC/CN REMARKS - FOC/CN Remarks
37. HA - Hunt Group Activity
38. HID - Hunt Group Identifier
39. HNUM - Hunt Number
40. HTN - Hunt Telephone Number
41. HTSEQ - Hunt Sequence
42. IBT - ISDN BRI Type

43. INIT - Initiator Identification
44. INIT TEL NO - Initiator Telephone Number
45. ISPID - ISDN Service Profile Identification (Service Group Section)
46. IWBAN - Inside Wiring Bill Account Number
47. LACT - Listing Activity Indicator (Directory Section)
48. LEAN - Line Existing Account Number
49. LEATN - Line Existing Account Telephone Number
50. LISTADR - Listed Address (Directory Service)
51. LISTNM - Listed Name (Directory Service)
52. LNEX - Line Number Extension Number (Services Section)
53. LNUM - Line Number (Services Section)
54. LOCNUM - Location Number (Hunt Group Section)
55. LOCNUM - Location Number (Service Group Section)
56. L-ORD - Loop Order Number (Service Group Section)
57. LPHRASE - Listing Phrase (Directory Service)
58. LSR NO - Local Service Request Number
59. LST - Local Service Termination
60. LTEXT - Line of Text (Directory Service)
61. LTN - Listed Telephone Number
62. LTXNUM - Line of Text Reference Number (Directory Service)
63. LTXTY - Listing Text Type (Directory Service)
64. LTY - Listing Type (Directory Section)
65. MATN - Main/Alternate Telephone Number (Service Group Section)
66. NAN - New Account Number
67. NATN - New Account Telephone Number
68. NNSP - New Network Service Provider Identification
69. NOR - Number Of Requests
70. NOTYP - Number Type (Service Group Section)
71. NPORD - Number Portability Order Number (Service Group Section)
72. NSTN - Non-Standard Telephone Number (Directory Section)
73. ORD - Order Number
74. OTN - Old Telephone Number (Service Group Section)
75. PID - Personal Identifier (Service Group Section)
76. PON - Purchase Order Number
77. PORTED NBR - Ported Telephone Number (Service Group Section)
78. RELAY RACK - Relay Rack (Service Group Section)
79. REP - Provider Contact Representative
80. REP TEL NO - Representative Telephone Number
81. RESID - Response Identifier
82. RTI - Route Index
83. SAT - Subscriber Access Telephone Number (Service Group Section)
84. SCFA - Secondary Connecting Facility Assignment
85. SHELF - Shelf (Service Group Section)
86. SLOT Slot (Service Group Section)
87. SLTN - Shared Line Telephone Number (Service Group Section)

88. STATUS CODE - Status Code
89. STATUS MSG - Status Message
90. STYC - Style Code (Directory Section)
91. SYSTEM ID - System Identification (Service Group Section)
92. TER - Terminal Number (Service Group Section)
93. TERS - Terminal Numbers (Service Group Section)
94. TEST PROD INDICATOR - Test Production Indicator
95. TLI - Telephone Line Identifier
96. TNS - Telephone Numbers (Service Group Section)
97. TOA - Type of Account (Directory Service)
98. TRANS ACK TYPE - Transaction Activity Type
99. TRANS SET PURPOSE CODE - Transaction Set Purpose Code
100. VER - Version Identification
101. WPP - White Pages Products (Directory Service)

### **5.3 Firm Order Confirmation (FOC)**

1. AAN - Associated Account Number
2. ALI - Alphanumeric Listing Identifier Code
3. AN - Account Number
4. ATN - Account Telephone Number
5. BAN1 - Billing Account Number 1
6. BAN2 - Billing Account Number 2
7. B11 - Billing Account Number Identifier 1
8. B12 - Billing Account Number Identifier 2
9. BOPI - Bulk Order Package Identifier
10. CABLE ID - Cable Identification
11. CABLE ID2 - Cable Identification 2
12. CC - Company Code
13. CCEA – Cross Connect Equipment Assignment
14. CCNA - Customer Carrier Name Abbreviation
15. CFA - Connecting Facility Assignment
16. CHAN/PAIR - Channel/Pair
17. CHAN/PAIR2 - Channel/Pair 2
18. CHC - Coordinated Hot Cut
19. CKR - Customer Circuit Reference (Service Group Section)
20. CNUM - Channel Line Number
21. D/TSENT - Date and Time Sent
22. DD/CD - Due Date/Completion Date
23. DIDNUM - DID Reference Number
24. DISC NBR - Disconnect Telephone Number (Service Group Section EU)
25. DISC NBR - Disconnect Telephone Number (Service Group Section LS)
26. DLNUM - Directory Listing Reference Number (Directory Section)
27. DLORD - Directory Listing Order Number
28. DNUM - Disconnect Line Number
29. DOI - Degree of Indent

30. DSGCON - Design/Engineering Contact
31. DSGCON TEL NO - Design/Engineering Contact Telephone Number
32. EAN - Existing Account Number
33. EATN - Existing Account Telephone Number
34. EBD - Effective Bill Date
35. ECCKT - Exchange Company Circuit ID (Services Section)
36. FDT - Frame Due Time
37. FECCKT - Facility Exchange Company Circuit ID
38. FNUM - Facility Line Number
39. FOC/CN REMARKS - FOC/CN Remarks
40. HA - Hunt Group Activity
41. HID - Hunt Group Identifier
42. HNUM - Hunt Number
43. HTN - Hunt Telephone Number
44. HTSEQ - Hunt Sequence
45. IBT - ISDN BRI Type
46. INIT - Initiator Identification
47. INIT TEL NO - Initiator Telephone Number
48. ISPID - ISDN Service Profile Identification (Service Group Section)
49. IWBAN - Inside Wiring Bill Account Number
50. LACT - Listing Activity Indicator (Directory Section)
51. LEAN - Line Existing Account Number
52. LEATN - Line Existing Account Telephone Number
53. LISTADR - Listed Address (Directory Service)
54. LISTNM - Listed Name (Directory Service)
55. LNEX - Line Number Extension Number (Services Section)
56. LNUM - Line Number (Services Section)
57. LOCNUM - Location Number (Hunt Group Section)
58. LOCNUM - Location Number (Service Group Section)
59. L-ORD - Loop Order Number (Service Group Section)
60. LPHRASE - Listing Phrase (Directory Service)
61. LSR NO - Local Service Request Number
62. LST - Local Service Termination
63. LTEXT - Line of Text (Directory Service)
64. LTN - Listed Telephone Number
65. LTXNUM - Line of Text Reference Number (Directory Service)
66. LXTY - Listing Text Type (Directory Service)
67. LTY - Listing Type (Directory Section)
68. MATN - Main/Alternate Telephone Number (Service Group Section)
69. NAN - New Account Number
70. NATN - New Account Telephone Number
71. NNSP - New Network Service Provider Identification
72. NOR - Number Of Requests
73. NOTYP - Number Type (Service Group Section)
74. NPORD - Number Portability Order Number (Service Group Section)

75. NSTN - Non-Standard Telephone Number (Directory Section)
76. ORD - Order Number
77. OTN - Old Telephone Number (Service Group Section)
78. PID - Personal Identifier (Service Group Section)
79. PON - Purchase Order Number
80. PORTED NBR - Ported Telephone Number (Service Group Section)
81. RELAY RACK - Relay Rack (Service Group Section)
82. REP - Provider Contact Representative
83. REP TEL NO - Representative Telephone Number
84. RESID - Response Identifier
85. RTI - Route Index
86. SAT - Subscriber Access Telephone Number (Service Group Section)
87. SCFA - Secondary Connecting Facility Assignment
88. SHELF - Shelf (Service Group Section)
89. SLOT - Slot (Service Group Section)
90. SLTN - Shared Line Telephone Number (Service Group Section)
91. STATUS CODE - Status Code
92. STATUS MSG - Status Message
93. STYC - Style Code (Directory Section)
94. SYSTEM ID - System Identification (Service Group Section)
95. TER - Terminal Number (Service Group Section)
96. TERS - Terminal Numbers (Service Group Section)
97. TEST PROD INDICATOR - Test Production Indicator
98. TGLNUM - Trunk Group Location Number
99. TLI - Telephone Line Identifier
100. TNNUM - Telephone Number Line Number
101. TNS - Telephone Numbers (Service Group Section)
102. TOA - Type of Account (Directory Service)
103. TRANS ACK TYPE - Transaction Activity Type
104. TRANS SET PURPOSE CODE - Transaction Set Purpose Code
105. VER - Version Identification
106. WPP - White Pages Products (Directory Service)

#### **5.4 Jeopardy Notification (JN)**

1. AAN - Associated Account Number
2. AN - Account Number
3. ATN - Account Telephone Number
4. BAN1 - Billing Account Number 1
5. BAN2 - Billing Account Number 2
6. BI1 - Billing Account Number Identifier 1
7. BI2 - Billing Account Number Identifier 2
8. BOPI - Bulk Order Package Identifier
9. CC - Company Code
10. CCNA - Customer Carrier Name Abbreviation
11. CHC - Coordinated Hot Cut

12. D/TSENT - Date and Time Sent
13. DD/CD - Due Date/Completion Date
14. DLORD - Directory Listing Order Number
15. EAN - Existing Account Number
16. EATN - Existing Account Telephone Number
17. EBD - Effective Bill Date
18. FDT - Frame Due Time
19. FOC/CN REMARKS - FOC/CN Remarks
20. IBT - ISDN BRI Type
21. INIT - Initiator Identification
22. INIT TEL NO - Initiator Telephone Number
23. IWBAN - Inside Wiring Bill Account Number
24. LOCNUM - Location Number (Hunt Group Section)
25. LOCNUM - Location Number (Service Group Section)
26. L-ORD - Loop Order Number (Service Group Section)
27. LSR NO - Local Service Request Number
28. NAN - New Account Number
29. NATN - New Account Telephone Number
30. NOR - Number Of Requests
31. ORD - Order Number
32. OTN - Old Telephone Number (Service Group Section)
33. PID - Personal Identifier (Service Group Section)
34. PON - Purchase Order Number
35. REP - Provider Contact Representative
36. REP TEL NO - Representative Telephone Number
37. SAT - Subscriber Access Telephone Number (Service Group Section)
38. SHELF - Shelf
39. STATUS CODE - Status Code
40. STATUS MSG - Status Message
41. TEST PROD INDICATOR - Test Production Indicator
42. TRANS ACK TYPE - Transaction Activity Type
43. TRANS SET PURPOSE CODE - Transaction Set Purpose Code
44. VER - Version Identification

### **5.5 Reject/Clarification Notification (RC)**

1. AAN - Associated Account Number
2. ALI - Alphanumeric Listing Identifier Code
3. AN - Account Number
4. ATN - Account Telephone Number
5. BAN1 - Billing Account Number 1
6. BAN2 - Billing Account Number 2
7. BI1 - Billing Account Number Identifier 1
8. BI2 - Billing Account Number Identifier 2
9. BOPI - Bulk Order Package Identifier
10. CABLE ID - Cable Identification

11. CABLE ID2 - Cable Identification 2
12. CC - Company Code
13. CCEA - Cross Connect Equipment Assignment
14. CCNA - Customer Carrier Name Abbreviation
15. CFA - Connecting Facility Assignment
16. CHAN/PAIR - Channel/Pair
17. CHAN/PAIR2 - Channel/Pair 2
18. CHC - Coordinated Hot Cut
19. CKR - Customer Circuit Reference (Service Group Section)
20. CNUM - Channel Line Number
21. D/TSENT - Date and Time Sent
22. DD/CD - Due Date/Completion Date
23. DIDNUM - DID Reference Number
24. DISC NBR - Disconnect Telephone Number (Service Group Section EU)
25. DISC NBR - Disconnect Telephone Number (Service Group Section LS)
26. DLNUM - Directory Listing Reference Number (Directory Section)
27. DLORD - Directory Listing Order Number
28. DNUM - Disconnect Line Number
29. DOI - Degree of Indent
30. DSGCON - Design/Engineering Contact
31. DSGCON TEL NO - Design/Engineering Contact Telephone Number
32. EAN - Existing Account Number
33. EATN - Existing Account Telephone Number
34. EBD - Effective Bill Date
35. ECCKT - Exchange Company Circuit ID (Services Section)
36. ERROR CODE - Error Code
37. ERROR MESSAGE - Error Message
38. FDT - Frame Due Time
39. FNUM – Facility Line Number
40. FOC/CN REMARKS - FOC/CN Remarks
41. HA - Hunt Group Activity
42. HID - Hunt Group Identifier
43. HNUM - Hunt Number
44. HTN - Hunt Telephone Number
45. HTSEQ - Hunt Sequence
46. IBT - ISDN BRI Type
47. INIT - Initiator Identification
48. INIT TEL NO - Initiator Telephone Number
49. ISPID- ISDN Service Profile Identification (Service Group Section)
50. IWBAN - Inside Wiring Bill Account Number
51. LACT - Listing Activity Indicator (Directory Section)
52. LEAN - Line Existing Account Number
53. LEATN - Line Existing Account Telephone Number
54. LEGNUM – Multi-point Leg Number
55. LISTADR - Listed Address (Directory Service)

56. LISTNM - Listed Name (Directory Service)
57. LNEX - Line Number Extension Number (Services Section)
58. LNUM (Services Section) - Line Number (Services Section)
59. LOCNUM - Location Number (Hunt Group Section)
60. LOCNUM - Location Number (Service Group Section)
61. L-ORD - Loop Order Number (Service Group Section)
62. LPHRASE - Listing Phrase (Directory Service)
63. LSR NO - Local Service Request Number
64. LST - Local Service Termination
65. LTEXT - Line of Text (Directory Service)
66. LTN - Listed Telephone Number
67. LTXNUM - Line of Text Reference Number (Directory Service)
68. LXTY - Listing Text Type (Directory Service)
69. LTY - Listing Type (Directory Section)
70. MATN - Main/Alternate Telephone Number (Service Group Section)
71. NAN - New Account Number
72. NATN - New Account Telephone Number
73. NNSP - New Network Service Provider Identification
74. NOR - Number Of Requests
75. NOTYP - Number Type (Service Group Section)
76. NSTN - Non-Standard Telephone Number (Directory Section)
77. ORD - Order Number
78. OTN - Old Telephone Number (Service Group Section)
79. PID - Personal Identifier (Service Group Section)
80. PON - Purchase Order Number
81. PORTED NBR - Ported Telephone Number (Service Group Section)
82. RELAY RACK - Relay Rack (Service Group Section)
83. REP - Provider Contact Representative
84. REP TEL NO - Representative Telephone Number
85. RESID - Response Identifier
86. RTI - Route Index
87. SAT - Subscriber Access Telephone Number (Service Group Section)
88. SHELF - Shelf (Service Group Section)
89. SLOT - Slot (Service Group Section)
90. SLTN - Shared Line Telephone Number (Service Group Section)
91. STATUS CODE - Status Code
92. STATUS MSG - Status Message
93. STYC - Style Code (Directory Section)
94. SYSTEM ID - System Identification (Service Group Section)
95. TER - Terminal Number (Service Group Section)
96. TERS - Terminal Numbers (Service Group Section)
97. TEST PROD INDICATOR - Test Production Indicator
98. TGLNUM - Trunk Group Location Number
99. TLI - Telephone Line Identifier
100. TNNUM - Telephone Number Line Number

- 101. TNS - Telephone Numbers (Service Group Section)
- 102. TOA - Type of Account (Directory Service)
- 103. TRANS ACK TYPE - Transaction Activity Type
- 104. TRANS SET PURPOSE CODE - Transaction Set Purpose Code
- 105. VER - Version Identification
- 106. WPP - White Pages Products (Directory Service)

### **5.6 Line Loss Notification (LLN)**

- 1. CC - Company Code
- 2. CVD - Conversion Date
- 3. ECCKT - Exchange Company Circuit ID (Services Section)
- 4. NT - Notification Type
- 5. NTA - Notification Type Activity
- 6. TEST PROD INDICATOR - Test Production Indicator
- 7. WTN - Working Telephone Number

### **5.7 Pending Order Status (POS)**

- 1. AAN - Associated Account Number
- 2. ATN - Account Telephone Number
- 3. BAN1 - Billing Account Number 1
- 4. BAN2 - Billing Account Number 2
- 5. BI1 - Billing Account Number Identifier 1
- 6. BI2 - Billing Account Number Identifier 2
- 7. BOPI - Bulk Order Package Identifier
- 8. CC - Company Code
- 9. CCNA - Customer Carrier Name Abbreviation
- 10. CHC - Coordinated Hot Cut
- 11. D/TSENT - Date and Time Sent
- 12. DD/CD - Due Date/Completion Date
- 13. DLORD - Directory Listing Order Number
- 14. EAN - Existing Account Number
- 15. EATN - Existing Account Telephone Number
- 16. EBD - Effective Bill Date
- 17. FDT - Frame Due Time
- 18. FOC/CN REMARKS - FOC/CN Remarks
- 19. IBT - ISDN BRI Type
- 20. INIT - Initiator Identification
- 21. INIT TEL NO - Initiator Telephone Number
- 22. IWBAN - Inside Wiring Bill Account Number
- 23. L-ORD - Loop Order Number (Service Group Section)
- 24. LSR NO - Local Service Request Number
- 25. NAN - New Account Number
- 26. NATN - New Account Telephone Number
- 27. NOR - Number of Requests
- 28. ORD - Order Number
- 29. OTN - Old Telephone Number (Service Group Section)

30. PID - Personal Identifier (Service Group Section)
31. PON - Purchase Order Number
32. REP - Provider Contact Representative
33. REP TEL NO - Representative Telephone Number
34. SAT - Subscriber Access Telephone Number (Service Group Section)
35. STATUS CODE - Status Code
36. STATUS MSG - Status Message
37. TEST PROD INDICATOR - Test Production Indicator
38. TRANS ACK TYPE – Transaction Activity Type
39. TRANS SET PURPOSE CODE – Transaction Set Purpose Code
40. VER - Version Identification

### **5.8 Firm Order Acknowledgment (Firm Order ACK)**

1. CC - Company Code
2. D/TSENT - Date and Time Sent
3. DDC MSG ID - Due Date Calculator Message ID
4. DDC MSG TEXT - Due Date Calculator Message Text
5. DUE DATE - Due Date
6. OUT DUE DATE - Out Due Date
7. PON - Purchase Order Number
8. PV INDICATOR - Premise Visit Indicator
9. TEST PROD INDICATOR - Test Production Indicator
10. VER - Version Identification

## **5c. AT&T Error Codes & Messages**

# 1. General

## 1.1 Purpose

This document has been created to aid the Competitive Local Exchange Company (CLEC) in requesting Unbundled Network Elements and Resale Services from AT&T 9-State. The information contained in this document is based upon the Ordering & Billing Forum (OBF) Local Service Ordering Guideline (LSOG Version 10). However, this document, which is entitled "AT&T 9-State Local Service Ordering Requirements" (LSOR), will further address the AT&T 9-State usage definitions and rules of application when ordering Unbundled Network Elements (UNE) and Resale Services from AT&T 9-State.

AT&T 9-State reserves the right to alter the format of this document or discontinue it, as appropriate, dependent upon future needs. This document will be updated as required after each OBF.

**Note:** The ordering forms templates contained in the LSOR are located on the CLEC Online website and may be sent to an AT&T 9-State Local Service Center (LSC) via an electronic interface established between AT&T 9-State and the CLEC. When ordering UNE and Resale Services, the LSOR should be followed.

## 1.2 Versioning

AT&T 9-State supports one version of OSS software for an electronic Application-to-Application Order interface and manual ordering (see Electronic Gateway section of this document). A test environment will be supported and will be referred to as the current version. Maintenance releases, which may contain defect fixes or new useful functionality, may occur between tri-annual releases.

Each new version implemented by AT&T 9-State will follow the Change Management Process. A release announcement via Accessible Letter will be sent to the CLEC community which will include:

- **Release Date:**  
The release date is the actual date that the release is implemented and active.
- **Release Version:**  
The release version number is five (5) positions. i.e. 10.08 (10 = LSOG Version, 08 = incremented update of the LSOG or also known as a "dot" release)
- **Effective Date:**  
The earliest date that the new XML Version may be used for the exchange of ordering information, mechanized or manual requests.
- **Implementation and Retirement Dates:**  
Implementation and Retirement dates represent when the new XML Version will be implemented and the previous version is retired.

At implementation of a new version, all LSRs will be converted to the new version bring implemented. No notification is required.

Additional electronic gateway and versioning information is available on the CLEC Online website at <https://clec.att.com/clec>.

Once the site opens:

- Select CLEC Handbook
- Select the AT&T 9-State region
- Select OSS or Guides/Tech Pubs
- Select either XML Support Website or Versioning

## 1.3 Organization & Structure

This section indicates the areas covered in the AT&T 9-State LSOR. The LSOR document is divided into the following sections by subjects to aid in the ordering of Unbundled Network Elements (UNE) and Resale Services.

- Purpose
- Versioning
- Organization & Structure
- Forms Provided
- Definition of Terms
- Field Representation Definitions
- Request Type & Activity Codes
- Usage and Matrix Table Definitions
- ACT (Activity) Definitions
- Form Requirements
- Electronic Gateways
- AT&T Local Responses
- AT&T Error Codes & Messages

The manual ordering forms are explained within the sections of this document. The following pages will delineate each section of the LSOR to better understand what is contained in this document.

## 1.4 Forms Provided

Below is a list of the manual forms used for ordering local service. All forms in this document are for illustrative purposes only. The actual manual forms that may be used for ordering local service are located on CLEC Online and may be found by using the following steps:

- Go to <<https://clec.att.com/clec>>
- Choose <CLEC Handbook> from side menu
- Choose <Handbook for Alabama, Florida, Georgia, Kentucky, Louisiana, Mississippi, North Carolina, South Carolina, Tennessee>
- Choose <Forms and Templates> from side menu
- Choose <Manual Forms>
- Scroll down to the applicable form. They are sorted alphabetically (unlike the LSOR):
  - Local Service Request (LSR)
  - Hunt Group Information (HGI)
  - End User (EU)

---

*Effective 11/10/12*

Loop Service (LS)  
Loop Service w/ Number Portability (LSNP)  
Number Portability (NP) Service  
Port Service (PS)  
Resale (RS) Service  
Resale Private Line (RPL) Service  
Centrex Resale Service (CRS)  
Centrex UNE Service (CUS)  
Digital Trunking Resale Service (DTR)  
Digital Trunking UNE Service (DTU)  
DID/PBX UNE Service (DPU)  
DID/PBX Resale Service (DPR)  
ISDN PRI UNE Service (IUS)  
ISDN PRI Resale Service (IRS)  
Directory Listing (DL)

Each LSOR section will identify all fields on that specific form and indicate whether the field is required, optional, not required, conditional, or prohibited. Each field describes the definition, usage, valid entries, data characteristics, length (minimum and maximum), example and possible conditions. The aforementioned data must be followed when submitting an LSR, regardless of the appearance of a field on any manual form. The Request Type (REQTYP) and Activity (ACT) is described in the related Usage Matrix Table. See Figure 3-1 located in this Chapter for format layout.

In addition to basic field rules, AT&T 9-State has identified fields where case sensitivity and sequencing are applicable. Where such business rules do not apply, there will be no notation.

## 2. Definition of Terms

### 2.1 LSR (Local Service Request)

This form is prepared by the customer to request that services be provided as specified in the specific tariffs/contracts/agreements.

### 2.2 HGI (Hunt Group Information)

This form is prepared by the customer requesting that Hunt Group Information services be provided. The HGI form must always be associated with an administrative Local Service Request (LSR) Form, an End User (EU) Form and may be associated with a service specific form.

### 2.3 EU (End User)

This form is prepared by the customer to provide location and the access information for the end user and other provisioning details necessary to provide the requested service.

### 2.4 Loop (LS)

This form is prepared by the customer for the provisioning of the Loop portion (the two-way transmission path, which connects an end user's (EU) premise to an AT&T 9-State's Central Office (CO) location of an EU's service to a new provider.

### 2.5 Loop w/ Number Portability (LSNP)

This form is prepared by the customer to migrate/convert activity of V (ACT V) the unbundled loop portion of an EU's service to a new provider and retain the EU's existing telephone number by porting the telephone number to the CLEC owned switch.

### 2.6 Number Portability (NP)

This form is prepared by the customer to allow the End User who has converted to a facility-based CLEC to retain his current telephone number.

### 2.7 Resale (RS) - (Includes non-Complex and Complex)

This form is prepared by CLECs operating as resellers to provide Basic Exchange POTS (Plain Old Telephone Service) and Integrated Services Digital Network Basic Rate Interface (ISDN BRI) services to the CLEC's EU.

### 2.8 Resale Private Line (RPL)

These services represent a category of analog services primarily to address a variety of voice, data and signals communication needs.

---

## **2.9 Centrex Resale (CRS) - (Includes Centrex ISDN)**

This form is prepared by the customer to order Centrex services to be resold.

## **2.10 Digital Trunking Resale (DTR)**

This form is prepared by the customer to order Digital Trunking services to be resold.

## **2.11 DID/PBX Resale (DPR)**

This form is prepared by the customer to order Private Branch Exchange (PBX), and Direct Inward Dialed (DID) service to be resold.

## **2.12 Resale ISDN PRI (IRS)**

This form is prepared by the customer to order Integrated Services Digital Network Primary Rate Interface (ISDN PRI) to be resold.

## **2.13 Unbundled Local Switching (PS) - (Includes ISDN BRI)**

This form is used prepared by the customer to order unbundled Basic Exchange POTS (Plain Old Telephone Service) and Integrated Services Digital Network Basic Rate Interface (ISDN BRI) services to the CLEC's EU via an Local Switching Port connected to CLEC provided facilities, or a Local Switching Port combined with an unbundled loop provided by AT&T 9-State.

Unbundled Local Switching combined with an unbundled loop may be referred to as Port with Loop or UNE Platform (UNE-P).

## **2.14 DID/PBX Port or Port w/ Loop (DPU)**

This form is used prepared by the customer to order unbundled providing Private Branch Exchange (PBX), and Direct Inward Dialed (DID) services to the CLEC's EU via an Local Switching Port connected to CLEC provided facilities, or a Local Switching Port combined with an unbundled loop provided by AT&T 9-State.

## **2.15 Centrex Port or Port w/ Loop (CUS)**

This form is prepared by the customer to order unbundled providing Centrex services to the CLEC's EU via an Local Switching Port connected to CLEC provided facilities, or a Local Switching Port combined with an unbundled loop provided by AT&T 9-State.

## **2.16 ISDN PRI (IUS) - (Includes REQ TYP 2 and Y)**

This form is prepared by the customer to order unbundled Integrated Services Digital Network Primary Rate Interface (ISDN PRI) services to the CLEC's EU via an Local Switching Port connected to CLEC provided facilities, or a Local Switching Port combined with an unbundled loop provided by AT&T 9-State.

## **2.17 Digital Trunking (DTU) - (Includes DS1 and Port)**

This form is used to order Digital Trunking services to the CLEC's EU via a Local Switching Port connected to CLEC provided facilities, or a Local Switching Port combined with an unbundled loop provided by AT&T 9-State.

## **2.18 Directory Listing (DL)**

This form is prepared by the customer and submitted to the Local Service Center (LSC) for the ordering of directory listing and assistance.

# 3a. Form Description

Local service ordering is presented in the LSOR on a field by field basis. Below is a sample illustrating how all fields are presented. Review section 3.1 for additional explanations of the field page layout (Labels 1-11.)

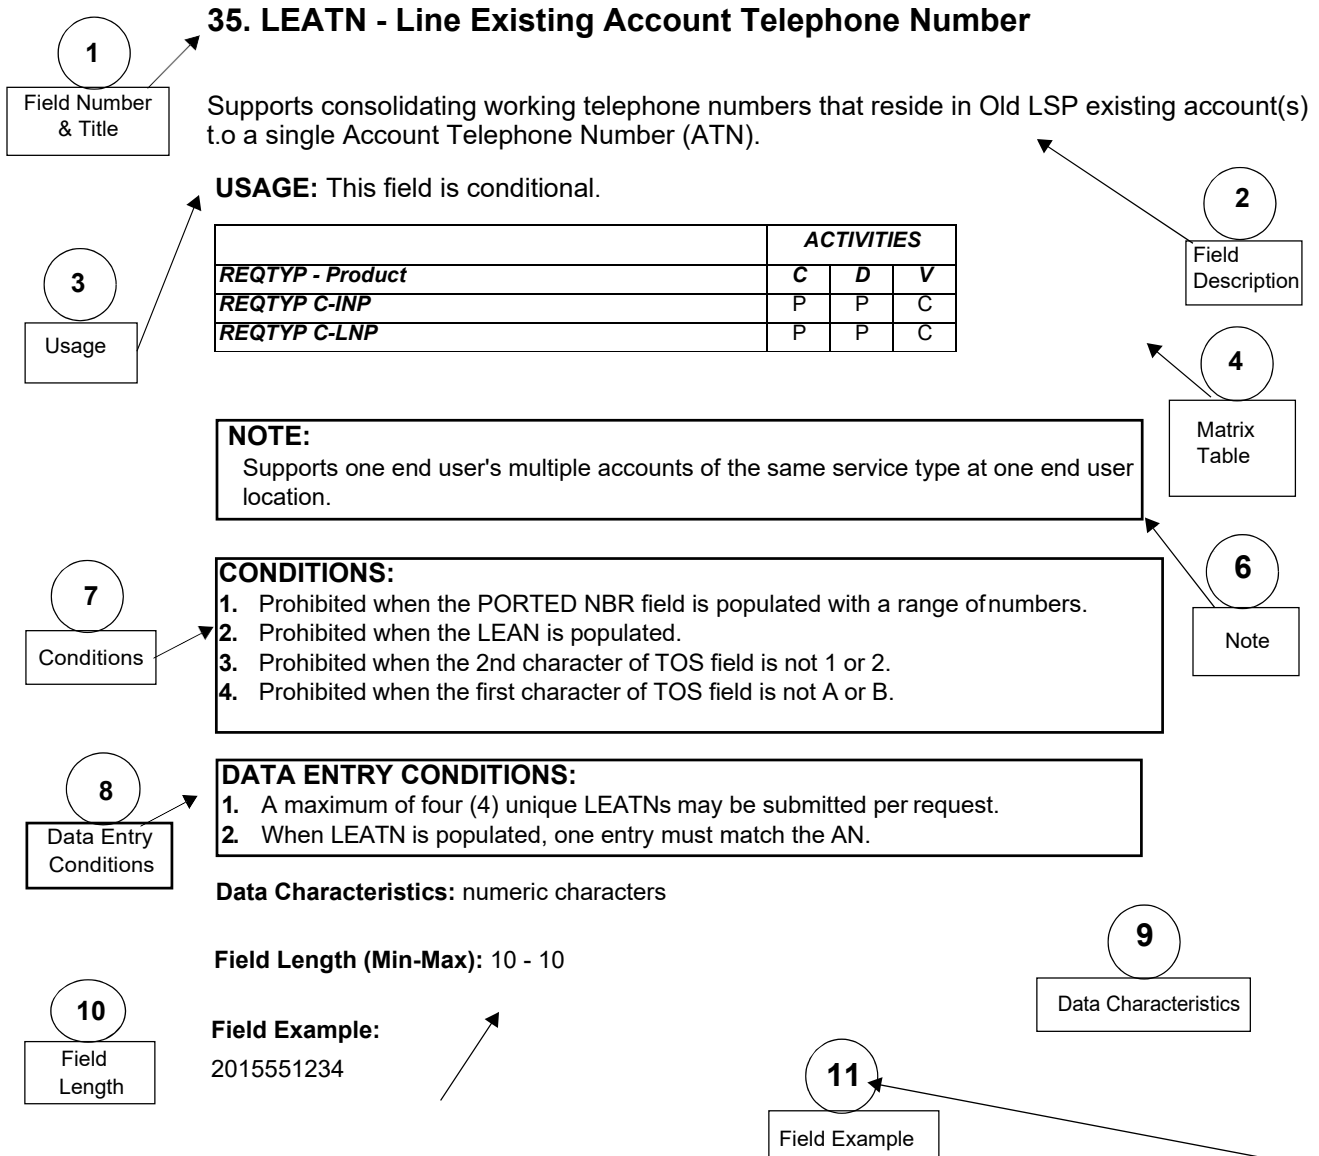

Figure 3-1

---

## 3.1 Field Representation Definitions

### 1) Field Title & Number

The field title includes both the name and the acronym for the field. The field number is associated with the field number and name that occurs on the related ordering forms. Field titles and numbers are taken directly from the Local Service Ordering Guidelines (LSOG). If a field number is followed by an alpha character, that field is not in the LSOG.

### 2) Field Description

The field description identifies and describes the field.

### 3) Usage Line

The usage line indicates a general usage of the field on the Request Types and Activities. The usage is designated based on the following statements. Refer to the matrix for specific usage based on Request Type and Activity.

#### “Usage Line” Legend

- If the matrix table shows “R” (required) for all REQ TYP / ACT combinations, then the Usage line will state “The following field is required”.
- If the matrix table shows “O” (optional) for all REQ TYP / ACT combinations, then the Usage line will state “The following field is optional”.
- If the matrix table shows “N” (not required) for all REQ TYP / ACT combinations, then the Usage line will state “This field is conditional.” See the REQ TYP/ACT table listed below for more details on Not Required fields.
- If the matrix table shows any combination of “R” (required), “O” (optional), “N” (not required), “C” (conditional) or “P” (prohibited), for all REQ TYP/ACT combinations, then the USAGE Line will state “The following field is conditional”.

**Note:** For a complete explanation of Usage for REQ TYP / ACT matrices, refer to Figure 3-3 through Figure 3-5 in the end of this section.

### 4) Matrix Table

The matrix table shows the ordering requirements of the field for the CLEC based on Request Type (REQ TYP) and Activity Type (ACT). See Figure 3-2 for a Matrix Table Example (based on the LSR).

**Legend for REQ TYP/ACT Matrix (Tables)**

The definitions below identify the Request Type and Activity (REQ TYP/ACT) which are applied inside each matrix table using the abbreviations of (R), (O), (C), (N), (P) and  (blank). Refer to the definition table below:

Required ( R )	Field must be populated and data will be edited.
Optional ( O )	If a field is identified as Optional the field may or may not be populated depending on the customer's needs for that REQ TYP and Activity. The field may apply to a specific scenario. When data is entered, it must be valid and will be edited.
Conditional ( C )	The field may or may not be populated based on dependencies of other field(s), data or the needs of the customer. When data is entered, it must be valid and will be edited.
Not Required ( N )	Field is not required (or not applicable) in a scenario. Not required is only shown in REQ TYP/ACT field matrices for "manual only" fields such as PON, VER and PG_of_ and used only on a manually submitted request.
Prohibited ( P )	The field can never be populated for that REQ TYP/ACT combination. If sent, an error will be returned.
<input type="text"/> (Blank)	When a REQ TYP/ACT combination cannot be sent, the matrix for each field will be blank.

**5) Valid Entries**

Valid entries are the data entered into a provided field on a request form to order a certain type of service. Depending on the request type (REQ TYP) and activity type (ACT), each field may have one or more entries at a time. If valid entries are not listed for a field, any data entered in that field must be valid. "Inward" Valid Entries override existing values on the customer's account.

**6) Notes**

If a note(s) is applied to a field then it may offer additional information describing specific ordering limits or instructions provided to the CLEC.

**6a) Note for "Not Used" Fields**

The note "This field is not used by AT&T 9-State at this time" is used to designate "not used" fields, or fields that should not be sent. No other field information follows the note. If data is entered it will be ignored by XML.

**Matrix Table Example** (partial example taken from an LSR Form field matrix)

REQTYP - Product	ACTIVITIES											
	N	C	D	T	R	V	W	S	B	Y	L	
REQTYP A-Analog Designed Loop	C	C	C	C	P	C	C					
REQTYP A-Analog Non-Designed Loop	C	C	C	C	P	C	C					
REQTYP A-Commingled (Non-Channelized) DS3 / STS1 Loops and IOC connected to Wholesale	C	P	C	P	P	P	P					
REQTYP A-Commingled-Ordinarily Combined UNEs (OCU)	C	P	C	P	P	P	P					
REQTYP A-Digital Data Designed Loop (DS0)	C	C	C	C	P	C	C					
REQTYP A-Digital Data Designed Loop (DS1) and (Non-Channelized)	C	C	C	C	P	P	C					
REQTYP A-Digital Designed Loop (Basic Rate ISDN)	C	C	C	C	P	C	C					
REQTYP A-EEL to UNE Re-Termination	P	P	P	P	P	C	P					
REQTYP A-EELs-2w BRI/ISDN	C	C	C	P	P	P	P					
REQTYP B-LNP BSLA-Designed Analog Loop						C						
REQTYP B-LNP BSLA-EELS						C						
REQTYP B-LNP BSLA-ISDN						C						
REQTYP B-LNP BSLA-Non-Designed Analog Loop						C						
REQTYP B-LNP BSLA-UCL-D						C						
REQTYP B-LNP BSLA-UCL-ND						C						

Figure 3-2

**7) Condition Note(s)**

A condition indicates a field has additional rules applied when entering the valid entry for a field. “Condition Note(s)” may appear with a field for the scenarios listed below. Conditions which apply to all states will not include the individual state abbreviations. Conditions pertaining to specific states will be defined by the region state codes when the field usage is defined for the specific product.

- When population of a field is based solely on REQTYP and ACT, the matrix table may be populated with R, O, N or P. Since the use of the field for a given REQTYP/ACT is straightforward and usage is not conditional on another field, there will be no “conditions” for the field (Shown in Example 1, Figure 3-3).
- When a condition is based on criteria other than solely REQTYP/ACT combination(s), a “C” will appear in the matrix which indicates additional condition(s) may be associated with the field. In this scenario, any added rules that apply to the field will be explained in “Condition” notes located below the matrix tables (Shown in Examples 2, 3, and 4). In these cases, additional conditions or data entry conditions may apply for further clarification of the field's usage.
- When a condition does not state “otherwise prohibited” as part of the condition then this condition is considered “otherwise optional”.

## 8) Data Entry Conditions

A "DATA ENTRY CONDITION" is shown when there are rules that apply to the data being entered in a field regardless of whether the field is required, optional or conditional. Once a CLEC has determined that a field is needed to request service, the Data Entry Conditions identify any specific rules of how to enter the data for that field. If there are no specific rules based on the REQTYP/ACT combination, a Data Entry Condition will not be listed. A field could be shown as required (R) for a specific REQTYP/ACT combination and reflect a data entry condition for the data being entered in that field.

For example, the Desired Due Date (DDD) is a required field for all applicable REQTYP/ACT combinations; however, the data in that field must follow certain rules. The date in this field must be valid. This validity is independent of any REQTYP/ACT combination, and must be followed to avoid an error.

If a field has *special* in the Data Characteristics, without a Data Entry Condition referencing which individual characters are allowed, then all special characters are allowed.

## 9) Data Characteristics

The data characteristics indicate the number of positions and the types of characters allowed: alpha/numeric/special.

## 10) Field Length

The field length displays the minimum and the maximum number of characters possible as valid entries.

## 11) Field Example

The field example illustrates a valid entry that might be populated in the field. All examples contained in this document are for illustrative purposes only.

**Example 1:**

**USAGE:** The following field is conditional.

**NOTE**  
 When a field is based solely on REQ TYP and ACT, the usage within the matrix will differ. In this example, the field is Prohibited for all REQ TYPs except ACT or "C", where the field is Required. A Condition is not provided for a REQ TYP/ACT combination because the Matrix will always be populated with a mix of "R" (Required), "O" (Optional), "P" (Prohibited) or "N" (Not Applicable). The usage is not conditional upon anything else.

	<i>ACTIVITIES</i>		
<i>REQ TYP - Product</i>	<i>C</i>	<i>D</i>	<i>V</i>
<i>REQ TYP C-INP</i>	R	P	P
<i>REQ TYP C-LNP</i>	R	P	P

Figure 3-3

**Example 2:**

**NOTE 1**  
When a condition is based on criteria other than REQ TYP/ACT combinations, a value of "C" will appear in the matrix. The "C" indicates that there may be additional conditional notes associated with the field for the indicated REQ TYP/ACT.

**USAGE:** This field is conditional.

<b>ACTIVITIES</b>						
<b>REQ TYP - Product</b>	<b>N</b>	<b>C</b>	<b>D</b>	<b>T</b>	<b>V</b>	<b>W</b>
<b>REQ TYP Z-Primary Rate ISDN-PRI</b>	C	C	C	C	C	C

**CONDITION:**  
This field is required if NPDI field on LSR form is populated and the PTNRACT field equals N.

Associated Condition Note

**Example 3:**

**USAGE:** This field is conditional.

**NOTE 2**  
In some cases, a field may be conditional based on a REQ TYP/ACT combination, and also other criteria. In this example, this field is prohibited in all cases for ACT "T", and the matrix is populated with a "C" for ACTs "N", "C", "where the matrix is populated with a 'C'. The "C" indicates a Conditional Note exists for these REQ TYP's "F" and "M" with ACT "N" and "C".

<b>ACTIVITIES</b>											
<b>REQ TYP - Product</b>	<b>N</b>	<b>C</b>	<b>D</b>	<b>T</b>	<b>R</b>	<b>V</b>	<b>W</b>	<b>S</b>	<b>B</b>	<b>Y</b>	<b>L</b>
<b>REQ TYP F-Port Service</b>	C	C	C			C		P		P	P
<b>REQ TYP M-2-Wire ISDN Basic Rate-BRI Digital Port/Loop UNE Combination</b>	C	C	C	P	P	C	P	P	P	P	P
<b>REQ TYP M-UNE-P/WLP Bus/Res (Switched Combo Bus/Res)</b>	C	C	C	P	P	C	C	P	P	P	P
<b>REQ TYP M-UNE-P/WLP Remote Call Forwarding (RCF Switched)</b>	C	C	C	P	P	C	C	P	P	P	P

**CONDITIONS:**  
1. Prohibited when the BA field is populated with N, Z or when the BA field is left blank.  
2. Prohibited on REQ TYP F and REQ TYP M (Non-Complex) and the LNA is W, B or L.

**NOTE 3**  
The Matrix may have more than one conditional note.

**NOTE 4**  
If the conditions within a Matrix are different by REQ TYP or ACT, the associated conditions will identify the applicable REQ TYP or ACT.

**Example 4:**

**NOTE 1**  
In some cases, a field may be conditional based on a REQ TYP/ACT combination, and also other criteria. In this example, a condition note called a "DATA ENTRY CONDITION" is applied. This type of condition provides specific rules that apply to the data being entered in the field whether the field is required, optional or conditional.

**USAGE:** This field is conditional.

<b>ACTIVITIES</b>											
<b>REQ TYP - Product</b>	<b>N</b>	<b>C</b>	<b>D</b>	<b>T</b>	<b>R</b>	<b>V</b>	<b>W</b>	<b>S</b>	<b>B</b>	<b>Y</b>	<b>L</b>
<b>REQ TYP F-Port Service</b>	C	C	R			C		P	P		P
<b>REQ TYP M-2-Wire ISDN Basic Rate-BRI Digital Port/Loop UNE Combination</b>	C	C	C	P	P	C	P	P	P	P	P
<b>REQ TYP M-UNE-P/WLP Bus/Res (Switched Combo Bus/Res)</b>	C	C	C	P	P	C	C	P	P	P	P
<b>REQ TYP M-UNE-P/WLP Remote Call Forwarding (RCF Switched)</b>	C	C	C	P	P	C	C	P	P	P	P

**NOTE 2**  
When a value of "C" appears in the matrix, the "C" indicates that there is a conditional note associated with the field for the indicated REQ TYP/ACT combination.

**CONDITIONS:**

1. Prohibited when the BA field is populated with N, Z or when the BA field is left blank.
2. Prohibited on REQ TYP F and REQ TYP M (Non-Complex) and the LNA is W, B or L.

**DATA ENTRY CONDITIONS:**

1. BLOCK entry of A, B or C allowed only in first position in this field.
2. BLOCK entry can not be a combination of the same entry.
3. BLOCK is invalid with a BA entry of N or Z.

**NOTE 3**  
These DATA ENTRY CONDITIONS describe the type of entry that can be placed in the field whether the REQ TYP/ ACT combination is required, optional, or conditional.

## 3.2 Request Type & Activity (Codes)

The codes offered in this section represent the Request Type and Activity which are applied in a Matrix Table (refer to "Matrix Table" section of this manual).

### Request Types

REQTYP Code	Request Type Description	Abbreviation
-	Local Service Request Form	LSR
-	Hunt Group Information Form	HGI
-	End User Request Form	EU
A	Loop Service	LS
B	Loop Service w/ Number Portability	LSNP
C	Number Portability	NP
E	Resale Service	RS
F	Port	PS
J	Directory Listing	DL
K	Resale Private Line	RPL
M	Unbundled Network Element Switched Combinations	PS
P	Centrex Resale Services	CRS
R	Digital Trunking Resale	DTR
S	Digital Trunking Port w/ Loop	DTU
T	DID/PBX Resale	DPR
W	DID/PBX Port w/ Loop	DPU
X	Centrex UNE Port w/ Loop	CUS
Y	ISDN PRI Port w/ Loop	IUS
Z	ISDN PRI Resale	IRS
2	ISDN PRI Port	IUS

### Activity Codes

Activity Code	Activity Code Description
N	New Install and/or account
C	Change an existing account, e.g., rearrangement, partial disconnect or addition
D	Disconnect
T	Move of an end user location to a new location, where LSP is not changing
R	Record Activity - ordering administrative changes
V	Conversion of Service to a New LSP
W	Conversion of Service to a New LSP As Is
S	Suspend/Restore Partial Account
B	Restore Full Account/Restore Denied Account
Y	Deny
L	Suspend Full Account

### 3.3 ACT (Activity) Definitions

The following definitions identify the Activity (ACT) for Unbundled Network Elements (UNE) and Resale Services (RS).

#### Activity Definitions

<b>New (N)</b>	UNE:	Ordering complete new unbundled network element(s). This could be a complete new customer or additional line(s) for an existing end user customer.
	Resale:	Ordering new account for an end user customer consisting of single or multiple lines.
<b>Change (C)</b>	UNE:	Request to change a feature or function of an existing UNE element, add an additional UNE element or delete an existing UNE element.
	Resale:	Request for an existing account to change, add or delete an existing Resale service. <b>Note:</b> <i>This includes adding a new line to an existing Resale account. If all lines are removed, then ACT of D is used.</i>
<b>Disconnect (D)</b>	UNE:	Disconnect of an existing unbundled network element(s) at the line level.
	Resale:	Disconnect an account and all lines.
<b>Inside Move</b>	UNE & Resale:	Not applicable in AT&T 9-State.
<b>Outside Move (T)</b>	UNE:	Move of an existing unbundled network element(s) to a new address within the same LATA (Local Access and Transport Area). Moves to an address outside the LATA require 2 separate LSRs - one with ACT D to disconnect service at the existing address, and the other with ACT N for service at the new address. LATA may be obtained from the pre-order address validation. The service at the new address will reflect the individual field values received on the LSR and not what was at the old address.
	Resale:	Move of an existing account to a new address. Moves to an address outside the LATA require 2 separate LSRs - one with ACT D to disconnect service at the existing address, and the other with ACT N for service at the new address. LATA may be obtained from the pre-order address validation. The service at the new address will reflect the individual field values received on the LSR and not what was at the old address.
<b>Record Change (R)</b>	UNE & Resale:	Record Activity is for ordering administrative changes to Directory Listings (DL) or correcting a service address or end user name change.
<b>Conversion to New LSP (V)</b>	UNE:	Converting an existing end user customer from the incumbent CLEC (i.e. AT&T 9-State Region) to the ordering CLEC (Local Service Provider), or from one CLEC to another. This does not allow a telephone number change. The converted service will be based on the individual field values received on the LSR and not what was on the account prior to the conversion.
	Resale:	Converting an existing end user customer from the incumbent CLEC (i.e. AT&T 9-State Region) to the ordering CLEC, and the end user customer wants their service changed. The converted service will be based on the individual field values received on the LSR and not what was on the account prior to the conversion.

<b>Conversion As Is (W)</b>	Resale:	Converting an existing end user customer from the incumbent CLEC (i.e. AT&T 9-State Region) to the ordering CLEC, or from one CLEC to another, and the end user customer wants their service arrangement exactly the same.
<b>Suspend / Restore Partial Account (S)</b>	UNE & Resale:	Partial Suspension and Restoring of an existing account.
<b>Restore (B)</b>	UNE & Resale:	Full Restoring of an existing or denied account.
<b>Deny / Short Term Suspension (Y)</b>	Resale:	Suspension of an existing Resale account for non-payment.
<b>Suspend Account (L)</b>	UNE & Resale:	Full Suspension of an existing account.

Effective 07/21/12

## 3b. REQ TYP/ACT Form Requirements

### 3.4 Form Requirements

#### FORM/ACT Matrix Charts

The Request Type/Activity Form matrix chart illustrates the required, conditional, prohibited and optional forms for ordering services. If a form is identified as Optional the form may or may not be populated depending on the customer's needs for that REQ TYP/ACT. The form may apply to a specific scenario. When data is entered, it must be valid and will be edited. Required forms are always required. Prohibited forms are always prohibited. Any form listed as Conditional is dependent on the conditions listed below the product matrix. Each form shows the Activity Type (ACT) for each Request Type and are defined as Required (R), Optional (O), Conditional (C) or Prohibited (P). Forms may be required or invalid depending on the account level activity and apply to the entire account. Each account level activity has valid Line Level Activities (LNAs). These LNAs determine how/if forms should be populated. A complete list of ACTs and LNAs along with their definitions can be found in the LSOR, Volumes III and IV.

#### REQ TYP A

FORM/ACT	LSR	HGI	EU	LS (A)	LSNP (B)	NP (C)	RS (E)	RS <i>Complex</i> (E)	PS (F&M)	RPL (K)	CRS (P)	DTR (R)	DTU (S)	DPR (T)	DPU (U&W)	CUS (X)	IUS (Y&2)	IRS (Z)	DL

## 4. Electronic Gateway

### 4.1 Extensible Markup Language (XML)

XML is a means for Competitive Local Exchange Carriers (CLEC) to mechanically send requests for Local service to AT&T 9-State.

Information regarding XML processing may be found on the CLEC Online website under CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation, or by contacting the OSS Support Team.

**NOTES:**

1. Local Service Ordering Requirements (LSOR) examples such as telephone number or date/time fields which indicate the use of hyphens are applicable only to orders submitted via LEX or faxed orders. Use of hyphens is not applicable to orders submitted via XML unless the LSOR indicates the use of hyphens in a note, e.g. Hunt Field ranging or CFA Field and all Jeopardy notifications.
2. Any field in the LSOR that has the following note "This field is not used by AT&T 9-State at this time" will be dropped by XML if sent and not passed to downstream systems. An error will not be sent on these fields.
3. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

### 4.1.1 XML Common Header Fields

XML uses Header (HDR) fields for all transactions, both inbound and outbound. Not all of these fields are documented in this LSOR. For a detailed explanation of the XML specific header field usage, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides /Tech Pubs / XML Support Website / Documentation*.

Common Header Fields – All Products - Inbound		
Field Name	Description	Data Characteristics
AN	Account Number	10 or 13 alpha/numeric
ATN	Account Telephone Number	10 numeric
CC	Company Code	4 alpha/numeric
CCNA	Customer Carrier Name Abbreviation	3 alpha
CLEC_APPL_ID	CLEC Application Identification	Up to 32 alpha/numeric
CLEC_APPL_PASSWORD	CLEC Application Password	Up to 16 alpha/numeric
D/TSENT	Date and Time Sent	14 alpha/numeric
MESSAGE_ID	Message Identification	Up to 32 alpha/numeric
MESSAGE_TEXT	Message Text	Up to 264 alpha/numeric/special
MSG_TIMESTAMP	Message Timestamp	Up to 26 alpha/numeric/special
ORD	Order Number	8 alpha/numeric
PON	Purchase Order Number	Up to 16 alpha/numeric
REMARKS	Remarks	Up to 350 alpha/numeric
STATE	State	2 alpha
TEST_PROD_INDICATOR	Test/Production Indicator	1 alpha
TRX_NAME	Transaction Name	3 or 5 alpha
VER	Version Identification	2 numeric

Common Header Fields – All Products - Outbound		
Field Name	Description	Data Characteristics
AN	Account Number	10 or 13 alpha/numeric
ATN	Account Telephone Number	10 numeric
CC	Company Code	4 alpha/numeric
CCNA	Customer Carrier Name Abbreviation	3 alpha
CLEC_APPL_ID	CLEC Application Identification	Up to 32 alpha/numeric
CLEC_APPL_PASSWORD	CLEC Application Password	Up to 16 alpha/numeric
D/TSENT	Date and Time Sent	14 alpha/numeric
LSR NO	Local Service Request Number	Up to 18 alpha/numeric
MESSAGE_ID	Message Identification	Up to 32 alpha/numeric
MESSAGE_TEXT	Message Text	Up to 264 alpha/numeric/special
MSG_TIMESTAMP	Message Timestamp	Up to 26 alpha/numeric/special
ORD	Order Number	8 alpha/numeric
PON	Purchase Order Number	Up to 16 alpha/numeric
REMARKS	Remarks	Up to 350 alpha/numeric
STATE	State	2 alpha
STATUS_CODE	Status Code	2 alpha/numeric
STATUS_MSG	Status Message	100 alpha/numeric
TEST_PROD_INDICATOR	Test/Production Indicator	1 alpha
TRX_NAME	Transaction Name	3 or 5 alpha
TRANS_SETPURPOSE_CODE	Transaction Set Purpose Code	2 alpha/numeric
VER	Version Identification	2 numeric

## 5. AT&T Local Responses

### 5a. AT&T Response Overview

AT&T Southeast will send a variety of electronic responses to CLECs relating to Local Service Requests (LSRs) processed electronically. The following responses may be received for electronically submitted LSR request(s):

- **Billing Completion Notification (BCN)** - Once the electronic LSR has processed through provisioning and cleared all errors, a notice is sent to indicate the request has processed and will post as a CRIS CSR.
- **Completion Notification (CN)** - Once the electronic LSR has all associated work done, a notice is sent to indicate the request has been completed.
- **Firm Order Confirmation (FOC)** - This response will be provided to indicate that the request(s) received are complete and accurate and have been processed by AT&T 9-State as a firm order. This response is returned on an original and/or supplemental request.
- **AT&T Cancel** - CLECs may receive a Cancellation Notification from AT&T 9-State when CLEC responsible jeopardy notifications Status message of 6C 'TN(s) not activated on Due Date' have been previously sent to the CLEC and a period of 30 calendar days has passed with no response from the CLEC.

If a telephone number has not been ported on the day after the due date sent on the Firm Order Confirmation (FOC), AT&T Southeast Region will send a STATUS MESSAGE of '6c' 'TN(s) not activated on Due Date'.

If AT&T Southeast Region has sent the CLEC the 6C STATUS MESSAGE and the CLEC has not ported the telephone number 30 days after the FOC due date, AT&T Southeast Region will send a STATUS MESSAGE of 4Q "TN's Not Activated - Send a SUPP or Activate".

AT&T Southeast Region will cancel the PON and cancel all orders on the 31st day after the FOC due date. In addition, AT&T Southeast Region will also send the CLEC the TRANS-SET-PURPOSE-CODE of CA and the TRAN-ACK-TYPE of AT; the return type will be AT&T Cancel.

The CLEC will need to submit a new LSR request if the telephone number still needs to be ported.

- **Jeopardy Notification (JN)** - This type of response is generated to indicate that something has occurred which might cause the scheduled installation or completion dates of a service order to slip or be missed.
- **Reject/Clarification Notification (RC)** - This type of response is generated to indicate the LSR is either incomplete, incorrect or contains conflicting information which results in AT&T 9-State's inability to issue a service order.
- **Line Loss Notification (LLN)** - This type of notification is generated to the old Local Service Provider (LSP) to indicate that something has occurred resulting in the loss of an end user's line (s) or loop (s). LLN-Resend-AT&T 9-State trading partners will have the ability to request a resend of a line loss notification report. LLN-resends are limited to within 180 calendar days from the original line loss date. Requests for a line loss resend are handled via the IS Call Center at 1.877.681.2271 during the Center's normal hours of operation.

- **Pending Order Status (POS)** - This response provides the customer with information associated with the AT&T 9-State order as it is processed from issuance to completion. This response can be either the initial requester or a revised pending order.
- **Firm Order Acknowledgment (Firm Order ACK)** - This response will be provided to indicate that the LSR is complete and accurate. This acknowledgment is NOT a Firm Order Confirmation (FOC). A FOC will be generated later by AT&T's order processing systems.

If a field is noted as required on its Usage statement, that field is required on the specified output. Elements not shown as required are generally echoed if available on the LSR.

Fields noted as required will always be returned on the indicated response and will be returned blank if there is no associated data to return on the response. If the field is not applicable to a particular response type, it is not included in that corresponding Response Section.

Typically response messages will be returned in upper case letters, however the users should allow for both upper and lower case lettering on the responses.

The following information may be provided for each data element:

<b><u>Name</u></b>	<b><u>Description</u></b>
Description Name	AT&T 9-State field name of the data element
Definition	Definition of the Description Name
Characteristics	Alphabetic / Numeric / Alphanumeric (may include special characters, provided as appropriate for individual data field)
Valid Values	Specific valid values of the field, provided only where applicable
Usage	Defines Usage Matrix or Not Applicable usage of the field on the return

**PLEASE NOTE:** Responses for *unused* fields are included in LSOR Section 5.1 only, and are included only for informational purposes.

Field Examples are included in LSOR Section 5.1 only, and are only for informational purposes.

*This document is intended to reflect in as accurate a manner as possible the return response information. AT&T 9-State and its subsidiaries, affiliates, officers, directors and employees are not liable or responsible for inaccuracies that may be present in this documentation.*

## 5b. Alphabetic/Numeric Cross Reference Index - Local Response Fields

The following table is an alphabetic cross-reference glossary of the local response fields included in the LSOR.

Field Name	Description	5.1 Billing Completion Notification	5.2 Completion Notification	5.3 Firm Order Confirmation	5.4 Jeopardy Notification	5.5 Reject / Clarification Notification	5.6 Line Loss Notification	5.7 Pending Order Status	5.8 Firm Order Acknowl- edgment

## 1. AAN - Associated Account Number

Identifies related accounts for the same end user at the same or different address(s).

**Usage:** This field is required.

**NOTES:**

1. When the AAN field on the LSR is not populated or blank, this field will be returned with all blanks.
2. This field identifies the CRIS Miscellaneous Account Number provided by the CLEC.

**CONDITION:**

When returned, the response information is obtained from the AAN field on the LSR screen and populated in the AAN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 13 - 13

**Field Example:**

404M205555333

## 2. ALI - Alphanumeric Listing Identifier Code

Identifier assigned to uniquely identify each listing for a main listing number from a customer.

**Usage:** This field is required.

**NOTE:**

When the ALI field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The ALI will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the ALI field from the directory listings screen and populate it in the ALI field on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 1 - 3

**Field Example:**

ABC

### 3. AN - Account Number

Identifies the main account number assigned by the NSP.

**Usage:** This field is required.

**NOTE:**

When the AN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the AN field on the LSR screen and populated in the AN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 13 - 13

**Field Example:**

3142359888

## 4. ATN - Account Telephone Number

Identifies the account telephone number assigned by the NSP.

**Usage:** This field is required.

**NOTE:**

When the ATN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the ATN field on the LSR screen and populated in the ATN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2015551212

## 5. BAN1 - Billing Account Number 1

Identifies the billing account to which the recurring and non-recurring charges for this request will be billed.

**Usage:** This field is required.

**NOTES:**

1. When returned, the BAN1 is returned in the following format:  
NPANXX1234123. *Example: 404X254321321*
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the BAN1 field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 13 - 13

**Field Example:**

201Q814587123

## 6. BAN2 - Billing Account Number 2

Identifies the billing account to which the recurring and non-recurring charges for this request will be billed.

**Usage:** This field is required.

**NOTES:**

1. When returned, the BAN2 is returned in the following format:  
NPANXX1234123. *Example: 404X254321321*
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the BAN2 field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 13 - 13

**Field Example:**

201Q814588456

## 7. BI1 - Billing Account Number Identifier 1

Identifies the service type of the billing account number populated in the BAN1 field.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
D	Directory Listings
L	Loop
M	Port Switched Combination
N	Number Portability
P	Port
R	Resale

**NOTE:**

When the BI1 field on the LSR is not populated or blank, this field will be returned with blank.

**CONDITION:**

When returned, the response information is obtained from the BI1 field on the LSR screen and populated in the BI1 field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

L

## 8. BI2 - Billing Account Number Identifier 2

Identifies the service type of the billing account number populated in the BAN2 field.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
<b>D</b>	Directory Listings
<b>L</b>	Loop
<b>M</b>	Port Switched Combination
<b>N</b>	Number Portability
<b>P</b>	Port
<b>R</b>	Resale

**NOTE:**

When the BI2 field on the LSR is not populated or blank, this field will be returned with blank.

**CONDITION:**

When returned, the response information is obtained from the BI2 field on the LSR screen and populated in the BI2 field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

L

## 9. BOPI - Bulk Order Package Identifier

Identifies the customer's unique BULK package ID that authorizes the issuance of this BULK request or supplement.

**Usage:** This field is required.

**NOTE:**

When the BOPI field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITIONS:**

1. This field is only applicable to UNE to UNE Bulk.
2. When returned, the response information is obtained from the BOPI field on the Global LSR screen and populated in the BOPI field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 12

**Field Example:**

000000000Z0

## 10. CABLE ID - Cable Identification

Identifies the provider's cable to be connected to the customer's equipment in a central office location.

**Usage:** This field is required.

**NOTE:**

When the CABLE ID field on the LS or LSNP is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the CABLE ID will be associated with every detail record with a different LNUM in the LS and LSNP screen. The system will obtain this information from the CABLE ID field from the LS and LSNP screen and populate it in the CABLE ID on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

PXX01

## 11. CABLE ID2 - Cable Identification 2

Identifies the provider's cable to be connected to the customer's equipment in a central office location.

**Usage:** This field is required.

**NOTE:**

When the CABLE ID2 field on the LS or LSNP is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the CABLE ID2 will be associated with every detail record with a different LNUM in the LS and LSNP screen. The system will obtain this information from the CABLE ID2 field from the LS and LSNP screen and populate it in the CABLE ID2 on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

PXX01

## 12. CC - Company Code

Identifies the exchange carrier initiating the transaction.

**Usage:** This field is required.

**NOTE:**

When the CC field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the CC field on the LSR screen and populated in the CC field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

1234

### 13. CCEA – Cross Connect Equipment Assignment

Identifies the physical point of termination at a collocation arrangement.

**Usage:** This field is required.

**NOTE:**

When the CCEA field on the DPU or IUS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the CCEA field will be associated with every detail record with a different LNUM in the DPU or IUS screen. The system will obtain this information from the CCEA field from the DPU or IUS screen and populate it in the CCEA field on the response.

**Data Characteristics:** alpha /numeric / special characters

**Field Length (Min-Max):** 10 - 47

**Field Example:**

NVE01/NL-26/1938/SHOKCA01/SHOKCA01W27

## 14. CCNA - Customer Carrier Name Abbreviation

Identifies the COMMON LANGUAGE IAC code for the customer.

**Usage:** This field is required.

**NOTE:**

When the CCNA field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the CCNA field on the LSR screen and populated in the CCNA field on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 3 - 3

**Field Example:**

ZYX

## 15. CFA - Connecting Facility Assignment

Identifies the provider's carrier system and channel to be used.

**Usage:** This field is required.

**NOTE:**

When the CFA field on the LS, LSNP and PS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the CFA will be associated with every detail record with a different LNUM in the Loop, LSNP and Port Service screen. The system will obtain this information from the CFA field from the Loop, LSNP and Port service screen and populate it in the CFA field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 42

**Field Example:**

101/T1/3/HRFRCT03HA1/HRFRCT03DC0

## 16. CHAN/PAIR - Channel/Pair

Identifies the specific channel or pair within the provider's cable to be used for connection.

**Usage:** This field is required.

### NOTES:

1. When the CHAN/PAIR field on the LS or LSNP is not populated or blank, this field will be returned with all blanks.
2. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

### CONDITION:

When returned, the CHAN/PAIR will be associated with every detail record with a different LNUM in the LS and LSNP screen. The system will obtain this information from the CHAN/PAIR field from the LS and LSNP screen and populate it in the CHAN/PAIR on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 4

**Field Example:**

24

## 17. CHAN/PAIR2 - Channel/Pair 2

Identifies the specific channel or pair within the provider's cable to be used for connection.

**Usage:** This field is required.

**NOTES:**

1. When the CHAN/PAIR2 field on the LS or LSNP is not populated or blank, this field will be returned with all blanks.
2. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITION:**

When returned, the CHAN/PAIR2 will be associated with every detail record with a different LNUM in the LS and LSNP screen. The system will obtain this information from the CHAN/PAIR2 field from the LS and LSNP screen and populate it in the CHAN/PAIR2 on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 4

**Field Example:**

24

## 18. CHC - Coordinated Hot Cut

Identifies that the customer is requesting near seamless cutover activity.

**Usage:** This field is required.

**NOTE:**

When the CHC field on the LSR is not populated or blank, this field will be returned blank.

**CONDITION:**

When returned, the response information is obtained from the CHC field on the LSR screen and populated in the CHC field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

Y

## 19. CKR - Customer Circuit Reference (Service Group Section)

Identifies the circuit number or sequential range of circuit numbers assigned by the customer.

**Usage:** This field is required.

**NOTE:**

When the CKR field on the LS, LSNP, NP, PS, RS is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the CKR will be associated with every detail record with a different LNUM in the Loop, LSNP, NP, Port and Resale screen. The system will obtain this information from the CKR field from the Loop, LSNP, NP Port and Resale screen and populate it in the CKR field on the response.

**Data Characteristics:** alpha / numeric /special characters

**Field Length (Min-Max):** 1 - 41

**Field Example:**

L0002

## 20. D/TSENT - Date and Time Sent

Identifies the date and time that the transaction is sent.

**Usage:** This field is required.

**Valid Entries:**

Valid Format:
CCYYMMDDHHAA
CC = Two Digit Century (00-99)
YY = Two Digit Year (00-99)
MM = Two Digit Month (01-12)
DD = Two Digit Day (01-31)
HH = Two Digit Hour (01-12)
MM = Two Digit Minute (00-59)
AM or PM

**NOTE:**

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITION:**

When returned, the system will record this information from the date and time stamp that indicates the date the response was submitted to the system interfacing the CLEC. The system shall populate this date in the D/TSENT field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 14 - 14

**Field Example:**

201103020125PM

## 20a. DACONT INT - Name of Contact at Providing Company (Directory Service)

Identifies the provider's representative that should be contacted on directory assistance listing matters, if different than the DLCONT INIT field.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 20b. DACONT TN - Directory Contact Telephone Number (Directory Service)

Identifies the telephone number of the provider's directory assistance listing contact.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 21. DD/CD - Due Date/Completion Date

Identifies the date the service order requested is due and completed.

**Usage:** This field is required.

**NOTES:**

1. Hyphen (-) is the only special character that may be returned.
2. When the DD or CD is not populated on the AT&T Southeast service order this field will be returned with blanks.
3. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITIONS:**

1. When returned, the DD/CD is returned in the following formats: CCYY-MM-DD or CCYYMMDD. *Example: 7/10/2004 or 20040710.*
2. When returned, the response information is obtained from the AT&T SE service order and populated in the DD/CD field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 10

**Field Example:**

11-10-2008

## 21a. DDQTYR - Number of Delivery Segments Received (Directory Service)

Identifies the number of directory delivery segments received.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 21b. DEMARC - Demarc Designation

Identifies the point where the provider terminates service at the end user premises.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 21c. DISC ECCKT - Disconnect ECCKT (Services Section)

Identifies the end user ECCKT to be disconnected.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 22. DISC NBR - Disconnect Telephone Number (Service Group Section EU)

Identifies the end user telephone number to be disconnected.

**Usage:** This field is required.

**NOTE:**

When the DISC NBR field on the EU screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The DISC NBR will be associated with every detail record with a different DNUM in the EU screen. The system will obtain this information from the DISC NBR field from the EU screen and populate it in the DISC NBR field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2016991234

## 23. DISC NBR - Disconnect Telephone Number (Service Group Section LS)

Identifies the end user telephone number to be disconnected.

**Usage:** This field is required.

**NOTE:**

When the DISC NBR field on the LS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The DISC NBR will be associated with every detail record with a different LNUM in the Loop Services form. The system will obtain this information from the DISC NBR field from the Loop Services screen and populate it in the DISC NBR field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2016991234

## 23a. DISC ORD - Disconnect Order Number

Identifies the provider's order number for the disconnect of end user service associated with this request.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 23b. DLCI - Data Link Connection Identifier (SECLOC)

Identifies the logical connection address between the provider's switch and the ECCKT.

**NOTE:**

This field is not used by AT&T Southeast at this time.

### **23c. DLCONT INT - Name of Contact at Providing Company (Directory Service)**

Identifies the provider's representative that should be contacted on directory/listing matters.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 23d. DLCONT TN - Directory Contact Telephone Number (Directory Service)

Identifies the telephone number of the provider's directory/listing contact.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 24. DLNUM - Directory Listing Reference Number (Directory Section)

Identifies each listing segment as a unique number.

**Usage:** This field is required.

**NOTE:**

When the DLNUM field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The DLNUM will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the DLNUM field from the directory listings screen and populate it in the DLNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

0023

## 25. DLORD - Directory Listing Order Number

Identifies the Directory Listing Service Order number.

**Usage:** This field is required.

**NOTE:**

This field will be returned with all blanks when a directory listing order is not issued.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 20

**Field Example:**

A123B456C

## 25a. DLQTYR - Number of Listings Received (Directory Service)

Identifies the number of listing detail sections (control, instructions and indicator) received for this request.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 26. DNUM - Disconnect Line Number

Identifies the line or trunk as a unique number and each additional occurrence as a unique number.

**Usage:** This field is required.

**NOTE:**

When the DNUM field on the EU screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the DNUM will be associated with every detail record with a different DNUM in the EU form. The system will obtain this information from the DNUM field from the EU form and populate it in the DNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

00023

## 27. DOI - Degree of Indent

Identifies the degree of indentation for this listing.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
0 - 6

**NOTE:**

When the DOI field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the DOI will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the DOI field from the directory listings screen and populate it in the DOI field in the directory listings section on the response.

**Data Characteristics:** numeric character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

1

## 27a. DOR - Date of Receipt (Directory Service)

Identifies the date this directory service request was received.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 27b. DRTN - Distinctive Ring Telephone Number (Service Group Section)

Identifies the additional telephone number(s) associated with unique ringing.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 28. DSGCON - Design/Engineering Contact

Identifies the representative of the customer or agent that should be contacted on design/engineering matters.

**Usage:** This field is required.

**NOTE:**

When the DSGCON field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the response information is obtained from the DSGCON field on the LSR screen and populated in the DSGCON field on the response.

**Data Characteristics:** alpha / special characters

**Field Length (Min-Max):** 1 - 15

**Field Example:**

JOHN SMITH

## 29. DSGCON TEL NO - Design/Engineering Contact Telephone Number

Identifies the telephone number of the provider's design/engineering contact.

**Usage:** This field is required

**Valid Entries:**

Valid Formats:
10 Numeric characters
15 Alpha/Numeric characters

**NOTE:**

When the DSGCON field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the response information is obtained from the DSGCON TEL NO field on the LSR screen and populated in the DSGCON TEL NO field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 15 - 15

**Field Example:**

2019813500X1234

## 29a. DSN - Dialable Station Number

Identifies the dialable one to seven (1-7) digit station digit dialing number.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 29b. DSTN - Disassociated Telephone Number

Identifies the telephone number or range of telephone numbers disassociated from the DID Telephone Number Range.

**NOTE:**

This field is not used by AT&T Southeast at this time.

### 30. EAN - Existing Account Number

Identifies the end user's existing account number.

**Usage:** This field is required.

**Valid Entries:**

Valid Formats:
10 Numeric characters
13 Alpha/Numeric characters

**NOTE:**

When the EAN field on the EU is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the EAN field on the EU screen and populated in the EAN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 13 - 13

**Field Example:**

404M231234123

## 31. EATN - Existing Account Telephone Number

Identifies the end user's existing account telephone number.

**Usage:** This field is required.

**NOTE:**

When the EATN field on the EU is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the EATN field on the EU screen and populated in the EATN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

3142359888

## 32. EBD - Effective Bill Date

Identifies the effective date to begin or cease billing when the billing date is different from the desired due date.

**Usage:** This field is required.

**Valid Entries:**

Valid Format:
CCYYMMDD
CC = Two Digit Century (00-99)
YY = Two Digit Year (00-99)
MM = Two Digit Month (01-12)
DD = Two Digit Day (01-31)

**NOTE:**

When EBD is not populated on the AT&T Southeast service order this field will be returned with blanks.

**CONDITIONS:**

1. When returned, EBD is returned in the following format: CCYYMMDD. *Example: 20040710*
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the EBD field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 8 - 8

**Field Example:**

20081115

### 32a. EC VER - Exchange Carrier Version

Identifies the provider's version and whether the response is a correction, re-send or a reason/jeopardy.

**NOTE:**

This field is not used by AT&T Southeast at this time.

### 33. ECCKT - Exchange Company Circuit ID (Services Section)

Identifies a provider's circuit identification.

**Usage:** This field is required.

**NOTES:**

1. When the ECCKT field is not populated on the Service order for (ACT=N, D, or MI=C or D) and the ECCKT field is not populated or blank on the LS screen, and is required on response, this field will be returned with blanks.
2. Period (.) is the only special character that may be returned.

**CONDITIONS:**

1. Excluding Line Share and Line Splitting, when ECCKT is returned for REQTYP A, and the ACT Type is not N or D and the MI is not C or D, the system will obtain the information from the LS screen and return the information in the ECCKT field on the response.
2. Excluding Line Share and Line Splitting, when ECCKT is returned, the system will obtain this information from the service order for REQTYP A, only when the ACT Type is N or D or the MI is C or D and populate the information in the ECCKT field on the response.
3. When both a telephone number and circuit id number is applicable to the line loss notification, the telephone number will be returned in this field and the circuit id will be returned in the ECCKT field.
4. When ECCKT is returned on REQTYP B, the system will obtain the information from the service order and populate the ECCKT information in the ECCKT field on the response.
5. When the ECCKT is returned and the product is Line Share or Line Splitting, the system will obtain the ECCKT from the AT&T Southeast service order and populate the information in the ECCKT field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 41

**Field Example:**

101.T1.NYCMNY50.NYCMNY54W01

## 34. FDT - Frame Due Time

Identifies the frame cutover time.

**Usage:** This field is required.

**NOTES:**

1. When the FDT is not populated on the AT&T Southeast service order this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.
3. When this field is returned as a range, the 5th position of the field will be a hyphen (-). *Example: 1800-1900*

**CONDITIONS:**

1. (Excluding REQTYP B (LNP)) When returned the response information is obtained from the AT&T Southeast service order and populated in the FDT field on the response.
2. For REQTYP B (LNP), when returned the response information for this field is obtained from the DFDT field on the LSR and populated in the FDT field on the response.
3. When returned, the FDT is returned in military time.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 9

**Field Example:**

1300-1700

### 35. FNUM - Facility Line Number

Identifies the facility as a unique number and each additional occurrence as a unique number.

**Usage:** This field is required.

**NOTE:**

When the FNUM field on the DTR, DTU, IUS or IRS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the FNUM field will be associated with every detail record with a different LNUM in the DTR, DTU, IUS or IRS screen. The system will obtain this information from the FNUM field from the DTR, DTU, IUS or IRS screen and populate it in the FNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 2

**Field Example:**

10

## 36. FOC/CN REMARKS - FOC/CN Remarks

Identifies a free flowing field which can be used to expand upon and clarify other data.

**Usage:** This field is required.

**NOTE:**

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITIONS:**

1. On LSRs, when the system determines that a dispatch is required it will populate 'DISPATCH IS REQUIRED' in the FOC/CN REMARKS field following any other FOC/CN-Remarks on the response. If there is not sufficient space for the message the system will drop the number of characters needed at the end of the other Remarks to populate the 20 characters, DISPATCH IS REQUIRED.

2. The 'ADSL Informational' message will be populated in the FOC/CN-Remarks on the FOC according to the following guidelines:

'Dispatch Required' will remain the last entry in FOC/CN-Remarks if applicable.

'Facility Check' messages, if applicable, will remain immediately in front of 'Dispatch Required' or last if 'Dispatch Required' is not applicable.

'ADSL Informational' message, when applicable, will appear immediately in front of both 'Facility Check' and 'Dispatch Required' messages or immediately in front of 'Facility Check' or 'Dispatch Required' message if only one is required. If neither 'Facility Check' nor 'Dispatch Required' message is applicable, 'ADSL Informational' message will be last entry in FOC/CN-Remarks.

Any remarks on incoming LSR that will be moved to the FOC will be shortened by number of characters required to place any or all of the three messages listed above that apply.

3. The Facility check messages will be populated in the Remarks on the FOC according to the following guidelines:
  - a. If there are no remarks applicable for the FOC/CN-Remarks section of the FOC (that originated from the Remarks on the LSR), the system will place one of the applicable facility checked messages, "Facilities have been checked" or "Facilities have been checked and a PF condition exists" in the FOC/CN REMARKS field on the response.
  - b. If the only remarks applicable for the FOC/CN-Remarks Section of the FOC is, "Dispatch is Required", the system will place one of the applicable facility checked messages "Facilities have been checked" or "Facilities have been checked and a PF condition exists" before the "Dispatch is Required" message.
  - c. If there are remarks applicable for the FOC/CN-Remarks section of the FOC (Remarks from LSR), but no "Dispatch is Required" message present, the system will place one of the applicable facility checked messages "Facilities have been checked" or "Facilities have been checked and a PF condition exists" at the beginning of the Remarks. If adding the facility checked message causes the Remarks section to exceed the number of characters allowed, the system will drop the number of characters needed at the end of the other Remarks.

---

## 36. FOC/CN REMARKS - FOC/CN Remarks (continued...)

**CONDITIONS, Continued**

4. The system will search to obtain this information from the REMARKS field from the LSR screen and populate in it the FOC/CN-REMARKS field on the response.
5. When an LSR is submitted for Non-Complex REQ TYP M, MI= A, B, C, or D, and LNA = C, D, G, N, P, T, V, W, or X where a service order is generated with Outward ('O') action coded FID OADSL in the UNFIELDDED IDENT Section of the AT&T Southeast service order, the system will return the following informational message in the FOC/CN-REMARKS field on the response:

CLEC SHOULD HAVE THE END USER CONTACT THEIR NSP/ISP FOR CHANGES TO THEIR ADSL SERVICE. ADL++ IS NOT VALID WITH UNE PORT SERVICE

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 350

**Field Example:**

CLEC SHOULD HAVE THE END USER CONTACT THEIR NSP/ISP FOR CHANGES TO THEIR ADSL SERVICE. ADSL++ IS NOT VALID WITH UNE PORT SERVICE

## 37. HA - Hunt Group Activity

Identifies the activity associated with the hunt group on this request.

**Usage:** This field is required.

**Valid Entries:**

Valid Values	
<b>C</b>	Change to Hunt Group Sequence
<b>D</b>	Remove Hunt Group Arrangement
<b>E</b>	Existing/No Change
<b>N</b>	New

**NOTE:**

When the HA field on the LSR is not populated or blank and is required on response, this field will be returned with all blanks.

**CONDITION:**

When returned, the HA will be associated with every detail record with a different HNUM in the Hunt Group record. The system will obtain this information from the HA field on the HGI screen and populate it in the HA field on the initial request or a supplement to a request.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

N

## 38. HID - Hunt Group Identifier

Identifies the hunt group.

**Usage:** This field is required.

**NOTE:**

When the HID field on the LSR is not populated or blank and is required on response, this field will be returned with all blanks.

**CONDITION:**

When returned, the HID will be associated with every detail record with a different HNUM in the Hunt Group record. The system will obtain this information from the HGI and populate it in the HID field on the initial request or a supplement to a request.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 4

**Field Example:**

30

### 39. HNUM - Hunt Number

Identifies the hunt group as a unique number and each additional occurrence as a unique number.

**Usage:** This field is required.

**NOTE:**

When the HNUM field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the HNUM will be associated with every detail record that has a different HNUM in the Hunt Group record. The system will obtain this information from the HNUM field on the HGI screen and populate it in the HNUM field on the initial request or a supplement to a request.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

00003

## 40. HTN - Hunt Telephone Number

Identifies the hunting number for this sequence in the hunt group.

**Usage:** This field is required.

**NOTE:**

When the HTN field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the HTN will be associated with every detail record with a different HNUM in the Hunt Line record. The system will obtain this information from the Hunt HTN field on the HGI screen and populate it in the HTN field on the initial request or a supplement to a request.

**Data Characteristics:** alpha / numeric /special characters

**Field Length (Min-Max):** 1 - 15

**Field Example:**

T0001

## 41. HTSEQ - Hunt Sequence

Identifies the desired hunting sequence or range of hunt sequence.

**Usage:** This field is required.

**NOTE:**

When the AAN field on the LSR is not populated or blank and is required on response, this field will be returned with all blanks.

**CONDITION:**

When returned, the HTSEQ will be associated with every detail record with a different HNUM in the Hunt Line record. The system will obtain this information from HTSEQ field on the HGI screen and populate it in the HTSEQ field on the initial request or a supplement to a request.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

0003

## 42. IBT - ISDN BRI Type

Identifies the type of National ISDN-BRI.

**Usage:** This field is required.

**NOTE:**

When the IBT field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the IBT field on the EU screen and populated in the IBT field on the response.

**Data Characteristics:** numeric character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

2

### 43. INIT - Initiator Identification

Identifies the LSP's representative who originated this transaction.

**Usage:** This field is required.

**CONDITION:**

When returned, the response information is obtained from the INIT field on the LSR screen and populated in the INIT LSR field on the response.

**Data Characteristics:** alpha / special characters

**Field Length (Min-Max):** 1 - 15

**Field Example:**

JOHN SMITH

## 44. INIT TEL NO - Initiator Telephone Number

Identifies the telephone number of the initiator.

**Usage:** This field is required.

**Valid Entries:**

Valid Formats:
10 Numeric characters
15 Alpha/Numeric characters

**CONDITION:**

When returned, the response information is obtained from the INIT-TEL NO field on the LSR screen and populated in the INIT-TEL NO LSR field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 15 - 15

**Field Example:**

2019813500

## 45. ISPID - ISDN Service Profile Identification (Service Group Section)

Provides a code that must be programmed into the ISDN BRI Customer Premises Equipment (CPE). This code is transmitted from the CPE over the ISDN BRI D-channel to the LSO switch. It must be present in order for the BRI to become active.

**Usage:** This field is required.

**CONDITION:**

When returned, the ISPID will be associated with every detail record with a different LNUM in the Resale form. The system will obtain this information from the ISPID field from the Resale screen and populate it in the ISPID field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 14

**Field Example:**

70350663550101

## 46. IWBAN - Inside Wiring Bill Account Number

Identifies the billing account number for charges associated with inside wire.

**Usage:** This field is optional.

**CONDITION:**

When returned, the response information is obtained from the IWBAN field on the EU screen and populated in the IWBAN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 13

**Field Example:**

201Q814587123

## 47. LACT - Listing Activity Indicator (Directory Section)

Identifies the activity involved for this listing request.

**Usage:** This field is required. Usage:

**Valid Entries:**

Valid Values:	
<b>N</b>	New Listing
<b>D</b>	Delete Listing (remove existing listing)
<b>I</b>	Change Listing (new data to be inserted)
<b>O</b>	Change Listing (old data to be removed)
<b>Z</b>	No Change to Listing

**NOTE:**

When the LACT field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The LACT will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the LACT field from the directory listings screen and populate it in the LACT field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

N

## 48. LEAN - Line Existing Account Number

Identifies the end user's existing account number assigned by the current NSP and/or LSP.

**Usage:** This field is required.

### NOTES:

1. When the LEAN field on the LSNP, NP, PS, or RS screen is not populated or blank and is required on response, this field will be returned with blanks.
2. Supports consolidated working telephone numbers that reside in Old LSP existing account(s) to a single Account Telephone Number (ATN). Supports one end user's multiple accounts at one end user location.

### CONDITION:

When returned, the LEAN will be associated with every detail record with a different LNUM in the LSNP, NP, Port and Resale screen. The system will obtain this information from the LEAN field from the LSNP, NP, Port and Resale screen and populate it in the LEAN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 13 - 13

**Field Example:**

201M231234

## 49. LEATN - Line Existing Account Telephone Number

Identifies the end user's existing account telephone number assigned by the old LSP.

**Usage:** This field is required.

**NOTES:**

1. When the LEATN field on the LS, LSNP, NP, PS, or RS screen is not populated or blank and is required on response, this field will be returned with blanks.
2. Supports consolidated working telephone numbers that reside in Old LSP existing account(s) to a single Account Telephone Number (ATN). Supports one end user's multiple accounts at one end user location.

**CONDITION:**

When returned, the LEATN will be associated with every detail record with a different LNUM in the Loop, LSNP, NP, Port and Resale screen. The system will obtain this information from the LEATN field from the Loop, LSNP, NP Port and Resale screen and populate it in the LEATN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2015551234

## 49a. LEGNUM - Multi-point Leg Number

Identifies the number assigned by the customer to this leg of a multi-point circuit.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 50. LISTADR - Listed Address (Directory Service)

Identifies the entire address as it is to be listed.

**Usage:** This field is required.

**NOTES:**

1. When the LAPR, LANO, LASF, LASD, LASN, LATH, LASS, LALOC, and LAST fields on the DL screen are not populated or blank and are required on response, this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.

**CONDITION:**

When returned, the LISTADR will be associated with every detail record with a different DLNUM in the DL screen. The LISTADR will be formatted using the LAPR, LANO, LASF, LASD, LASN, LATH, LASS, LALOC, and LAST fields as they appear on the DL screen. The system will format this data in the LISTADR field on the response as follows: When returned the fields will be displayed in the following order: LAPR LANO LASF LASD LASN LATH LASS LALOC LAST.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 150

**Field Example:**

25W 4501/2 SW CAMINO RAMON Ln NW SAN RAMON CA 94583

## 51. LISTNM - Listed Name (Directory Service)

Identifies the name contained in the listing.

**Usage:** This field is required.

**NOTE:**

When the LNLN, LNFN, DES, TL, TITLE1, TITLE2, and NICK fields on the DL screen are not populated or blank and are required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the LISTNM will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the LNLN, LNFN, DES, TL, TITLE1, TITLE2, and NICK fields from the directory listings screen and populate it in the LISTNM field in the directory listings section on the response. When returned the system will format the information in the LISTNM field in the following order: LNLN LNFN DES TL TITLE1 TITLE2 NICK. The system will remove trailing blanks.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 252

**Field Example:**

JANE SMITH

## 51a. LNEX - Line Number Extension Number (SECLOC)

Provides an extension to the line number field (LNUM) for use when multiple ISDN-BRI directory numbers (TNS) are assigned to a single ISDN BRI line for one service order/PON/LNUM.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 52. LNEX - Line Number Extension Number (Services Section)

Provides an extension to the line number field (LNUM) for use when multiple ISDN-BRI directory numbers (TNS) are assigned to a single ISDN BRI line for one service order/ PON/LNUM.

**Usage:** This field is required.

**NOTE:**

When the LNEX field on the PS or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the LNUM will be associated with every detail record with a different LNEX in the Loop, Port and Resale screen. The system will obtain this information from the LNEX field from the Port and Resale form and populate it in the LNEX field in the Services Group record on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

00001

## 52a. LNUM - Line Number (SECLOC)

Identifies the line or trunk as a unique number and each additional occurrence of either as a unique number.

**NOTE:**

This field is not used by AT&T Southeast at this time.

### 53. LNUM - Line Number (Services Section)

Identifies the line or trunk as a unique number and each additional occurrence of either as a unique number.

**Usage:** This field is required.

**Valid Entries:**

<b>Valid Values:</b>
----------------------

00001 - 99999
---------------

**NOTE:**

When the LNUM field on the LS, LSNP, NP, PS, or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the LNUM will be associated with every detail record with a different LNUM in the Loop, LSNP, NP, Port and Resale screen. The system will obtain this information from the LNUM field from the Loop, LSNP, NP, Port and Resale form and populate it in the LNUM field in the Services Group record on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

00118

## 54. LOCNUM - Location Number (Hunt Group Section)

Identifies the service location number for the service requested.

**Usage:** This field is required.

**NOTES:**

1. When the LOCNUM field on the HTI is not populated or blank and is required on response, this field will be returned with all blanks.
2. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITION:**

When returned, the LOCNUM will be associated with each detail record with a different HNUM in the Hunt Group record on the initial request or a supplement to a request. The system will obtain this information from the LOCNUM field on the HGI Screen and will populate it in the LOCNUM field on the HGI Screen and will populate it in the LOCNUM field on the initial request or a supplement to a request.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 3 - 3

**Field Example:**

002

## 54a. LOCNUM - Location Number (SECLOC)

Identifies the service location number for the service requested.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 55. LOCNUM - Location Number (Service Group Section)

Identifies the service location number for the service requested.

**Usage:** This field is required.

**Valid Entries:**

Valid Values
000 - 999

### NOTES:

1. When the LOCNUM field on the LS, LSNP, NP, PS, or RS screen is not populated or blank and is required on response, this field will be returned with all blanks.
2. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

### CONDITION:

When returned, the LOCNUM will be associated with every detail record with a different LNUM in the Loop, LSNP, NP, Port and Resale screen. The system will obtain this information from the LOCNUM field from the Loop, LSNP, NP, Port and Resale form and populate it in the LOCNUM field in the Services Group record on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 3 - 3

**Field Example:**

002

## 56. L-ORD - Loop Order Number (Service Group Section)

Identifies the provider's order number for the loop.

**Usage:** This field is required.

**NOTE:**

When the firm order type is not for REQTYP A, this field will be returned with blanks.

**CONDITIONS:**

1. This field is only applicable on REQTYP A request(s).
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the L-ORD field.

**Data Characteristics:** alpha /numeric characters

**Field Length (Min-Max):** 1 - 8

**Field Example:**

C1234567

## 57. LPHRASE - Listing Phase (Directory Service)

Identifies a predefined phrase associated with a listing.

**Usage:** This field is required.

### Valid Entries:

Valid Values:	
5	Toll Free-Dial '1' & Then
15	Toll Free-Dial '0' & Then
20	Toll Free-Dial Access Code & Then
25	Charges Will Apply-Dial '1' & Then ('900 numbers')
33	No Charge Dial '1' & Then (Florida Only)
35	No Charge for Call Dialed Direct To This Number from (Exchange Name)
45	TDD & Voice
50	TDD Only
65	(City) Tel No
67	Charges Apply-Dial "1" and Then
73	Charges Will Apply
77	Toll & Service Charges Apply
85	At The Tone Dial ---
90	At the Beep Enter Call Back Number
103	(s % See Customer Guide Pages concerning the use of the telephone equip at this no.)
107	(s % See Customer Guide Pages concerning the use of the telephone equip at this no.)

### NOTE:

When the LPHRASE on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

### CONDITIONS:

1. The listing text type group LTXNUM, LXTY, LPHRASE and LTEXT can repeat up to three times.
2. When returned, the LPHRASE will be associated with every detail record with a different LTXNUM in the DL screen. The system will obtain the LPHRASE field information from the LPHRASE field found in the DL screen and will populate this information in the LPHRASE field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 3

**Field Example:**

103

**57a. LSPAN - LSP's Authorization Number**

Identifies the old LSP's authorization Number.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 58. LSR NO - Local Service Request Number

Identifies the number that may be generated by the provider's mechanized systems, pre-assigned to the customer by the provider or manually assigned by the provider to identify a customer's request for service.

**Usage:** This field is required.

**Valid Entries:**

<b>Valid Format:</b>
NNNNNNNNNANNNNN-NN
A = Alpha
N = Numeric

**NOTE:**

Hyphen (-) is the only special character that may be returned.

**CONDITION:**

When returned, the response information is obtained from the LSR NO field on the LSR screen and populated in the LSR NO field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 18

**Field Example:**

20030302L00074-00

## 59. LST - Local Service Termination

Identifies the CLLI code of the end office switch from which the service is being provided.

**Usage:** This field is required.

**CONDITION:**

When returned, the LST will be associated with every detail record with a different LNUM in the LSR screen. The system will obtain this information from the LST field from the administrative section on the LSR screen and populate it in the LST field on the response. The incoming LST field is on the Header level and will be populated on the Detail level on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 11 - 11

**Field Example:**

STLSMO07CG0

## 59a. LST - Local Service Termination (SECLOC)

Identifies the CLLI code of the end office switch from which the service is being provided.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 59b. LTC - Line Treatment Code

Identifies the unique treatment profile code required for this line when the CENTREX common block contains more than one treatment code.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 60. LTEXT - Line of Text (Directory Service)

Identifies the descriptive or informative text that will appear in the directory to assist the end user.

**Usage:** This field is required.

**NOTE:**

When the LTEXT on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITIONS:**

1. The listing text type group LTXNUM, LTXTY, LPHRASE and LTEXT can repeat up to three times
2. When returned, the LTEXT will be associated with every detail record with a different LTXNUM in the DL screen. The system will obtain the LTEXT field information from the LTEXT field found in the DL screen and will populate this information in the LTEXT field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 250

**Field Example:**

CALL BETWEEN 9 AND 5

## 61. LTN - Listed Telephone Number

Identifies the telephone number that may be included in the directory and/or quoted in Directory Assistance (DA).

**Usage:** This field is required.

**NOTE:**

When the LTN field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The LTN will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the LTN field from the directory listings screen and populate it in the LTN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2019813500

## 62. LTXNUM - Line of Text Reference Number (Directory Service)

Identifies each line of information with a unique number.

**Usage:** This field is required.

**NOTE:**

When the LTXNUM field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITIONS:**

1. The listing text type group LTXNUM, LTXTY, LPHRASE and LTEXT can repeat up to three times.
2. The LTXNUM will be associated with every detail record with a different LTXNUM in the DL screen. The system will obtain the LTXNUM field information from the LTXNUM field found in the DL screen and will populate this information in the LTXNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

02

## 63. LXTY - Listing Text Type (Directory Service)

Identifies the type of associated text that will appear in the directory to assist the end user.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
<b>AC</b>	Alternate Call
<b>CR</b>	Cross Reference
<b>DL</b>	Designer Extra Line
<b>DLB</b>	Designer Extra Line Bold
<b>DLS</b>	Designer Extra Line Script
<b>ITX</b>	Indent Text
<b>OP</b>	Other Predefined Phrase
<b>SP</b>	Special Text
<b>TT</b>	Text

**NOTE:**

When the LXTY field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITIONS:**

1. The listing text type group LTXNUM, LXTY, LPHRASE and LTEXT can repeat up to three times
2. The LXTY will be associated with every detail record with a different LTXNUM in the DL screen. The system will obtain the LXTY field information from the LXTY field found in the DL screen and will populate this information in the LXTY field on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 2 - 3

**Field Example:**

ITX

## 64. LTY- Listing Type (Directory Service)

Identifies the type of listing with respect to publication and Directory Assistance (DA) appearance rules.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
1	Listed - Appears in DA and Directory
2	Non-Listed - Appears only in DA
3	Non-Published - Does not appear in directory and the telephone number does not appear in DA

**NOTE:**

When the LTY field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The LTY will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the LTY field from the directory listings screen and populate it in the LTY field on the response.

**Data Characteristics:** numeric character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

1

## 65. MATN - Main/Alternate Telephone Number (Service Group Section)

Indicates the dialable telephone number(s) assigned to the ISDN BRI line. If the same number cannot be used for both B-channels, then the main number will be assigned to B-channel 1 and the alternate number will be assigned to B-channel 2.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
<b>A</b>	Alternate Telephone Number(s)
<b>M</b>	Main Telephone Number

**NOTE:**

When the MATN field on the PS or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the MATN field will be associated with every detail record with a different LNUM in the Port and Resale screen. The system will obtain this information from the MATN field from the Port and Resale screen and populate it in the MATN field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

M

## 66. NAN - New Account Number

Identifies the new account number.

**Usage:** This field is required.

**NOTE:**

When the NAN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the NAN field on the LSR screen and populated in the NAN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2015551234

## 67. NATN - New Account Telephone Number

Identifies the new account telephone number.

**Usage:** This field is required.

**NOTE:**

When the NATN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the NATN field on the LSR screen and populated in the NATN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2055551234

## 67a. NID - Network Interface Device

Indicates if the existing Network Interface Device (NID) will be reused.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 68. NNSP - New Network Service Provider Identification

Identifies the Number Portability Administration Center (NPCA) Service Provider Identifier (SPI) of the new Network Service Provider (NSP).

**Usage:** This field is required.

**NOTE:**

When the NNSP field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITIONS:**

1. This field is applicable to LNP.
2. When returned, this information is obtained from the NNSP field on the LSR and returned in the NNSP field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

8A55

## 69. NOR - Number Of Requests

Identifies the local service request and the total quantity of local service requests within a related group of orders being submitted.

**Usage:** This field is conditional.

**NOTES:**

1. The value returned in this field will be identical to the value submitted on the initial or supplemental LSR.
2. Hyphen (-) is the only special character that may be returned.

**CONDITION:**

This field will only be returned when the REQ TYP is B and the product is Bulk Single LSR arrangement.

**Data Characteristics:** numeric / special characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

01 - 99

## 70. NOTYP - Number Type (Service Group Section)

Identifies the type of telephone number.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
T	Telephone Number
L	Terminal Number

**CONDITION:**

When returned, the NOTYP will be associated with every detail record with a different LNUM in the Resale screen. The system will obtain this information from the NOTYP field on the Resale screen and populate it in the NOTYP field in the Resale section on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

T

## 71. NPORD - Number Portability Order Number (Service Group Section)

Identifies the provider's order number for number portability.

**Usage:** This field is required.

**NOTE:**

This field will be returned with blanks on Reject Notifications and Jeopardy notifications.

**CONDITION:**

When returned, the system will obtain this information from the AT&T Southeast service order and populate the information in the NPORD field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 20

**Field Example:**

**C123456**

## 71a. NSP DSGCON - Network Service Provider (NSP) Design/ Engineering Contact

Identifies the representative of the provider that should be contacted on the design/  
engineering matters.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 72. NSTN - Non-Standard Telephone Number (Directory Section)

Identifies a telephone number which is not in the standard North American Numbering Plan format, e.g., vanity numbers, Enterprise, 911.

**Usage:** This field is required.

**NOTES:**

1. When the NSTN field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.

**CONDITION:**

The NSTN will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the NSTN field from the directory listings screen and populate it in the NSTN field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 18

**Field Example:**

414-227-HELP

## 72a. ONSP - Old Network Service Provider Identification

Identifies the Number Portability Administration Center (NPAC) Service Provider Identifier (SPI) of the current Network Service Provider (NSP).

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 72b. OOR - Out of Range Indicator

Identifies the loop as out of range and additional engineering and/or an extended range card may be required.

**NOTE:**

This field is not used by AT&T Southeast at this time.

### 73. ORD - Order Number

Identifies the provider's order number for the service requested.

**Usage:** This field is required.

**NOTE:**

When an AT&T Southeast Service order has not been generated this field will be returned blank.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order and populated in the ORD field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 8 - 8

**Field Example:**

C1234567

## 73a. ORDL - Line Level Order Number (Service Group Section)

Identifies the provider's order number at the line level.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 74. OTN - Old Telephone Number (Service Group Section)

Identifies the existing telephone number that is being changed.

**Usage:** This field is required.

**NOTE:**

When the OTN field on the PS or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The OTN will be associated with every detail record with a different LNUM in the Port and Resale Services screen. The system will obtain this information from the OTN field from the Port and Resale Services screen and populate it in the OTN on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2016990001

**74a. PG\_of \_ - Page\_of\_**

Identifies the page number and total number of pages contained in this request.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 74b. PGI - Pair Gain Indicator

Identifies whether pair gain will be used for this service.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 75. PID - Personal Identifier (Service Group Section)

Identifies the end user's personal identification number.

**Usage:** This field is required.

**NOTES:**

1. When this information is not populated on the AT&T Southeast service order and this field is required on response, the field will be returned with blanks.
2. This field identifies the authorization number to be utilized with the telephone number provided in the SAT field.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order and returned in the PID field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

4412

## 76. PON - Purchase Order Number

Identifies the customer's unique purchase order or requisition number that authorizes the issuance of this request or supplement.

**Usage:** This field is required.

**NOTE:**

Apostrophe ('), Blank ( ), Comma (,) Hyphen (-), Period (.) and Space ( ) are the only special characters that may be returned.

**CONDITION:**

When returned, the response information is obtained from the PON field on the LSR screen and populated in the PON field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 16

**Field Example:**

824Z9

## 77. PORTED NBR - Ported Telephone Number (Service Group Section)

Identifies the Telephone Number (TN) or consecutive range of TNs residing in the same switch.

**Usage:** This field is required.

**CONDITION:**

When returned, the system will obtain the information from the PORTED NBR field on the LSNP and NP screen and populate the information in the PORTED NBR field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10- 10

**Field Example:**

908699700

## 77a. RCODE - Reason Code

Identifies the reason the order may not meet the requested due date at confirmation and/or post confirmation.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 77b. RDET - Reason Jeopardy Code Detail

Identifies further detail for the service when the reason/jeopardy code for the order is not defined.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 77c. RDLCI - Related Data Link Connection Identifier (SECLOC)

Identifies the logical connection address between the provider's switch and the RECCKT.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 77d. RDT - Response Date

Identifies the date the customer has to respond to the associated provider notification, when the customer wants to retain the loop of the previous line shared service.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 77e. RDY - Response Days

Identifies the number of days the customer has to respond to the associated provider notification, when the customer wants to retain the loop of the previous line shared service.

**NOTE:**

This field is not used by AT&T Southeast at this time.

**77f. RECCKT - Related Circuit ID (SECLOC)**

Identifies the provider's related physical circuit ID against which the virtual circuit activity is requested.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 78. RELAY RACK - Relay Rack (Service Group Section)

Identifies the bay/cabinet in a central office and may include the floor and aisle where the specific piece of equipment is located.

**Usage:** This field is required.

**NOTES:**

1. When the RELAY RACK field on the LS or PS screen is not populated or blank and is required on response, this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.

**CONDITION:**

When returned, the RELAY RACK field will be associated with every detail record with a different LNUM in the LS and PS screen. The system will obtain this information from the RELAY RACK field from the LS and PS screen and populate it in the RELAY RACK field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 10

**Field Example:**

10052-03

## 79. REP - Provider Contact Representative

Identifies the provider's representative handling this service request.

**Usage:** This field is required.

**Valid Entries:**

<b>Valid Value:</b>
LCSC

**CONDITION:**

When returned, the response information is returned as LCSC and populated in the REP field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 15

**Field Example:**

LSCS

## 80. REP TEL NO - Representative Telephone Number

Identifies the telephone number of the provider's representative handling this request.

**Usage:** This field is required.

**CONDITION:**

When returned, this information is obtained from the CLEC profile and returned in the REPTTEL NO field.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

4045551234

## 81. RESID - Response Identifier

Identifies the response number assigned by the provider to relate to associated transactions.

**Usage:** This field is required.

**NOTE:**

When the RESID field on the LSR is not populated or blank and the field is required on response, this field will be returned with all blanks.

**CONDITION:**

When returned, this information is obtained from the RESID field on the LSR and returned in the RESID field on the initial request or a supplement to a request.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 20

**Field Example:**

123ABC

## 81a. RT - Response Type

Identifies the type of response sent to the customer.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 82. RTI - Route Index

Identifies the routing index to be used by the provider's switching equipment to forward/port the provider's telephone number to the customer's non-RCF trunk group.

**Usage:** This field is required.

**NOTE:**

When the RTI field on the LSNP or NP screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the RTI field will be associated with every detail record with a different LNUM in the LSNP or NP screen. The system will obtain this information from the RTI field from the LSNP or NP screen and populate it in the RTI field on the response.

**Data Characteristics:** alpha /numeric characters

**Field Length (Min-Max):** 1 - 6

**Field Example:**

215

### 83. SAT - Subscriber Access Telephone Number (Service Group Section)

Identifies the telephone number, which allows remote access to make feature configuration changes.

**Usage:** This field is required.

**NOTE:**

When this information is not populated on the service order and this field is required on response, the field will be returned with blanks.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order and returned in the SAT field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

4045551234

## 84. SCFA - Secondary Connecting Facility Assignment

Identifies the carrier system and channel to be used from a Wideband Analog or High Capacity Facility for a thru-connect configuration.

**Usage:** This field is required.

**NOTE:**

When the SCFA field on the LS or RPL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the SCFA field will be associated with every detail record with a different LNUM in the LS or RPL screen. The system will obtain this information from the SCFA field from the LS or RPL screen and populate it in the SCFA field on the response.

**Data Characteristics:** alpha /numeric / special characters

**Field Length (Min-Max):** 1 - 42

**Field Example:**

101/T1/3/BSTMAGTOGP/BSTMATCG0

## 85. SHELF - Shelf (Service Group Section)

Identifies the number assigned to the shelf within the relay rack.

**Usage:** this field is required.

**Valid Entries:**

Valid Formats:
2 Numeric characters
6 Alpha/Numeric characters

**NOTE:**

When the SHELF field on the LS or PS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the SHELF field will be associated with every detail record with a different LNUM in the LS or PS screen. The system will obtain this information from the SHELF field from the LS or PS screen and populate it in the SHELF field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 2 - 2 or 6 - 6

**Field Example:**

12

## 86. SLOT - Slot (Service Group Section)

Identifies the specific connection slot of the shelf to be used.

**Usage:** This field is required.

**NOTE:**

When the SLOT field on the LS or PS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the SLOT field will be associated with every detail record with a different LNUM in the LS or PS screen. The system will obtain this information from the SLOT field from the LS or PS screen and populate it in the SLOT field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 6

**Field Example:**

009

## 87. SLTN - Shared Line Telephone Number (Service Group Section)

Identifies the end user telephone number(s) for line sharing or line splitting.

**Usage:** This field is required.

**NOTE:**

When the SLTN field on the LS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:** When returned, the SLTN field will be associated with every detail record with a different LNUM in the LS screen. The system will obtain this information from the SLTN field from the LS screen and populate it in the SLTN field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 12 - 12

**Field Example:**

201-555-1234

## 87a. SPORT - Slot Port

Identifies the customer's specific connection part of the slot to be used.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 87b. SQTYP - Service Address Quantity Received (Directory Service)

Identifies the quantity of service address segments received for this request.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 87c. ST - Switch Type

Identifies the name of the service switch.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 88. STATUS CODE - Status Code

Indicates the status code of the order.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
AO
CA
CB
CD
CF
CI
CK
CL
CM
CP
CS
CY
PD
PF
SA
SL
SO
SR

**CONDITION:**

When returned the system will obtain the status from the AT&T Southeast service order and will place it in the status code field on the response of a FOC, CN, POS, BCN, Jeopardy, or Clarification.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

AO

## 89. STATUS MSG - Status Message

Indicates the status message associated with the status code.

**Usage:** This field is required.

### NOTE:

Due to the REQ TYP C Porting process, a Status Code will not exist until after the CLEC activates the telephone number.

### CONDITIONS:

1. When multiple Jeopardy messages are returned the system will format them as follows: The 2 character code indicating the type of message, followed by a space and the message, followed by a space and another type and another message up to the 100 A/N character limit.  
  
*Example: 1Q ASSIGNMENT PROBLEM 2C BUSY CABLE AND/OR PAIR 2D LOOP IS TOO LONG 2G ADDRESS IS INVALID 2H BASIC*
2. When the LSR is in an RPON group and one of the PONs is placed in Jeopardy status, the following Jeopardy message will be sent: PON XXXXXXXX IS IN JEOPARDY STATUS, ALL RELATED PONS IN RPON GROUP RETURNED
3. When the STATUS CODE is AO the following response is populated in the STATUS-MSG field: ASSIGNABLE ORDER
4. When the STATUS CODE is AO, PD, CP, or PF and the AT&T Southeast Service order Status has an error prefix of E, F, or O and the system has determined that the order is in jeopardy, one or more of the following jeopardy responses may be returned on the JN.
  - 1A INTEROFFICE FACILITY SHORTAGE
  - 1B SCHEDULING/WORK LOAD
  - 1C CUSTOMER (LSP) NOT READY
  - 1D NO LOOP AVAILABLE
  - 1E END USER NOT READY
  - 1F NSP MISSED APPOINTMENT
  - 1G NO ACCESS TO END USER
  - 1H CENTRAL OFFICE FREEZE
  - 1J SPECIAL CONSTRUCTION
  - 1K NATURAL DISASTER
  - 1L FRAME DUE TIME CANNOT BE MET
  - 1M REQUESTED DD IS LESS THAN PUBLISHED INTERVAL
  - 1N DD AND FRAME DUE TIME CANNOT BE MET
  - 1P OTHER
  - 1Q ASSIGNMENT PROBLEM
  - 1R CUSTOMER COULD NOT BE REACHED AT REACH NUMBER
  - 1S BUILDING NOT READY, CUSTOMER WILL ADVISE
  - 1T POLE AT TRAILER SITE NOT SET
  - 1W ENTRANCE FACILITIES REQUIRED

**89. STATUS MSG - Status Message (continued...)****CONDITIONS (continued):**

- 1X NOT TECHNICALLY FEASIBLE
- 1Y NO CENTRAL OFFICE EQUIPMENT AVAILABLE
- 1Z LOOP REQUIRES INSTALLATION OF ADDITIONAL EQUIPMENT
- 2A LSR ERROR INCORRECT OR MISSING INFORMATION
- 2B FACILITY WORK ORDER PENDING NO BONA FIDE REQUEST (BFR) REQUIRED
- 2C BUSY CABLE ID
- 2E LOOP IS TOO LONG
- 2F INVALID OR WORKING SPLITTER
- 2G ADDRESS IS INVALID
- 2H BASIC ADDRESS IS VALID BUT LOC IS NEEDED
- 4Q TN(S) NOT ACTIVATED - SEND A SUPP OR ACTIVATE
- 6C TN(S) NOT ACTIVATED ON DUE DATE

5. When the STATUS CODE is CA and the AT&T Southeast service order status is MA the following response is populated in the STATUS-MSG field: MISSED APPOINTMENT ORDER -CA

COMPANY ASSIGNMENT

When the STATUS CODE is CA and the AT&T Southeast service order status is CA the following response is populated in the STATUS-MSG field: CANCELLED ORDER

6. When the STATUS CODE is CB the following response is populated in the STATUS-MSG field:

MISSED APPOINTMENT ORDER -CB

COMPANY BUSINESS OFC

7. When the STATUS CODE is CD the following response is populated in the STATUS-MSG field:

MISSED APPOINTMENT ORDER -CD

COMPANY DESIGNED

8. When the STATUS CODE is CF the following response is populated in the STATUS-MSG field:

MISSED APPOINTMENT ORDER -CF

COMPANY FACILITIES

9. When the STATUS CODE is CI the following response is populated in the STATUS-MSG field:

MISSED APPOINTMENT ORDER -CI

COMPANY INDEPENDENT

10. When the STATUS CODE is CK the following response is populated in the STATUS-MSG field:

MISSED APPOINTMENT ORDER -CK

COMPANY FACILITIES - ISDN BRI SERVICE

**89. STATUS MSG - Status Message (continued...)****CONDITIONS (continued):**

11. When the STATUS CODE is CL the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CL  
COMPANY LOAD
12. When the STATUS CODE is CM the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CM  
COMPANY MECHANIZATION
13. When the STATUS CODE is CO the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CO  
COMPANY OTHER
14. When the STATUS CODE is CP and the AT&T Southeast service order status is CP, CPX or PCX the following response is populated in the STATUS-MSG field:  
Completed Order
15. When the STATUS CODE is CP and the AT&T Southeast service order status is HPCX or IPCX the following response is populated in the STATUS-MSG field:  
BILLING/RECORDS COMPLETE
16. When the STATUS CODE is CS the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CS  
COMPANY SWITCHING
17. When the STATUS CODE is CX the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CX  
COMPANY EXCEPTIONAL
18. When the STATUS CODE is CY the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CY  
CUSTOMER DESIRED DUE DATE MISSED - FOC DATE TO FOLLOW
19. When the STATUS CODE is PD and the AT&T Southeast the following response is populated in the STATUS-MSG field:  
Pending Order
20. When the STATUS CODE is PF and the AT&T Southeast the following response is populated in the STATUS-MSG field:  
PENDING FACILITIES ORDER
21. When the STATUS CODE is SA the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -SA  
SUBSCRIBER ACCESS 860 REQUIRED

**89. STATUS MSG - Status Message (continued...)****CONDITIONS** (continued):

- 22.** When the STATUS CODE is SL the following response is populated in the STATUS-MSG field:
- MISSED APPOINTMENT ORDER -SL
  - SUBSCRIBER REQUEST LATER DATE 860 REQUIRED
- 23.** When the STATUS CODE is SO the following response is populated in the STATUS-MSG field:
- MISSED APPOINTMENT ORDER -SO
  - SUBSCRIBER OTHER 860 REQUIRED
- 24.** When the STATUS CODE is SR the following response is populated in the STATUS-MSG field:
- MISSED APPOINTMENT ORDER -SR
  - SUBSCRIBER NOT READY 860 REQUIRED

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 100

**Field Example:**

1J SPECIAL CONSTRUCTION

## 90. STYC - Style Code (Directory Service)

Identifies whether the listing provided is a straight line, Straight Line Under (SLU) header, caption header, etc..

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
CI	Caption Indent
SH	SLU Header
SI	SLU Indent
SL	Straight Line

**NOTE:**

When the STYC field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The STYC will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the STYC field from the directory listings screen and populate it in the STYC field on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

SL

## 91. SYSTEM ID- System Identification (Service Group Section)

Identifies the customer's system to be used in a collocation arrangement.

**Usage:** This field is required.

**NOTE:**

When the SYSTEM ID field on the LS or PS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the SYSTEM ID field will be associated with every detail record with a different LNUM in the LS and PS screen. The system will obtain this information from the SYSTEM ID field from the LS and PS screen and populate it in the SYSTEM ID field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

CA101

## 91a. TDTR - Ten Digit Trigger Response

Identifies the activation of a ten digit trigger for local routing number portability.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 92. TER - Terminal Number (Service Group Section)

Identifies the number for a non-lead line in a multi-line hunt group or consecutive range of terminal numbers associated with the TNS field for this request.

**Usage:** This field is required.

**NOTES:**

1. When the TER field on the LS screen is not populated or blank and is required on response, this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.

**CONDITION:**

When returned, the TER field will be associated with every detail record with a different LNUM in the LS screen. The system will obtain this information from the TER field from the LS screen and populate it in the TER field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 10

**Field Example:**

05718-1000

### 93. TERS - Terminal Numbers (Service Group Section)

Identifies the number for a non-lead line in a multi-line hunt group or consecutive range of terminal numbers.

**Usage:** This field is required.

**NOTE:**

When the TER field on the PS or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TERS field will be associated with every detail record with a different LNUM in the Port and Resale screen. The system will obtain this information from the TERS field from the Port and Resale screen and populate it in the TERS field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 10

**Field Example:**

T0001

## 94. TEST PROD INDICATOR - Test Production Indicator

Identifies whether the transaction is production or test.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
P	Production
T	Test

**CONDITION:**

When returned, the system auto populates information in this field.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

T

## 95. TLI - Telephone Line Identifier

Indicates the pilot number of a multi-line hunt group.

**Usage:** This field is required.

**NOTE:**

When the TLI field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TLI will be associated with every detail record with a different HNUM in the Hunt Group record. The system will obtain the TLI information on the HGI screen and populate it in the TLI field of the Hunt Group record on the initial request or a supplement to a request.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

4045551212

## 95a. TNC - Telephone Number Change

Identifies the end users new telephone number.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 96. TNS - Telephone Numbers (Service Group Section)

Identifies the telephone number (TN) / terminal number (TER) / ISDN BRI directory number or sequential range of TNs / TERs for this request.

**Usage:** This field is required.

**NOTE:**

When the TNS field on the PS or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TNS will be associated with every detail record with a different LNUM in the Port and Resale screen. The system will obtain this information from the TNS field from the Port and Resale screen and populate it in the TNS field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2016990001

## 97. TOA - Type of Account (Directory Service)

Identifies the type of account for this listing.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
<b>B</b>	Business Firm Name
<b>BP</b>	Business Class, Person Name
<b>R</b>	Residence
<b>RP</b>	Residence Class, Business Firm Name

**NOTE:**

When the TOA field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TOA will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the TOA field from the directory listings screen and populate it in the TOA field in the directory listings section on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 1 - 2

**Field Example:**

BP

## 98. TRANS ACK TYPE - Transaction Activity Type

Identifies transaction activity.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
AC
AH
AT
NA
RD

### NOTE:

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

### CONDITIONS:

1. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AH, the return type is Clarification (860 required)
2. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AT, the return type is Accepted FOC.
3. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is RD, the return type is Reject (850 required)
4. When TRANS-SET-PURPOSE-CODE is 08 and the TRANS-ACK-TYPE is NA, the return type is Status or POS (Pending Order Status)  
No action required.
5. When TRANS-SET-PURPOSE-CODE is 21 and the TRANS-ACK-TYPE is AC, the return type is Jeopardy (New Due Desired Date Required)
6. When TRANS-SET-PURPOSE-CODE is 53 and the TRANS-ACK-TYPE is AT, the return type is Billing Completion.
7. When TRANS-SET-PURPOSE-CODE is CN and the TRANS-ACK-TYPE is AT, the return type is Completion.
8. When TRANS-SET-PURPOSE-CODE is CA and the TRANS-ACK-TYPE is AT, the return type is AT&T Cancel.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

AC

## 99. TRANS SET PURPOSE CODE - Transaction Set Purpose Code

Identifies the transaction set purpose code.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
06
08
21
53
CN
CA

### NOTE:

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

### CONDITIONS:

1. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AH, the return type is Clarification (860 required)
2. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AT, the return type is Accepted FOC.
3. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is RD, the return type is Reject (850 required)
4. When TRANS-SET-PURPOSE-CODE is 08 and the TRANS-ACK-TYPE is NA, the return type is Status or POS (Pending Order Status)  
No action required.
5. When TRANS-SET-PURPOSE-CODE is 21 and the TRANS-ACK-TYPE is AC, the return type is Jeopardy (New Due Desired Date Required)
6. When TRANS-SET-PURPOSE-CODE is 53 and the TRANS-ACK-TYPE is AT, the return type is Billing Completion.
7. When TRANS-SET-PURPOSE-CODE is CN and the TRANS-ACK-TYPE is AT, the return type is Completion.
8. When TRANS-SET-PURPOSE-CODE is CA and the TRANS-ACK-TYPE is AT, the return type is AT&T Cancel.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

06

**99a. UNIT - Unit**

Identifies the number assigned to a panel, shelf or case within the bay/cabinet indicated in the Relay Rack field.

**NOTE:**

This field is not used by AT&T Southeast at this time.

## 100. VER - Version Identification

Identifies the customer's version number.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
00 - 99
Blank or Space

**NOTE:**

When the VER field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the VER field on the LSR screen and populated in the VER field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

01

## 101. WPP - White Pages Products (Directory Service)

Identifies information about the white page products, signature listings, personality logo and lines of distinction.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
<b>DB</b>	Designer Bold
<b>DBP</b>	Designer Bold Plus
<b>DS</b>	Designer Script
<b>DSP</b>	Designer Script Plus

**NOTE:**

When the TOA field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TOA will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the TOA field from the directory listings screen and populate it in the TOA field in the directory listings section on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 1 - 3

**Field Example:**

DP

## 5.2 Completion Notification (CN)

### Completion Notification (CN) Fields

Field Abbreviation	Field #	Field Name
AAN	1	Associated Account Number
ALI	2	Alphanumeric Listing Identifier Code
AN	3	Account Number
ATN	4	Account Telephone Number
BAN1	5	Billing Account Number 1
BAN2	6	Billing Account Number 2
BI1	7	Billing Account Number Identifier 1
BI2	8	Billing Account Number Identifier 2

VER	100	Version Identification
WPP	101	White Pages Products (Directory Service)

## 1. AAN - Associated Account Number

Identifies related accounts for the same end user at the same or different address(s).

**Usage:** This field is required.

**NOTES:**

1. When the AAN field on the LSR is not populated or blank, this field will be returned with all blanks.
2. This field identifies the CRIS Miscellaneous Account Number provided by the CLEC.

**CONDITION:**

When returned, the response information is obtained from the AAN field on the LSR screen and populated in the AAN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 13 - 13

**Field Example:**

404M205555333

## 2. ALI - Alphanumeric Listing Identifier Code

Identifier assigned to uniquely identify each listing for a main listing number from a customer.

**Usage:** This field is required.

**NOTE:**

When the ALI field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The ALI will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the ALI field from the directory listings screen and populate it in the ALI field on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 1 - 3

**Field Example:**

ABC

### 3. AN - Account Number

Identifies the main account number assigned by the NSP.

**Usage:** This field is required.

**NOTE:**

When the AN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the AN field on the LSR screen and populated in the AN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 13 - 13

**Field Example:**

3142359888

## 4. ATN - Account Telephone Number

Identifies the account telephone number assigned by the NSP.

**Usage:** This field is required.

**NOTE:**

When the ATN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the ATN field on the LSR screen and populated in the ATN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2015551212

## 5. BAN1 - Billing Account Number 1

Identifies the billing account to which the recurring and non-recurring charges for this request will be billed.

**Usage:** This field is required.

**NOTES:**

1. When returned, the BAN1 is returned in the following format:  
NPANXX1234123. *Example: 404X254321321*
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the BAN1 field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 13 - 13

**Field Example:**

201Q814587123

## 6. BAN2 - Billing Account Number 2

Identifies the billing account to which the recurring and non-recurring charges for this request will be billed.

**Usage:** This field is required.

**NOTES:**

1. When returned, the BAN2 is returned in the following format:  
NPANXX1234123. *Example: 404X254321321*
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the BAN2 field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 13 - 13

**Field Example:**

201Q84588456

## 7. BI1 - Billing Account Number Identifier 1

Identifies the service type of the billing account number populated in the BAN1 field.

**Usage:** This field is required.

**Valid Entries:**

Valid Values	
D	Directory Listings
L	Loop
M	Port Switched Combination
N	Number Portability
P	Port
R	Resale

**NOTE:**

When the BI1 field on the LSR is not populated or blank, this field will be returned with blank.

**CONDITION:**

When returned, the response information is obtained from the BI1 field on the LSR screen and populated in the BI1 field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

L

## 8. BI2 - Billing Account Number Identifier 2

Identifies the service type of the billing account number populated in the BAN2 field.

**Usage:** This field is required.

**Valid Entries:**

Valid Values	
D	Directory Listings
L	Loop
M	Port Switched Combination
N	Number Portability
P	Port
R	Resale

**NOTE:**

When the BI2 field on the LSR is not populated or blank, this field will be returned with blank.

**CONDITION:**

When returned, the response information is obtained from the BI2 field on the LSR screen and populated in the BI2 field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

L

## 9. BOPI - Bulk Order Package Identifier

Identifies the customer's unique BULK package ID that authorizes the issuance of the BULK request or supplement.

**Usage:** This field is required.

**NOTE:**

When the BOPI field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITIONS:**

1. This field is only applicable to UNE to UNE Bulk.
2. When returned, the response information is obtained from the BOPI field on the Global LSR screen and populated in the BOPI field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 12

**Field Example:**

000000000Z0

## 10. CABLE ID - Cable Identification

Identifies the provider's cable to be connected to the customer's equipment in a central office location.

**Usage:** This field is required.

**NOTE:**

When the CABLE ID field on the LS or LSNP is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the CABLE ID will be associated with every detail record with a different LNUM in the LS and LSNP screen. The system will obtain this information from the CABLE ID field from the LS and LSNP screen and populate it in the CABLE ID on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

PXX01

## 11. CABLE ID2 - Cable Identification 2

Identifies the provider's cable to be connected to the customer's equipment in a central office location.

**Usage:** This field is required.

**NOTE:**

When the CABLE ID2 field on the LS or LSNP is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the CABLE ID2 will be associated with every detail record with a different LNUM in the LS and LSNP screen. The system will obtain this information from the CABLE ID2 field from the LS and LSNP screen and populate it in the CABLE ID2 on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

PXX01

## 12. CC - Company Code

Identifies the exchange carrier initiating the transaction.

**Usage:** This field is required.

**NOTE:**

When the CC field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the CC field on the LSR screen and populated in the CC field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

1234

### 13. CCEA – Cross Connect Equipment Assignment

Identifies the physical point of termination at a collocation arrangement.

**Usage:** This field is required.

**NOTES:**

When the CCEA field on the DPU or IUS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the CCEA field will be associated with every detail record with a different LNUM in the DPU or IUS screen. The system will obtain this information from the CCEA field from the DPU or IUS screen and populate it in the CCEA field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 10 - 47

**Field Example:**

NVE01/NL-26/1938/SHOKCA01W27

## 14. CCNA - Customer Carrier Name Abbreviation

Identifies the COMMON LANGUAGE IAC code for the customer.

**Usage:** This field is required.

**NOTE:**

When the CCNA field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the CCNA field on the LSR screen and populated in the CCNA field on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 3 - 3

**Field Example:**

ZYX

## 15. CFA - Connecting Facility Assignment

Identifies the provider's carrier system and channel to be used.

**Usage:** This field is required.

**NOTE:**

When the CFA field on the LS, LSNP and PS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the CFA will be associated with every detail record with a different LNUM in the Loop, LSNP and Port Service screen. The system will obtain this information from the CFA field from the Loop, LSNP and Port service screen and populate it in the CFA field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 42

**Field Example:**

101/T1/3/HRFRCT03HA1/HRFRCT03DC0

## 16. CHAN/PAIR - Channel/Pair

Identifies the specific channel or pair within the provider's cable to be used for connection.

**Usage:** This field is required.

**NOTES:**

1. When the CHAN/PAIR field on the LS or LSNP is not populated or blank, this field will be returned with all blanks.
2. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITION:**

When returned, the CHAN/PAIR will be associated with every detail record with a different LNUM in the LS and LSNP screen. The system will obtain this information from the CHAN/PAIR field from the LS and LSNP screen and populate it in the CHAN/PAIR on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 4

**Field Example:**

24

## 17. CHAN/PAIR2 - Channel/Pair 2

Identifies the specific channel or pair within the provider's cable to be used for connection.

**Usage:** This field is required.

**NOTES:**

1. When the CHAN/PAIR2 field on the LS or LSNP is not populated or blank, this field will be returned with all blanks.
2. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITION:**

When returned, the CHAN/PAIR2 will be associated with every detail record with a different LNUM in the LS and LSNP screen. The system will obtain this information from the CHAN/PAIR2 field from the LS and LSNP screen and populate it in the CHAN/PAIR2 on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 4

**Field Example:**

24

## 18. CHC - Coordinated Hot Cut

Identifies that the customer is requesting near seamless cutover activity.

**Usage:** This field is required.

**NOTE:**

When the CHC field on the LSR is not populated or blank, this field will be returned blank.

**CONDITION:**

When returned, the response information is obtained from the CHC field on the LSR screen and populated in the CHC field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

Y

## 19. CKR - Customer Circuit Reference (Service Group Section)

Identifies the circuit number or sequential range of circuit numbers assigned by the customer.

**Usage:** This field is required.

**NOTE:**

When the CKR field on the LS, LSNP, NP, PS, RS is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the CKR will be associated with every detail record with a different LNUM in the Loop, LSNP, NP, Port and Resale screen. The system will obtain this information from the CKR field from the Loop, LSNP, NP Port and Resale screen and populate it in the CKR field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 41

**Field Example:**

L00020

## 20. D/TSENT - Date and Time Sent

Identifies the date and time that the transaction is sent.

**Usage:** This field is required.

**Valid Entries:**

Valid Format:	
<b>CCYYMMDDHHMAA</b>	
<b>CC</b>	Two Digit Century (00-99)
<b>YY</b>	Two Digit Year (00-99)
<b>MM</b>	Two Digit Month (01-12)
<b>DD</b>	Two Digit Day (01-31)
<b>HH</b>	Two Digit Hour (01-12)
<b>MM</b>	Two Digit Minute (00-59)
<b>AA</b>	AM or PM

### NOTE:

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

### CONDITION:

When returned, the system will record this information from the date and time stamp that indicates the date the response was submitted to the system interfacing the CLEC. The system shall populate this date in the D/TSENT field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 14 - 14

**Field Example:**

201103020125PM

## 21. DD/CD - Due Date/Completion Date

Identifies the date the service order requested is due and completed.

**Usage:** This field is required.

**NOTES:**

1. Hyphen (-) is the only special character that may be returned.
2. When the DD or CD is not populated on the AT&T Southeast service order this field will be returned with blanks.
3. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITIONS:**

1. When returned, the DD/CD is returned in the following formats: CCYY-MM-DD or CCYYMMDD *Example: 7/10/2004 or 20040710*.
2. When returned, the response information is obtained from the AT&T SE service order and populated in the DD/CD field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 10

**Field Example:**

11-10-2008

## 22. DISC NBR - Disconnect Telephone Number (Service Group Section EU)

Identifies the end user telephone number to be disconnected.

**Usage:** This field is required.

**NOTE:**

When the DISC NBR field on the EU screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The DISC NBR will be associated with every detail record with a different DNUM in the EU screen. The system will obtain this information from the DISC NBR field from the EU screen and populate it in the DISC NBR field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2016991234

## 23. DISC NBR - Disconnect Telephone Number (Service Group Section LS)

Identifies the end user telephone number to be disconnected.

**Usage:** This field is required.

**NOTE:**

When the DISC NBR field on the LS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The DISC NBR will be associated with every detail record with a different LNUM in the Loop Services form. The system will obtain this information from the DISC NBR field from the Loop Services screen and populate it in the DISC NBR field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2016991234

## 24. DLNUM - Directory Listing Reference Number (Directory Section)

Identifies each listing segment as a unique number.

**Usage:** This field is required.

**NOTE:**

When the DLNUM field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The DLNUM will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the DLNUM field from the directory listings screen and populate it in the DLNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

0023

## 25. DLORD - Directory Listing Order Number

Identifies the Directory Listing Service Order number.

**Usage:** This field is required.

**NOTE:**

This field will be returned with all blanks when a directory listing order is not issued.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 20

**Field Example:**

A123B456C

## 26. DNUM - Disconnect Line Number

Identifies the line or trunk as a unique number and each additional occurrence as a unique number.

**Usage:** This field is required.

**NOTE:**

When the DNUM field on the EU screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the DNUM will be associated with every detail record with a different DNUM in the EU form. The system will obtain this information from the DNUM field from the EU form and populate it in the DNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

00023

## 27. DOI - Degree of Indent

Identifies the degree of indentation for this listing.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
0 - 6

**NOTE:**

When the DOI field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the DOI will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the DOI field from the directory listings screen and populate it in the DOI field in the directory listings section on the response.

**Data Characteristics:** numeric character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

1

## 28. DSGCON - Design/Engineering Contact

Identifies the representative of the customer or agent that should be contacted on design/engineering matters.

**Usage:** This field is required.

**NOTE:**

When the DSGCON field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the response information is obtained from the DSGCON field on the LSR screen and populated in the DSGCON field on the response.

**Data Characteristics:** alpha / special characters

**Field Length (Min-Max):** 1 - 15

**Field Example:**

JOHN SMITH

## 29. DSGCON TEL NO - Design/Engineering Contact Telephone Number

Identifies the telephone number of the provider's design/engineering contact.

**Usage:** This field is required.

**Valid Entries:**

Valid Formats:
10 Numeric characters
15 Alpha/Numeric characters

**NOTE:**

When the DSGCON field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the response information is obtained from the DSGCON TEL NO field on the LSR screen and populated in the DSGCON TEL NO field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 15 - 15

**Field Example:**

2019813500X1234

### 30. EAN - Existing Account Number

Identifies the end user's existing account number.

**Usage:** This field is required.

**NOTE:**

When the EAN field on the EU is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the EAN field on the EU screen and populated in the EAN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 13 - 13

**Field Example:**

404M231234123

## 31. EATN - Existing Account Telephone Number

Identifies the end user's existing account telephone number.

**Usage:** This field is required.

**NOTE:**

When the EATN field on the EU is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the EATN field on the EU screen and populated in the EATN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

3142359888

## 32. EBD - Effective Bill Date

Identifies the effective date to begin or cease billing when the billing date is different from the desired due date.

**Usage:** This field is required.

**NOTE:**

When EBD is not populated on the AT&T Southeast service order this field will be returned with blanks.

**CONDITIONS:**

1. When returned, EBD is returned in the following format:  
CCYYMMDD *Example: 20040710*
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the EBD field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 8 - 8

**Field Example:**

20081115

### 33. ECCKT - Exchange Company Circuit ID (Services Section)

Identifies a provider's circuit identification.

**Usage:** This field is required.

**NOTES:**

1. When the ECCKT field is not populated on the Service order for (ACT=N, D, or MI=C or D) and the ECCKT field is not populated or blank on the LS screen, and is required on response, this field will be returned with blanks.
2. Period (.) is the only special character that may be returned.

**CONDITIONS:**

1. Excluding Line Share and Line Splitting, when ECCKT is returned for REQ TYP A, and the ACT Type is not N or D and the MI is not C or D, the system will obtain the information from the LS screen and return the information in the ECCKT field on the response.
2. Excluding Line Share and Line Splitting, when ECCKT is returned, the system will obtain this information from the service order for REQ TYP A, only when the ACT Type is N or D or the MI is C or D and populate the information in the ECCKT field on the response.
3. When both a telephone number and circuit id number is applicable to the line loss notification, the telephone number will be returned in this field and the circuit id will be returned in the ECCKT field.
4. When ECCKT is returned on REQ TYP B, the system will obtain the information from the service order and populate the ECCKT information in the ECCKT field on the response.
5. When the ECCKT is returned and the product is Line Share or Line Splitting, the system will obtain the ECCKT from the AT&T Southeast service order and populate the information in the ECCKT field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 41

**Field Example:**

101.T1.NYCMNY50.NYCMNY54W01

## 34. FDT - Frame Due Time

Identifies the frame cutover time.

**Usage:** This field is required.

**NOTES:**

1. When the FDT is not populated on the AT&T Southeast service order this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.
3. When this field is returned as a range, the 5th position of the field will be a hyphen (-). *Example: 1800-1900*

**CONDITIONS:**

1. (Excluding REQ TYP B (LNP)) When returned the response information is obtained from the AT&T Southeast service order and populated in the FDT field on the response.
2. For REQ TYP B (LNP), when returned the response information for this field is obtained from the DFDT field on the LSR and populated in the FDT field on the response.
3. When returned, the FDT is returned in military time.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 9

**Field Example:**

1300-1700

### 35. FNUM - Facility Line Number

Identifies the facility as a unique number and each additional occurrence as a unique number.

**Usage:** This field is required.

**NOTE:**

When the FNUM field on the DTR, DTU, IUS or IRS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the FNUM field will be associated with every detail record with a different LNUM in the DTR, DTU, IUS or IRS screen. The system will obtain this information from the FNUM field from the DTR, DTU, IUS or IRS screen and populate it in the FNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 2

**Field Example:**

10

## 36. FOC/CN REMARKS - FOC/CN Remarks

Identifies a free flowing field which can be used to expand upon and clarify other data.

**Usage:** This field is required.

**NOTE:**

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITIONS:**

1. On LSRs, when the system determines that a dispatch is required it will populate 'DISPATCH IS REQUIRED' in the FOC/CN REMARKS field following any other FOC/CN-Remarks on the response. If there is not sufficient space for the message the system will drop the number of characters needed at the end of the other Remarks to populate the 20 characters, DISPATCH IS REQUIRED.
2. The 'ADSL Informational' message will be populated in the FOC/CN-Remarks on the FOC according to the following guidelines:
  - 'Dispatch Required' will remain the last entry in FOC/CN-Remarks if applicable.
  - 'Facility Check' messages, if applicable, will remain immediately in front of 'Dispatch Required' or last if 'Dispatch Required' is not applicable.
  - 'ADSL Informational' message, when applicable, will appear immediately in front of both 'Facility Check' and Dispatch Required' messages or immediately in front of 'Facility Check' or 'Dispatch Required' message if only one is required. If neither 'Facility Check' nor 'Dispatch Required' message is applicable, 'ADSL Informational' message will be last entry in FOC/CN-Remarks.

Any remarks on incoming LSR that will be moved to the FOC will be shortened by number of characters required to place any or all of the three messages listed above that apply.
3. The Facility check messages will be populated in the Remarks on the FOC according to the following guidelines:
  - a. If there are no remarks applicable for the FOC/CN-Remarks section of the FOC (that originated from the Remarks on the LSR), the system will place one of the applicable facility checked messages, "Facilities have been checked" or "Facilities have been checked and a PF condition exists" in the FOC/CN REMARKS field on the response.
  - b. If the only remarks applicable for the FOC/CN-Remarks Section of the FOC is, "Dispatch is Required", the system will place one of the applicable facility checked messages "Facilities have been checked" or "Facilities have been checked and a PF condition exists" before the "Dispatch is Required" message.
  - c. If there are remarks applicable for the FOC/CN-Remarks section of the FOC (Remarks from LSR), but no "Dispatch is Required" message present, the system will place one of the applicable facility checked messages "Facilities have been checked" or "Facilities have been checked and a PF condition exists" at the beginning of the Remarks. If adding the facility checked message causes the Remarks section to exceed the number of characters allowed, the system will drop the number of characters needed at the end of the other Remarks.

**36. FOC/CN REMARKS - FOC/CN Remarks (continued...)****CONDITIONS (continued):**

4. The system will search to obtain this information from the REMARKS field from the LSR screen and populate in it the FOC/CN-REMARKS field on the response.
5. When an LSR is submitted for Non-Complex REQTYP M, MI= A, B, C, or D, and LNA = C, D, G, N, P, T, V, W, or X where a service order is generated with Outward ('O') action coded FID OADSL in the UNFIELDDED IDENT Section of the AT&T Southeast service order, the system will return the following informational message in the FOC/CN-REMARKS field on the response:

CLEC SHOULD HAVE THE END USER CONTACT THEIR NSP/ISP FOR CHANGES TO THEIR ADSL SERVICE. ADL++ IS NOT VALID WITH UNE PORT SERVICE

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 350

**Field Example:**

CLEC SHOULD HAVE THE END USER CONTACT THEIR NSP/ISP FOR CHANGES TO THEIR ADSL SERVICE. ADSL++ IS NOT VALID WITH UNE PORT SERVICE

## 37. HA - Hunt Group Activity

Identifies the activity associated with the hunt group on this request.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
<b>C</b>	Change to Hunt Group Sequence
<b>D</b>	Remove Hunt Group Arrangement
<b>E</b>	Existing/No Change
<b>N</b>	New

**NOTE:**

When the HA field on the LSR is not populated or blank and is required on response, this field will be returned with all blanks.

**CONDITION:**

When returned, the HA will be associated with every detail record with a different HNUM in the Hunt Group record. The system will obtain this information from the HA field on the HGI screen and populate it in the HA field on the initial request or a supplement to a request.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

N

## 38. HID - Hunt Group Identifier

Identifies the hunt group.

**Usage:** This field is required.

**NOTE:**

When the HID field on the LSR is not populated or blank and is required on response, this field will be returned with all blanks.

**CONDITION:**

When returned, the HID will be associated with every detail record with a different HNUM in the Hunt Group record. The system will obtain this information from the HGI and populate it in the HID field on the initial request or a supplement to a request.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 4

**Field Example:**

30

### 39. HNUM - Hunt Number

Identifies the hunt group as a unique number and each additional occurrence as a unique number.

**Usage:** This field is required.

**NOTE:**

When the HNUM field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the HNUM will be associated with every detail record that has a different HNUM in the Hunt Group record. The system will obtain this information from the HNUM field on the HGI screen and populate it in the HNUM field on the initial request or a supplement to a request.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

00003

## 40. HTN - Hunt Telephone Number

Identifies the hunting number for this sequence in the hunt group.

**Usage:** This field is required.

**NOTE:**

When the HTN field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the HTN will be associated with every detail record with a different HNUM in the Hunt Line record. The system will obtain this information from the Hunt HTN field on the HGI screen and populate it in the HTN field on the initial request or a supplement to a request.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 15

**Field Examples:**

T0001

## 41. HTSEQ - Hunt Sequence

Identifies the desired hunting sequence or range of hunt sequence.

**Usage:** This field is required.

**NOTE:**

When the AAN field on the LSR is not populated or blank and is required on response, this field will be returned with all blanks.

**CONDITION:**

When returned, the HTSEQ will be associated with every detail record with a different HNUM in the Hunt Line record. The system will obtain this information from HTSEQ field on the HGI screen and populate it in the HTSEQ field on the initial request or a supplement to a request.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

0003

## 42. IBT - ISDN BRI Type

Identifies the type of National ISDN-BRI.

**Usage:** This field is required.

**NOTE:**

When the IBT field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the IBT field on the EU screen and populated in the IBT field on the response.

**Data Characteristics:** numeric character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

2

### 43. INIT - Initiator Identification

Identifies the LSP's representative who originated this transaction.

**Usage:** This field is required.

**CONDITION:**

When returned, the response information is obtained from the INIT field on the LSR screen and populated in the INIT LSR field on the response.

**Data Characteristics:** alpha / special characters

**Field Length (Min-Max):** 1 - 15

**Field Example:**

JOHN SMITH

## 44. INIT TEL NO - Initiator Telephone Number

Identifies the telephone number of the initiator.

**Usage:** This field is required.

**Valid Entries:**

Valid Formats:
10 Numeric characters
15 Alpha/Numeric characters

**CONDITION:**

When returned, the response information is obtained from the INIT-TEL NO field on the LSR screen and populated in the INIT-TEL NO LSR field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 15 - 15

**Field Example:**

2019813500

## 45. ISPID - ISDN Service Profile Identification (Service Group Section)

Provides a code that must be programmed into the ISDN BRI Customer Premises Equipment (CPE). This code is transmitted from the CPE over the ISDN BRI D-channel to the LSO switch. It must be present in order for the BRI to become active.

**Usage:** This field is required.

**CONDITION:**

When returned, the ISPID will be associated with every detail record with a different LNUM in the Resale form. The system will obtain this information from the ISPID field from the Resale screen and populate it in the ISPID field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 14

**Field Example:**

70350663550101

## 46. IWBAN - Inside Wiring Bill Account Number

Identifies the billing account number for charges associated with inside wire.

**Usage:** This field is optional.

**CONDITION:**

When returned, the response information is obtained from the IWBAN field on the EU screen and populated in the IWBAN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 13

**Field Example:**

201Q814587123

## 47. LACT - Listing Activity Indicator (Directory Section)

Identifies the activity involved for this listing request.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
<b>N</b>	New listing
<b>D</b>	Delete Listing (remove existing listing)
<b>I</b>	Change Listing (new data to be inserted)
<b>O</b>	Change Listing (old data to be removed)
<b>Z</b>	No Change to Listing

**NOTE:**

When the LACT field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The LACT will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the LACT field from the directory listings screen and populate it in the LACT field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

N

## 48. LEAN - Line Existing Account Number

Identifies the end user's existing account number assigned by the current NSP and/or LSP.

**Usage:** This field is required.

**NOTES:**

1. When the LEAN field on the LSNP, NP, PS, or RS screen is not populated or blank and is required on response, this field will be returned with blanks.
2. Supports consolidated working telephone numbers that reside in Old LSP existing account(s) to a single Account Telephone Number (ATN). Supports one end user's multiple accounts at one end user location.

**CONDITION:**

When returned, the LEAN will be associated with every detail record with a different LNUM in the LSNP, NP, Port and Resale screen. The system will obtain this information from the LEAN field from the LSNP, NP, Port and Resale screen and populate it in the LEAN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 13 - 13

**Field Example:**

201M231234

## 49. LEATN - Line Existing Account Telephone Number

Identifies the end user's existing account telephone number assigned by the old LSP.

**Usage:** This field is required.

**NOTES:**

1. When the LEATN field on the LS, LSNP, NP, PS, or RS screen is not populated or blank and is required on response, this field will be returned with blanks.
2. Supports consolidated working telephone numbers that reside in Old LSP existing account(s) to a single Account Telephone Number (ATN). Supports one end user's multiple accounts at one end user location.

**CONDITION:**

When returned, the LEATN will be associated with every detail record with a different LNUM in the Loop, LSNP, NP, Port and Resale screen. The system will obtain this information from the LEATN field from the Loop, LSNP, NP Port and Resale screen and populate it in the LEATN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2015551234

## 50. LISTADR - Listed Address (Directory Service)

Identifies the entire address as it is to be listed.

**Usage:** This field is required.

### NOTES:

1. When the LAPR, LANO, LASF, LASD, LASN, LATH, LASS, LALOC, and LAST fields on the DL screen are not populated or blank and are required on response, this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.

### CONDITION:

When returned, the LISTADR will be associated with every detail record with a different DLNUM in the DL screen. The LISTADR will be formatted using the LAPR, LANO, LASF, LASD, LASN, LATH, LASS, LALOC, and LAST fields as they appear on the DL screen. The system will format this data in the LISTADR field on the response as follows: When returned the fields will be displayed in the following order: LAPR, LANO, LASF, LASD, LASN, LATH, LASS, LALOC, LAST.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 150

**Field Example:**

25W 4501/2 SW CAMINO RAMON LN NW SAN RAMON CA 94583

## 51. LISTNM - Listed Name (Directory Service)

Identifies the name contained in the listing.

**Usage:** This field is required.

**NOTE:**

When the LNLN, LNFN, DES, TL, TITLE1, TITLE2, and NICK fields on the DL screen are not populated or blank and are required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the LISTNM will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the LNLN, LNFN, DES, TL, TITLE1, TITLE2, and NICK fields from the directory listings screen and populate it in the LISTNM field in the directory listings section on the response. When returned the system will format the information in the LISTNM field in the following order: LNLN, LNFN, DES, TL, TITLE1, TITLE2, NICK. The system will remove trailing blanks.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 252

**Field Example:**

JANE SMITH

## 52. LNEX - Line Number Extension Number (Services Section)

Provides an extension to the line number field (LNUM) for use when multiple ISDN-BRI directory numbers (TNS) are assigned to a single ISDN BRI line for one service order/ PON/LNUM.

**Usage:** This field is required.

**NOTE:**

When the LNEX field on the PS or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the LNUM will be associated with every detail record with a different LNEX in the Loop, Port and Resale screen. The system will obtain this information from the LNEX field from the Port and Resale form and populate it in the LNEX field in the Services Group record on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

00001

## 53. LNUM - Line Number (Services Section)

Identifies the line or trunk as a unique number and each additional occurrence of either as a unique number.

**Usage:** This field is required.

**Valid Entries:**

<b>Valid Values:</b>
----------------------

00001 - 99999
---------------

**NOTE:**

When the LNUM field on the LS, LSNP, NP, PS, or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the LNUM will be associated with every detail record with a different LNUM in the Loop, LSNP, NP, Port and Resale screen. The system will obtain this information from the LNUM field from the Loop, LSNP, NP, Port and Resale form and populate it in the LNUM field in the Services Group record on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

00118

## 54. LOCNUM - Location Number (Hunt Group Section)

Identifies the service location number for the service requested.

**Usage:** This field is required.

**NOTES:**

1. When the LOCNUM field on the HTI is not populated or blank and is required on response, this field will be returned with all blanks.
2. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITION:**

When returned, the LOCNUM will be associated with each detail record with a different HNUM in the Hunt Group record on the initial request or a supplement to a request. The system will obtain this information from the LOCNUM field on the HGI Screen and will populate it in the LOCNUM field on the HGI Screen and will populate it in the LOCNUM field on the initial request or a supplement to a request.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 3 - 3

**Field Example:**

002

## 55. LOCNUM - Location Number (Service Group Section)

Identifies the service location number for the service requested.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
000-999

### NOTES:

1. When the LOCNUM field on the LS, LSNP, NP, PS, or RS screen is not populated or blank and is required on response, this field will be returned with all blanks.
2. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

### CONDITION:

When returned, the LOCNUM will be associated with every detail record with a different LNUM in the Loop, LSNP, NP, Port and Resale screen. The system will obtain this information from the LOCNUM field from the Loop, LSNP, NP, Port and Resale form and populate it in the LOCNUM field in the Services Group record on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 3 - 3

**Field Example:**

002

## 56. L-ORD - Loop Order Number (Service Group Section)

Identifies the provider's order number for the loop.

**Usage:** This field is required.

**NOTE:**

When the firm order type is not for REQTYP A, this field will be returned with blanks.

**CONDITIONS:**

1. This field is only applicable on REQTYP A request(s).
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the L-ORD field.

**Data Characteristics:** alpha /numeric characters

**Field Length (Min-Max):** 1 - 8

**Field Example:**

C1234567

## 57. LPHRASE - Listing Phrase (Directory Service)

Identifies a predefined phrase associated with a listing.

**Usage:** This field is required.

### Valid Entries:

Valid Values:	
5	Toll Free-Dial '1' & Then
15	Toll Free-Dial '0' & Then
20	Toll Free-Dial Access Code & Then
25	Charges Will Apply-Dial '1' & Then ('900 numbers')
33	No Charge Dial '1' & Then (Florida Only)
35	No Charge for Call Dialed Direct To This Number from (Exchange Name)
45	TDD & Voice
50	TDD Only
65	(City) Tel No
67	Charges Apply-Dial "1" and Then
73	Charges Will Apply
77	Toll & Service Charges Apply
85	At The Tone Dial ---
90	At the Beep Enter Call Back Number
103	(s % See Customer Guide Pages concerning the use of the telephone equip at this no.)
107	(s % See Customer Guide Pages concerning the use of the telephone equip at this no.)

### NOTE:

When the LPHRASE on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

### CONDITIONS:

1. The listing text type group LTXNUM, LXTY, LPHRASE and LTEXT can repeat up to three times.
2. When returned, the LPHRASE will be associated with every detail record with a different LTXNUM in the DL screen. The system will obtain the LPHRASE field information from the LPHRASE field found in the DL screen and will populate this information in the LPHRASE field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 3

**Field Example:**

103

## 58. LSR NO - Local Service Request Number

Identifies the number that may be generated by the provider's mechanized systems, pre-assigned to the customer by the provider or manually assigned by the provider to identify a customer's request for service.

**Usage:** This field is required.

**Valid Entries:**

<b>Valid Format:</b>
NNNNNNNNNANNNNN-NN
A = Alpha
N = Numeric

**NOTE:**  
Hyphen (-) is the only special character that may be returned.

**CONDITION:**  
When returned, the response information is obtained from the LSR NO field on the LSR screen and populated in the LSR NO field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 18

**Field Example:**

20030302L00074-00

## 59. LST - Local Service Termination

Identifies the CLLI code of the end office switch from which the service is being provided.

**Usage:** This field is required.

**CONDITION:**

When returned, the LST will be associated with every detail record with a different LNUM in the LSR screen. The system will obtain this information from the LST field from the administrative section on the LSR screen and populate it in the LST field on the response. The incoming LST field is on the Header level and will be populated on the Detail level on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 11 - 11

**Field Example:**

STLSMO07CG0

## 60. LTEXT - Line of Text (Directory Service)

Identifies the descriptive or informative text that will appear in the directory to assist the end user.

**Usage:** This field is required.

**NOTE:**

When the LTEXT on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITIONS:**

1. The listing text type group LTXNUM, LXTY, LPHRASE and LTEXT can repeat up to three times
2. When returned, the LTEXT will be associated with every detail record with a different LTXNUM in the DL screen. The system will obtain the LTEXT field information from the LTEXT field found in the DL screen and will populate this information in the LTEXT field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 250

**Field Example:**

CALL BETWEEN 9 AND 5

## 61. LTN - Listed Telephone Number

Identifies the telephone number that may be included in the directory and/or quoted in Directory Assistance (DA).

**Usage:** This field is required.

**NOTE:**

When the LTN field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The LTN will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the LTN field from the directory listings screen and populate it in the LTN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2019813500

## 62. LTXNUM - Line of Text Reference Number (Directory Service)

Identifies each line of information with a unique number.

**Usage:** This field is required.

**NOTE:**

When the LTXNUM field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITIONS:**

1. The listing text type group LTXNUM, LTXTY, LPHRASE and LTEXT can repeat up to three times.
2. The LTXNUM will be associated with every detail record with a different LTXNUM in the DL screen. The system will obtain the LTXNUM field information from the LTXNUM field found in the DL screen and will populate this information in the LTXNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

02

## 63. LTXTY - Listing Text Type (Directory Service)

Identifies the type of associated text that will appear in the directory to assist the end user.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
<b>AC</b>	Alternate Call
<b>CR</b>	Cross Reference
<b>DL</b>	Designer Extra Line
<b>DLB</b>	Designer Extra Line Bold
<b>DLS</b>	Designer Extra Line Script
<b>ITX</b>	Indent Text
<b>OP</b>	Other Predefined Phrase
<b>SP</b>	Special Text
<b>TT</b>	Text

### NOTE:

When the LTXTY field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

### CONDITIONS:

1. The listing text type group LTXNUM, LTXTY, LPHRASE and LTEXT can repeat up to three times
2. The LTXTY will be associated with every detail record with a different LTXNUM in the DL screen. The system will obtain the LTXTY field information from the LTXTY field found in the DL screen and will populate this information in the LTXTY field on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 2 - 3

**Field Example:**

ITX

## 64. LTY - Listing Type (Directory Section)

Identifies the type of listing with respect to publication and Directory Assistance (DA) appearance rules.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
1	Listed - Appears in DA and Directory
2	Non-Listed - Appears only in DA
3	Non-Published - Does not appear in directory and the telephone number does not appear in DA

**NOTE:**

When the LTY field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The LTY will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the LTY field from the directory listings screen and populate it in the LTY field on the response.

**Data Characteristics:** numeric character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

1

## 65. MATN - Main/Alternate Telephone Number (Service Group Section)

Indicates the dialable telephone number(s) assigned to the ISDN BRI line. If the same number cannot be used for both B-channels, then the main number will be assigned to B-channel 1 and the alternate number will be assigned to B-channel 2.

**Usage:** This field is required.

### Valid Entries:

Valid Values:	
<b>A</b>	Alternate Telephone Number(s)
<b>M</b>	Main Telephone Number

### NOTE:

When the MATN field on the PS or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

### CONDITION:

When returned, the MATN field will be associated with every detail record with a different LNUM in the Port and Resale screen. The system will obtain this information from the MATN field from the Port and Resale screen and populate it in the MATN field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

M

## 66. NAN - New Account Number

Identifies the new account number.

**Usage:** This field is required.

**NOTE:**

When the NAN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the NAN field on the LSR screen and populated in the NAN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2015551234

## 67. NATN - New Account Telephone Number

Identifies the new account telephone number.

**Usage:** This field is required.

**NOTE:**

When the NATN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the NATN field on the LSR screen and populated in the NATN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2055551234

## 68. NNSP - New Network Service Provider Identification

Identifies the Number Portability Administration Center (NPAC) Service Provider Identifier (SPI) of the new Network Service Provider (NSP).

**Usage:** This field is required.

**NOTE:**

When the NNSP field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITIONS:**

1. This field is applicable to LNP.
2. When returned, this information is obtained from the NNSP field on the LSR and returned in the NNSP field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

8A55

## 69. NOR - Number Of Requests

Identifies the local service request and the total quantity of local service requests within a related group of orders being submitted.

**Usage:** This field is conditional.

**NOTES:**

1. The value returned in this field will be identical to the value submitted on the initial or supplemental LSR.
2. Hyphen (-) is the only special character that may be returned.

**CONDITION:**

This field will only be returned when the REQ TYP is B and the product is Bulk Single LSR arrangement.

**Data Characteristics:** numeric / special characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

01-99

## 70. NOTYP - Number Type (Service Group Section)

Identifies the type of telephone number

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
T	Telephone Number
L	Terminal Number

**CONDITION:**

When returned, the NOTYP will be associated with every detail record with a different LNUM in the Resale screen. The system will obtain this information from the NOTYP field on the Resale screen and populate it in the NOTYP field in the Resale section on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

T

## 71. NPORD - Number Portability Order Number (Service Group Section)

Identifies the provider's order number for number portability.

**Usage:** This field is required.

**NOTE:**

This field will be returned with blanks on Reject Notifications and Jeopardy notifications.

**CONDITION:**

When returned, the system will obtain this information from the AT&T Southeast service order and populate the information in the NPORD field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 20

**Field Example:**

C123456

## 72. NSTN - Non-Standard Telephone Number (Directory Section)

Identifies a telephone number which is not in the standard North American Numbering Plan format, e.g., vanity numbers, Enterprise, 911.

**Usage:** This field is required.

**NOTES:**

1. When the NSTN field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.

**CONDITION:**

The NSTN will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the NSTN field from the directory listings screen and populate it in the NSTN field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 18

**Field Example:**

414-227-HELP

## 73. ORD - Order Number

Identifies the provider's order number for the service requested.

**Usage:** This field is required.

**NOTE:**

When an AT&T Southeast Service order has not been generated this field will be returned blank.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order and populated in the ORD field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 8 - 8

**Field Example:**

C1234567

## 74. OTN - Old Telephone Number (Service Group Section)

Identifies the existing telephone number that is being changed.

**Usage:** This field is required.

**NOTE:**

When the OTN field on the PS or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The OTN will be associated with every detail record with a different LNUM in the Port and Resale Services screen. The system will obtain this information from the OTN field from the Port and Resale Services screen and populate it in the OTN on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2016990001

## 75. PID - Personal Identifier (Service Group Section)

Identifies the end user's personal identification number.

**Usage:** This field is required.

**NOTES:**

1. When this information is not populated on the AT&T Southeast service order and this field is required on response, the field will be returned with blanks.
2. This field identifies the authorization number to be utilized with the telephone number provided in the SAT field

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order and returned in the PID field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

4412

## 76. PON - Purchase Order Number

Identifies the customer's unique purchase order or requisition number that authorizes the issuance of this request or supplement.

**Usage:** This field is required.

**NOTE:**

Apostrophe ('), Blank ( ), Comma (,) Hyphen (-), Period (.) and Space ( ) are the only special characters that may be returned.

**CONDITION:**

When returned, the response information is obtained from the PON field on the LSR screen and populated in the PON field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 16

**Field Example:**

824Z9

## 77. PORTED NBR - Ported Telephone Number (Service Group Section)

Identifies the Telephone Number (TN) or consecutive range of TNs residing in the same switch to be ported.

**Usage:** This field is required.

**CONDITION:**

When returned, the system will obtain the information from the PORTED NBR field on the LSNP and NP screen and populate the information in the PORTED NBR field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

9086997000

## 78. RELAY RACK - Relay Rack (Service Group Section)

Identifies the bay/cabinet in a central office and may include the floor and aisle where the specific piece of equipment is located.

**Usage:** This field is required.

**NOTES:**

1. When the RELAY RACK field on the LS or PS screen is not populated or blank and is required on response, this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.

**CONDITION:**

When returned, the RELAY RACK field will be associated with every detail record with a different LNUM in the LS and PS screen. The system will obtain this information from the RELAY RACK field from the LS and PS screen and populate it in the RELAY RACK field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 10

**Field Example:**

10052-03

## 79. REP - Provider Contact Representative

Identifies the provider's representative handling this service request.

**Usage:** This field is required.

**Valid Entries:**

Valid Value:
LCSC

**CONDITION:**

When returned, the response information is returned as LCSC and populated in the REP field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 15

**Field Example:**

LSCS

## 80. REP TEL NO - Representative Telephone Number

Identifies the telephone number of the provider's representative handling this request.

**Usage:** This field is required.

**CONDITION:**

When returned, this information is obtained from the CLEC profile and returned in the REPTTEL NO field.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

4045551234

## 81. RESID - Response Identifier

Identifies the response number assigned by the provider to relate to associated transactions.

**Usage:** This field is required.

**NOTE:**

When the RESID field on the LSR is not populated or blank and the field is required on response, this field will be returned with all blanks.

**CONDITION:**

When returned, this information is obtained from the RESID field on the LSR and returned in the RESID field on the initial request or a supplement to a request.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 20

**Field Example:**

123ABC

## 82. RTI - Route Index

Identifies the routing index to be used by the provider's switching equipment to forward/port the provider's telephone number to the customer's non-RCF trunk group.

**Usage:** This field is required.

**NOTE:**

When the RTI field on the LSNP or NP screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the RTI field will be associated with every detail record with a different LNUM in the LSNP or NP screen. The system will obtain this information from the RTI field from the LSNP or NP screen and populate it in the RTI field on the response.

**Data Characteristics:** alpha /numeric characters

**Field Length (Min-Max):** 1 - 6

**Field Example:**

215

### 83. SAT - Subscriber Access Telephone Number (Service Group Section)

Identifies the telephone number, which allows remote access to make feature configuration changes.

**Usage:** This field is required.

**NOTE:**

When this information is not populated on the service order and this field is required on response, the field will be returned with blanks.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order and returned in the SAT field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

4045551234

## 84. SCFA - Secondary Connecting Facility Assignment

Identifies the carrier system and channel to be used from a Wideband Analog or High Capacity Facility for a thru-connect configuration.

**Usage:** This field is required.

**NOTES:**

When the SCFA field on the LS or RPL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the SCFA field will be associated with every detail record with a different LNUM in the LS or RPL screen. The system will obtain this information from the SCFA field from the LS or RPL screen and populate it in the SCFA field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 42

**Field Example:**

101/T1/3/BSTMAGTOGO/BSTMATCG0

## 85. SHELF - Shelf (Service Group Section)

Identifies the number assigned to the shelf within the relay rack.

**Usage:** This field is required.

**Valid Entries:**

Valid Formats:
2 Numeric characters
6 Alpha/Numeric characters

**NOTE:**

When the SHELF field on the LS or PS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the SHELF field will be associated with every detail record with a different LNUM in the LS or PS screen. The system will obtain this information from the SHELF field from the LS or PS screen and populate it in the SHELF field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 2 - 2 or 6 - 6

**Field Example:**

12

## 86. SLOT - Slot (Service Group Section)

Identifies the specific connection slot of the shelf to be used.

**Usage:** This field is required.

**NOTE:**

When the SLOT field on the LS or PS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the SLOT field will be associated with every detail record with a different LNUM in the LS or PS screen. The system will obtain this information from the SLOT field from the LS or PS screen and populate it in the SLOT field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 6

**Field Example:**

009

## 87. SLTN - Shared Line Telephone Number (Service Group Section)

Identifies the end user telephone number(s) for line sharing and line splitting.

**Usage:** This field is required.

**NOTES:**

When the SLTN field on the LS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the SLTN field will be associated with every detail record with a different LNUM in the LS screen. The system will obtain this information from the SLTN field from the LS screen and populate it in the SLTN field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 12- 12

**Field Example:**

201-555-1234

## 88. STATUS CODE - Status Code

Indicates the status code of the order.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
AO
CA
CB
CD
CF
CI
CK
CL
CM
CP
CS
CY
PD
PF
SA
SL
SO
SR

**CONDITION:**

When returned the system will obtain the status from the AT&T Southeast service order and will place it in the status code field on the response of a FOC, CN, POS, BCN, Jeopardy, or Clarification.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

AO

## 89. STATUS MSG - Status Message

Indicates the status message associated with the status code.

**Usage:** This field is required.

### NOTE:

Due to the REQ TYP C Porting process, a Status Code will not exist until after the CLEC activates the telephone number.

### CONDITIONS:

1. When multiple Jeopardy messages are returned the system will format them as follows:  
 The 2 character code indicating the type of message, followed by a space and the message, followed by a space and another type and another message up to the 100 A/N character limit.  
 Example: 1Q ASSIGNMENT PROBLEM 2C BUSY CABLE AND/OR PAIR 2D LOOP IS TOO LONG 2G ADDRESS IS INVALID 2H BASIC
2. When the LSR is in an RPON group and one of the PONs is placed in Jeopardy status, the following Jeopardy message will be sent: PON XXXXXXXX IS IN JEOPARDY STATUS, ALL RELATED PONS IN RPON GROUP RETURNED
3. When the STATUS CODE is AO the following response is populated in the STATUS-MSG field: ASSIGNABLE ORDER
4. When the STATUS CODE is AO, PD, CP, or PF and the AT&T Southeast Service order Status has an error prefix of E, F, or O and the system has determined that the order is in jeopardy, one or more of the following jeopardy responses may be returned on the JN.
  - 1A INTEROFFICE FACILITY SHORTAGE
  - 1B SCHEDULING/WORK LOAD
  - 1C CUSTOMER (LSP) NOT READY
  - 1D NO LOOP AVAILABLE
  - 1E END USER NOT READY
  - 1F NSP MISSED APPOINTMENT
  - 1G NO ACCESS TO END USER
  - 1H CENTRAL OFFICE FREEZE
  - 1J SPECIAL CONSTRUCTION
  - 1K NATURAL DISASTER
  - 1L FRAME DUE TIME CANNOT BE MET
  - 1M REQUESTED DD IS LESS THAN PUBLISHED INTERVAL
  - 1N DD AND FRAME DUE TIME CANNOT BE MET
  - 1P OTHER
  - 1Q ASSIGNMENT PROBLEM
  - 1R CUSTOMER COULD NOT BE REACHED AT REACH NUMBER
  - 1S BUILDING NOT READY, CUSTOMER WILL ADVISE
  - 1T POLE AT TRAILER SITE NOT SET
  - 1W ENTRANCE FACILITIES REQUIRED
  - 1X NOT TECHNICALLY FEASIBLE
  - 1Y NO CENTRAL OFFICE EQUIPMENT AVAILABLE

**89. STATUS MSG - Status Message (continued...)****CONDITIONS (continued):**

- 1Y NO CENTRAL OFFICE EQUIPMENT AVAILABLE
- 1Z LOOP REQUIRES INSTALLATION OF ADDITIONAL EQUIPMENT
- 2A LSR ERROR INCORRECT OR MISSING INFORMATION
- 2B FACILITY WORK ORDER PENDING NO BONA FIDE REQUEST (BFR) REQUIRED
- 2C BUSY CABLE ID
- 2E LOOP IS TOO LONG
- 2F INVALID OR WORKING SPLITTER
- 2G ADDRESS IS INVALID
- 2H BASIC ADDRESS IS VALID BUT LOC IS NEEDED
- 4Q TN(S) NOT ACTIVATED - SEND A SUPP OR ACTIVATE
- 6C TN(S) NOT ACTIVATED ON DUE DATE

- 5.** When the STATUS CODE is CA and the AT&T Southeast service order status is MA the following response is populated in the STATUS-MSG field: MISSED APPOINTMENT ORDER -CA

## COMPANY ASSIGNMENT

When the STATUS CODE is CA and the AT&T Southeast service order status is CA the following response is populated in the STATUS-MSG field: CANCELLED ORDER

- 6.** When the STATUS CODE is CB the following response is populated in the STATUS-MSG field:

MISSED APPOINTMENT ORDER -CB  
COMPANY BUSINESS OFC

- 7.** When the STATUS CODE is CD the following response is populated in the STATUS-MSG field:

MISSED APPOINTMENT ORDER -CD  
COMPANY DESIGNED

- 8.** When the STATUS CODE is CF the following response is populated in the STATUS-MSG field:

MISSED APPOINTMENT ORDER -CF  
COMPANY FACILITIES

- 9.** When the STATUS CODE is CI the following response is populated in the STATUS-MSG field:

MISSED APPOINTMENT ORDER -CI  
COMPANY INDEPENDENT

- 10.** When the STATUS CODE is CK the following response is populated in the STATUS-MSG field:

MISSED APPOINTMENT ORDER -CK  
COMPANY FACILITIES - ISDN BRI SERVICE

**89. STATUS MSG - Status Message (continued...)****CONDITIONS (continued):**

- 11.** When the STATUS CODE is CL the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CL  
COMPANY LOAD
- 12.** When the STATUS CODE is CM the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CM  
COMPANY MECHANIZATION
- 13.** When the STATUS CODE is CO the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CO  
COMPANY OTHER
- 14.** When the STATUS CODE is CP and the AT&T Southeast service order status is CP, CPX or PCX the following response is populated in the STATUS-MSG field:  
Completed Order
- 15.** When the STATUS CODE is CP and the AT&T Southeast service order status is HPCX or IPCX the following response is populated in the STATUS-MSG field:  
BILLING/RECORDS COMPLETE
- 16.** When the STATUS CODE is CS the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CS  
COMPANY SWITCHING
- 17.** When the STATUS CODE is CX the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CX  
COMPANY EXCEPTIONAL
- 18.** When the STATUS CODE is CY the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CY  
CUSTOMER DESIRED DUE DATE MISSED - FOC DATE TO FOLLOW
- 19.** When the STATUS CODE is PD and the AT&T Southeast the following response is populated in the STATUS-MSG field:  
PENDING ORDER
- 20.** When the STATUS CODE is PF and the AT&T Southeast the following response is populated in the STATUS-MSG field:  
PENDING FACILITIES ORDER
- 21.** When the STATUS CODE is SA the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -SA  
SUBSCRIBER ACCESS 860 REQUIRED

**89. STATUS MSG - Status Message (continued...)****CONDITIONS (continued):**

- 22.** When the STATUS CODE is SL the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -SL  
SUBSCRIBER REQUEST LATER DATE 860 REQUIRED
- 23.** When the STATUS CODE is SO the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -SO  
SUBSCRIBER OTHER 860 REQUIRED
- 24.** When the STATUS CODE is SR the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -SR  
SUBSCRIBER NOT READY 860 REQUIRED

**Data Characteristics:** alpha / numeric special characters

**Field Length (Min-Max):** 1 - 100

**Field Example:**

1J SPEICAL CONSTRUCTION

## 90. STYC - Style Code (Directory Section)

Identifies whether the listing provided is a straight line, Straight Line Under (SLU) header, caption header, etc..

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
CI	Caption Indent
SH	SLU Header
SI	SLU Indent
SL	Straight Line

**NOTE:**

When the STYC field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The STYC will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the STYC field from the directory listings screen and populate it in the STYC field on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

SL

## 91. SYSTEM ID - System Identification (Service Group Section)

Identifies the customer's system to be used in a collocation arrangement.

**Usage:** This field is required.

**NOTE:**

When the SYSTEM ID field on the LS or PS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the SYSTEM ID field will be associated with every detail record with a different LNUM in the LS and PS screen. The system will obtain this information from the SYSTEM ID field from the LS and PS screen and populate it in the SYSTEM ID field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

CA101

## 92. TER - Terminal Number (Service Group Section)

Identifies the number for a non-lead line in a multi-line hunt group or consecutive range of terminal numbers associated with the TNS field for this request.

**Usage:** This field is required.

**NOTES:**

1. When the TER field on the LS screen is not populated or blank and is required on response, this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.

**CONDITION:**

When returned, the TER field will be associated with every detail record with a different LNUM in the LS screen. The system will obtain this information from the TER field from the LS screen and populate it in the TER field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 10

**Field Example:**

05718-1000

### 93. TERS - Terminal Numbers (Service Group Section)

Identifies the number of a non-lead line in a multi-line hunt group or consecutive range of terminal numbers.

**Usage:** This field is required.

**NOTE:**

When the TER field on the PS or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TERS field will be associated with every detail record with a different LNUM in the Port and Resale screen. The system will obtain this information from the TERS field from the Port and Resale screen and populate it in the TERS field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 10

**Field Example:**

T0001

## 94. TEST PROD INDICATOR - Test Production Indicator

Identifies whether the transaction is production or test.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
P	Production
T	Test

**CONDITION:**

When returned, the system auto populates information in this field.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

T

## 95. TLI - Telephone Line Identifier

Indicates the pilot number of a multi-line hunt group.

**Usage:** This field is required.

**NOTE:**

When the TLI field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TLI will be associated with every detail record with a different HNUM in the Hunt Group record. The system will obtain the TLI information on the HGI screen and populate it in the TLI field of the Hunt Group record on the initial request or a supplement to a request.

**Data Characteristics:** numeric characters

**Filed Length (Min-Max):** 10- 10

**Field Example:**

4045551122

## 96. TNS - Telephone Numbers (Service Group Section)

Identifies the telephone number (TN) / terminal number (TER) / ISDN BRI directory number or sequential range of TNs / TERs for this request.

**Usage:** This field is required.

**NOTE:**

When the TNS field on the PS or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TNS will be associated with every detail record with a different LNUM in the Port and Resale screen. The system will obtain this information from the TNS field from the Port and Resale screen and populate it in the TNS field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2016990001

## 97. TOA - Type of Account (Directory Service)

Identifies the type of account for this listing.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
<b>B</b>	Business Firm Name
<b>BP</b>	Business Class, Person Name
<b>R</b>	Residence
<b>RP</b>	Residence Class, Business Firm Name

**NOTE:**

When the TOA field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TOA will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the TOA field from the directory listings screen and populate it in the TOA field in the directory listings section on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 1 - 2

**Field Example:**

BP

## 98. TRANS ACK TYPE - Transaction Activity Type

Identifies transaction activity.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
AC
AH
AT
NA
RD

### NOTES:

1. When returned, the TRANS ACK TYPE will be associated with either an initial request or a supplement to a request.
2. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

### CONDITIONS:

1. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AH, the return type is Clarification (860 required)
2. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AT, the return type is Accepted FOC.
3. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is RD, the return type is Reject (850 required)
4. When TRANS-SET-PURPOSE-CODE is 08 and the TRANS-ACK-TYPE is NA, the return type is Status or POS (Pending Order Status) No action required.
5. When TRANS-SET-PURPOSE-CODE is 21 and the TRANS-ACK-TYPE is AC, the return type is Jeopardy (New Due Desired Date Required)
6. When TRANS-SET-PURPOSE-CODE is 53 and the TRANS-ACK-TYPE is AT, the return type is Billing Completion.
7. When TRANS-SET-PURPOSE-CODE is CN and the TRANS-ACK-TYPE is AT, the return type is Completion.
8. When TRANS-SET-PURPOSE-CODE is CA and the TRANS-ACK-TYPE is AT, the return type is AT&T Cancel.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

AC

## 99. TRANS SET PURPOSE CODE - Transaction Set Purpose Code

Identifies the transaction set purpose code.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
06
08
21
53
CN
CA

### NOTE:

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

### CONDITIONS:

1. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AH, the return type is Clarification (860 required)
2. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AT, the return type is Accepted FOC.
3. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is RD, the return type is Reject (850 required)
4. When TRANS-SET-PURPOSE-CODE is 08 and the TRANS-ACK-TYPE is NA, the return type is Status or POS (Pending Order Status) No action required.
5. When TRANS-SET-PURPOSE-CODE is 21 and the TRANS-ACK-TYPE is AC, the return type is Jeopardy (New Due Desired Date Required)
6. When TRANS-SET-PURPOSE-CODE is 53 and the TRANS-ACK-TYPE is AT, the return type is Billing Completion.
7. When TRANS-SET-PURPOSE-CODE is CN and the TRANS-ACK-TYPE is AT, the return type is Completion.
8. When TRANS-SET-PURPOSE-CODE is CA and the TRANS-ACK-TYPE is AT, the return type is AT&T Cancel.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

06

## 100. VER - Version Identification

Identifies the customer's version number.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
00 - 99
Blank or Space

**NOTE:**

When the VER field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the VER field on the LSR screen and populated in the VER field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

01

## 101. WPP - White Pages Products (Directory Service)

Identifies information about the white page products, signature listings, personality logo and lines of distinction.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
<b>DB</b>	Designer Bold
<b>DBP</b>	Designer Bold Plus
<b>DS</b>	Designer Script
<b>DSP</b>	Designer Script Plus

**NOTE:**

When the TOA field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TOA will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the TOA field from the directory listings screen and populate it in the TOA field in the directory listings section on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 1 - 3

**Field Example:**

DB

## 5.3 Firm Order Confirmation (FOC)

### *Firm Order Confirmation (FOC) Fields*

Field Abbreviation	Field #	Field Name
AAN	1	Associated Account Number
ALI	2	Alphanumeric Listing Identifier Code
AN	3	Account Number
ATN	4	Account Telephone Number
BAN1	5	Billing Account Number 1
BAN2	6	Billing Account Number 2
BI1	7	Billing Account Number Identifier 1
BI2	8	Billing Account Number Identifier 2
BOPI	9	Bulk Order Package Identifier
CABLE ID	10	Cable Identification
CABLE ID2	11	Cable Identification 2
CC	12	Company Code
CCEA	13	Cross Connect Equipment Assignment
CCNA	14	Customer Carrier Name Abbreviation
CFA	15	Connecting Facility Assignment
CHAN/PAIR	16	Channel/Pair
CHAN/PAIR2	17	Channel/Pair 2
CHC	18	Coordinated Hot Cut
CKR	19	Customer Circuit Reference (Service Group Section)
CNUM	20	Channel Line Number
D/TSENT	21	Date and Time Sent
DD/CD	22	Due Date/Completion Date
DIDNUM	23	DID Reference Number
DISC NBR	24	Disconnect Telephone Number (Service Group Section EU)
DISC NBR	25	Disconnect Telephone Number (Service Group Section LS)
DLNUM	26	Directory Listing Reference Number (Directory Section)
DLORD	27	Directory Listing Order Number
DNUM	28	Disconnect Line Number
DOI	29	Degree of Indent
DSGCON	30	Design/Engineering Contact
DSGCON TEL NO	31	Design/Engineering Contact Telephone Number
EAN	32	Existing Account Number
EATN	33	Existing Account Telephone Number
EBD	34	Effective Bill Date
ECCKT	35	Exchange Company Circuit ID (Services Section)
FDT	36	Frame Due Time
FECCKT	37	Facility Exchange Company Circuit ID
FNUM	38	Facility Line Number
FOC/CN REMARKS	39	FOC/CN Remarks
HA	40	Hunt Group Activity

Field Abbreviation	Field #	Field Name
HID	41	Hunt Group Identifier
HNUM	42	Hunt Number
HTN	43	Hunt Telephone Number
HTSEQ	44	Hunt Sequence
IBT	45	ISDN BRI Type
INIT	46	Initiator Identification
INIT TEL NO	47	Initiator Telephone Number
ISPID	48	ISDN Service Profile Identification (Service Group Section)
IWBAN	49	Inside Wiring Bill Account Number
LACT	50	Listing Activity Indicator (Directory Section)
LEAN	51	Line Existing Account Number
LEATN	52	Line Existing Account Telephone Number
LISTADR	53	Listed Address (Directory Service)
LISTNM	54	Listed Name (Directory Service)
LNEX	55	Line Number Extension Number (Services Section)
LNUM	56	Line Number (Services Section)
LOCNUM	57	Location Number (Hunt Group Section)
LOCNUM	58	Location Number (Service Group Section)
L-ORD	59	Loop Order Number (Service Group Section)
LPHRASE	60	Listing Phrase (Directory Service)
LSR NO	61	Local Service Request Number
LST	62	Local Service Termination
LTEXT	63	Line of Text (Directory Service)
LTN	64	Listed Telephone Number
LTXNUM	65	Line of Text Reference Number (Directory Service)
LTXTY	66	Listing Text Type (Directory Service)
LTY	67	Listing Type (Directory Service)
MATN	68	Main/Alternate Telephone Number (Service Group Section)
NAN	69	New Account Number
NATN	70	New Account Telephone Number
NNSP	71	New Network Service Provider Identification
NOR	72	Number Of Requests
NOTYP	73	Number Type (Service Group Section)
NPORD	74	Number Portability Order Number (Service Group Section)
NSTN	75	Non-Standard Telephone Number (Directory Section)
ORD	76	Order Number
OTN	77	Old Telephone Number (Service Group Section)
PID	78	Personal Identifier (Service Group Section)
PON	79	Purchase Order Number
PORTED NBR	80	Ported Telephone Number (Service Group Section)
RELAY RACK	81	Relay Rack (Service Group Section)

Field Abbreviation	Field #	Field Name
REP	82	Provider Contact Representative
REP TEL NO	83	Representative Telephone Number
RESID	84	Response Identifier
RTI	85	Route Index
SAT	86	Subscriber Access Telephone Number (Service Group Section)
SCFA	87	Secondary Connecting Facility Assignment
SHELF	88	Shelf (Service Group Section)
SLOT	89	Slot (Service Group Section)
SLTN	90	Shared Line Telephone Number (Service Group Section)
STATUS CODE	91	Status Code
STATUS MSG	92	Status Message
STYC	93	Style Code (Directory Section)
SYSTEM ID	94	System Identification (Service Group Section)
TER	95	Terminal Number (Service Group Section)
TERS	96	Terminal Numbers (Service Group Section)
TEST PROD INDICATOR	97	Test Production Indicator
TGLNUM	98	Trunk Group Location Number
TLI	99	Telephone Line Identifier
TNNUM	100	Telephone Number Line Number
TNS	101	Telephone Numbers (Service Group Section)
TOA	102	Type of Account (Directory Service)
TRANS ACK TYPE	103	Transaction Activity Type
TRANS SET PURPOSE CODE	104	Transaction Set Purpose Code
VER	105	Version Identification
WPP	106	White Pages Products (Directory Service)

## 1. AAN - Associated Account Number

Identifies related accounts for the same end user at the same or different address(s).

**Usage:** This field is required.

**NOTES:**

1. When the AAN field on the LSR is not populated or blank, this field will be returned with all blanks.
2. This field identifies the CRIS Miscellaneous Account Number provided by the CLEC.

**CONDITION:**

When returned, the response information is obtained from the AAN field on the LSR screen and populated in the AAN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 13 - 13

**Field Example:**

404M205555333

## 2. ALI - Alphanumeric Listing Identifier Code

Identifier assigned to uniquely identify each listing for a main listing number from a customer.

**Usage:** This field is required.

**NOTE:**

When the ALI field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The ALI will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the ALI field from the directory listings screen and populate it in the ALI field on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 1 - 3

**Field Example:**

ABC

### 3. AN - Account Number

Identifies the main account number assigned by the NSP.

**Usage:** This field is required.

**NOTE:**

When the AN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the AN field on the LSR screen and populated in the AN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 13 - 13

**Field Example:**

3142359888

## 4. ATN - Account Telephone Number

Identifies the account telephone number assigned by the NSP.

**Usage:** This field is required.

**NOTE:**

When the ATN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the ATN field on the LSR screen and populated in the ATN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2015551212

## 5. BAN1 - Billing Account Number 1

Identifies the billing account to which the recurring and non-recurring charges for this request will be billed.

**Usage:** This field is required.

**NOTES:**

1. When returned, the BAN1 is returned in the following format:  
NPANXX1234123. *Example: 404X254321321*
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the BAN1 field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 13 - 13

**Field Example:**

201Q814587123

## 6. BAN2 - Billing Account Number 2

Identifies the billing account to which the recurring and non-recurring charges for this request will be billed.

**Usage:** This field is required.

**NOTES:**

1. When returned, the BAN2 is returned in the following format:  
NPANXX1234123. *Example: 404X254321321*
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the BAN2 field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 13 - 13

**Field Example:**

201Q814588456

## 7. BI1 - Billing Account Number Identifier 1

Identifies the service type of the billing account number populated in the BAN1 field.

**Usage:** This field is required.

**Valid Entries:**

Valid Values	
<b>D</b>	Directory Listings
<b>L</b>	Loop
<b>M</b>	Port Switched Combination
<b>N</b>	Number Portability
<b>P</b>	Port
<b>R</b>	Resale

**NOTE:**

When the BI1 field on the LSR is not populated or blank, this field will be returned with blank.

**CONDITION:**

When returned, the response information is obtained from the BI1 field on the LSR screen and populated in the BI1 field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

L

## 8. BI2 - Billing Account Number Identifier 2

Identifies the service type of the billing account number populated in the BAN2 field.

**Usage:** This field is required.

**Valid Entries:**

Valid Values	
<b>D</b>	Directory Listings
<b>L</b>	Loop
<b>M</b>	Port Switched Combination
<b>N</b>	Number Portability
<b>P</b>	Port
<b>R</b>	Resale

**NOTE:**

When the BI2 field on the LSR is not populated or blank, this field will be returned with blank.

**CONDITION:**

When returned, the response information is obtained from the BI2 field on the LSR screen and populated in the BI2 field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

L

## 9. BOPI - Bulk Order Package Identifier

Identifies the customer's unique BULK package ID that authorizes the issuance of this BULK request or supplement.

**Usage:** This field is required.

**NOTE:**

When the BOPI field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITIONS:**

1. This field is only applicable to UNE to UNE Bulk.
2. When returned, the response information is obtained from the BOPI field on the Global LSR screen and populated in the BOPI field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 12

**Field Example:**

000000000Z0

## 10. CABLE ID - Cable Identification

Identifies the provider's cable to be connected to the customer's equipment in a central office location.

**Usage:** This field is required.

**NOTE:**

When the CABLE ID field on the LS or LSNP is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the CABLE ID will be associated with every detail record with a different LNUM in the LS and LSNP screen. The system will obtain this information from the CABLE ID field from the LS and LSNP screen and populate it in the CABLE ID on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

PXX01

## 11. CABLE ID2 - Cable Identification 2

Identifies the provider's cable to be connected to the customer's equipment in a central office location.

**Usage:** This field is required.

**NOTE:**

When the CABLE ID2 field on the LS or LSNP is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the CABLE ID2 will be associated with every detail record with a different LNUM in the LS and LSNP screen. The system will obtain this information from the CABLE ID2 field from the LS and LSNP screen and populate it in the CABLE ID2 on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

PXX01

## 12. CC - Company Code

Identifies the exchange carrier initiating the transaction.

**Usage:** This field is required.

**NOTE:**

When the CC field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the CC field on the LSR screen and populated in the CC field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

1234

### 13. CCEA – Cross Connect Equipment Assignment

Identifies the physical point of termination at a collocation arrangement.

**Usage:** This field is required.

**NOTE:**

When the CCEA field on the DPU or IUS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the CCEA field will be associated with every detail record with a different LNUM in the DPU or IUS screen. The system will obtain this information from the CCEA field from the DPU or IUS screen and populate it in the CCEA field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 10 - 47

**Field Example:**

NVE01/NL-26/1938/SHOCKA01W27

## 14. CCNA - Customer Carrier Name Abbreviation

Identifies the COMMON LANGUAGE IAC code for the customer.

**Usage:** This field is required.

**NOTE:**

When the CCNA field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the CCNA field on the LSR screen and populated in the CCNA field on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 3 - 3

**Field Example:**

ZYX

## 15. CFA - Connecting Facility Assignment

Identifies the provider's carrier system and channel to be used.

**Usage:** This field is required.

**NOTE:**

When the CFA field on the LS, LSNP and PS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the CFA will be associated with every detail record with a different LNUM in the Loop, LSNP and Port Service screen. The system will obtain this information from the CFA field from the Loop, LSNP and Port service screen and populate it in the CFA field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 42

**Field Example:**

101/T1/3/HRFRCT03HA1/HRFRCT03DC0

## 16. CHAN/PAIR - Channel/Pair

Identifies the specific channel or pair within the provider's cable to be used for connection.

**Usage:** This field is required.

**NOTES:**

1. When the CHAN/PAIR field on the LS or LSNP is not populated or blank, this field will be returned with all blanks.
2. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITION:**

When returned, the CHAN/PAIR will be associated with every detail record with a different LNUM in the LS and LSNP screen. The system will obtain this information from the CHAN/PAIR field from the LS and LSNP screen and populate it in the CHAN/PAIR on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 4

**Field Example:**

24

## 17. CHAN/PAIR2 - Channel/Pair 2

Identifies the specific channel or pair within the provider's cable to be used for connection.

**Usage:** This field is required.

**NOTES:**

1. When the CHAN/PAIR2 field on the LS or LSNP is not populated or blank, this field will be returned with all blanks.
2. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITION:**

When returned, the CHAN/PAIR2 will be associated with every detail record with a different LNUM in the LS and LSNP screen. The system will obtain this information from the CHAN/PAIR2 field from the LS and LSNP screen and populate it in the CHAN/PAIR2 on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 4

**Field Example:**

24

## 18. CHC - Coordinated Hot Cut

Identifies that the customer is requesting near seamless cutover activity.

**Usage:** This field is required.

**NOTE:**

When the CHC field on the LSR is not populated or blank, this field will be returned blank.

**CONDITION:**

When returned, the response information is obtained from the CHC field on the LSR screen and populated in the CHC field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

Y

## 19. CKR - Customer Circuit Reference (Service Group Section)

Identifies the circuit number or sequential range of circuit numbers assigned by the customer.

**Usage:** This field is required.

**NOTE:**

When the CKR field on the LS, LSNP, NP, PS, RS is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the CKR will be associated with every detail record with a different LNUM in the Loop, LSNP, NP, Port and Resale screen. The system will obtain this information from the CKR field from the Loop, LSNP, NP Port and Resale screen and populate it in the CKR field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 41

**Field Example:**

L0002

## 20. CNUM - Channel Line Number

Identifies the B and D channel line number.

**Usage:** This field is required.

**NOTE:**

When the CNUM field on the ISU or ISR screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the CNUM field will be associated with every detail record with a different LNUM in the ISU or ISR screen. The system will obtain this information from the CNUM field from the ISU or ISR screen and populate it in the CNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 4

**Field Example:**

576

## 21. D/TSENT - Date and Time Sent

Identifies the date and time that the transaction is sent.

**Usage:** This field is required.

**Valid Entries:**

Valid Format:	
<b>CCYYMMDDHHMAA</b>	
<b>CC</b>	Two Digit Century (00-99)
<b>YY</b>	Two Digit Year (00-99)
<b>MM</b>	Two Digit Month (01-12)
<b>DD</b>	Two Digit Day (01-31)
<b>HH</b>	Two Digit Hour (01-12)
<b>MM</b>	Two Digit Minute (00-59)
<b>AA</b>	AM or PM

### NOTE:

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

### CONDITION:

When returned, the system will record this information from the date and time stamp that indicates the date the response was submitted to the system interfacing the CLEC. The system shall populate this date in the D/TSENT field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 14 - 14

**Field Example:**

201103030125PM

## 22. DD/CD - Due Date/Completion Date

Identifies the date the service order requested is due and completed.

**Usage:** This field is required.

**NOTES:**

1. Hyphen (-) is the only special character that may be returned.
2. When the DD or CD is not populated on the AT&T Southeast service order this field will be returned with blanks.
3. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITIONS:**

1. When returned, the DD/CD is returned in the following formats: CCYY-MM-DD or CCYYMMDD *Example: 7/10/2004 or 20040710*.
2. When returned, the response information is obtained from the AT&T SE service order and populated in the DD/CD field on the response.

**Data Characteristics:** alpha / numeric special characters

**Field Length (Min-Max):** 1 - 10

**Field Example:**

11-10-2008

## 23. DIDNUM - DID Reference Number

Identifies each DID group as a unique number and each additional DID group as a unique number.

**Usage:** This field is required.

**NOTE:**

When the DIDNUM field on the DPR, DPU or DTU screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the DIDNUM field will be associated with every detail record with a different LNUM in the DPR, DPU or DTU screen. The system will obtain this information from the DIDNUM field from the DPR, DPU or DTU screen and populate it in the DIDNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

00023

## 24. DISC NBR - Disconnect Telephone Number (Service Group Section EU)

Identifies the end user telephone number to be disconnected.

**Usage:** This field is required.

**NOTE:**

When the DISC NBR field on the EU screen is not populated or blank and is required on response, this field will be returned with blanks

**CONDITION:**

The DISC NBR will be associated with every detail record with a different DNUM in the EU screen. The system will obtain this information from the DISC NBR field from the EU screen and populate it in the DISC NBR field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2148672233

## 25. DISC NBR - Disconnect Telephone Number (Service Group Section LS)

Identifies the end user telephone number to be disconnected.

**Usage:** This field is required.

**NOTE:**

When the DISC NBR field on the LS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The DISC NBR will be associated with every detail record with a different LNUM in the Loop Services form. The system will obtain this information from the DISC NBR field from the Loop Services screen and populate it in the DISC NBR field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2016991234

## 26. DLNUM - Directory Listing Reference Number (Directory Section)

Identifies each listing segment as a unique number.

**Usage:** This field is required.

**NOTE:**

When the DLNUM field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The DLNUM will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the DLNUM field from the directory listings screen and populate it in the DLNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

0023

## 27. DLORD - Directory Listing Order Number

Identifies the Directory Listing Service Order number.

**Usage:** This field is required.

**NOTE:**

This field will be returned with all blanks when a directory listing order is not issued.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 20

**Field Example:**

A123\B456C

## 28. DNUM - Disconnect Line Number

Identifies the line or trunk as a unique number and each additional occurrence as a unique number.

**Usage:** This field is required.

**NOTE:**

When the DNUM field on the EU screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the DNUM will be associated with every detail record with a different DNUM in the EU form. The system will obtain this information from the DNUM field from the EU form and populate it in the DNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

00023

## 29. DOI - Degree of Indent

Identifies the degree of indentation for this listing.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
0 - 6

**NOTE:**

When the DOI field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the DOI will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the DOI field from the directory listings screen and populate it in the DOI field in the directory listings section on the response.

**Data Characteristics:** numeric character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

1

### 30. DSGCON - Design/Engineering Contact

Identifies the representative of the customer or agent that should be contacted on design/engineering matters.

**Usage:** This field is required.

**NOTE:**

When the DSGCON field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the response information is obtained from the DSGCON field on the LSR screen and populated in the DSGCON field on the response.

**Data Characteristics:** alpha / special characters

**Field Length (Min-Min):** 1 - 15

**Field Example:**

JOHN SMITH

## 31. DSGCON TEL NO - Design/Engineering Contact Telephone Number

Identifies the telephone number of the provider's design/engineering contact.

**Usage:** This field is required.

**Valid Entries:**

Valid Formats:
10 Numeric characters
15 Alpha/Numeric characters

**NOTE:**

When the DSGCON field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the response information is obtained from the DSGCON TEL NO field on the LSR screen and populated in the DSGCON TEL NO field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 15 - 15

**Field Example:**

2019813500X1234

## 32. EAN - Existing Account Number

Identifies the end user's existing account number.

**Usage:** This field is required.

**Valid Entries:**

Valid Formats:
10 Numeric characters
13 Alpha/Numeric characters

**NOTE:**

When the EAN field on the EU is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the EAN field on the EU screen and populated in the EAN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 13 - 13

**Field Example:**

404M231234123

### 33. EATN - Existing Account Telephone Number

Identifies the end user's existing account telephone number.

**Usage:** This field is required.

**NOTE:**

When the EATN field on the EU is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the EATN field on the EU screen and populated in the EATN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

3142359888

## 34. EBD - Effective Bill Date

Identifies the effective date to begin or cease billing when the billing date is different from the desired due date.

**Usage:** This field is required.

**NOTE:**

When EBD is not populated on the AT&T Southeast service order this field will be returned with blanks.

**CONDITIONS:**

1. When returned, EBD is returned in the following format:  
CCYYMMDD *Example: 20040710*
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the EBD field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 8 - 8

**Field Example:**

20081115

## 35. ECCKT - Exchange Company Circuit ID (Services Section)

Identifies a provider's circuit identification.

**Usage:** This field is required.

### NOTES:

1. When the ECCKT field is not populated on the Service order for (ACT=N, D, or MI=C or D) and the ECCKT field is not populated or blank on the LS screen, and is required on response, this field will be returned with blanks.
2. Period (.) is the only special character that may be returned.

### CONDITIONS:

1. Excluding Line Share and Line Splitting, when ECCKT is returned for REQ TYP A, and the ACT Type is not N or D and the MI is not C or D, the system will obtain the information from the LS screen and return the information in the ECCKT field on the response.
2. Excluding Line Share and Line Splitting, when ECCKT is returned, the system will obtain this information from the service order for REQ TYP A, only when the ACT Type is N or D or the MI is C or D and populate the information in the ECCKT field on the response.
3. When both a telephone number and circuit id number is applicable to the line loss notification, the telephone number will be returned in this field and the circuit id will be returned in the ECCKT field.
4. When ECCKT is returned on REQ TYP B, the system will obtain the information from the service order and populate the ECCKT information in the ECCKT field on the response.
5. When the ECCKT is returned and the product is Line Share or Line Splitting, the system will obtain the ECCKT from the AT&T Southeast service order and populate the information in the ECCKT field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 41

**Field Example:**

101.T1.NYCMNY50.NYCMNY54W01

## 36. FDT - Frame Due Time

Identifies the frame cutover time.

**Usage:** This field is required.

**NOTES:**

1. When the FDT is not populated on the AT&T Southeast service order this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.
3. When this field is returned as a range, the 5th position of the field will be a hyphen (-). *Example: 1800-1900*

**CONDITIONS:**

1. (Excluding REQ TYP B (LNP)) When returned the response information is obtained from the AT&T Southeast service order and populated in the FDT field on the response.
2. For REQ TYP B (LNP), when returned the response information for this field is obtained from the DFDT field on the LSR and populated in the FDT field on the response.
3. When returned, the FDT is returned in military time.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 9

**Field Example:**

1300-1700

## 37. FECCKT – Facility Exchange Company Circuit ID

Identifies the service provider's facility circuit identification.

**Usage:** This field is required.

**NOTE:**

When the FECCKT field on the DTU, DTR, ISU or ISR screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the FECCKT field will be associated with every detail record with a different LNUM in the DTU, DTR, ISU or ISR screen. The system will obtain this information from the FECCKT field from the DTU, DTR, ISU or ISR screen and populate it in the FECCKT field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 15 - 46

**Field Example:**

101.T1.NYCMNY50.NYCMNY54W01

## 38. FNUM – Facility Line Number

Identifies the facility as a unique number and each additional occurrence as a unique number.

**Usage:** This field is required.

**NOTE:**

When the FNUM field on the DTR, DTU, IUS or IRS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the FNUM field will be associated with every detail record with a different LNUM in the DTR, DTU, IUS or IRS screen. The system will obtain this information from the FNUM field from the DTR, DTU, IUS or IRS screen and populate it in the FNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 2

**Field Example:**

10

## 39. FOC/CN REMARKS - FOC/CN Remarks

Identifies a free flowing field which can be used to expand upon and clarify other data.

**Usage:** This field is required.

**NOTE:**

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/ Tech Pubs / XML Support Website / Documentation*.

**CONDITIONS:**

1. On LSRs, when the system determines that a dispatch is required it will populate 'DISPATCH IS REQUIRED' in the FOC/CN REMARKS field following any other FOC/CN-Remarks on the response. If there is not sufficient space for the message the system will drop the number of characters needed at the end of the other Remarks to populate the 20 characters, DISPATCH IS REQUIRED.

2. The 'ADSL Informational' message will be populated in the FOC/CN-Remarks on the FOC according to the following guidelines:

'Dispatch Required' will remain the last entry in FOC/CN-Remarks if applicable.

'Facility Check' messages, if applicable, will remain immediately in front of 'Dispatch Required' or last if 'Dispatch Required' is not applicable.

'ADSL Informational' message, when applicable, will appear immediately in front of both 'Facility Check' and 'Dispatch Required' messages or immediately in front of 'Facility Check' or 'Dispatch Required' message if only one is required. If neither 'Facility Check' nor 'Dispatch Required' message is applicable, 'ADSL Informational' message will be last entry in FOC/CN-Remarks.

Any remarks on incoming LSR that will be moved to the FOC will be shortened by number of characters required to place any or all of the three messages listed above that apply.

3. The Facility check messages will be populated in the Remarks on the FOC according to the following guidelines:

- a. If there are no remarks applicable for the FOC/CN-Remarks section of the FOC (that originated from the Remarks on the LSR), the system will place one of the applicable facility checked messages, "Facilities have been checked" or "Facilities have been checked and a PF condition exists" in the FOC/CN REMARKS field on the response.

- b. If the only remarks applicable for the FOC/CN-Remarks Section of the FOC is, "Dispatch is Required", the system will place one of the applicable facility checked messages "Facilities have been checked" or "Facilities have been checked and a PF condition exists" before the "Dispatch is Required" message.

- c. If there are remarks applicable for the FOC/CN-Remarks section of the FOC (Remarks from LSR), but no "Dispatch is Required" message present, the system will place one of the applicable facility checked messages "Facilities have been checked" or "Facilities have been checked and a PF condition exists" at the beginning of the Remarks. If adding the facility checked message causes the Remarks section to exceed the number of characters allowed, the system will drop the number of characters needed at the end of the other Remarks.

**39. FOC/CN REMARKS - FOC/CN Remarks (continued...)****CONDITIONS (continued):**

4. The system will search to obtain this information from the REMARKS field from the LSR screen and populate in it the FOC/CN-REMARKS field on the response.
5. When an LSR is submitted for Non-Complex REQTYP M, MI= A, B, C, or D, and LNA = C, D, G, N, P, T, V, W, or X where a service order is generated with Outward ('O') action coded FID OADSL in the UNFIELDDED IDENT Section of the AT&T Southeast service order, the system will return the following informational message in the FOC/CN-REMARKS field on the response:

CLEC SHOULD HAVE THE END USER CONTACT THEIR NSP/ISP FOR CHANGES TO THEIR ADSL SERVICE. ADL++ IS NOT VALID WITH UNE PORT SERVICE

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 350

**Field Example:**

CLEC SHOULD HAVE THE END USER CONTACT THEIR NSP/ISP FOR CHANGES TO THEIR ADSL SERVICE. ADSL++ IS NOT VALID WITH UNE PORT SERVICE

## 40. HA - Hunt Group Activity

Identifies the activity associated with the hunt group on this request.

**Usage:** This field is required.

**Valid Entries:**

Valid Values	
<b>C</b>	Change to Hunt Group Sequence
<b>D</b>	Remove Hunt Group Arrangement
<b>E</b>	Existing/No Change
<b>N</b>	New

**NOTE:**

When the HA field on the LSR is not populated or blank and is required on response, this field will be returned with all blanks.

**CONDITION:**

When returned, the HA will be associated with every detail record with a different HNUM in the Hunt Group record. The system will obtain this information from the HA field on the HGI screen and populate it in the HA field on the initial request or a supplement to a request.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

N

## 41. HID - Hunt Group Identifier

Identifies the hunt group.

**Usage:** This field is required.

**NOTE:**

When the HID field on the LSR is not populated or blank and is required on response, this field will be returned with all blanks.

**CONDITION:**

When returned, the HID will be associated with every detail record with a different HNUM in the Hunt Group record. The system will obtain this information from the HGI and populate it in the HID field on the initial request or a supplement to a request.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 4

**Field Example:**

30

## 42. HNUM - Hunt Number

Identifies the hunt group as a unique number and each additional occurrence as a unique number.

**Usage:** This field is required.

**NOTE:**

When the HNUM field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the HNUM will be associated with every detail record that has a different HNUM in the Hunt Group record. The system will obtain this information from the HNUM field on the HGI screen and populate it in the HNUM field on the initial request or a supplement to a request.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

00003

### 43. HTN - Hunt Telephone Number

Identifies the hunting number for this sequence in the hunt group.

**Usage:** This field is required.

**NOTE:**

When the HTN field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the HTN will be associated with every detail record with a different HNUM in the Hunt Line record. The system will obtain this information from the Hunt HTN field on the HGI screen and populate it in the HTN field on the initial request or supplement to a request.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 15

**Field Example:**

T0001

## 44. HTSEQ - Hunt Sequence

Identifies the desired hunting sequence or range of hunt sequence.

**Usage:** This field is required.

**NOTE:**

When the AAN field on the LSR is not populated or blank and is required on response, this field will be returned with all blanks.

**CONDITION:**

When returned, the HTSEQ will be associated with every detail record with a different HNUM in the Hunt Line record. The system will obtain this information from HTSEQ field on the HGI screen and populate it in the HTSEQ field on the initial request or a supplement to a request.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

0003

## 45. IBT - ISDN BRI Type

Indicates the type of National ISDN-BRI.

**Usage:** This field is required.

**NOTE:**

When the IBT field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the IBT field on the EU screen and populated in the IBT field on the response.

**Data Characteristics:** numeric character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

2

## 46. INIT - Initiator Identification

Identifies the LSP's representative who originated this transaction.

**Usage:** This field is required.

**CONDITION:**

When returned, the response information is obtained from the INIT field on the LSR screen and populated in the INIT LSR field on the response.

**Data Characteristics:** alpha / special characters

**Field Length (Min-Max):** 1 - 15

**Field Example:**

JOHN SMITH

## 47. INIT TEL NO - Initiator Telephone Number

Identifies the telephone number of the initiator.

**Usage:** This field is required.

**Valid Entries:**

Valid Formats:
10 Numeric characters
15 Alpha/Numeric characters

**CONDITION:**

When returned, the response information is obtained from the INIT-TEL NO field on the LSR screen and populated in the INIT-TEL NO LSR field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 15 - 15

**Field Example:**

2019813500

## 48. ISPID - ISDN Service Profile Identification (Service Group Section)

Provides a code that must be programmed into the ISDN BRI Customer Premises Equipment (CPE). This code is transmitted from the CPE over the ISDN BRI D-channel to the LSO switch. It must be present in order for the BRI to become active.

**Usage:** This field is required.

**CONDITION:**

When returned, the ISPID will be associated with every detail record with a different LNUM in the Resale form. The system will obtain this information from the ISPID field from the Resale screen and populate it in the ISPID field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 14

**Field Example:**

70350663550101

## 49. IWBAN - Inside Wiring Bill Account Number

Identifies the billing account number for charges associated with inside wire.

**Usage:** This field is optional.

**CONDITION:**

When returned, the response information is obtained from the IWBAN field on the EU screen and populated in the IWBAN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 13

**Field Example:**

201Q814587123

## 50. LACT - Listing Activity Indicator (Directory Section)

Identifies the activity involved for this listing request.

**Usage:** This field is required. Usage:

**Valid Entries:**

Valid Values	
<b>N</b>	New Listing
<b>D</b>	Delete Listing (remove existing listing)
<b>I</b>	Change Listing (new data to be inserted)
<b>O</b>	Change Listing (old data to be removed)
<b>Z</b>	No Change to Listing

**NOTE:**

When the LACT field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The LACT will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the LACT field from the directory listings screen and populate it in the LACT field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

N

## 51. LEAN - Line Existing Account Number

Identifies the end user's existing account number assigned by the current NSP and/or LSP.

**Usage:** This field is required.

**NOTES:**

1. When the LEAN field on the LSNP, NP, PS, or RS screen is not populated or blank and is required on response, this field will be returned with blanks.
2. Supports consolidated working telephone numbers that reside in Old LSP existing account(s) to a single Account Telephone Number (ATN). Supports one end user's multiple accounts at one end user location.

**CONDITION:**

When returned, the LEAN will be associated with every detail record with a different LNUM in the LSNP, NP, Port and Resale screen. The system will obtain this information from the LEAN field from the LSNP, NP, Port and Resale screen and populate it in the LEAN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 13 - 13

**Field Example:**

201M231234

## 52. LEATN - Line Existing Account Telephone Number

Identifies the end user's existing account telephone number assigned by the old LSP.

**Usage:** This field is required.

**NOTES:**

1. When the LEATN field on the LS, LSNP, NP, PS, or RS screen is not populated or blank and is required on response, this field will be returned with blanks.
2. Supports consolidated working telephone numbers that reside in Old LSP existing account(s) to a single Account Telephone Number (ATN). Supports one end user's multiple accounts at one end user location

**CONDITION:**

When returned, the LEATN will be associated with every detail record with a different LNUM in the Loop, LSNP, NP, Port and Resale screen. The system will obtain this information from the LEATN field from the Loop, LSNP, NP Port and Resale screen and populate it in the LEATN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2015551234

### 53. LISTADR - Listed Address (Directory Service)

Identifies the entire address as it is to be listed.

**Usage:** This field is required.

**NOTES:**

1. When the LAPR, LANO, LASF, LASD, LASN, LATH, LASS, LALOC, and LAST fields on the DL screen are not populated or blank and are required on response, this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.

**CONDITION:**

When returned, the LISTADR will be associated with every detail record with a different DLNUM in the DL screen. The LISTADR will be formatted using the LAPR, LANO, LASF, LASD, LASN, LATH, LASS, LALOC, and LAST fields as they appear on the DL screen. The system will format this data in the LISTADR field on the response as follows: When returned the fields will be displayed in the following order: LAPR, LANO, LASF, LASD, LASN, LATH, LASS, LALOC, LAST.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 150

**Field Example:**

25W 4501/2 SW CAMINO RAMON LN NW SAN RAMON CA 94583

## 54. LISTNM - Listed Name (Directory Service)

Identifies the name contained in the listing.

**Usage:** This field is required.

**NOTE:**

When the LNLN, LNFN, DES, TL, TITLE1, TITLE2, and NICK fields on the DL screen are not populated or blank and are required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the LISTNM will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the LNLN, LNFN, DES, TL, TITLE1, TITLE2, and NICK fields from the directory listings screen and populate it in the LISTNM field in the directory listings section on the response. When returned the system will format the information in the LISTNM field in the following order: LNLN, LNFN, DES, TL, TITLE1, TITLE2, NICK. The system will remove trailing blanks.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 252

**Field Example:**

JANE SMITH

## 55. LNEX - Line Number Extension Number (Services Section)

Provides an extension to the line number field (LNUM) for use when multiple ISDN-BRI directory numbers (TNS) are assigned to a single ISDN BRI line for one service order/ PON/LNUM.

**Usage:** This field is required.

**NOTE:**

When the LNEX field on the PS or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the LNUM will be associated with every detail record with a different LNEX in the Loop, Port and Resale screen. The system will obtain this information from the LNEX field from the Port and Resale form and populate it in the LNEX field in the Services Group record on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

00001

## 56. LNUM - Line Number (Services Section)

Identifies the line or trunk as a unique number and each additional occurrence of either as a unique number.

**Usage:** This field is required.

**Valid Entries:**

Valid Values
00001 - 99999

**NOTE:**

When the LNUM field on the LS, LSNP, NP, PS, or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the LNUM will be associated with every detail record with a different LNUM in the Loop, LSNP, NP, Port and Resale screen. The system will obtain this information from the LNUM field from the Loop, LSNP, NP, Port and Resale form and populate it in the LNUM field in the Services Group record on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

00118

## 57. LOCNUM - Location Number (Hunt Group Section)

Identifies the service location number for the service requested.

**Usage:** This field is required.

**NOTES:**

1. When the LOCNUM field on the HTI is not populated or blank and is required on response, this field will be returned with all blanks.
2. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITION:**

When returned, the LOCNUM will be associated with each detail record with a different HNUM in the Hunt Group record on the initial request or a supplement to a request. The system will obtain this information from the LOCNUM field on the HGI Screen and will populate it in the LOCNUM field on the HGI Screen and will populate it in the LOCNUM field on the initial request or a supplement to a request.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 3 - 3

**Field Example:**

002

## 58. LOCNUM - Location Number (Service Group Section)

Identifies the service location number for the service requested.

**Usage:** This field is required.

**Valid Entries:**

Valid Values
000 - 999

### NOTES:

1. When the LOCNUM field on the LS, LSNP, NP, PS, or RS screen is not populated or blank and is required on response, this field will be returned with all blanks.
2. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

### CONDITION:

When returned, the LOCNUM will be associated with every detail record with a different LNUM in the Loop, LSNP, NP, Port and Resale screen. The system will obtain this information from the LOCNUM field from the Loop, LSNP, NP, Port and Resale form and populate it in the LOCNUM field in the Services Group record on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 3 - 3

**Field Example:**

002

## 59. L-ORD - Loop Order Number (Service Group Section)

Identifies the provider's order number for the loop.

**Usage:** This field is required.

**NOTE:**

When the firm order type is not for REQTYP A, this field will be returned with blanks.

**CONDITIONS:**

1. This field is only applicable on REQTYP A request(s).
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the L-ORD field.

**Data Characteristics:** alpha /numeric characters

**Field Length (Min-Max):** 1 - 8

**Field Example:**

C1234567

## 60. LPHRASE - Listing Phrase (Directory Service)

Identifies a predefined phrase associated with a listing.

**Usage:** This field is required.

### Valid Entries:

Valid Values:	
5	Toll Free-Dial '1' & Then
15	Toll Free-Dial '0' & Then
20	Toll Free-Dial Access Code & Then
25	Charges Will Apply-Dial '1' & Then ('900 numbers')
33	No Charge Dial '1' & Then (Florida Only)
35	No Charge for Call Dialed Direct To This Number from (Exchange Name)
45	TDD & Voice
50	TDD Only
65	(City) Tel No
67	Charges Apply-Dial "1" and Then
73	Charges Will Apply
77	Toll & Service Charges Apply
85	At The Tone Dial ---
90	At the Beep Enter Call Back Number
103	(s % See Customer Guide Pages concerning the use of the telephone equip at this no.)
107	(s % See Customer Guide Pages concerning the use of the telephone equip at this no.)

### NOTE:

When the LPHRASE on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

### CONDITIONS:

1. The listing text type group LTXNUM, LXTY, LPHRASE and LTEXT can repeat up to three times.
2. When returned, the LPHRASE will be associated with every detail record with a different LTXNUM in the DL screen. The system will obtain the LPHRASE field information from the LPHRASE field found in the DL screen and will populate this information in the LPHRASE field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 3

**Field Example:**

103

## 61. LSR NO - Local Service Request Number

Identifies the number that may be generated by the provider's mechanized systems, pre-assigned to the customer by the provider or manually assigned by the provider to identify a customer's request for service.

**Usage:** This field is required.

**Valid Entries:**

<b>Valid Format:</b>
NNNNNNNNNANNNNN-NN
A = Alpha
N = Numeric

**NOTE:**

Hyphen (-) is the only special character that may be returned.

**CONDITION:**

When returned, the response information is obtained from the LSR NO field on the LSR screen and populated in the LSR NO field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 18

**Field Example:**

20030302L00074-00

## 62. LST - Local Service Termination

Identifies the CLLI code of the end office switch from which the service is being provided.

**Usage:** This field is required.

**CONDITION:**

When returned, the LST will be associated with every detail record with a different LNUM in the LSR screen. The system will obtain this information from the LST field from the administrative section on the LSR screen and populate it in the LST field on the response. The incoming LST field is on the Header level and will be populated on the Detail level on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 11 - 11

**Field Example:**

STLSMO07CG0

## 63. LTEXT - Line of Text (Directory Service)

Identifies the descriptive or informative text that will appear in the directory to assist the end user.

**Usage:** This field is required.

**NOTE:**

When the LTEXT on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITIONS:**

1. The listing text type group LTXNUM, LXTY, LPHRASE and LTEXT can repeat up to three times
2. When returned, the LTEXT will be associated with every detail record with a different LTXNUM in the DL screen. The system will obtain the LTEXT field information from the LTEXT field found in the DL screen and will populate this information in the LTEXT field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 250

**Field Example:**

CALL BETWEEN 9 AND 5

## 64. LTN - Listed Telephone Number

Identifies the telephone number that may be included in the directory and/or quoted in Directory Assistance (DA).

**Usage:** This field is required.

**NOTE:**

When the LTN field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The LTN will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the LTN field from the directory listings screen and populate it in the LTN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2019813500

## 65. LTXNUM - Line of Text Reference Number (Directory Service)

Identifies each line of information with a unique number.

**Usage:** This field is required.

**NOTE:**

When the LTXNUM field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITIONS:**

1. The listing text type group LTXNUM, LTXTY, LPHRASE and LTEXT can repeat up to three times.
2. The LTXNUM will be associated with every detail record with a different LTXNUM in the DL screen. The system will obtain the LTXNUM field information from the LTXNUM field found in the DL screen and will populate this information in the LTXNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

02

## 66. LTXTY - Listing Text Type (Directory Service)

Identifies the type of associated text that will appear in the directory to assist the end user.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
<b>AC</b>	Alternate Call
<b>CR</b>	Cross Reference
<b>DL</b>	Designer Extra Line
<b>DLB</b>	Designer Extra Line Bold
<b>DLS</b>	Designer Extra Line Script
<b>ITX</b>	Indent Text
<b>OP</b>	Other Predefined Phrase
<b>SP</b>	Special Text
<b>TT</b>	Text

### NOTE:

When the LTXTY field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

### CONDITIONS:

1. The listing text type group LTXNUM, LTXTY, LPHRASE and LTEXT can repeat up to three times
2. The LTXTY will be associated with every detail record with a different LTXNUM in the DL screen. The system will obtain the LTXTY field information from the LTXTY field found in the DL screen and will populate this information in the LTXTY field on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 2 - 3

**Field Example:**

ITX

## 67. LTY - Listing Type (Directory Section)

Identifies the type of listing with respect to publication and Directory Assistance (DA) appearance rules.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
1	Listed - Appears in DA and Directory
2	Non-Listed - Appears only in DA
3	Non-Published - Does not appear in directory and the telephone number does not appear in DA

**NOTE:**

When the LTY field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The LTY will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the LTY field from the directory listings screen and populate it in the LTY field on the response.

**Data Characteristics:** numeric character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

1

## 68. MATN - Main/Alternate Telephone Number (Service Group Section)

Indicates the dialable telephone number(s) assigned to the ISDN BRI line. If the same number cannot be used for both B-channels, then the main number will be assigned to B-channel 1 and the alternate number will be assigned to B-channel 2.

**Usage:** This field is required.

### Valid Entries:

Valid Values:	
<b>A</b>	Alternate Telephone Number(s)
<b>M</b>	Main Telephone Number

### NOTE:

When the MATN field on the PS or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

### CONDITION:

When returned, the MATN field will be associated with every detail record with a different LNUM in the Port and Resale screen. The system will obtain this information from the MATN field from the Port and Resale screen and populate it in the MATN field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

M

## 69. NAN - New Account Number

Identifies the new account number.

**Usage:** This field is required.

**NOTE:**

When the NAN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the NAN field on the LSR screen and populated in the NAN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2015551234

## 70. NATN - New Account Telephone Number

Identifies the new account telephone number.

**Usage:** This field is required.

**NOTE:**

When the NATN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the NATN field on the LSR screen and populated in the NATN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2055551234

## 71. NNSP - New Network Service Provider Identification

Identifies the Number Portability Administration Center (NPAC) Service Provider Identifier ( SP) of the new Network Service Provider (NSP).

**Usage:** This field is required.

**NOTE:**

When the NNSP field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITIONS:**

1. This field is applicable to LNP.
2. When returned, this information is obtained from the NNSP field on the LSR and returned in the NNSP field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

8A55

## 72. NOR - Number Of Requests

Identifies the local service request and the total quantity of local service requests within a related group of orders being submitted.

**Usage:** This field is conditional.

**NOTES:**

1. The value returned in this field will be identical to the value submitted on the initial or supplemental LSR.
2. Hyphen (-) is the only special character that may be returned.

**CONDITION:**

This field will only be returned when the REQ TYP is B and the product is Bulk Single LSR arrangement.

**Data Characteristics:** numeric / special characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

01-99

## 73. NOTYP - Number Type (Service Group Section)

Identifies the type of telephone number.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
T	Telephone Number
L	Terminal Number

**CONDITION:**

When returned, the NOTYP will be associated with every detail record with a different LNUM in the Resale screen. The system will obtain this information from the NOTYP field on the Resale screen and populate it in the NOTYP field in the Resale section on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

T

## 74. NPORD - Number Portability Order Number (Service Group Section)

Identifies the provider's order number for number portability.

**Usage:** This field is required.

**NOTE:**

This field will be returned with blanks on Reject Notifications and Jeopardy notifications.

**CONDITION:**

When returned, the system will obtain this information from the AT&T Southeast service order and populate the information in the NPORD field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 20

**Field Example:**

C123456

## 75. NSTN - Non-Standard Telephone Number (Directory Section)

Identifies a telephone number which is not in the standard North American Numbering Plan format, e.g., vanity numbers, Enterprise, 911.

**Usage:** This field is required.

**NOTES:**

1. When the NSTN field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.

**CONDITION:**

The NSTN will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the NSTN field from the directory listings screen and populate it in the NSTN field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 18

**Field Example:**

414-227-HELP

## 76. ORD - Order Number

Identifies the provider's order number for the service requested.

**Usage:** This field is required.

**NOTE:**

When an AT&T Southeast Service order has not been generated this field will be returned blank.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order and populated in the ORD field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 8 - 8

**Field Example:**

C1234567

## 77. OTN - Old Telephone Number (Service Group Section)

Identifies the existing telephone number that is being changed.

**Usage:** This field is required.

**NOTE:**

When the OTN field on the PS or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The OTN will be associated with every detail record with a different LNUM in the Port and Resale Services screen. The system will obtain this information from the OTN field from the Port and Resale Services screen and populate it in the OTN on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2016990001

## 78. PID - Personal Identifier (Service Group Section)

Identifies the end user's personal identification number.

**Usage:** This field is required.

**NOTES:**

1. When this information is not populated on the AT&T Southeast service order and this field is required on response, the field will be returned with blanks.
2. This field identifies the authorization number to be utilized with the telephone number provided in the SAT field.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order and returned in the PID field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

4412

## 79. PON - Purchase Order Number

Identifies the customer's unique purchase order or requisition number that authorizes the issuance of this request or supplement.

**Usage:** This field is required.

**NOTE:**

Apostrophe ('), Blank ( ), Comma (,) Hyphen (-), Period (.) and Space ( ) are the only special characters that may be returned.

**CONDITION:**

When returned, the response information is obtained from the PON field on the LSR screen and populated in the PON field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 16

**Field Example:**

824Z9

## 80. PORTED NBR - Ported Telephone Number (Service Group Section)

Identifies the Telephone Number (TN) or consecutive range of TNs residing in the same switch to be ported.

**Usage:** This field is required.

**CONDITION:**

When returned, the system will obtain the information from the PORTED NBR field on the LSNP and NP screen and populate the information in the PORTED NBR field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 -1 0

**Field Example:**

9086997000

## 81. RELAY RACK - Relay Rack (Service Group Section)

A code that identifies the customer's bay/cabinet in a collocation arrangement and may also include the floor and aisle where the service piece of equipment is located.

**Usage:** This field is required.

**NOTES:**

1. When the RELAY RACK field on the LS or PS screen is not populated or blank and is required on response, this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.

**CONDITION:**

When returned, the RELAY RACK field will be associated with every detail record with a different LNUM in the LS and PS screen. The system will obtain this information from the RELAY RACK field from the LS and PS screen and populate it in the RELAY RACK field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 10

**Field Example:**

10052-03

## 82. REP - Provider Contact Representative

Identifies the provider's representative handling this service request.

**Usage:** This field is required.

**Valid Entries:**

<b>Valid Value:</b>
---------------------

LCSC
------

<b>CONDITION:</b>
-------------------

When returned, the response information is returned as LCSC and populated in the REP field on the response.
---

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 15

**Field Example:**

LSCS

### 83. REP TEL NO - Representative Telephone Number

Identifies the telephone number of the provider's representative handling this request.

**Usage:** This field is required.

**CONDITION:**

When returned, this information is obtained from the CLEC profile and returned in the REP TEL NO field.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

4045551234

## 84. RESID - Response Identifier

Identifies the response number assigned by the provider to relate to associated transactions.

**Usage:** This field is required.

**NOTE:**

When the RESID field on the LSR is not populated or blank and the field is required on response, this field will be returned with all blanks.

**CONDITION:**

When returned, this information is obtained from the RESID field on the LSR and returned in the RESID field on the initial request or a supplement to a request.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 20

**Field Example:**

123ABC

## 85. RTI - Route Index

Identifies the routing index to be used by the provider's switching equipment to forward/port the provider's telephone number to the customer's non-RCF trunk group.

**Usage:** This field is required.

**NOTE:**

When the RTI field on the LSNP or NP screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the RTI field will be associated with every detail record with a different LNUM in the LSNP or NP screen. The system will obtain this information from the RTI field from the LSNP or NP screen and populate it in the RTI field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 6

**Field Example:**

215

## 86. SAT - Subscriber Access Telephone Number (Service Group Section)

Identifies the telephone number, which allows remote access to make feature configuration changes.

**Usage:** This field is required.

**NOTE:**

When this information is not populated on the service order and this field is required on response, the field will be returned with blanks.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order and returned in the SAT field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

4045551234

## 87. SCFA - Secondary Connecting Facility Assignment

Identifies the carrier system and channel to be used from a Wideband Analog or High Capacity Facility for a thru-connect configuration.

**Usage:** This field is required.

**NOTE:**

When the SCFA field on the LS or RPL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the SCFA field will be associated with every detail record with a different LNUM in the LS or RPL screen. The system will obtain this information from the SCFA field from the LS or RPL screen and populate it in the SCFA field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 42

**Field Example:**

101/T1/3/BSTMAGTOGO/BSTMATCG0

## 88. SHELF - Shelf (Service Group Section)

Identifies the number assigned to the shelf within the relay rack.

**Usage:** This field is required.

**Valid Entries:**

Valid Formats:
2 Numeric characters
6 Alpha/Numeric characters

**NOTE:**

When the SHELF field on the LS or PS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the SHELF field will be associated with every detail record with a different LNUM in the LS or PS screen. The system will obtain this information from the SHELF field from the LS or PS screen and populate it in the SHELF field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 2 - 2 or 6 - 6

**Field Example:**

12

## 89. SLOT - Slot (Service Group Section)

Identifies the specific connection slot of the shelf to be used.

**Usage:** This field is required.

**NOTE:**

When the SLOT field on the LS or PS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the SLOT field will be associated with every detail record with a different LNUM in the LS or PS screen. The system will obtain this information from the SLOT field from the LS or PS screen and populate it in the SLOT field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 6

**Field Example:**

009

## 90. SLTN - Shared Line Telephone Number (Service Group Section)

Supports working telephone number of voice service in which line sharing service is to be provisioned.

**Usage:** This field is required.

**NOTE:**

When the SLTN field on the LS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the SLTN field will be associated with every detail record with a different LNUM in the LS screen. The system will obtain this information from the SLTN field from the LS screen and populate it in the SLTN field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 12 - 12

**Field Example:**

201-555-1234

## 91. STATUS CODE - Status Code

Indicates the status code of the order.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
AO
CA
CB
CD
CF
CI
CK
CL
CM
CP
CS
CY
PD
PF
SA
SL
SO
SR

### CONDITIONS:

1. When returned the system will obtain the status from the AT&T Southeast service order and will place it in the status code field on the response of a FOC, CN, POS, BCN, Jeopardy, or Clarification.
2. REQTYP C orders are Conditional and may not have the STATUS\_CODE and STATUS\_MESSAGE fields returned in those instances where it is not a Complex port.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min- Max):** 2 - 2

**Field Example:**

AO

## 92. STATUS MSG - Status Message

Indicates the status message associated with the status code.

**Usage:** This field is required.

### NOTE:

Due to the REQ TYP C Porting process, a Status Code will not exist until after the CLEC activates the telephone number.

### CONDITIONS:

1. When multiple Jeopardy messages are returned the system will format them as follows:  
The 2 character code indicating the type of message, followed by a space and the message, followed by a space and another type and another message up to the 100 A N character limit.  
  
Example: 1Q ASSIGNMENT PROBLEM 2C BUSY CABLE AND/OR PAIR 2D LOOP IS TOO LONG 2G ADDRESS IS INVALID 2H BASIC
2. When the LSR is in an RPON group and one of the PONs is placed in Jeopardy status, the following Jeopardy message will be sent: PON XXXXXXXX IS IN JEOPARDY STATUS, ALL RELATED PONS IN RPON GROUP RETURNED
3. When the STATUS CODE is AO the following response is populated in the STATUS-MSG field: ASSIGNABLE ORDER
4. When the STATUS CODE is AO, PD, CP, or PF and the AT&T Southeast Service order Status has an error prefix of E, F, or O and the system has determined that the order is in jeopardy, one or more of the following jeopardy responses may be returned on the JN.
  - 1A INTEROFFICE FACILITY SHORTAGE
  - 1B SCHEDULING/WORK LOAD
  - 1C CUSTOMER (LSP) NOT READY
  - 1D NO LOOP AVAILABLE
  - 1E END USER NOT READY
  - 1F NSP MISSED APPOINTMENT
  - 1G NO ACCESS TO END USER
  - 1H CENTRAL OFFICE FREEZE
  - 1J SPECIAL CONSTRUCTION
  - 1K NATURAL DISASTER
  - 1L FRAME DUE TIME CANNOT BE MET
  - 1M REQUESTED DD IS LESS THAN PUBLISHED INTERVAL
  - 1N DD AND FRAME DUE TIME CANNOT BE MET
  - 1P OTHER
  - 1Q ASSIGNMENT PROBLEM
  - 1R CUSTOMER COULD NOT BE REACHED AT REACH NUMBER
  - 1S BUILDING NOT READY, CUSTOMER WILL ADVISE
  - 1T POLE AT TRAILER SITE NOT SET
  - 1W ENTRANCE FACILITIES REQUIRED

## 92. STATUS MSG - Status Message (continued...)

### CONDITIONS (continued):

- 1X NOT TECHNICALLY FEASIBLE
  - 1Y NO CENTRAL OFFICE EQUIPMENT AVAILABLE
  - 1Z LOOP REQUIRES INSTALLATION OF ADDITIONAL EQUIPMENT
  - 2A LSR ERROR INCORRECT OR MISSING INFORMATION
  - 2B FACILITY WORK ORDER PENDING NO BONA FIDE REQUEST (BFR) REQUIRED
  - 2C BUSY CABLE ID
  - 2E LOOP IS TOO LONG
  - 2F INVALID OR WORKING SPLITTER
  - 2G ADDRESS IS INVALID
  - 2H BASIC ADDRESS IS VALID BUT LOC IS NEEDED
  - 4Q TN(S) NOT ACTIVATED - SEND A SUPP OR ACTIVATE
  - 6C TN(S) NOT ACTIVATED ON DUE DATE
5. When the STATUS CODE is CA and the AT&T Southeast service order status is MA the following response is populated in the STATUS-MSG field: MISSED APPOINTMENT ORDER -CA  
COMPANY ASSIGNMENT  
When the STATUS CODE is CA and the AT&T Southeast service order status is CA the following response is populated in the STATUS-MSG field: CANCELLED ORDER
6. When the STATUS CODE is CB the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CB  
COMPANY BUSINESS OFC
7. When the STATUS CODE is CD the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CD  
COMPANY DESIGNED
8. When the STATUS CODE is CF the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CF  
COMPANY FACILITIES
9. When the STATUS CODE is CI the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CI  
COMPANY INDEPENDENT
10. When the STATUS CODE is CK the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CK  
COMPANY FACILITIES - ISDN BRI SERVICE

**92. STATUS MSG - Status Message (continued...)****CONDITIONS (continued):**

11. When the STATUS CODE is CL the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CL  
COMPANY LOAD
12. When the STATUS CODE is CM the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CM  
COMPANY MECHANIZATION
13. When the STATUS CODE is CO the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CO  
COMPANY OTHER
14. When the STATUS CODE is CP and the AT&T Southeast service order status is CP, CPX or PCX the following response is populated in the STATUS-MSG field:  
Completed Order
15. When the STATUS CODE is CP and the AT&T Southeast service order status is HPCX or IPCX the following response is populated in the STATUS-MSG field:  
BILLING/RECORDS COMPLETE
16. When the STATUS CODE is CS the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CS  
COMPANY SWITCHING
17. When the STATUS CODE is CX the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CX  
COMPANY EXCEPTIONAL
18. When the STATUS CODE is CY the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CY  
CUSTOMER DESIRED DUE DATE MISSED - FOC DATE TO FOLLOW
19. When the STATUS CODE is PD and the AT&T Southeast the following response is populated in the STATUS-MSG field:  
PENDING ORDER
20. When the STATUS CODE is PF and the AT&T Southeast the following response is populated in the STATUS-MSG field:  
PENDING FACILITIES ORDER
21. When the STATUS CODE is SA the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -SA  
SUBSCRIBER ACCESS 860 REQUIRED

**92. STATUS MSG - Status Message (continued...)****CONDITIONS (continued):**

- 22.** When the STATUS CODE is SL the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -SL  
SUBSCRIBER REQUEST LATER DATE 860 REQUIRED
- 23.** When the STATUS CODE is SO the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -SO  
SUBSCRIBER OTHER 860 REQUIRED
- 24.** When the STATUS CODE is SR the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -SR  
SUBSCRIBER NOT READY 860 REQUIRED
- 25.** ReqTyp C orders are Conditional and may not have the STATUS CODE and STATUS MESSAGE fields returned in those instances where it is not a Complex port.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 100

**Field Example:**

1J SPECIAL CONSTRUCTION

### 93. STYC - Style Code (Directory Section)

Identifies whether the listing provided is a straight line, Straight Line Under (SLU) header, caption header, etc..

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
CI	Caption Indent
SH	SLU Header
SI	SLU Indent
SL	Straight Line

**NOTE:**

When the STYC field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The STYC will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the STYC field from the directory listings screen and populate it in the STYC field on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

SL

## 94. SYSTEM ID - System Identification (Service Group Section)

Identifies the customer's system to be used in a collocation arrangement.

**Usage:** This field is required.

**NOTE:**

When the SYSTEM ID field on the LS or PS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the SYSTEM ID field will be associated with every detail record with a different LNUM in the LS and PS screen. The system will obtain this information from the SYSTEM ID field from the LS and PS screen and populate it in the SYSTEM ID field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

CA101

## 95. TER - Terminal Number (Service Group Section)

Identifies the number for a non-lead line in a multi-line hunt group or consecutive range of terminal numbers associated with the TNS field for this request.

**Usage:** This field is required.

**NOTES:**

1. When the TER field on the LS screen is not populated or blank and is required on response, this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.

**CONDITION:**

When returned, the TER field will be associated with every detail record with a different LNUM in the LS screen. The system will obtain this information from the TER field from the LS screen and populate it in the TER field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 10

**Field Example:**

05718-1000

## 96. TERS - Terminal Numbers (Service Group Section)

Identifies the number for a non-lead line in a multi-line hunt group or consecutive range of terminal numbers.

**Usage:** This field is required.

**NOTE:**

When the TER field on the PS or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TERS field will be associated with every detail record with a different LNUM in the Port and Resale screen. The system will obtain this information from the TERS field from the Port and Resale screen and populate it in the TERS field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 10

**Field Example:**

T0001

## 97. TEST PROD INDICATOR - Test Production Indicator

Identifies whether the transaction is production or test.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
P	Production
T	Test

**CONDITION:**

When returned, the system auto populates information in this field.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

T

## 98. TGLNUM - Trunk Group Location Number

Identifies the trunk group number.

**Usage:** This field is required.

**NOTE:**

When the TGLNUM field on the DTU, ISR or ISU screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TGLNUM field will be associated with every detail record with a different LNUM in the DTU, ISR or ISU screen. The system will obtain this information from the TGLNUM field from the DTU, ISR or ISU screen and populate it in the TGLNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 2

**Field Example:**

03

## 99. TLI - Telephone Line Identifier

Indicates the pilot number of a multi-line hunt group.

**Usage:** This field is required.

**NOTE:**

When the TLI field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TLI will be associated with every detail record with a different HNUM in the Hunt Group record. The system will obtain the TLI information on the HGI screen and populate it in the TLI field of the Hunt Group record on the initial request or a supplement to a request.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

4045551122

## 100. TNNUM - Telephone Number Line Number

Identifies the PRI reference telephone line number.

**Usage:** This field is required.

**NOTE:**

When the TNNUM field on the ISU or ISR screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TNNUM field will be associated with every detail record with a different LNUM in the ISU or ISR screen. The system will obtain this information from the TNNUM field from the ISU or ISR screen and populate it in the TNNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 3

**Field Example:**

109

## 101. TNS - Telephone Numbers (Service Group Section)

Identifies the telephone number (TN) / terminal number (TER) / ISDN BRI directory number or sequential range of TNs / TERs for this request.

**Usage:** This field is required.

**NOTE:**

When the TNS field on the PS or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TNS will be associated with every detail record with a different LNUM in the Port and Resale screen. The system will obtain this information from the TNS field from the Port and Resale screen and populate it in the TNS field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2016990001

## 102. TOA - Type of Account (Directory Service)

Identifies the type of account for this listing.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
<b>B</b>	Business Firm Name
<b>BP</b>	Business Class, Person Name
<b>R</b>	Residence
<b>RP</b>	Residence Class, Business Firm Name

**NOTE:**

When the TOA field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TOA will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the TOA field from the directory listings screen and populate it in the TOA field in the directory listings section on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 1 - 2

**Field Example:**

BP

## 103. TRANS ACK TYPE - Transaction Activity Type

Identifies transaction activity.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
AC
AH
AT
NA
RD

### NOTE:

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

### CONDITIONS:

1. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AH, the return type is Clarification (860 required)
2. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AT, the return type is Accepted FOC.
3. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is RD, the return type is Reject (850 required)
4. When TRANS-SET-PURPOSE-CODE is 08 and the TRANS-ACK-TYPE is NA, the return type is Status or POS (Pending Order Status) No action required.
5. When TRANS-SET-PURPOSE-CODE is 21 and the TRANS-ACK-TYPE is AC, the return type is Jeopardy (New Due Desired Date Required)
6. When TRANS-SET-PURPOSE-CODE is 53 and the TRANS-ACK-TYPE is AT, the return type is Billing Completion.
7. When TRANS-SET-PURPOSE-CODE is CN and the TRANS-ACK-TYPE is AT, the return type is Completion.
8. When TRANS-SET-PURPOSE-CODE is CA and the TRANS-ACK-TYPE is AT, the return type is AT&T Cancel.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

AC

## 104. TRANS SET PURPOSE CODE - Transaction Set Purpose Code

Identifies the transaction set purpose code.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
06
08
21
53
CN
CA

### NOTE:

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

### CONDITIONS:

1. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AH, the return type is Clarification (860 required)
2. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AT, the return type is Accepted FOC.
3. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is RD, the return type is Reject (850 required)
4. When TRANS-SET-PURPOSE-CODE is 08 and the TRANS-ACK-TYPE is NA, the return type is Status or POS (Pending Order Status)  
No action required.
5. When TRANS-SET-PURPOSE-CODE is 21 and the TRANS-ACK-TYPE is AC, the return type is Jeopardy (New Due Desired Date Required)
6. When TRANS-SET-PURPOSE-CODE is 53 and the TRANS-ACK-TYPE is AT, the return type is Billing Completion.
7. When TRANS-SET-PURPOSE-CODE is CN and the TRANS-ACK-TYPE is AT, the return type is Completion.
8. When TRANS-SET-PURPOSE-CODE is CA and the TRANS-ACK-TYPE is AT, the return type is AT&T Cancel.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

06

## 105. VER - Version Identification

Identifies the customer's version number.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
00 - 99
Blank or Space

**NOTE:**

When the VER field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the VER field on the LSR screen and populated in the VER field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

01

## 106. WPP - White Pages Products (Directory Service)

Identifies information about the white page products, signature listings, personality logo and lines of distinction.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
<b>DB</b>	Designer Bold
<b>DBP</b>	Designer Bold Plus
<b>DS</b>	Designer Script
<b>DSP</b>	Designer Script Plus

**NOTE:**

When the TOA field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TOA will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the TOA field from the directory listings screen and populate it in the TOA field in the directory listings section on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 1 - 3

**Field Example:**

DB

## 5.4 Jeopardy Notification (JN)

### *Jeopardy Notification (JN) Fields*

<b>Field Abbreviation</b>	<b>Field #</b>	<b>Field Name</b>
AAN	1	Associated Account Number
AN	2	Account Number
ATN	3	Account Telephone Number
BAN1	4	Billing Account Number 1
BAN2	5	Billing Account Number 2
BI1	6	Billing Account Number Identifier 1
BI2	7	Billing Account Number Identifier 2
BOPI	8	Bulk Order Package Identifier
CC	9	Company Code
CCNA	10	Customer Carrier Name Abbreviation
CHC	11	Coordinated Hot Cut
D/TSENT	12	Date and Time Sent
DD/CD	13	Due Date/Completion Date
DLORD	14	Directory Listing Order Number
EAN	15	Existing Account Number
EATN	16	Existing Account Telephone Number
EBD	17	Effective Bill Date
FDT	18	Frame Due Time
FOC/CN REMARKS	19	FOC/CN Remarks
IBT	20	ISDN BRI Type
INIT	21	Initiator Identification
INIT TEL NO	22	Initiator Telephone Number
IWBAN	23	Inside Wiring Bill Account Number
LOCNUM	24	Location Number (Hunt Group Section)
LOCNUM	25	Location Number (Service Group Section)
L-ORD	26	Loop Order Number (Service Group Section)
LSR NO	27	Local Service Request Number
NAN	28	New Account Number
NATN	29	New Account Telephone Number
NOR	30	Number Of Requests
ORD	31	Order Number
OTN	32	Old Telephone Number (Service Group Section)
PID	33	Personal Identifier (Service Group Section)
PON	34	Purchase Order Number
REP	35	Provider Contact Representative
REP TEL NO	36	Representative Telephone Number
SAT	37	Subscriber Access Telephone Number (Service Group Section)

Field Abbreviation	Field #	Field Name
SHELF	38	Shelf
STATUS CODE	39	Status Code
STATUS MSG	40	Status Message
TEST PROD INDICATOR	41	Test Production Indicator
TRANS ACK TYPE	42	Transaction Activity Type
TRANS SET PURPOSE CODE	43	Transaction Set Purpose Code
VER	44	Version Identification

## 1. AAN - Associated Account Number

Identifies related accounts for the same end user at the same or different address(s).

**Usage:** This field is required.

**NOTES:**

1. When the AAN field on the LSR is not populated or blank, this field will be returned with all blanks.
2. This field identifies the CRIS Miscellaneous Account Number provided by the CLEC.

**CONDITION:**

When returned, the response information is obtained from the AAN field on the LSR screen and populated in the AAN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 13 - 13

**Field Example:**

404M205555333

## 2. AN - Account Number

Identifies the main account number assigned by the NSP.

**Usage:** This field is required.

**NOTE:**

When the AN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the AN field on the LSR screen and populated in the AN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 13 - 13

**Field Example:**

3142359888

### 3. ATN - Account Telephone Number

Identifies the account telephone number assigned by the NSP.

**Usage:** This field is required.

**NOTE:**

When the ATN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the ATN field on the LSR screen and populated in the ATN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2015551212

## 4. BAN1 - Billing Account Number 1

Identifies the billing account to which the recurring and non-recurring charges for this request will be billed.

**Usage:** This field is required.

**NOTES:**

1. When returned, the BAN1 is returned in the following format:  
NPANXX1234123. *Example: 404X254321321*
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the BAN1 field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 13 - 13

**Field Example:**

201Q814587123

## 5. BAN2 - Billing Account Number 2

Identifies the billing account to which the recurring and non-recurring charges for this request will be billed.

**Usage:** This field is required.

**NOTES:**

1. When returned, the BAN2 is returned in the following format:  
NPANXX1234123. *Example: 404X254321321*
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the BAN2 field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 13 - 13

**Field Example:**

201Q814588456

## 6. BI1 - Billing Account Number Identifier 1

Identifies the service type of the billing account number populated in the BAN1 field.

**Usage:** This field is required.

**Valid Entries:**

Valid Values	
<b>D</b>	Directory Listings
<b>L</b>	Loop
<b>M</b>	Port Switched Combination
<b>N</b>	Number Portability
<b>P</b>	Port
<b>R</b>	Resale

**NOTE:**

When the BI1 field on the LSR is not populated or blank, this field will be returned with blank.

**CONDITION:**

When returned, the response information is obtained from the BI1 field on the LSR screen and populated in the BI1 field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

L

## 7. BI2 - Billing Account Number Identifier 2

Identifies the service type of the billing account number populated in the BAN2 field.

**Usage:** This field is required.

**Valid Entries:**

Valid Values	
D	Directory Listings
L	Loop
M	Port Switched Combination
N	Number Portability
P	Port
R	Resale

**NOTE:**

When the BI2 field on the LSR is not populated or blank, this field will be returned with blank.

**CONDITION:**

When returned, the response information is obtained from the BI2 field on the LSR screen and populated in the BI2 field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

L

## 8. BOPI - Bulk Order Package Identifier

Identifies the customer's unique BULK package ID that authorized the issuance of this BULK request or supplement.

**Usage:** This field is required.

**NOTE:**

When the BOPI field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITIONS:**

1. This field is only applicable to UNE to UNE Bulk.
2. When returned, the response information is obtained from the BOPI field on the Global LSR screen and populated in the BOPI field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 12

**Field Example:**

000000000Z0

## 9. CC - Company Code

Identifies the exchange carrier initiating the transaction.

**Usage:** This field is required.

**NOTE:**

When the CC field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the CC field on the LSR screen and populated in the CC field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

1234

## 10. CCNA - Customer Carrier Name Abbreviation

Identifies the COMMON LANGUAGE IAC code for the customer.

**Usage:** This field is required.

**NOTE:**

When the CCNA field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the CCNA field on the LSR screen and populated in the CCNA field on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 3 - 3

**Field Example:**

ZYX

## 11. CHC - Coordinated Hot Cut

Identifies that the customer is requesting near seamless cutover activity.

**Usage:** This field is required.

**NOTE:**

When the CHC field on the LSR is not populated or blank, this field will be returned blank.

**CONDITION:**

When returned, the response information is obtained from the CHC field on the LSR screen and populated in the CHC field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

Y

## 12. D/TSENT - Date and Time Sent

Identifies the date and time that the transaction is sent.

**Usage:** This field is required.

**Valid Entries:**

Valid Format:	
<b>CCYYMMDDHHMMAA</b>	
<b>CC</b>	Two Digit Century (00-99)
<b>YY</b>	Two Digit Year (00-99)
<b>MM</b>	Two Digit Month (01-12)
<b>DD</b>	Two Digit Day (01-31)
<b>HH</b>	Two Digit Hour (01-12)
<b>MM</b>	Two Digit Minute (00-59)
<b>AA</b>	AM or PM

**NOTE:**

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITION:**

When returned, the system will record this information from the date and time stamp that indicates the date the response was submitted to the system interfacing the CLEC. The system shall populate this date in the D/TSENT field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 14 - 14

**Field Example:**

201103020125PM

### 13. DD/CD - Due Date/Completion Date

Identifies the date the service order requested is due and completed.

**Usage:** This field is required.

**NOTES:**

1. Hyphen (-) is the only special character that may be returned.
2. When the DD or CD is not populated on the AT&T Southeast service order this field will be returned with blanks.
3. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITIONS:**

1. When returned, the DD/CD is returned in the following formats: CCYY-MM-DD or CCYYMMDD. *Example: 7/10/2004 or 20040710.*
2. When returned, the response information is obtained from the AT&T SE service order and populated in the DD/CD field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 10

**Field Example:**

11-10-2008

## 14. DLORD - Directory Listing Order Number

Identifies the Directory Listing Service Order number.

**Usage:** This field is required.

**NOTE:**

This field will be returned with all blanks when a directory listing order is not issued.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 20

**Field Example:**

A123B456C

## 15. EAN - Existing Account Number

Identifies the end user's existing account number.

**Usage:** This field is required.

**Valid Entries:**

Valid Formats:
10 Numeric characters
13 Alpha/Numeric characters

**NOTE:**

When the EAN field on the EU is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the EAN field on the EU screen and populated in the EAN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 13 - 13

**Field Example:**

404M231234123

## 16. EATN - Existing Account Telephone Number

Identifies the end user's existing account telephone number assigned by the current NSP.

**Usage:** This field is required.

**NOTE:**

When the EATN field on the EU is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the EATN field on the EU screen and populated in the EATN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

3142359888

## 17. EBD - Effective Bill Date

Identifies the effective date to begin or cease billing when the billing date is different from the desired due date.

**Usage:** This field is required.

**NOTE:**

When EBD is not populated on the AT&T Southeast service order this field will be returned with blanks.

**CONDITIONS:**

1. When returned, EBD is returned in the following format: CCYYMMDD. *Example: 20040710*
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the EBD field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 8 - 8

**Field Example:**

20081115

## 18. FDT - Frame Due Time

Identifies the frame cutover time.

**Usage:** This field is required.

**NOTES:**

1. When the FDT is not populated on the AT&T Southeast service order this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.
3. When this field is returned as a range, the 5th position of the field will be a hyphen (-). *Example: 1800-1900*

**CONDITIONS:**

1. (Excluding REQ TYP B (LNP)) When returned the response information is obtained from the AT&T Southeast service order and populated in the FDT field on the response.
2. For REQ TYP B (LNP), when returned the response information for this field is obtained from the DFDT field on the LSR and populated in the FDT field on the response.
3. When returned, the FDT is returned in military time.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 9

**Field Example:**

1300-1700

## 19. FOC/CN REMARKS - FOC/CN Remarks

Identifies a free flowing field which can be used to expand upon and clarify other data.

**Usage:** This field is required.

**NOTE:**

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITIONS:**

1. On LSRs, when the system determines that a dispatch is required it will populate 'DISPATCH IS REQUIRED' in the FOC/CN REMARKS field following any other FOC/CN-Remarks on the response. If there is not sufficient space for the message the system will drop the number of characters needed at the end of the other Remarks to populate the 20 characters, DISPATCH IS REQUIRED.

2. The 'ADSL Informational' message will be populated in the FOC/CN-Remarks on the FOC according to the following guidelines:

'Dispatch Required' will remain the last entry in FOC/CN-Remarks if applicable.

'Facility Check' messages, if applicable, will remain immediately in front of 'Dispatch Required' or last if 'Dispatch Required' is not applicable.

'ADSL Informational' message, when applicable, will appear immediately in front of both 'Facility Check' and Dispatch Required' messages or immediately in front of 'Facility Check' or 'Dispatch Required' message if only one is required. If neither 'Facility Check' nor 'Dispatch Required' message is applicable, 'ADSL Informational' message will be last entry in FOC/CN-Remarks.

Any remarks on incoming LSR that will be moved to the FOC will be shortened by number of characters required to place any or all of the three messages listed above that apply.

3. The Facility check messages will be populated in the Remarks on the FOC according to the following guidelines:

- a. If there are no remarks applicable for the FOC/CN-Remarks section of the FOC (that originated from the Remarks on the LSR), the system will place one of the applicable facility checked messages, "Facilities have been checked" or "Facilities have been checked and a PF condition exists" in the FOC/CN REMARKS field on the response.

- b. If the only remarks applicable for the FOC/CN-Remarks Section of the FOC is, "Dispatch is Required", the system will place one of the applicable facility checked messages "Facilities have been checked" or "Facilities have been checked and a PF condition exists" before the "Dispatch is Required" message.

- c. If there are remarks applicable for the FOC/CN-Remarks section of the FOC (Remarks from LSR), but no "Dispatch is Required" message present, the system will place one of the applicable facility checked messages "Facilities have been checked" or "Facilities have been checked and a PF condition exists" at the beginning of the Remarks. If adding the facility checked message causes the Remarks section to exceed the number of characters allowed, the system will drop the number of characters needed at the end of the other Remarks.

---

**19. FOC/CN REMARKS - FOC/CN Remarks (continued...)****CONDITIONS (continued):**

4. The system will search to obtain this information from the REMARKS field from the LSR screen and populate in it the FOC/CN-REMARKS field on the response.
5. When an LSR is submitted for Non-Complex REQ TYP M, MI= A, B, C, or D, and LNA = C, D, G, N, P, T, V, W, or X where a service order is generated with Outward ('O') action coded FID OADSL in the UNFIELDDED IDENT Section of the AT&T Southeast service order, the system will return the following informational message in the FOC/CN-REMARKS field on the response:

CLEC SHOULD HAVE THE END USER CONTACT THEIR NSP/ISP FOR CHANGES TO THEIR ADSL SERVICE. ADL++ IS NOT VALID WITH UNE PORT SERVICE

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 350

**Field Example:**

CLEC SHOULD HAVE THE END USER CONTACT THEIR NSP/ISP FOR CHANGES TO THEIR ADSL SERVICE. ADSL\_++ IS NOT VALID WITH UNE PORT SERVICE

## 20. IBT - ISDN BRI Type

Identifies the type of National ISDN-BRI.

**Usage:** This field is required.

**NOTE:**

When the IBT field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the IBT field on the EU screen and populated in the IBT field on the response.

**Data Characteristics:** numeric character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

2

## 21. INIT - Initiator Identification

Identifies the LSP's representative who originated this transaction.

**Usage:** This field is required.

**CONDITION:**

When returned, the response information is obtained from the INIT field on the LSR screen and populated in the INIT LSR field on the response.

**Data Characteristics:** alpha / special characters

**Field Length (Min-Max):** 1 - 15

**Field Example:**

JOHN SMITH

## 22. INIT TEL NO - Initiator Telephone Number

Identifies the telephone number of the initiator.

**Usage:** This field is required.

**Valid Entries:**

Valid Formats:
10 Numeric characters
15 Alpha/Numeric characters

**CONDITION:**

When returned, the response information is obtained from the INIT-TEL NO field on the LSR screen and populated in the INIT-TEL NO LSR field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 15 - 15

**Field Example:**

2019813500

## 23. IWBAN - Inside Wiring Bill Account Number

Identifies the billing account number for charges associated with inside wire.

**Usage:** This field is optional.

**CONDITION:**

When returned, the response information is obtained from the IWBAN field on the EU screen and populated in the IWBAN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 13

**Field Example:**

201Q814587123

## 24. LOCNUM - Location Number (Hunt Group Section)

Identifies the service location number for the service requested.

**Usage:** This field is optional.

**NOTES:**

1. When the LOCNUM field on the HTI is not populated or blank and is required on response, this field will be returned with all blanks.
2. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITION:**

When returned, the LOCNUM will be associated with each detail record with a different HNUM in the Hunt Group record on the initial request or a supplement to a request. The system will obtain this information from the LOCNUM field on the HGI Screen and will populate it in the LOCNUM field on the HGI Screen and will populate it in the LOCNUM field on the initial request or a supplement to a request.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 3 - 3

**Field Example:**

002

## 25. LOCNUM - Location Number (Service Group Section)

Identifies the service location number for the service requested.

**Usage:** This field is optional.

**Valid Entries:**

Valid Values:
000 - 999

**NOTES:**

1. When the LOCNUM field on the LS, LSNP, NP, PS, or RS screen is not populated or blank and is required on response, this field will be returned with all blanks.
2. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITION:**

When returned, the LOCNUM will be associated with every detail record with a different LNUM in the Loop, LSNP, NP, Port and Resale screen. The system will obtain this information from the LOCNUM field from the Loop, LSNP, NP, Port and Resale form and populate it in the LOCNUM field in the Services Group record on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 3 - 3

**Field Example:**

002

## 26. L-ORD - Loop Order Number (Service Group Section)

Identifies the provider's order number for the loop.

**Usage:** This field is required.

**NOTE:**

When the firm order type is not for REQTYP A, this field will be returned with blanks.

**CONDITIONS:**

1. This field is only applicable on REQTYP A request(s).
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the L-ORD field.

**Data Characteristics:** alpha /numeric characters

**Field Length (Min-Max):** 1 - 8

**Field Example:**

C1234567

## 27. LSR NO - Local Service Request Number

Identifies the number that may be generated by the provider's mechanized systems, pre-assigned to the customer by the provider or manually assigned by the provider to identify a customer's request for service.

**Usage:** This field is required.

**Valid Entries:**

<b>Valid Format:</b>
NNNNNNNNNANNNNN-NN
A = Alpha
N = Numeric

**NOTE:**  
Hyphen (-) is the only special character that may be returned.

**CONDITION:**  
When returned, the response information is obtained from the LSR NO field on the LSR screen and populated in the LSR NO field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 18

**Field Example:**

20030302L00074-00

## 28. NAN - New Account Number

Identifies the new account number.

**Usage:** This field is required.

**NOTE:**

When the NAN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the NAN field on the LSR screen and populated in the NAN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2055551234

## 29. NATN - New Account Telephone Number

Identifies the new account telephone number.

**Usage:** This field is required.

**NOTE:**

When the NATN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the NATN field on the LSR screen and populated in the NATN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min0Max):** 10 - 10

**Field Example:**

2055551234

## 30. NOR - Number Of Requests

Identifies the local service request and the total quantity of local service requests within a related group of orders being submitted.

**Usage:** This field is conditional.

**NOTES:**

1. The value returned in this field will be identical to the value submitted on the initial or supplemental LSR.
2. Hyphen (-) is the only special character that may be returned.

**CONDITION:**

This field will only be returned when the REQ TYP is B and the product is Bulk Single LSR arrangement.

**Data Characteristics:** numeric / special characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

01-99

## 31. ORD - Order Number

Identifies the provider's order number for the service requested.

**Usage:** This field is required.

**NOTE:**

When an AT&T Southeast Service order has not been generated this field will be returned blank.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order and populated in the ORD field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 8 - 8

**Field Example:**

C1234567

## 32. OTN - Old Telephone Number (Service Group Section)

Identifies the existing telephone number that is being changed.

**Usage:** This field is required.

**NOTE:**

When the OTN field on the PS or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The OTN will be associated with every detail record with a different LNUM in the Port and Resale Services screen. The system will obtain this information from the OTN field from the Port and Resale Services screen and populate it in the OTN on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

201699001

### 33. PID - Personal Identifier (Service Group Section)

Identifies the end user's personal identification number.

**Usage:** This field is required.

**NOTES:**

1. When this information is not populated on the AT&T Southeast service order and this field is required on response, the field will be returned with blanks.
2. This field identifies the authorization number to be utilized with the telephone number provided in the SAT field.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order and returned in the PID field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

4412

## 34. PON - Purchase Order Number

Identifies the customer's unique purchase order or requisition number that authorizes the issuance of this request or supplement.

**Usage:** This field is required.

**NOTE:**

Apostrophe ('), Blank ( ), Comma (,) Hyphen (-), Period (.) and Space ( ) are the only special characters that may be returned.

**CONDITION:**

When returned, the response information is obtained from the PON field on the LSR screen and populated in the PON field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 16

**Field Example:**

824Z9

### 35. REP - Provider Contact Representative

Identifies the provider's representative handling this service request.

**Usage:** This field is required.

**Valid Entries:**

<b>Valid Value:</b>
---------------------

LCSC
------

<b>CONDITION:</b>
-------------------

When returned, the response information is returned as LCSC and populated in the REP field on the response.
---

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 15

**Field Example:**

LSCS

## 36. REP TEL NO - Representative Telephone Number

Identifies the telephone number of the provider's representative handling this request.

**Usage:** This field is required.

**CONDITION:**

When returned, this information is obtained from the CLEC profile and returned in the REPTTEL NO field.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

4045551234

### 37. SAT - Subscriber Access Telephone Number (Service Group Section)

Identifies the telephone number, which allows remote access to make feature configuration changes.

**Usage:** This field is required.

**NOTE:**

When this information is not populated on the service order and this field is required on response, the field will be returned with blanks.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order and returned in the SAT field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

4045551234

## 38. SHELF - Shelf

Identifies the number assigned to the shelf within the relay rack.

**Usage:** This field is optional.

**Valid Entries:**

Valid Formats:
2 Numeric characters
6 Alpha/Numeric characters

**NOTE:**

When the SHELF field on the LS or PS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the SHELF field will be associated with every detail record with a different LNUM in the LS or PS screen. The system will obtain this information from the SHELF field from the LS or PS screen and populate it in the SHELF field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 2 - 2 or 6 - 6

**Field Example:**

12

### 39. STATUS CODE - Status Code

Indicates the status code of the order.

**Usage:** This field is required.

**Valid Entries:**

STATUS CODE	STATUS MESSAGE*
AO	ASSIGNABLE ORDER
CA	COMPANY ASSIGNMENT
CB	COMPANY BUSINESS OFC
CD	COMPANY DESIGNED
CF	COMPANY FACILITIES
CI	COMPANY INDEPENDENT
CK	COMPANY FACILITIES-ISDN BRI SERVICE
CL	COMPANY LOAD
CM	COMPANY MECHANIZATION
CO	COMPANY OTHER
CP	COMPLETED ORDER BILLING/RECORDS COMPLETE
CS	COMPANY SWITCHING
CX	COMPANY EXCEPTIONAL
CY	CUSTOMER DESIRED DUE DATE MISSED-FOC DATE TO FOLLOW
FP	REQUEST IS FIREST PORT OUT IN NPA NXX
NS	REQUEST IS NOT A SIMPLE PORT
PD	PENDING ORDER
PF	PENDING FACILITIES ORDER
SA	SUBSCRIBER ACCESS 860 REQUIRED
SL	SUBSCRIBER REQUEST LATER DATE 860 REQUIRED
SO	SUBSCRIBER OTHER 860 REQUIRED
SR	SUBSCRIBER NOT READY 860 REQUIRED
1A	INTER OFFICE FACILITY SHORTAGE
1B	SCHEDULING/WORK LOAD
1C	CUSTOMER (LSP) NOT READY
1D	NO LOOP AVAILABLE
1E	END USER NOT READY
1F	NSP MISSED APPOINTMENT
IG	NO ACCESS TO END USER
1H	CENTRAL OFFICE FREEZE
1J	SPECIAL CONSTRUCTION
1K	NATURAL DISASTER
1L	FRAME DUE TIME CANNOT BE MET
1M	REQUESTED DD IS LESS THAN PUBLISHED INTERVAL
1N	DD AND FRAME DUE TIME CANNOT BE MET
1P	OTHER
1Q	ASSIGNMENT PROBLEM

### 39. STATUS CODE - Status Code (continued...)

Valid Entries (continued):

STATUS CODE	STATUS MESSAGE*
1R	CUSTOMER COULD NOT BE REACHED AT REACH NUMBER
1S	BUILDING NOT READY, CUSTOMER WILL ADVISE
1T	POLE AT TRAILER SITE NOT SET
1W	ENTRANCE FACILITIES REQUIRED
1X	NOT TECHNICALLY FEASIBLE
1Y	NO CENTRAL OFFICE EQUIPMENT AVAILABLE
1Z	LOOP REQUIRES INSTALLATION OF ADDITIONAL EQUIPMENT
2A	LSR ERROR INCORRECT OR MISSING INFORMATION
2B	FACILITY WORK ORDER PENDING NO BONA FIDE REQUEST (BFR) REQUIRED
2C	BUSY CABLE ID
2E	LOOP IS TOO LONG
2F	INVALID OR WORKING SPLITTER
2G	ADDRESS IS INVALID
2H	BASIC ADDRESS IS VALID BUT LOC IS NEEDED
5F	ACCOUNT ALREADY CONVERTED, REQUEST WILL BE CANCELLED
* Status Messages are provided for definition purposes only	

#### CONDITIONS:

1. When returned the system will obtain the status from the AT&T Southeast service order and will place it in the status code field on the response of a FOC, CN, POS, BCN, Jeopardy, or Clarification.
2. REQ TYP C orders are Conditional and may not have the STATUS CODE and STATUS MESSAGE fields returned in those instances where it is not a Complex port.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

AO

## 40. STATUS MSG - Status Message

Indicates the status message associated with the status code.

**Usage:** This field is required.

### NOTES:

1. All special characters are allowed.
2. Due to the REQTYP C Porting process, a Status Code will not exist until after the CLEC activates the telephone number.

### CONDITIONS:

1. When multiple Jeopardy messages are returned the system will format them as follows:  

The 2 character code indicating the type of message, followed by a space and the message, followed by a space and another type and another message up to the 100 A/N character limit.

Example: 1Q ASSIGNMENT PROBLEM 2C BUSY CABLE AND/OR PAIR 2D LOOP IS TOO LONG 2G ADDRESS IS INVALID 2H BASIC
2. When the LSR is in an RPON group and one of the PONs is placed in Jeopardy status, the following Jeopardy message will be sent: PON XXXXXXXX IS IN JEOPARDY STATUS, ALL RELATED PONs IN RPON GROUP RETURNED
3. Status Message information is located under the STATUS CODE field.
4. When the STATUS CODE is AO, PD, CP, or PF and the AT&T Southeast Service order Status has an error prefix of E, F, or O and the system has determined that the order is in jeopardy, one or more of the following jeopardy responses may be returned on the JN.
  - 1A INTEROFFICE FACILITY SHORTAGE
  - 1B SCHEDULING/WORK LOAD
  - 1C CUSTOMER (LSP) NOT READY
  - 1D NO LOOP AVAILABLE
  - 1E END USER NOT READY
  - 1F NSP MISSED APPOINTMENT
  - 1G NO ACCESS TO END USER
  - 1H CENTRAL OFFICE FREEZE
  - 1J SPECIAL CONSTRUCTION
  - 1K NATURAL DISASTER
  - 1L FRAME DUE TIME CANNOT BE MET
  - 1M REQUESTED DD IS LESS THAN PUBLISHED INTERVAL
  - 1N DD AND FRAME DUE TIME CANNOT BE MET
  - 1P OTHER
  - 1Q ASSIGNMENT PROBLEM
  - 1R CUSTOMER COULD NOT BE REACHED AT REACH NUMBER
  - 1S BUILDING NOT READY, CUSTOMER WILL ADVISE
  - 1Q ASSIGNMENT PROBLEM

**40. STATUS MSG - Status Message (continued...)****CONDITIONS (continued):**

- 1R CUSTOMER COULD NOT BE REACHED AT REACH NUMBER
  - 1S BUILDING NOT READY, CUSTOMER WILL ADVISE
  - 1T POLE AT TRAILER SITE NOT SET
  - 1W ENTRANCE FACILITIES REQUIRED
  - 1X NOT TECHNICALLY FEASIBLE
  - 1Y NO CENTRAL OFFICE EQUIPMENT AVAILABLE
  - 1Z LOOP REQUIRES INSTALLATION OF ADDITIONAL EQUIPMENT
  - 2A LSR ERROR INCORRECT OR MISSING INFORMATION
  - 2B FACILITY WORK ORDER PENDING NO BONA FIDE REQUEST (BFR) REQUIRED
  - 2C BUSY CABLE ID
  - 2E LOOP IS TOO LONG
  - 2F INVALID OR WORKING SPLITTER
  - 2G ADDRESS IS INVALID
  - 2H BASIC ADDRESS IS VALID BUT LOC IS NEEDED
  - 4Q TN(S) NOT ACTIVATED - SEND A SUPP OR ACTIVATE
  - 6C TN(S) NOT ACTIVATED ON DUE DATE
- 5.** When the STATUS CODE is CA and the AT&T Southeast service order status is MA the following response is populated in the STATUS-MSG field: MISSED APPOINTMENT ORDER -CA  
COMPANY ASSIGNMENT  
When the STATUS CODE is CA and the AT&T Southeast service order status is CA the following response is populated in the STATUS-MSG field: CANCELLED ORDER
- 6.** When the STATUS CODE is CP and the AT&T Southeast service order status is CP, CPX or PCX the following response is populated in the STATUS-MSG field: Completed Order
- 7.** When the STATUS CODE is CP and the AT&T Southeast service order status is HPCX or IPCX the following response is populated in the STATUS-MSG field: BILLING/RECORDS COMPLETE
- 8.** When the STATUS CODE is FP the following response is populated in the STATUS-MSG field:  
REQUEST IS FIRST PORT OUT IN NPA NXX.
- 9.** When the STATUS CODE is NS the following response is populated in the STATUS-MSG field:  
REQUEST IS NOT A SIMPLE PORT.
- 10.** REQTYPC orders are Conditional and may not have the STATUS CODE and STATUS MESSAGE fields returned in those instances where it is not a Complex port.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 100

**Field Example:**

1J SPECIAL CONSTRUCTION

## 41. TEST PROD INDICATOR - Test Production Indicator

Identifies whether the transaction is production or test.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
P	Production
T	Test

**CONDITION:**

When returned, the system auto populates information in this field.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

T

## 42. TRANS ACK TYPE - Transaction Activity Type

Identifies transaction activity.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
AC
AH
AT
NA
RD

### NOTE:

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

### CONDITIONS:

1. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AH, the return type is Clarification (860 required)
2. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AT, the return type is Accepted FOC.
3. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is RD, the return type is Reject (850 required)
4. When TRANS-SET-PURPOSE-CODE is 08 and the TRANS-ACK-TYPE is NA, the return type is Status or POS (Pending Order Status) No action required.
5. When TRANS-SET-PURPOSE-CODE is 21 and the TRANS-ACK-TYPE is AC, the return type is Jeopardy (New Due Desired Date Required)
6. When TRANS-SET-PURPOSE-CODE is 53 and the TRANS-ACK-TYPE is AT, the return type is Billing Completion.
7. When TRANS-SET-PURPOSE-CODE is CN and the TRANS-ACK-TYPE is AT, the return type is Completion.
8. When TRANS-SET-PURPOSE-CODE is CA and the TRANS-ACK-TYPE is AT, the return type is AT&T Cancel.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

AC

## 43. TRANS SET PURPOSE CODE - Transaction Set Purpose Code

Identifies the transaction set purpose code.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
06
08
21
53
CN
CA

### NOTE:

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

### CONDITIONS:

1. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AH, the return type is Clarification (860 required)
2. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AT, the return type is Accepted FOC.
3. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is RD, the return type is Reject (850 required)
4. When TRANS-SET-PURPOSE-CODE is 08 and the TRANS-ACK-TYPE is NA, the return type is Status or POS (Pending Order Status) No action required.
5. When TRANS-SET-PURPOSE-CODE is 21 and the TRANS-ACK-TYPE is AC, the return type is Jeopardy (New Due Desired Date Required)
6. When TRANS-SET-PURPOSE-CODE is 53 and the TRANS-ACK-TYPE is AT, the return type is Billing Completion.
7. When TRANS-SET-PURPOSE-CODE is CN and the TRANS-ACK-TYPE is AT, the return type is Completion.
8. When TRANS-SET-PURPOSE-CODE is CA and the TRANS-ACK TYPE is AT, the return type is AT&T Cancel.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

06

## 44. VER - Version Identification

Identifies the customer's version number.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
00 - 99
Blank or Space

**NOTE:**

When the VER field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the VER field on the LSR screen and populated in the VER field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

01

## 5.5 Reject/Clarification Notification (RC)

### Reject/Clarification Notification (RC) Fields

Field Abbreviation	Field #	Field Name
AAN	1	Associated Account Number
ALI	2	Alphanumeric Listing Identifier Code
AN	3	Account Number
ATN	4	Account Telephone Number
BAN1	5	Billing Account Number 1
BAN2	6	Billing Account Number 2
BI1	7	Billing Account Number Identifier 1
BI2	8	Billing Account Number Identifier 2
BOPI	9	Bulk Order Package Identifier
CABLE ID	10	Cable Identification
CABLE ID2	11	Cable Identification 2
CC	12	Company Code
CCEA	13	Cross Connect Equipment Assignment
CCNA	14	Customer Carrier Name Abbreviation
CFA	15	Connecting Facility Assignment
CHAN/PAIR	16	Channel/Pair
CHAN/PAIR2	17	Channel/Pair 2
CHC	18	Coordinated Hot Cut
CKR	19	Customer Circuit Reference (Service Group Section)
CNUM	20	Channel Line Number
D/TSENT	21	Date and Time Sent
DD/CD	22	Due Date/Completion Date
DIDNUM	23	DID Reference Number
DISC NBR	24	Disconnect Telephone Number (Service Group Section EU)
DISC NBR	25	Disconnect Telephone Number (Service Group Section LS)
DLNUM	26	Directory Listing Reference Number (Directory Section)
DLORD	27	Directory Listing Order Number
DNUM	28	Disconnect Line Number
DOI	29	Degree of Indent
DSGCON	30	Design/Engineering Contact
DSGCON TEL NO	31	Design/Engineering Contact Telephone Number
EAN	32	Existing Account Number
EATN	33	Existing Account Telephone Number
EBD	34	Effective Bill Date
ECCKT	35	Exchange Company Circuit ID (Services Section)
ERROR CODE	36	Error Code
ERROR MESSAGE	37	Error Message

Field Abbreviation	Field #	Field Name
FDT	38	Frame Due Time
FNUM	39	Facility Line Number
FOC/CN REMARKS	40	FOC/CN Remarks
HA	41	Hunt Group Activity
HID	42	Hunt Group Identifier
HNUM	43	Hunt Number
HTN	44	Hunt Telephone Number
HTSEQ	45	Hunt Sequence
IBT	46	ISDN BRI Type
INIT	47	Initiator Identification
INIT TEL NO	48	Initiator Telephone Number
ISPID	49	ISDN Service Profile Identification (Service Group Section)
IWBAN	50	Inside Wiring Bill Account Number
LACT	51	Listing Activity Indicator (Directory Section)
LEAN	52	Line Existing Account Number
LEATN	53	Line Existing Account Telephone Number
LEGNUM	54	Multi-point Leg Number
LISTADR	55	Listed Address (Directory Service)
LISTNM	56	Listed Name (Directory Service)
LNEX	57	Line Number Extension Number (Services Section)
LNUM	58	Line Number (Services Section)
LOCNUM	59	Location Number (Hunt Group Section)
LOCNUM	60	Location Number (Service Group Section)
L-ORD	61	Loop Order Number (Service Group Section)
LPHRASE	62	Listing Phrase (Directory Service)
LSR NO	63	Local Service Request Number
LST	64	Local Service Termination
LTEXT	65	Line of Text (Directory Service)
LTN	66	Listed Telephone Number
LTXNUM	67	Line of Text Reference Number (Directory Service)
LTXTY	68	Listing Text Type (Directory Service)
LTY	69	Listing Type (Directory Service)
MATN	70	Main/Alternate Telephone Number (Service Group Section)
NAN	71	New Account Number
NATN	72	New Account Telephone Number
NNSP	73	New Network Service Provider Identification
NOR	74	Number Of Requests
NOTYP	75	Number Type (Service Group Section)
NSTN	76	Non-Standard Telephone Number (Directory Section)
ORD	77	Order Number

Field Abbreviation	Field #	Field Name
OTN	78	Old Telephone Number (Service Group Section)
PID	79	Personal Identifier (Service Group Section)
PON	80	Purchase Order Number
PORTED NBR	81	Ported Telephone Number (Service Group Section)
RELAY RACK	82	Relay Rack (Service Group Section)
REP	83	Provider Contact Representative
REP TEL NO	84	Representative Telephone Number
RESID	85	Response Identifier
RTI	86	Route Index
SAT	87	Subscriber Access Telephone Number (Service Group Section)
SHELF	88	Shelf (Service Group Section)
SLOT	89	Slot (Service Group Section)
SLTN	90	Shared Line Telephone Number (Service Group Section)
STATUS CODE	91	Status Code
STATUS MSG	92	Status Message
STYC	93	Style Code (Directory Section)
SYSTEM ID	94	System Identification (Service Group Section)
TER	95	Terminal Number (Service Group Section)
TERS	96	Terminal Numbers (Service Group Section)
TEST PROD INDICATOR	97	Test Production Indicator
TGLNUM	98	Trunk Group Location Number
TLI	99	Telephone Line Identifier
TNNUM	100	Telephone Number Line Number
TNS	101	Telephone Numbers (Service Group Section)
TOA	102	Type of Account (Directory Service)
TRANS ACK TYPE	103	Transaction Activity Type
TRANS SET PURPOSE CODE	104	Transaction Set Purpose Code
VER	105	Version Identification
WPP	106	White Pages Products (Directory Service)

## 1. AAN - Associated Account Number

Identifies related accounts for the same end user at the same or different address(s).

**Usage:** This field is required.

**NOTES:**

1. When the AAN field on the LSR is not populated or blank, this field will be returned with all blanks.
2. This field identifies the CRIS Miscellaneous Account Number provided by the CLEC.

**CONDITION:**

When returned, the response information is obtained from the AAN field on the LSR screen and populated in the AAN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 13 - 13

**Field Example:**

404M205555333

## 2. ALI - Alphanumeric Listing Identifier Code

Identifier assigned to uniquely identify each listing for a main listing number from a customer.

**Usage:** This field is required.

**NOTE:**

When the ALI field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The ALI will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the ALI field from the directory listings screen and populate it in the ALI field on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 1 - 3

**Field Example:**

ABC

### 3. AN - Account Number

Identifies the main account number assigned by the NSP.

**Usage:** This field is required.

**NOTE:**

When the AN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the AN field on the LSR screen and populated in the AN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 13 - 13

**Field Example:**

3142359888

## 4. ATN - Account Telephone Number

Identifies the account telephone number assigned by the NSP.

**Usage:** This field is required.

**NOTE:**

When the ATN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the ATN field on the LSR screen and populated in the ATN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2015551212

## 5. BAN1 - Billing Account Number 1

Identifies the billing account to which the recurring and non-recurring charges for this request will be billed.

**Usage:** This field is required.

**NOTES:**

1. When returned, the BAN1 is returned in the following format:  
NPANXX1234123. *Example: 404X254321321*
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the BAN1 field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 13 - 13

**Field Example:**

201Q814587123

## 6. BAN2 - Billing Account Number 2

Identifies the billing account to which the recurring and non-recurring charges for this request will be billed.

**Usage:** This field is required.

**NOTES:**

1. When returned, the BAN2 is returned in the following format:  
NPANXX1234123. *Example: 404X254321321*
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the BAN2 field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 13 - 13

**Field Example:**

201Q814588456

## 7. BI1 - Billing Account Number Identifier 1

Identifies the service type of the billing account number populated in the BAN1 field.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
D	Directory Listings
L	Loop
M	Port Switched Combination
N	Number Portability
P	Port
R	Resale

**NOTE:**

When the BI1 field on the LSR is not populated or blank, this field will be returned with blank.

**CONDITION:**

When returned, the response information is obtained from the BI1 field on the LSR screen and populated in the BI1 field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

L

## 8. BI2 - Billing Account Number Identifier 2

Identifies the service type of the billing account number populated in the BAN2 field.

**Usage:** This field is required.

**Valid Entries:**

Valid Values	
D	Directory Listings
L	Loop
M	Port Switched Combination
N	Number Portability
P	Port
R	Resale

**NOTE:**

When the BI2 field on the LSR is not populated or blank, this field will be returned with blank.

**CONDITION:**

When returned, the response information is obtained from the BI2 field on the LSR screen and populated in the BI2 field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

L

## 9. BOPI - Bulk Order Package Identifier

Identifies the customer's unique BULK package ID that authorizes the issuance of this BULK request or supplement.

**Usage:** This field is required.

**NOTE:**

When the BOPI field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITIONS:**

1. This field is only applicable to UNE to UNE Bulk.
2. When returned, the response information is obtained from the BOPI field on the Global LSR screen and populated in the BOPI field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 12

**Field Example:**

000000000Z0

## 10. CABLE ID - Cable Identification

Identifies the provider's cable to be connected to the customer's equipment in a central office location.

**Usage:** This field is required.

**NOTE:**

When the CABLE ID field on the LS or LSNP is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the CABLE ID will be associated with every detail record with a different LNUM in the LS and LSNP screen. The system will obtain this information from the CABLE ID field from the LS and LSNP screen and populate it in the CABLE ID on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

PXX01

## 11. CABLE ID2 - Cable Identification 2

Identifies the provider's cable to be connected to the customer's equipment in a central office location.

**Usage:** This field is required.

**NOTE:**

When the CABLE ID2 field on the LS or LSNP is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the CABLE ID2 will be associated with every detail record with a different LNUM in the LS and LSNP screen. The system will obtain this information from the CABLE ID2 field from the LS and LSNP screen and populate it in the CABLE ID2 on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

PXX01

## 12. CC - Company Code

Identifies the exchange carrier initiating the transaction.

**Usage:** This field is required.

**NOTE:**

When the CC field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the CC field on the LSR screen and populated in the CC field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

1234

### 13. CCEA - Cross Connect Equipment Assignment

Identifies the physical point of termination at a collocation arrangement.

**Usage:** This field is required.

**NOTE:**

When the CCEA field on the DPU or IUS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the CCEA field will be associated with every detail record with a different LNUM in the DPU or IUS screen. The system will obtain this information from the CCEA field from the DPU or IUS screen and populate it in the CCEA field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 10 - 47

**Field Example:**

NVE01/NL-26/1938/SHOKCA01/SHOKCA01W27

## 14. CCNA - Customer Carrier Name Abbreviation

Identifies the COMMON LANGUAGE IAC code for the customer.

**Usage:** This field is required.

**NOTE:**

When the CCNA field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the CCNA field on the LSR screen and populated in the CCNA field on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 3 - 3

**Field Example:**

ZYX

## 15. CFA - Connecting Facility Assignment

Identifies the provider's carrier system and channel to be used.

**Usage:** This field is required.

**NOTE:**

When the CFA field on the LS, LSNP and PS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the CFA will be associated with every detail record with a different LNUM in the Loop, LSNP and Port Service screen. The system will obtain this information from the CFA field from the Loop, LSNP and Port service screen and populate it in the CFA field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 42

**Field Example:**

101/T1/3/HRFRCT03HA1/HRFRCT03DC0

## 16. CHAN/PAIR - Channel/Pair

Identifies the specific channel or pair within the provider's cable to be used for connection.

**Usage:** This field is required.

**NOTES:**

1. When the CHAN/PAIR field on the LS or LSNP is not populated or blank, this field will be returned with all blanks.
2. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State/OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITION:**

When returned, the CHAN/PAIR will be associated with every detail record with a different LNUM in the LS and LSNP screen. The system will obtain this information from the CHAN/PAIR field from the LS and LSNP screen and populate it in the CHAN/PAIR on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 4

**Field Example:**

24

## 17. CHAN/PAIR2 - Channel/Pair 2

Identifies the specific channel or pair within the provider's cable to be used for connection.

**Usage:** This field is required.

**NOTES:**

1. When the CHAN/PAIR2 field on the LS or LSNP is not populated or blank, this field will be returned with all blanks.
2. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITION:**

When returned, the CHAN/PAIR2 will be associated with every detail record with a different LNUM in the LS and LSNP screen. The system will obtain this information from the CHAN/PAIR2 field from the LS and LSNP screen and populate it in the CHAN/PAIR2 on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 4

**Field Example:**

24

## 18. CHC - Coordinated Hot Cut

Identifies that the customer is requesting near seamless cutover activity.

**Usage:** This field is required.

**NOTE:**

When the CHC field on the LSR is not populated or blank, this field will be returned blank.

**CONDITION:**

When returned, the response information is obtained from the CHC field on the LSR screen and populated in the CHC field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

Y

## 19. CKR - Customer Circuit Reference (Service Group Section)

Identifies the circuit number or sequential range of circuit numbers assigned by the customer.

**Usage:** This field is required.

**NOTE:**

When the CKR field on the LS, LSNP, NP, PS, RS is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the CKR will be associated with every detail record with a different LNUM in the Loop, LSNP, NP, Port and Resale screen. The system will obtain this information from the CKR field from the Loop, LSNP, NP Port and Resale screen and populate it in the CKR field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 41

**Field Example:**

L0002

## 20. CNUM - Channel Line Number

Identifies the B or D channel line number.

**Usage:** This field is required.

**NOTE:**

When the CNUM field on the ISU or ISR screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the CNUM field will be associated with every detail record with a different LNUM in the ISU or ISR screen. The system will obtain this information from the CNUM field from the ISU or ISR screen and populate it in the CNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 4

**Field Example:**

576

## 21. D/TSENT - Date and Time Sent

Identifies the date and time that the transaction is sent.

**Usage:** This field is required.

**Valid Entries:**

Valid Format:	
<b>CCYYMMDDHHMMAA</b>	
<b>CC</b>	Two Digit Century (00-99)
<b>YY</b>	Two Digit Year (00-99)
<b>MM</b>	Two Digit Month (01-12)
<b>DD</b>	Two Digit Day (01-31)
<b>HH</b>	Two Digit Hour (01-12)
<b>MM</b>	Two Digit Minute (00-59)
<b>AA</b>	AM or PM

### NOTE:

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

### CONDITION:

When returned, the system will record this information from the date and time stamp that indicates the date the response was submitted to the system interfacing the CLEC. The system shall populate this date in the D/TSENT field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 14 - 14

**Field Example:**

201103020125PM

## 22. DD/CD - Due Date/Completion Date

Identifies the date the service order requested is due and completed.

**Usage:** This field is required.

**NOTES:**

1. Hyphen (-) is the only special character that may be returned.
2. When the DD or CD is not populated on the AT&T Southeast service order this field will be returned with blanks.
3. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITIONS:**

1. When returned, the DD/CD is returned in the following formats:  
CCYY-MM-DD or CCYYMMDD *Example: 7/10/2004 or 20040710.*
2. When returned, the response information is obtained from the AT&T SE service order and populated in the DD/CD field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 10

**Field Example:**

11-10-2008

## 23. DIDNUM - DID Reference Number

Identifies each DID group as a unique number and each additional DID group as a unique number.

**Usage:** This field is required.

**NOTE:**

When the DIDNUM field on the DPR, DPU or DTU screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the DIDNUM field will be associated with every detail record with a different LNUM in the DPR, DPU or DTU screen. The system will obtain this information from the DIDNUM field from the DPR, DPU or DTU screen and populate it in the DIDNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

00023

## 24. DISC NBR - Disconnect Telephone Number (Service Group Section EU)

Identifies the end user telephone number to be disconnected.

**Usage:** This field is required.

**NOTE:**

When the DISC NBR field on the EU screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The DISC NBR will be associated with every detail record with a different DNUM in the EU screen. The system will obtain this information from the DISC NBR field from the EU screen and populate it in the DISC NBR field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2016991234

## 25. DISC NBR - Disconnect Telephone Number (Service Group Section LS)

Identifies the end user telephone number to be disconnected.

**Usage:** This field is required.

**NOTE:**

When the DISC NBR field on the LS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The DISC NBR will be associated with every detail record with a different LNUM in the Loop Services form. The system will obtain this information from the DISC NBR field from the Loop Services screen and populate it in the DISC NBR field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2016991234

## 26. DLNUM - Directory Listing Reference Number (Directory Section)

Identifies each listing segment as a unique number.

**Usage:** This field is required.

**NOTE:**

When the DLNUM field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The DLNUM will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the DLNUM field from the directory listings screen and populate it in the DLNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

0023

## 27. DLORD - Directory Listing Order Number

Identifies the Directory Listing Service Order number.

**Usage:** This field is required.

**NOTE:**

This field will be returned with all blanks when a directory listing order is not issued.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 20

**Field Example:**

A123B456C

## 28. DNUM - Disconnect Line Number

Identifies the line or trunk as a unique number and each additional occurrence as a unique number.

**Usage:** This field is required.

**NOTE:**

When the DNUM field on the EU screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the DNUM will be associated with every detail record with a different DNUM in the EU form. The system will obtain this information from the DNUM field from the EU form and populate it in the DNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

00023

## 29. DOI - Degree of Indent

Identifies the degree of indentation for this listing.

**Usage:** This field is required.

**Valid Entries:**

<b>Valid Values:</b>
----------------------

0 - 6
-------

**NOTE:**

When the DOI field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the DOI will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the DOI field from the directory listings screen and populate it in the DOI field in the directory listings section on the response.

**Data Characteristics:** numeric character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

1

### 30. DSGCON - Design/Engineering Contact

Identifies the representative of the customer or agent that should be contacted on design/engineering matters.

**Usage:** This field is required.

**NOTE:**

When the DSGCON field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the response information is obtained from the DSGCON field on the LSR screen and populated in the DSGCON field on the response.

**Data Characteristics:** alpha / special characters

**Field Length (Min-Max):** 1 - 15

**Field Example:**

JOHN SMITH

## 31. DSGCON TEL NO - Design/Engineering Contact Telephone Number

Identifies the telephone number of the provider's design/engineering contact.

**Usage:** This field is required.

**Valid Entries:**

Valid Formats:
10 Numeric characters
15 Alpha/Numeric characters

**NOTE:**

When the DSGCON field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the response information is obtained from the DSGCON TEL NO field on the LSR screen and populated in the DSGCON TEL NO field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 15 - 15

**Field Example:**

2019813500X1234

## 32. EAN - Existing Account Number

Identifies the end user's existing account number.

**Usage:** This field is required.

**Valid Entries:**

Valid Formats:
10 Numeric characters
13 Alpha/Numeric characters

**NOTE:**

When the EAN field on the EU is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the EAN field on the EU screen and populated in the EAN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 13 - 13

**Field Example:**

404M231234123

### 33. EATN - Existing Account Telephone Number

Identifies the end user's existing account telephone number.

**Usage:** This field is required.

**NOTE:**

When the EATN field on the EU is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the EATN field on the EU screen and populated in the EATN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

3142359888

## 34. EBD - Effective Bill Date

Identifies the effective date to begin or cease billing when the billing date is different from the desired due date.

**Usage:** This field is required.

**NOTE:**

When EBD is not populated on the AT&T Southeast service order this field will be returned with blanks.

**CONDITIONS:**

1. When returned, EBD is returned in the following format: CCYYMMDD. *Example: 20040710*
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the EBD field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 8 - 8

**Field Example:**

20081115

## 35. ECCKT - Exchange Company Circuit ID (Services Section)

Identifies a provider's circuit identification.

**Usage:** This field is required.

### NOTES:

1. When the ECCKT field is not populated on the Service order for (ACT=N, D, or MI=C or D) and the ECCKT field is not populated or blank on the LS screen, and is required on response, this field will be returned with blanks.
2. Period (.) is the only special character that may be returned.

### CONDITIONS:

1. Excluding Line Share and Line Splitting, when ECCKT is returned for REQ TYP A, and the ACT Type is not N or D and the MI is not C or D, the system will obtain the information from the LS screen and return the information in the ECCKT field on the response.
2. Excluding Line Share and Line Splitting, when ECCKT is returned, the system will obtain this information from the service order for REQ TYP A, only when the ACT Type is N or D or the MI is C or D and populate the information in the ECCKT field on the response.
3. When both a telephone number and circuit id number is applicable to the line loss notification, the telephone number will be returned in this field and the circuit id will be returned in the ECCKT field.
4. When ECCKT is returned on REQ TYP B, the system will obtain the information from the service order and populate the ECCKT information in the ECCKT field on the response.
5. When the ECCKT is returned and the product is Line Share or Line Splitting, the system will obtain the ECCKT from the AT&T Southeast service order and populate the information in the ECCKT field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 41

**Field Example:**

101.T1.NYCMNY50.NYCMNY54W01

### 36. ERROR CODE - Error Code

Identifies the code associated to the Error Message.

**Usage:** This field is required.

**NOTE:**

The error codes and messages are available via the Codes and Messages database.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 14

**Field Example:**

R8280

### 37. ERROR MESSAGE - Error Message

Identifies the text message associated with the error code.

**Usage:** This field is required.

**NOTES:**

1. The error codes and messages are available via the Codes and Messages database.
2. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 264

**Field Examples:**

INVALID DATA

## 38. FDT - Frame Due Time

Identifies the frame cutover time.

**Usage:** This field is required.

**NOTES:**

1. When the FDT is not populated on the AT&T Southeast service order this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.
3. When this field is returned as a range, the 5th position of the field will be a hyphen (-). *Example: 1800-1900*

**CONDITIONS:**

1. (Excluding REQ TYP B (LNP)) When returned the response information is obtained from the AT&T Southeast service order and populated in the FDT field on the response.
2. For REQ TYP B (LNP), when returned the response information for this field is obtained from the DFDT field on the LSR and populated in the FDT field on the response.
3. When returned, the FDT is returned in military time.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 9

**Field Example:**

1300-1700

### 39. FNUM – Facility Line Number

Identifies the facility as a unique number and each additional occurrence as a unique number.

**Usage:** This field is required.

**NOTE:**

When the FNUM field on the DTR, DTU, IUS or IRS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the FNUM field will be associated with every detail record with a different LNUM in the DTR, DTU, IUS or IRS screen. The system will obtain this information from the FNUM field from the DTR, DTU, IUS or IRS screen and populate it in the FNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 2

**Field Example:**

10

## 40. FOC/CN REMARKS - FOC/CN Remarks

Identifies a free flowing field which can be used to expand upon and clarify other data.

**Usage:** This field is required.

**NOTE:**

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITIONS:**

1. On LSRs, when the system determines that a dispatch is required it will populate 'DISPATCH IS REQUIRED' in the FOC/CN REMARKS field following any other FOC/CN-Remarks on the response. If there is not sufficient space for the message the system will drop the number of characters needed at the end of the other Remarks to populate the 20 characters, DISPATCH IS REQUIRED.

2. The 'ADSL Informational' message will be populated in the FOC/CN-Remarks on the FOC according to the following guidelines:

'Dispatch Required' will remain the last entry in FOC/CN-Remarks if applicable.

'Facility Check' messages, if applicable, will remain immediately in front of 'Dispatch Required' or last if 'Dispatch Required' is not applicable.

'ADSL Informational' message, when applicable, will appear immediately in front of both 'Facility Check' and Dispatch Required' messages or immediately in front of 'Facility Check' or 'Dispatch Required' message if only one is required. If neither 'Facility Check' nor 'Dispatch Required' message is applicable, 'ADSL Informational' message will be last entry in FOC/CN-Remarks.

Any remarks on incoming LSR that will be moved to the FOC will be shortened by number of characters required to place any or all of the three messages listed above that apply.

3. The Facility check messages will be populated in the Remarks on the FOC according to the following guidelines:

- a. If there are no remarks applicable for the FOC/CN-Remarks section of the FOC (that originated from the Remarks on the LSR), the system will place one of the applicable facility checked messages, "Facilities have been checked" or "Facilities have been checked and a PF condition exists" in the FOC/CN REMARKS field on the response.

- b. If the only remarks applicable for the FOC/CN-Remarks Section of the FOC is, "Dispatch is Required", the system will place one of the applicable facility checked messages "Facilities have been checked" or "Facilities have been checked and a PF condition exists" before the "Dispatch is Required" message.

- c. If there are remarks applicable for the FOC/CN-Remarks section of the FOC (Remarks from LSR), but no "Dispatch is Required" message present, the system will place one of the applicable facility checked messages "Facilities have been checked" or "Facilities have been checked and a PF condition exists" at the beginning of the Remarks. If adding the facility checked message causes the Remarks section to exceed the number of characters allowed, the system will drop the number of characters needed at the end of the other Remarks.

---

**40. FOC/CN REMARKS - FOC/CN Remarks (continued...)****CONDITIONS (continued):**

4. The system will search to obtain this information from the REMARKS field from the LSR screen and populate in it the FOC/CN-REMARKS field on the response.
5. When an LSR is submitted for Non-Complex REQ TYP M, MI= A, B, C, or D, and LNA = C, D, G, N, P, T, V, W, or X where a service order is generated with Outward ('O') action coded FID OADSL in the UNFIELDDED IDENT Section of the AT&T Southeast service order, the system will return the following informational message in the FOC/CN-REMARKS field on the response:

CLEC SHOULD HAVE THE END USER CONTACT THEIR NSP/ISP FOR CHANGES TO THEIR ADSL SERVICE. ADL++ IS NOT VALID WITH UNE PORT SERVICE

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 350

**Field Example:**

CLEC SHOULD HAVE THE END USER CONTACT THEIR NSP/ISP FOR CHANGES TO THEIR ADSL SERVICE. ADSL++ IS NOT VALID WITH UNE PORT SERVICE

## 41. HA - Hunt Group Activity

Identifies the activity associated with the hunt group on this request.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
<b>C</b>	Change to Hunt Group Sequence
<b>D</b>	Remove Hunt Group Arrangement
<b>E</b>	Existing/No Change
<b>N</b>	New

**NOTE:**

When the HA field on the LSR is not populated or blank and is required on response, this field will be returned with all blanks.

**CONDITION:**

When returned, the HA will be associated with every detail record with a different HNUM in the Hunt Group record. The system will obtain this information from the HA field on the HGI screen and populate it in the HA field on the initial request or a supplement to a request.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

N

## 42. HID - Hunt Group Identifier

Identifies the hunt group.

**Usage:** This field is required.

**NOTE:**

When the HID field on the LSR is not populated or blank and is required on response, this field will be returned with all blanks.

**CONDITION:**

When returned, the HID will be associated with every detail record with a different HNUM in the Hunt Group record. The system will obtain this information from the HGI and populate it in the HID field on the initial request or a supplement to a request.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 4

**Field Example:**

30

### 43. HNUM - Hunt Number

Identifies the hunt group as a unique number and each additional occurrence as a unique number.

**Usage:** This field is required.

**NOTE:**

When the HNUM field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the HNUM will be associated with every detail record that has a different HNUM in the Hunt Group record. The system will obtain this information from the HNUM field on the HGI screen and populate it in the HNUM field on the initial request or a supplement to a request.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

00003

## 44. HTN - Hunt Telephone Number

Identifies the hunting number for this sequence in the hunt group.

**Usage:** This field is required.

**NOTE:**

When the HTN field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the HTN will be associated with every detail record with a different HNUM in the Hunt Line record. The system will obtain this information from the Hunt HTN field on the HGI screen and populate it in the HTN field on the initial request or a supplement to a request.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 15

**Field Example:**

T0001

## 45. HTSEQ - Hunt Sequence

Identifies the desired hunting sequence or range of hunt sequence.

**Usage:** This field is required.

**NOTE:**

When the AAN field on the LSR is not populated or blank and is required on response, this field will be returned with all blanks.

**CONDITION:**

When returned, the HTSEQ will be associated with every detail record with a different HNUM in the Hunt Line record. The system will obtain this information from HTSEQ field on the HGI screen and populate it in the HTSEQ field on the initial request or a supplement to a request.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

0003

## 46. IBT - ISDN BRI Type

Indicates the type of National ISDN-BRI.

**Usage:** This field is required.

**NOTE:**

When the IBT field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the IBT field on the EU screen and populated in the IBT field on the response.

**Data Characteristics:** numeric character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

2

## 47. INIT - Initiator Identification

Identifies the LSP's representative who originated this transaction.

**Usage:** This field is required.

**CONDITION:**

When returned, the response information is obtained from the INIT field on the LSR screen and populated in the INIT LSR field on the response.

**Data Characteristics:** alpha / special characters

**Field Length (Min-Max):** 1 - 15

**Field Example:**

JOHN SMITH

## 48. INIT TEL NO - Initiator Telephone Number

Identifies the telephone number of the initiator.

**Usage:** This field is required.

**Valid Entries:**

Valid Formats:
10 Numeric characters
15 Alpha/Numeric characters

**CONDITION:**

When returned, the response information is obtained from the INIT-TEL NO field on the LSR screen and populated in the INIT-TEL NO LSR field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 15 - 15

**Field Example:**

2019813500

## 49. ISPID- ISDN Service Profile Identification (Service Group Section)

Provides a code that must be programmed into the ISDN BRI Customer Premises Equipment (CPE). This code is transmitted from the CPE over the ISDN BRI D-channel to the LSO switch. It must be present in order for the BRI to become active.

**Usage:** This field is required.

**CONDITION:**

When returned, the ISPID will be associated with every detail record with a different LNUM in the Resale form. The system will obtain this information from the ISPID field from the Resale screen and populate it in the ISPID field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 14

**Field Example:**

70350663550101

## 50. IWBAN - Inside Wiring Bill Account Number

Identifies the billing account number for charges associated with inside wire.

**Usage:** This field is optional.

**CONDITION:**

When returned, the response information is obtained from the IWBAN field on the EU screen and populated in the IWBAN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 13

**Field Example:**

201Q814587123

## 51. LACT - Listing Activity Indicator (Directory Section)

Identifies the activity involved for this listing request.

**Usage:** This field is required. Usage:

**Valid Entries:**

Valid Values:	
<b>N</b>	New Listing
<b>D</b>	Delete Listing (remove existing listing)
<b>I</b>	Change Listing (new data to be inserted)
<b>O</b>	Change Listing (old data to be removed)
<b>Z</b>	No Change to Listing

**NOTE:**

When the LACT field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The LACT will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the LACT field from the directory listings screen and populate it in the LACT field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

N

## 52. LEAN - Line Existing Account Number

Identifies the end user's existing account number assigned by the current NSP and/or LSP.

**Usage:** This field is required.

**NOTES:**

1. When the LEAN field on the LSNP, NP, PS, or RS screen is not populated or blank and is required on response, this field will be returned with blanks.
2. Supports consolidated working telephone numbers that reside in Old LSP existing account(s) to a single Account Telephone Number (ATN). Supports one end user's multiple accounts at one end user location.

**CONDITION:**

When returned, the LEAN will be associated with every detail record with a different LNUM in the LSNP, NP, Port and Resale screen. The system will obtain this information from the LEAN field from the LSNP, NP, Port and Resale screen and populate it in the LEAN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 13 - 13

**Field Example:**

201M231234

### 53. LEATN - Line Existing Account Telephone Number

Identifies the end user's existing account telephone number assigned by the old LSP.

**Usage:** This field is required.

**NOTES:**

1. When the LEATN field on the LS, LSNP, NP, PS, or RS screen is not populated or blank and is required on response, this field will be returned with blanks.
2. Supports consolidated working telephone numbers that reside in Old LSP existing account(s) to a single Account Telephone Number (ATN). Supports one end user's multiple accounts at one end user location.

**CONDITION:**

When returned, the LEATN will be associated with every detail record with a different LNUM in the Loop, LSNP, NP, Port and Resale screen. The system will obtain this information from the LEATN field from the Loop, LSNP, NP Port and Resale screen and populate it in the LEATN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2015551234

## 54. LEGNUM – Multi-point Leg Number

Identifies the number assigned by the customer to this leg of a multi-point circuit.

**Usage:** This field is required.

**NOTE:**

When the LEGNUM field on the RPL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the LEGNUM field will be associated with every detail record with a different LNUM in the RPL screen. The system will obtain this information from the LEGNUM field from the RPL screen and populate it in the LEGNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 3

**Field Example:**

5

## 55. LISTADR - Listed Address (Directory Service)

Identifies the entire address as it is to be listed.

**Usage:** This field is required.

**NOTES:**

1. When the LAPR, LANO, LASF, LASD, LASN, LATH, LASS, LALOC, and LAST fields on the DL screen are not populated or blank and are required on response, this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.

**CONDITION:**

When returned, the LISTADR will be associated with every detail record with a different DLNUM in the DL screen. The LISTADR will be formatted using the LAPR, LANO, LASF, LASD, LASN, LATH, LASS, LALOC, and LAST fields as they appear on the DL screen. The system will format this data in the LISTADR field on the response as follows: When returned the fields will be displayed in the following order: LAPR, LANO, LASF, LASD, LASN, LATH, LASS, LALOC, LAST.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 150

**Field Example:**

25W 4501/2 SW CAMINO RAMON LN NW SAN RAMON CA 94583

## 56. LISTNM - Listed Name (Directory Service)

Identifies the name contained in the listing.

**Usage:** This field is required.

**NOTE:**

When the LNLN, LNFN, DES, TL, TITLE1, TITLE2, and NICK fields on the DL screen are not populated or blank and are required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the LISTNM will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the LNLN, LNFN, DES, TL, TITLE1, TITLE2, and NICK fields from the directory listings screen and populate it in the LISTNM field in the directory listings section on the response. When returned the system will format the information in the LISTNM field in the following order: LNLN, LNFN, DES, TL, TITLE1, TITLE2, NICK. The system will remove trailing blanks.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 252

**Field Example:**

JANE SMITH

## 57. LNEX - Line Number Extension Number (Services Section)

Provides an extension to the line number field (LNUM) for use when multiple ISDN-BRI directory numbers (TNS) are assigned to a single ISDN BRI line for one service order/PON/LNUM.

**Usage:** This field is required.

**NOTE:**

When the LNEX field on the PS or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the LNUM will be associated with every detail record with a different LNEX in the Loop, Port and Resale screen. The system will obtain this information from the LNEX field from the Port and Resale form and populate it in the LNEX field in the Services Group record on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

00001

## 58. LNUM (Services Section) - Line Number (Services Section)

Identifies the line or trunk as a unique number and each additional occurrence of either as a unique number.

**Usage:** This field is required.

**Valid Entries:**

<b>Valid Values:</b>
----------------------

00001 - 99999
---------------

**NOTE:**

When the LNUM field on the LS, LSNP, NP, PS, or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the LNUM will be associated with every detail record with a different LNUM in the LS, LSNP, NP, Port and Resale screen. The system will obtain this information from the LNUM field from the LS, LSNP, NP, Port and Resale form and populate it in the LNUM field in the Services Group record on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

00118

## 59. LOCNUM - Location Number (Hunt Group Section)

Identifies the service location number for the service requested.

**Usage:** This field is required.

**NOTES:**

1. When the LOCNUM field on the HTI is not populated or blank and is required on response, this field will be returned with all blanks.
2. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State/OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITION:**

When returned, the LOCNUM will be associated with each detail record with a different HNUM in the Hunt Group record on the initial request or a supplement to a request. The system will obtain this information from the LOCNUM field on the HGI Screen and will populate it in the LOCNUM field on the HGI Screen and will populate it in the LOCNUM field on the initial request or a supplement to a request.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 3 - 3

**Field Example:**

002

## 60. LOCNUM - Location Number (Service Group Section)

Identifies the service location number for the service requested.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
000 - 999

### NOTES:

1. When the LOCNUM field on the LS, LSNP, NP, PS, or RS screen is not populated or blank and is required on response, this field will be returned with all blanks.
2. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

### CONDITION:

When returned, the LOCNUM will be associated with every detail record with a different LNUM in the Loop, LSNP, NP, Port and Resale screen. The system will obtain this information from the LOCNUM field from the Loop, LSNP, NP, Port and Resale form and populate it in the LOCNUM field in the Services Group record on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 3 - 3

**Field Example:**

002

## 61. L-ORD - Loop Order Number (Service Group Section)

Identifies the provider's order number for the loop.

**Usage:** This field is required.

**NOTE:**

When the firm order type is not for REQTYP A, this field will be returned with blanks.

**CONDITIONS:**

1. This field is only applicable on REQTYP A request(s).
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the L-ORD field.

**Data Characteristics:** alpha /numeric characters

**Field Length (Min-Max):** 1 - 8

**Field Example:**

C1234567

## 62. LPHRASE - Listing Phrase (Directory Service)

Identifies a predefined phrase associated with a listing.

**Usage:** This field is required.

### Valid Entries:

Valid Values:	
5	Toll Free-Dial '1' & Then
15	Toll Free-Dial '0' & Then
20	Toll Free-Dial Access Code & Then
25	Charges Will Apply-Dial '1' & Then ('900 numbers')
33	No Charge Dial '1' & Then (Florida Only)
35	No Charge for Call Dialed Direct To This Number from (Exchange Name)
45	TDD & Voice
50	TDD Only
65	(City) Tel No
67	Charges Apply-Dial '1' and Then
73	Charges Will Apply
77	Toll & Service Charges Apply
85	At The Tone Dial ---
90	At the Beep Enter Call Back Number
103	(s % See Customer Guide Pages concerning the use of the telephone equip at this no.)
107	(s % See Customer Guide Pages concerning the use of the telephone equip at this no.)

### NOTE:

When the LPHRASE on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

### CONDITIONS:

1. The listing text type group LTXNUM, LXTY, LPHRASE and LTEXT can repeat up to three times.
2. When returned, the LPHRASE will be associated with every detail record with a different LTXNUM in the DL screen. The system will obtain the LPHRASE field information from the LPHRASE field found in the DL screen and will populate this information in the LPHRASE field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 3

**Field Example:**

103

## 63. LSR NO - Local Service Request Number

Identifies the number that may be generated by the provider's mechanized systems, pre-assigned to the customer by the provider or manually assigned by the provider to identify a customer's request for service.

**Usage:** This field is required.

**Valid Entries:**

Valid Format:
NNNNNNNNNANNNNN-NN
A = Alpha
N = Numeric

**NOTE:**

Hyphen (-) is the only special character that may be returned.

**CONDITION:**

When returned, the response information is obtained from the LSR NO field on the LSR screen and populated in the LSR NO field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 18

**Field Example:**

20030302L00074-00

## 64. LST - Local Service Termination

Identifies the CLLI code of the end office switch from which the service is being provided.

**Usage:** This field is required.

**CONDITION:**

When returned, the LST will be associated with every detail record with a different LNUM in the LSR screen. The system will obtain this information from the LST field from the administrative section on the LSR screen and populate it in the LST field on the response. The incoming LST field is on the Header level and will be populated on the Detail level on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 11 - 11

**Field Example:**

STLSMO07CG0

## 65. LTEXT - Line of Text (Directory Service)

Identifies the descriptive or informative text that will appear in the directory to assist the end user.

**Usage:** This field is required.

**NOTE:**

When the LTEXT on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITIONS:**

1. The listing text type group LTXNUM, LXTY, LPHRASE and LTEXT can repeat up to three times
2. When returned, the LTEXT will be associated with every detail record with a different LTXNUM in the DL screen. The system will obtain the LTEXT field information from the LTEXT field found in the DL screen and will populate this information in the LTEXT field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 250

**Field Example:**

CALL BETWEEN 9 AND 5

## 66. LTN - Listed Telephone Number

Identifies the telephone number that may be included in the directory and/or quoted in Directory Assistance (DA).

**Usage:** This field is required.

**NOTE:**

When the LTN field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The LTN will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the LTN field from the directory listings screen and populate it in the LTN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2019813500

## 67. LTXNUM - Line of Text Reference Number (Directory Service)

Identifies each line of information with a unique number.

**Usage:** This field is required.

**NOTE:**

When the LTXNUM field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITIONS:**

1. The listing text type group LTXNUM, LTXTY, LPHRASE and LTEXT can repeat up to three times.
2. The LTXNUM will be associated with every detail record with a different LTXNUM in the DL screen. The system will obtain the LTXNUM field information from the LTXNUM field found in the DL screen and will populate this information in the LTXNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

02

## 68. LTXTY - Listing Text Type (Directory Service)

Identifies the type of associated text that will appear in the directory to assist the end user.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
<b>AC</b>	Alternate Call
<b>CR</b>	Cross Reference
<b>DL</b>	Designer Extra Line
<b>DLB</b>	Designer Extra Line Bold
<b>DLS</b>	Designer Extra Line Script
<b>ITX</b>	Indent Text
<b>OP</b>	Other Predefined Phrase
<b>SP</b>	Special Text
<b>TT</b>	Text

### NOTE:

When the LTXTY field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

### CONDITIONS:

1. The listing text type group LTXNUM, LTXTY, LPHRASE and LTEXT can repeat up to three times
2. The LTXTY will be associated with every detail record with a different LTXNUM in the DL screen. The system will obtain the LTXTY field information from the LTXTY field found in the DL screen and will populate this information in the LTXTY field on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 2 - 3

**Field Example:**

ITX

## 69. LTY - Listing Type (Directory Section)

Identifies the type of listing with respect to publication and Directory Assistance (DA) appearance rules.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
1	Listed - Appears in DA and Directory
2	Non-Listed - Appears only in DA
3	Non-Published - Does not appear in directory and the telephone number does not appear in DA

**NOTE:**

When the LTY field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The LTY will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the LTY field from the directory listings screen and populate it in the LTY field on the response.

**Data Characteristics:** numeric character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

1

## 70. MATN - Main/Alternate Telephone Number (Service Group Section)

Indicates the dialable telephone number(s) assigned to the ISDN BRI line. If the same number cannot be used for both B-channels, then the main number will be assigned to B-channel 1 and the alternate number will be assigned to B-channel 2.

**Usage:** This field is required.

### Valid Entries:

Valid Values:	
<b>A</b>	Alternate Telephone Number(s)
<b>M</b>	Main Telephone Number

### NOTE:

When the MATN field on the PS or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

### CONDITION:

When returned, the MATN field will be associated with every detail record with a different LNUM in the Port and Resale screen. The system will obtain this information from the MATN field from the Port and Resale screen and populate it in the MATN field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

M

## 71. NAN - New Account Number

Identifies the new account number.

**Usage:** This field is required.

**NOTE:**

When the NAN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the NAN field on the LSR screen and populated in the NAN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2015551234

## 72. NATN - New Account Telephone Number

Identifies the new account telephone number.

**Usage:** This field is required.

**NOTE:**

When the NATN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the NATN field on the LSR screen and populated in the NATN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2055551234

## 73. NNSP - New Network Service Provider Identification

Identifies the Number Portability Administration center (NPAC) Service Provider Identifier (SPI) of the new Network Service Provider (NSP).

**Usage:** This field is required.

**NOTE:**

When the NNSP field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITIONS:**

1. This field is applicable to LNP.
2. When returned, this information is obtained from the NNSP field on the LSR and returned in the NNSP field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

8A55

## 74. NOR - Number Of Requests

Identifies the local service request and the total quantity of local service requests within a related group of orders being submitted.

**Usage:** This field is conditional.

**NOTES:**

1. The value returned in this field will be identical to the value submitted on the initial or supplemental LSR.
2. Hyphen (-) is the only special character that may be returned.

**CONDITION:**

This field will only be returned when the REQ TYP is B and the product is Bulk Single LSR arrangement.

**Data Characteristics:** numeric / special characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

01-99

## 75. NOTYP - Number Type (Service Group Section)

Identifies the type of telephone number.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
T	Telephone Number
L	Terminal Number

**CONDITION:**

When returned, the NOTYP will be associated with every detail record with a different LNUM in the Resale screen. The system will obtain this information from the NOTYP field on the Resale screen and populate it in the NOTYP field in the Resale section on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

T

## 76. NSTN - Non-Standard Telephone Number (Directory Section)

Identifies a telephone number which is not in the standard North American Numbering Plan format, e.g., vanity numbers, Enterprise, 911.

**Usage:** This field is required.

**NOTES:**

1. When the NSTN field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.

**CONDITION:**

The NSTN will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the NSTN field from the directory listings screen and populate it in the NSTN field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 18

**Field Example:**

414-227-HELP

## 77. ORD - Order Number

Identifies the provider's order number for the service requested.

**Usage:** This field is required.

**NOTE:**

When an AT&T Southeast Service order has not been generated this field will be returned blank.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order and populated in the ORD field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 8 - 8

**Field Example:**

C1234567

## 78. OTN - Old Telephone Number (Service Group Section)

Identifies the existing telephone number that is being changed.

**Usage:** This field is required.

**NOTE:**

When the OTN field on the PS or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The OTN will be associated with every detail record with a different LNUM in the Port and Resale Services screen. The system will obtain this information from the OTN field from the Port and Resale Services screen and populate it in the OTN on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2016990001

## 79. PID - Personal Identifier (Service Group Section)

Identifies the end user's personal identification number.

**Usage:** This field is required.

**NOTES:**

1. When this information is not populated on the AT&T Southeast service order and this field is required on response, the field will be returned with blanks.
2. This field identifies the authorization number to be utilized with the telephone number provided in the SAT field.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order and returned in the PID field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

4412

## 80. PON - Purchase Order Number

Identifies the customer's unique purchase order or requisition number that authorizes the issuance of this request or supplement.

**Usage:** This field is required.

**NOTE:**

Apostrophe ('), Blank ( ), Comma (,) Hyphen (-), Period (.) and Space ( ) are the only special characters that may be returned.

**CONDITION:**

When returned, the response information is obtained from the PON field on the LSR screen and populated in the PON field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 16

**Field Example:**

824Z9

## 81. PORTED NBR - Ported Telephone Number (Service Group Section)

Identifies the Telephone Number (TN) or consecutive range of TNs residing in the same switch to be ported.

**Usage:** This field is required.

**CONDITION:**

When returned, the system will obtain the information from the PORTED NBR field on the LSNP and NP screen and populate the information in the PORTED NBR field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

9086997000

## 82. RELAY RACK - Relay Rack (Service Group Section)

A code that identifies the customer's bay/cabinet in a collocation arrangement and may also include the floor and aisle where the service piece of equipment is located.

**Usage:** This field is required.

**NOTES:**

1. When the RELAY RACK field on the LS or PS screen is not populated or blank and is required on response, this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.

**CONDITION:**

When returned, the RELAY RACK field will be associated with every detail record with a different LNUM in the LS and PS screen. The system will obtain this information from the RELAY RACK field from the LS and PS screen and populate it in the RELAY RACK field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 10

**Field Example:**

10052-03

### 83. REP - Provider Contact Representative

Identifies the provider's representative handling this service request.

**Usage:** This field is required.

**Valid Entries:**

<b>Valid Value:</b>
LCSC

**CONDITION:**

When returned, the response information is returned as LCSC and populated in the REP field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 15

**Field Example:**

LSCS

## 84. REP TEL NO - Representative Telephone Number

Identifies the telephone number of the provider's representative handling this request.

**Usage:** This field is required.

**CONDITION:**

When returned, this information is obtained from the CLEC profile and returned in the REPTTEL NO field.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

4045551234

## 85. RESID - Response Identifier

Identifies the response number assigned by the provider to relate to associated transactions.

**Usage:** This field is required.

**NOTE:**

When the RESID field on the LSR is not populated or blank and the field is required on response, this field will be returned with all blanks.

**CONDITION:**

When returned, this information is obtained from the RESID field on the LSR and returned in the RESID field on the initial request or a supplement to a request.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 20

**Field Example:**

123ABC

## 86. RTI - Route Index

Identifies the routing index to be used by the provider's switching equipment to forward/port the provider's telephone number to the customer's non-RCF trunk group.

**Usage:** This field is required.

**NOTE:**

When the RTI field on the LSNP or NP screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the RTI field will be associated with every detail record with a different LNUM in the LSNP or NP screen. The system will obtain this information from the RTI field from the LSNP or NP screen and populate it in the RTI field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 6

**Field Example:**

215

## 87. SAT - Subscriber Access Telephone Number (Service Group Section)

Identifies the telephone number, which allows remote access to make feature configuration changes.

**Usage:** This field is required.

**NOTE:**

When this information is not populated on the service order and this field is required on response, the field will be returned with blanks.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order and returned in the SAT field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

4045551234

## 88. SHELF - Shelf (Service Group Section)

Identifies the number assigned to the shelf within the relay rack.

**Usage:** This field is required.

**Valid Entries:**

Valid Formats:
2 Numeric characters
6 Alpha/Numeric characters

**NOTE:**

When the SHELF field on the LS or PS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the SHELF field will be associated with every detail record with a different LNUM in the LS or PS screen. The system will obtain this information from the SHELF field from the LS or PS screen and populate it in the SHELF field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 2 - 2 or 6 - 6

**Field Example:**

12

## 89. SLOT - Slot (Service Group Section)

Identifies the specific connection slot of the shelf to be used.

**Usage:** This field is required.

**NOTE:**

When the SLOT field on the LS or PS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the SLOT field will be associated with every detail record with a different LNUM in the LS or PS screen. The system will obtain this information from the SLOT field from the LS or PS screen and populate it in the SLOT field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 6

**Field Example:**

009

## 90. SLTN - Shared Line Telephone Number (Service Group Section)

Supports working telephone number of voice service in which line sharing service is to be provisioned.

**Usage:** This field is required.

**NOTES:**

1. When the SLTN field on the LS screen is not populated or blank and is required on response, this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.

**CONDITION:**

When returned, the SLTN field will be associated with every detail record with a different LNUM in the LS screen. The system will obtain this information from the SLTN field from the LS screen and populate it in the SLTN field on the response.

**Data Characteristics:** alpha / numeric/ special characters

**Field Length (Min-Max):** 12 - 12

**Field Example:**

201-555-1234

## 91. STATUS CODE - Status Code

Indicates the status code of the order.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
AO
CA
CB
CD
CF
CI
CK
CL
CM
CP
CS
CY
PD
PF
SA
SL
SO
SR

**CONDITION:**

When returned the system will obtain the status from the AT&T Southeast service order and will place it in the status code field on the response of a FOC, CN, POS, BCN, Jeopardy, or Clarification.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

AO

## 92. STATUS MSG - Status Message

Indicates the status message associated with the status code.

**Usage:** This field is required.

### NOTE:

Due to the Reqtyp C Porting process, a Status Code will not exist until after the CLEC activates the telephone number.

### CONDITIONS:

1. When multiple Jeopardy messages are returned the system will format them as follows:  

The 2 character code indicating the type of message, followed by a space and the message, followed by a space and another type and another message up to the 100 A/N character limit.

Example: 1Q ASSIGNMENT PROBLEM 2C BUSY CABLE AND/OR PAIR 2D LOOP IS TOO LONG 2G ADDRESS IS INVALID 2H BASIC
2. When the LSR is in an RPON group and one of the PONs is placed in Jeopardy status, the following Jeopardy message will be sent: PON XXXXXXXX IS IN JEOPARDY STATUS, ALL RELATED PONs IN RPON GROUP RETURNED
3. When the STATUS CODE is AO the following response is populated in the STATUS-MSG field: ASSIGNABLE ORDER
4. When the STATUS CODE is AO, PD, CP, or PF and the AT&T Southeast Service order Status has an error prefix of E, F, or O and the system has determined that the order is in jeopardy, one or more of the following jeopardy responses may be returned on the JN.
  - 1A INTEROFFICE FACILITY SHORTAGE
  - 1B SCHEDULING/WORK LOAD
  - 1C CUSTOMER (LSP) NOT READY
  - 1D NO LOOP AVAILABLE
  - 1E END USER NOT READY
  - 1F NSP MISSED APPOINTMENT
  - 1G NO ACCESS TO END USER
  - 1H CENTRAL OFFICE FREEZE
  - 1J SPECIAL CONSTRUCTION
  - 1K NATURAL DISASTER
  - 1L FRAME DUE TIME CANNOT BE MET
  - 1M REQUESTED DD IS LESS THAN PUBLISHED INTERVAL
  - 1N DD AND FRAME DUE TIME CANNOT BE MET
  - 1P OTHER
  - 1Q ASSIGNMENT PROBLEM
  - 1R CUSTOMER COULD NOT BE REACHED AT REACH NUMBER
  - 1S BUILDING NOT READY, CUSTOMER WILL ADVISE
  - 1T POLE AT TRAILER SITE NOT SET

**92. STATUS MSG - Status Message (continued...)****CONDITIONS (continued):**

- 1W ENTRANCE FACILITIES REQUIRED
  - 1X NOT TECHNICALLY FEASIBLE
  - 1Y NO CENTRAL OFFICE EQUIPMENT AVAILABLE
  - 1Z LOOP REQUIRES INSTALLATION OF ADDITIONAL EQUIPMENT
  - 2A LSR ERROR INCORRECT OR MISSING INFORMATION
  - 2B FACILITY WORK ORDER PENDING NO BONA FIDE REQUEST (BFR) REQUIRED
  - 2C BUSY CABLE ID
  - 2E LOOP IS TOO LONG
  - 2F INVALID OR WORKING SPLITTER
  - 2G ADDRESS IS INVALID
  - 2H BASIC ADDRESS IS VALID BUT LOC IS NEEDED
  - 4Q TN(S) NOT ACTIVATED - SEND A SUPP OR ACTIVATE
  - 6C TN(S) NOT ACTIVATED ON DUE DATE
- 5.** When the STATUS CODE is CA and the AT&T Southeast service order status is MA the following response is populated in the STATUS-MSG field: MISSED APPOINTMENT ORDER -CA
- COMPANY ASSIGNMENT
- When the STATUS CODE is CA and the AT&T Southeast service order status is CA the following response is populated in the STATUS-MSG field: CANCELLED ORDER
- 6.** When the STATUS CODE is CB the following response is populated in the STATUS-MSG field:
- MISSED APPOINTMENT ORDER -CB
- COMPANY BUSINESS OFC
- 7.** When the STATUS CODE is CD the following response is populated in the STATUS-MSG field:
- MISSED APPOINTMENT ORDER -CD
- COMPANY DESIGNED
- 8.** When the STATUS CODE is CF the following response is populated in the STATUS-MSG field:
- MISSED APPOINTMENT ORDER -CF
- COMPANY FACILITIES
- 9.** When the STATUS CODE is CI the following response is populated in the STATUS-MSG field:
- MISSED APPOINTMENT ORDER -CI
- COMPANY INDEPENDENT
- 10.** When the STATUS CODE is CK the following response is populated in the STATUS-MSG field:
- MISSED APPOINTMENT ORDER -CK
- COMPANY FACILITIES - ISDN BRI SERVICE

**92. STATUS MSG - Status Message (continued...)****CONDITIONS (continued):**

11. When the STATUS CODE is CL the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CL  
COMPANY LOAD
12. When the STATUS CODE is CM the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CM  
COMPANY MECHANIZATION
13. When the STATUS CODE is CO the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CO  
COMPANY OTHER
14. When the STATUS CODE is CP and the AT&T Southeast service order status is CP, CPX or PCX the following response is populated in the STATUS-MSG field:  
Completed Order
15. When the STATUS CODE is CP and the AT&T Southeast service order status is HPCX or IPCX the following response is populated in the STATUS-MSG field:  
BILLING/RECORDS COMPLETE
16. When the STATUS CODE is CS the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CS  
COMPANY SWITCHING
17. When the STATUS CODE is CX the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CX  
COMPANY EXCEPTIONAL
18. When the STATUS CODE is CY the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CY  
CUSTOMER DESIRED DUE DATE MISSED - FOC DATE TO FOLLOW
19. When the STATUS CODE is PD and the AT&T Southeast the following response is populated in the STATUS-MSG field:  
PENDING ORDER
20. When the STATUS CODE is PF and the AT&T Southeast the following response is populated in the STATUS-MSG field:  
PENDING FACILITIES ORDER
21. When the STATUS CODE is SA the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -SA  
SUBSCRIBER ACCESS 860 REQUIRED

---

## 92. STATUS MSG - Status Message (continued...)

**CONDITIONS** (continued):

22. When the STATUS CODE is SL the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -SL  
SUBSCRIBER REQUEST LATER DATE 860 REQUIRED
23. When the STATUS CODE is SO the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -SO  
SUBSCRIBER OTHER 860 REQUIRED
24. When the STATUS CODE is SR the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -SR  
SUBSCRIBER NOT READY 860 REQUIRED

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 100

**Field Example:**

1J SPECIAL CONSTRUCTION

### 93. STYC - Style Code (Directory Section)

Identifies whether the listing provided is a straight line, Straight Line Under (SLU) header, caption header, etc..

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
CI	Caption Indent
SH	SLU Header
SI	SLU Indent
SL	Straight Line

**NOTE:**

When the STYC field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The STYC will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the STYC field from the directory listings screen and populate it in the STYC field on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

SL

## 94. SYSTEM ID - System Identification (Service Group Section)

Identifies the customer's system to be used in a collocation arrangement.

**Usage:** This field is required.

**NOTE:**

When the SYSTEM ID field on the LS or PS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the SYSTEM ID field will be associated with every detail record with a different LNUM in the LS and PS screen. The system will obtain this information from the SYSTEM ID field from the LS and PS screen and populate it in the SYSTEM ID field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

CA101

## 95. TER - Terminal Number (Service Group Section)

Identifies the number for a non-lead line in a multi-line hunt group or consecutive range of terminal numbers associated with the TNS field for this request.

**Usage:** This field is required.

**NOTES:**

1. When the TER field on the LS screen is not populated or blank and is required on response, this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.

**CONDITION:**

When returned, the TER field will be associated with every detail record with a different LNUM in the LS screen. The system will obtain this information from the TER field from the LS screen and populate it in the TER field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 10

**Field Example:**

05718-1000

## 96. TERS - Terminal Numbers (Service Group Section)

Identifies the number of a non-lead line in a multi-line hunt group or consecutive range of terminal numbers.

**Usage:** This field is required.

**NOTE:**

When the TER field on the PS or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TERS field will be associated with every detail record with a different LNUM in the Port and Resale screen. The system will obtain this information from the TERS field from the Port and Resale screen and populate it in the TERS field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 10

**Field Example:**

T0001

## 97. TEST PROD INDICATOR - Test Production Indicator

Identifies whether the transaction is production or test.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
P	Production
T	Test

**CONDITION:**

When returned, the system auto populates information in this field.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

T

## 98. TGLNUM - Trunk Group Location Number

Identifies the trunk group line number.

**Usage:** This field is required.

**NOTE:**

When the TGLNUM field on the DTU, ISR or ISU screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TGLNUM field will be associated with every detail record with a different LNUM in the DTU, ISR or ISU screen. The system will obtain this information from the TGLNUM field from the DTU, ISR or ISU screen and populate it in the TGLNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 2

**Field Example:**

03

## 99. TLI - Telephone Line Identifier

Indicates the pilot number of a multi-line hunt group.

**Usage:** This field is required.

**NOTE:**

When the TLI field on the LSR is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TLI will be associated with every detail record with a different HNUM in the Hunt Group record. The system will obtain the TLI information on the HGI screen and populate it in the TLI field of the Hunt Group record on the initial request or a supplement to a request.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

4045551122

## 100. TNNUM - Telephone Number Line Number

Identifies the PRI reference telephone line number.

**Usage:** This field is required.

**NOTE:**

When the TNNUM field on the ISU or ISR screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TNNUM field will be associated with every detail record with a different LNUM in the ISU or ISR screen. The system will obtain this information from the TNNUM field from the ISU or ISR screen and populate it in the TNNUM field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 3

**Field Example:**

109

## 101. TNS - Telephone Numbers (Service Group Section)

Identifies the telephone number (TN) / terminal number (TER) / ISDN BRI directory number or sequential range of TNs / TERs for this request.

**Usage:** This field is required.

**NOTE:**

When the TNS field on the PS or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TNS will be associated with every detail record with a different LNUM in the Port and Resale screen. The system will obtain this information from the TNS field from the Port and Resale screen and populate it in the TNS field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2016990001

## 102. TOA - Type of Account (Directory Service)

Identifies the type of account for this listing.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
<b>B</b>	Business Firm Name
<b>BP</b>	Business Class, Person Name
<b>R</b>	Residence
<b>RP</b>	Residence Class, Business Firm Name

**NOTE:**

When the TOA field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TOA will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the TOA field from the directory listings screen and populate it in the TOA field in the directory listings section on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 1 - 2

**Field Example:**

BP

## 103. TRANS ACK TYPE - Transaction Activity Type

Identifies transaction activity.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
AC
AH
AT
NA
RD

### NOTE:

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

### CONDITIONS:

1. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AH, the return type is Clarification (860 required)
2. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AT, the return type is Accepted FOC.
3. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is RD, the return type is Reject (850 required)
4. When TRANS-SET-PURPOSE-CODE is 08 and the TRANS-ACK-TYPE is NA, the return type is Status or POS (Pending Order Status) No action required.
5. When TRANS-SET-PURPOSE-CODE is 21 and the TRANS-ACK-TYPE is AC, the return type is Jeopardy (New Due Desired Date Required)
6. When TRANS-SET-PURPOSE-CODE is 53 and the TRANS-ACK-TYPE is AT, the return type is Billing Completion.
7. When TRANS-SET-PURPOSE-CODE is CN and the TRANS-ACK-TYPE is AT, the return type is Completion.
8. When TRANS-SET-PURPOSE-CODE is CA and the TRANS-ACK-TYPE is AT, the return type is AT&T Cancel.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

AC

## 104. TRANS SET PURPOSE CODE - Transaction Set Purpose Code

Identifies the transaction set purpose code.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
06
08
21
53
CN
CA

### NOTE:

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

### CONDITIONS:

1. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AH, the return type is Clarification (860 required)
2. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AT, the return type is Accepted FOC.
3. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is RD, the return type is Reject (850 required)
4. When TRANS-SET-PURPOSE-CODE is 08 and the TRANS-ACK-TYPE is NA, the return type is Status or POS (Pending Order Status) No action required.
5. When TRANS-SET-PURPOSE-CODE is 21 and the TRANS-ACK-TYPE is AC, the return type is Jeopardy (New Due Desired Date Required)
6. When TRANS-SET-PURPOSE-CODE is 53 and the TRANS-ACK-TYPE is AT, the return type is Billing Completion.
7. When TRANS-SET-PURPOSE-CODE is CN and the TRANS-ACK-TYPE is AT, the return type is Completion.
8. When TRANS-SET-PURPOSE-CODE is CA and the TRANS-ACK-TYPE is AT, the return type is AT&T Cancel.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

06

## 105. VER - Version Identification

Identifies the customer's version number.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
00 - 99
Blank or Space

**NOTE:**

When the VER field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the VER field on the LSR screen and populated in the VER field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

01

## 106. WPP - White Pages Products (Directory Service)

Identifies information about the white page products, signature listings, personality logo and lines of distinction.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
<b>DB</b>	Designer Bold
<b>DBP</b>	Designer Bold Plus
<b>DS</b>	Designer Script
<b>DSP</b>	Designer Script Plus

**NOTE:**

When the TOA field on the DL screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

When returned, the TOA will be associated with every detail record with a different DLNUM in the directory listings screen. The system will obtain this information from the TOA field from the directory listings screen and populate it in the TOA field in the directory listings section on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 1 - 3

**Field Example:**

DB

## 5.6 Line Loss Notification (LLN)

### *Line Loss Notification (LLN) Fields*

<b>Field Abbreviation</b>	<b>Field #</b>	<b>Field Name</b>
CC	1	Company Code
CVD	2	Conversion Date
ECCKT	3	Exchange Company Circuit ID (Services Section)
NT	4	Notification Type
NTA	5	Notification Type Activity
TEST PROD INDICATOR	6	Test Production Indicator
WTN	7	Working Telephone Number

## 1. CC - Company Code

Identifies the exchange carrier initiating the transaction.

**Usage:** This field is required.

**NOTE:**

When the CC field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the CC field on the LSR screen and populated in the CC field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

1234

## 2. CVD - Conversion Date

Identifies the date the end user converted to the new LSP or the request date associated to the NTA field.

**Usage:** This field is optional.

**Valid Entries:**

Valid Format:	
CCYYMMDD	
CC	Two Digit Century (00-99)
YY	Two Digit Year (00-99)
MM	Two Digit Month (01-12)
DD	Two Digit Day (01-31)

**NOTE:**

This field is returned in the following format: CCYYMMDD.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 8 - 8

**Field Example:**

20030302

### 3. ECCKT - Exchange Company Circuit ID (Services Section)

Identifies a provider's circuit identification.

**Usage:** This field is optional.

**NOTES:**

1. When the ECCKT field is not populated on the Service order for (ACT=N, D, or MI=C or D) and the ECCKT field is not populated or blank on the LS screen, and is required on response, this field will be returned with blanks.
2. Period (.) is the only special character that may be returned.

**CONDITIONS:**

1. Excluding Line Share and Line Splitting, when ECCKT is returned for REQ TYP A, and the ACT Type is not N or D and the MI is not C or D, the system will obtain the information from the LS screen and return the information in the ECCKT field on the response.
2. Excluding Line Share and Line Splitting, when ECCKT is returned, the system will obtain this information from the service order for REQ TYP A, only when the ACT Type is N or D or the MI is C or D and populate the information in the ECCKT field on the response.
3. When both a telephone number and circuit id number is applicable to the line loss notification, the telephone number will be returned in this field and the circuit id will be returned in the ECCKT field.
4. When ECCKT is returned on REQ TYP B, the system will obtain the information from the service order and populate the ECCKT information in the ECCKT field on the response.
5. When the ECCKT is returned and the product is Line Share or Line Splitting, the system will obtain the ECCKT from the AT&T Southeast service order and populate the information in the ECCKT field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 41

**Field Example:**

101.T1.NYCMNY50.NYCMNY54W01

## 4. NT - Notification Type

Identifies the type of notification being sent to the customer.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
A	Loss Notification

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

A

## 5. NTA - Notification Type Activity

Identifies the type of activity associated with the Notification Type (NT) field

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
<b>A</b>	Disconnected
<b>F</b>	Wireless Provider
<b>G</b>	Abandoned Station
<b>H</b>	Conversion /Switch to new LSP
<b>S</b>	Switched in error
<b>X</b>	No line Losses on a reporting day

**NOTE:**

AT&T Southeast systems will generate a positive record notification X in this field, when no line losses occur on a specific day by Company Code (CC).

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

A

## 6. TEST PROD INDICATOR - Test Production Indicator

Identifies whether the transaction is production or test.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
P	Production
T	Test

**NOTE:**

When returned, the system auto populates information in this field.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

T

## 7. WTN - Working Telephone Number

Identifies the customer's working telephone number at the customer's location.

**Usage:** This field is optional.

**NOTE:**

When a line loss notification is for SL1 or SL2 (Analog non-designed/ designed loop) this field will be returned with either a miscellaneous account number or a billing account number.

**CONDITION:**

When both a telephone number and circuit id number is applicable to the line loss notification, the telephone number will be returned in this field and the circuit id will be returned in the ECCKT field.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2016990001

## 5.7 Pending Order Status (POS)

### *Pending Order Status (POS) Fields*

Field Abbreviation	Field #	Field Name
AAN	1	Associated Account Number
ATN	2	Account Telephone Number
BAN1	3	Billing Account Number 1
BAN2	4	Billing Account Number 2
BI1	5	Billing Account Number Identifier 1
BI2	6	Billing Account Number Identifier 2
BOPI	7	Bulk Order Package Identifier
CC	8	Company Code
CCNA	9	Customer Carrier Name Abbreviation
CHC	10	Coordinated Hot Cut
D/TSENT	11	Date and Time Sent
DD/CD	12	Due Date/Completion Date
DLORD	13	Directory Listing Order Number
EAN	14	Existing Account Number
EATN	15	Existing Account Telephone Number
EBD	16	Effective Bill Date
FDT	17	Frame Due Time
FOC/CN REMARKS	18	FOC/CN Remarks
IBT	19	ISDN BRI Type
INIT	20	Initiator Identification
INIT TEL NO	21	Initiator Telephone Number
IWBAN	22	Inside Wiring Bill Account Number
L-ORD	23	Loop Order Number (Service Group Section)
LSR NO	24	Local Service Request Number
NAN	25	New Account Number
NATN	26	New Account Telephone Number
NOR	27	Number of Requests
ORD	28	Order Number
OTN	29	Old Telephone Number (Service Group Section)
PID	30	Personal Identifier (Service Group Section)
PON	31	Purchase Order Number
REP	32	Provider Contact Representative
REP TEL NO	33	Representative Telephone Number
SAT	34	Subscriber Access Telephone Number (Service Group Section)
STATUS CODE	35	Status Code
STATUS MSG	36	Status Message
TEST PROD INDICATOR	37	Test Production Indicator
TRANS ACK TYPE	38	Transaction Activity Type
TRANS SET PURPOSE CODE	39	Transaction Set Purpose Code
VER	40	Version Identification

## 1. AAN - Associated Account Number

Identifies related accounts for the same end user at the same or different address(s).

**Usage:** This field is required.

**NOTES:**

1. When the AAN field on the LSR is not populated or blank, this field will be returned with all blanks.
2. This field identifies the CRIS Miscellaneous Account Number provided by the CLEC.

**CONDITION:**

When returned, the response information is obtained from the AAN field on the LSR screen and populated in the AAN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 13 - 13

**Field Example:**

4004M205555333

## 2. ATN - Account Telephone Number

Identifies the account telephone number assigned by the NSP.

**Usage:** This field is required.

**NOTE:**

When the ATN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the ATN field on the LSR screen and populated in the ATN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

2015551212

### 3. BAN1 - Billing Account Number 1

Identifies the billing account to which the recurring and non-recurring charges for this request will be billed.

**Usage:** This field is required.

**NOTES:**

1. When returned, the BAN1 is returned in the following format:  
NPANXX1234123. *Example: 404X254321321*
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the BAN1 field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 13 - 13

**Field Example:**

201Q814587123

## 4. BAN2 - Billing Account Number 2

Identifies the billing account to which the recurring and non-recurring charges for this request will be billed.

**Usage:** This field is required.

**NOTES:**

1. When returned, the BAN2 is returned in the following format:  
NPANXX1234123. *Example: 404X254321321*
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the BAN2 field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 13 - 13

**Field Example:**

201Q814588456

## 5. BI1 - Billing Account Number Identifier 1

Identifies the service type of the billing account number populated in the BAN1 field.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
D	Directory Listings
L	Loop
M	Port Switched Combination
N	Number Portability
P	Port
R	Resale

**NOTE:**

When the BI1 field on the LSR is not populated or blank, this field will be returned with blank.

**CONDITION:**

When returned, the response information is obtained from the BI1 field on the LSR screen and populated in the BI1 field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

L

## 6. BI2 - Billing Account Number Identifier 2

Identifies the service type of the billing account number populated in the BAN2 field.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
D	Directory Listings
L	Loop
M	Port Switched Combination
N	Number Portability
P	Port
R	Resale

**NOTE:**

When the BI2 field on the LSR is not populated or blank, this field will be returned with blank.

**CONDITION:**

When returned, the response information is obtained from the BI2 field on the LSR screen and populated in the BI2 field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

L

## 7. BOPI - Bulk Order Package Identifier

Identifies the customer's unique BULK package ID that authorizes the issuance of this BULK request or supplement.

**Usage:** This field is required.

**NOTE:**

When the BOPI field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITIONS:**

1. This field is only applicable to UNE to UNE Bulk.
2. When returned, the response information is obtained from the BOPI field on the Global LSR screen and populated in the BOPI field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 12

**Field Example:**

000000000Z0

## 8. CC - Company Code

Identifies the exchange carrier initiating the transaction.

**Usage:** This field is required.

**NOTE:**

When the CC field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the CC field on the LSR screen and populated in the CC field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

1234

## 9. CCNA - Customer Carrier Name Abbreviation

Identifies the COMMON LANGUAGE IAC code for the customer.

**Usage:** This field is required.

**NOTE:**

When the CCNA field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the CCNA field on the LSR screen and populated in the CCNA field on the response.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 3 - 3

**Field Example:**

ZYX

## 10. CHC - Coordinated Hot Cut

Identifies that the customer is requesting near seamless cutover activity.

**Usage:** This field is required.

**NOTE:**

When the CHC field on the LSR is not populated or blank, this field will be returned blank.

**CONDITION:**

When returned, the response information is obtained from the CHC field on the LSR screen and populated in the CHC field on the response.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

Y

## 11. D/TSENT - Date and Time Sent

Identifies the date and time that the transaction is sent.

**Usage:** This field is required.

**Valid Entries:**

Valid Format:	
<b>CCYYMMDDHHMAA</b>	
<b>CC</b>	Two Digit Century (00-99)
<b>YY</b>	Two Digit Year (00-99)
<b>MM</b>	Two Digit Month (01-12)
<b>DD</b>	Two Digit Day (01-31)
<b>HH</b>	Two Digit Hour (01-12)
<b>MM</b>	Two Digit Minute (00-59)
<b>AA</b>	AM or PM

**NOTE:**

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITION:**

When returned, the system will record this information from the date and time stamp that indicates the date the response was submitted to the system interfacing the CLEC. The system shall populate this date in the D/TSENT field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 14 - 14

**Field Example:**

201103020125PM

## 12. DD/CD - Due Date/Completion Date

Identifies the date the service order requested is due and completed.

**Usage:** This field is required.

**NOTES:**

1. Hyphen (-) is the only special character that may be returned.
2. When the DD or CD is not populated on the AT&T Southeast service order this field will be returned with blanks.
3. For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITIONS:**

1. When returned, the DD/CD is returned in the following formats: CCYY-MM-DD or CCYYMMDD *Example: 7/10/2004 or 20040710*.
2. When returned, the response information is obtained from the AT&T SE service order and populated in the DD/CD field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 10

**Field Example:**

11-10-2008

### 13. DLORD - Directory Listing Order Number

Identifies the Directory Listing Service Order number.

**Usage:** This field is required.

**NOTE:**

This field will be returned with all blanks when a directory listing order is not issued.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 20

**Field Example:**

A123B456C

## 14. EAN - Existing Account Number

Identifies the end user's existing account number.

**Usage:** This field is required.

**Valid Entries:**

Valid Formats:
10 Numeric characters
13 Alpha/Numeric characters

**NOTE:**

When the EAN field on the EU is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the EAN field on the EU screen and populated in the EAN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 13 - 13

**Field Example:**

404M231234123

## 15. EATN - Existing Account Telephone Number

Identifies the end user's existing account telephone number.

**Usage:** This field is required.

**NOTE:**

When the EATN field on the EU is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the EATN field on the EU screen and populated in the EATN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

3142359888

## 16. EBD - Effective Bill Date

Identifies the effective date to begin or cease billing when the billing date is different from the desired due date.

**Usage:** This field is required.

**NOTE:**

When EBD is not populated on the AT&T Southeast service order this field will be returned with blanks.

**CONDITIONS:**

1. When returned, EBD is returned in the following format:  
CCYYMMDD *Example: 20040710*
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the EBD field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 8 - 8

**Field Example:**

20081115

## 17. FDT - Frame Due Time

Identifies the frame cutover time.

**Usage:** This field is required.

### NOTES:

1. When the FDT is not populated on the AT&T Southeast service order this field will be returned with blanks.
2. Hyphen (-) is the only special character that may be returned.
3. When this field is returned as a range, the 5th position of the field will be a hyphen (-). *Example: 1800-1900*

### CONDITIONS:

1. (Excluding REQ TYP B (LNP)) When returned the response information is obtained from the AT&T Southeast service order and populated in the FDT field on the response.
2. For REQ TYP B (LNP), when returned the response information for this field is obtained from the DFDT field on the LSR and populated in the FDT field on the response.
3. When returned, the FDT is returned in military time.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 9

**Field Example:**

1300-1700

## 18. FOC/CN REMARKS - FOC/CN Remarks

Identifies a free flowing field which can be used to expand upon and clarify other data.

**Usage:** This field is required.

### NOTE:

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/ Tech Pubs / XML Support Website / Documentation*.

### CONDITIONS:

1. On LSR's, when the system determines that a dispatch is required it will populate 'DISPATCH IS REQUIRED' in the FOC/CN REMARKS field following any other FOC/CN-Remarks on the response. If there is not sufficient space for the message the system will drop the number of characters needed at the end of the other Remarks to populate the 20 characters, DISPATCH IS REQUIRED.
2. The 'ADSL Informational' message will be populated in the FOC/CN Remarks on the FOC according to the following guidelines: 'Dispatch Required' will remain the last entry in FOC/CN-Remarks if applicable. 'Facility Check' messages, if applicable, will remain immediately in front of 'Dispatch Required' or last if 'Dispatch Required' is not applicable. 'ADSL Informational' message, when applicable, will appear immediately in front of both 'Facility Check' and 'Dispatch Required' messages or immediately in front of 'Facility Check' or 'Dispatch Required' message if only one is required. If neither 'Facility Check' nor 'Dispatch Required' message is applicable, 'ADSL Informational' message will be last entry in FOC/CN Remarks. Any remarks on incoming LSR that will be moved to the FOC will be shortened by number of characters required to place any or all of the three messages listed above that apply.
3. The Facility check messages will be populated in the Remarks on the FOC according to the following guidelines:
  - a. If there are no remarks applicable for the FOC/CN-Remarks section of the FOC (that originated from the Remarks on the LSR), the system will place one of the applicable facility checked messages, "Facilities have been checked" or "Facilities have been checked and a PF condition exists" in the FOC/CN REMARKS field on the response.
  - b. If the only remarks applicable for the FOC/CN-Remarks Section of the FOC is, "Dispatch is Required", the system will place one of the applicable facility checked messages "Facilities have been checked" or "Facilities have been checked and a PF condition exists" before the "Dispatch is Required" message.
  - c. If there are remarks applicable for the FOC/CN-Remarks section of the FOC (Remarks from LSR), but no "Dispatch is Required" message present, the system will place one of the applicable facility checked messages "Facilities have been checked" or "Facilities have been checked and a PF condition exists" at the beginning of the Remarks. If adding the facility checked message causes the Remarks section to exceed the number of characters allowed, the system will drop the number of characters needed at the end of the other Remarks.

---

**18. FOC/CN REMARKS - FOC/CN Remarks (continued...)****CONDITIONS (continued):**

4. The system will search to obtain this information from the REMARKS field from the LSR screen and populate in it the FOC/CN-REMARKS field on the response.
5. When an LSR is submitted for Non-Complex REQ TYP M, MI= A, B, C, or D, and LNA = C, D, G, N, P, T, V, W, or X where a service order is generated with Outward ('O') action coded FID OADSL in the UNFIELDDED IDENT Section of the AT&T Southeast service order, the system will return the following informational message in the FOC/CN-REMARKS field on the response: CLEC SHOULD HAVE THE END USER CONTACT THEIR NSP/ISP FOR CHANGES TO THEIR ADSL SERVICE. ADL++ IS NOT VALID WITH UNE PORT SERVICE.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 350

**Field Example:**

CLEC SHOULD HAVE THE END USER CONTACT THEIR NSP/ISP FOR CHANGES TO THEIR ADSL SERVICE. ADL++ IS NOT VALID WITH UNE PORT SERVICE

## 19. IBT - ISDN BRI Type

Identifies the type of National ISDN-BRI.

**Usage:** This field is required.

**NOTE:**

When the IBT field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the IBT field on the EU screen and populated in the IBT field on the response.

**Data Characteristics:** numeric character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

2

## 20. INIT - Initiator Identification

Identifies the LSP's representative who originated this transaction.

**Usage:** This field is required.

**CONDITION:**

When returned, the response information is obtained from the INIT field on the LSR screen and populated in the INIT LSR field on the response.

**Data Characteristics:** alpha / special characters

**Field Length (Min-Max):** 1 - 15

**Field Example:**

JOHN SMITH

## 21. INIT TEL NO - Initiator Telephone Number

Identifies the telephone number of the initiator.

**Usage:** This field is required.

**Valid Entries:**

Valid Formats:
10 Numeric characters
15 Alpha/Numeric characters

**CONDITION:**

When returned, the response information is obtained from the INIT-TEL NO field on the LSR screen and populated in the INIT-TEL NO LSR field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 10 - 10 or 15 - 15

**Field Example:**

2019813500

## 22. IWBAN - Inside Wiring Bill Account Number

Identifies the billing account number for charges associated with inside wire.

**Usage:** This field is required.

**CONDITION:**

When returned, the response information is obtained from the IWBAN field on the EU screen and populated in the IWBAN field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 13

**Field Example:**

201Q814587123

## 23. L-ORD - Loop Order Number (Service Group Section)

Identifies the provider's order number for the loop.

**Usage:** This field is required.

**NOTE:**

When this firm order type is not for REQTYP A, this field will be returned with blanks.

**CONDITIONS:**

1. This field is only applicable on REQTYP A request(s).
2. When returned, the response information is obtained from the AT&T Southeast service order and populated in the L-ORD field.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 8

**Field Example:**

C1234567

## 24. LSR NO - Local Service Request Number

Identifies the number that may be generated by the provider's mechanized systems, pre-assigned to the customer by the provider or manually assigned by the provider to identify a customer's request for service.

**Usage:** This field is required.

**Valid Entries:**

Valid Format:
NNNNNNNNNANNNNN-NN
A = Alpha
N = Numeric

**NOTE:**

Hyphen (-) is the only special character that may be returned.

**CONDITION:**

When returned, the response information is obtained from the LSR NO field on the LSR screen and populated in the LSR NO field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 18

**Field Example:**

20030302L00074-00

## 25. NAN - New Account Number

Identifies the new account number.

**Usage:** This field is required.

**NOTE:**

When the NAN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the NAN field on the LSR screen and populated in the NAN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 10

**Field Example:**

2015551234

## 26. NATN - New Account Telephone Number

Identifies the new account telephone number.

**Usage:** This field is required.

**NOTES:**

1. Hyphen (-) is the only special character that may be returned.
2. When the NATN field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the NATN field on the LSR screen and populated in the NATN field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 1 - 10

**Field Example:**

2055551234

## 27. NOR - Number of Requests

Identifies the local service request and the total quantity of local service requests within a related group of orders being submitted.

**Usage:** This field is conditional.

**NOTES:**

1. The value returned in this field will be identical to the value submitted on the initial or supplemental LSR.
2. Hyphen (-) is the only special character that may be returned.

**CONDITION:**

This field will only be returned when the REQ TYP is B and the product is Bulk Single LSR arrangement.

**Data Characteristics:** numeric / special characters

**Field Length (Min-Max):** 5 - 5

**Field Example:**

01-99

## 28. ORD - Order Number

Identifies the provider's order number for the service provided.

**Usage:** This field is required.

**NOTE:**

When an AT&T Southeast Service order has not been generated this field will be returned blank.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order and populated in the ORD field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 8 - 8

**Field Example:**

C1234567

## 29. OTN - Old Telephone Number (Service Group Section)

Identifies the existing telephone number that is being changed.

**Usage:** This field is required.

**NOTE:**

When the OTN field on the PS or RS screen is not populated or blank and is required on response, this field will be returned with blanks.

**CONDITION:**

The OTN will be associated with every detail record with a different LNUM in the Port and Resale Services screen. The system will obtain this information from the OTN field from the Port and Resale Services screen and populate it in the OTN on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

20169900001

### 30. PID - Personal Identifier (Service Group Section)

Identifies the end user's personal identification number.

**Usage:** This field is required.

**NOTES:**

1. When this information is not populated on the AT&T Southeast service order and this field is required on response, the field will be returned with blanks.
2. This field identifies the authorized number to be utilized with the telephone number provided in the SAT field.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order and returned in the PID field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

4412

## 31. PON - Purchase Order Number

Identifies the customer's unique purchase order or requisition number that authorizes the issuance of this request or supplement.

**Usage:** This field is required.

**NOTE:**

Apostrophe ('), Blank ( ), Comma (,) Hyphen (-), Period (.) and Space ( ) are the only special characters that may be returned.

**CONDITION:**

When returned, the response information is obtained from the PON field on the LSR screen and populated in the PON field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 16

**Field Example:**

824Z9

## 32. REP - Provider Contact Representative

Identifies the provider's representative handling this service request.

**Usage:** This field is required.

**Valid Entries:**

<b>Valid Value:</b>
---------------------

LCSC
------

<b>CONDITION:</b>
-------------------

When returned, the response information is returned as LCSC and populated in the REP field on the response.
---

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 1 - 15

**Field Example:**

LCSC

### 33. REP TEL NO - Representative Telephone Number

Identifies the telephone number of the provider's representative handling this request.

**Usage:** This field is required.

**CONDITION:**

When returned, this information is obtained from the CLEC profile and returned in the REPTTEL NO field.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

4045551234

### 34. SAT - Subscriber Access Telephone Number (Service Group Section)

Identifies the telephone number, which allows remote access to make feature configuration changes.

**Usage:** This field is required.

**NOTE:**

When this information is not populated on the service order and this field is required on response, the field will be returned with blanks.

**CONDITION:**

When returned, the response information is obtained from the AT&T Southeast service order and returned in the SAT field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 10 - 10

**Field Example:**

4045551234

## 35. STATUS CODE - Status Code

Indicates the status code of the order.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
AO
CA
CB
CD
CF
CI
CK
CL
CM
CP
CS
CY
PD
PF
SA
SL
SO
SR

### CONDITIONS:

1. When returned the system will obtain the status from the AT&T Southeast service order and will place it in the status code field on the response of a FOC, CN, POS, BCN, Jeopardy, or Clarification.
2. ReqTyp C orders are Conditional and may not have the STATUS CODE and STATUS MESSAGE fields returned in those instances where it is not a Complex port.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

AO

## 36. STATUS MSG - Status Message

Indicates the status message associated with the status code.

**Usage:** This field is required.

### NOTE:

Due to the Reqtyp C Porting process, a Status Code will not exist until after the CLEC activates the telephone number.

### CONDITIONS:

1. When multiple Jeopardy messages are returned the system will format them as follows:  

The 2 character code indicating the type of message, followed by a space and the message, followed by a space and another type and another message up to the 100 A/N character limit.

Example: 1Q ASSIGNMENT PROBLEM 2C BUSY CABLE AND/OR PAIR 2D LOOP IS TOO LONG 2G ADDRESS IS INVALID 2H BASIC
2. When the LSR is in an RPON group and one of the PONs is placed in Jeopardy status, the following Jeopardy message will be sent: PON XXXXXXXX IS IN JEOPARDY STATUS, ALL RELATED PONs IN RPON GROUP RETURNED
3. When the STATUS CODE is AO the following response is populated in the STATUS-MSG field: ASSIGNABLE ORDER
4. When the STATUS CODE is AO, PD, CP, or PF and the AT&T Southeast Service order Status has an error prefix of E, F, or O and the system has determined that the order is in jeopardy, one or more of the following jeopardy responses may be returned on the JN.
  - 1A INTEROFFICE FACILITY SHORTAGE
  - 1B SCHEDULING/WORK LOAD
  - 1C CUSTOMER (LSP) NOT READY
  - 1D NO LOOP AVAILABLE
  - 1E END USER NOT READY
  - 1F NSP MISSED APPOINTMENT
  - 1G NO ACCESS TO END USER
  - 1H CENTRAL OFFICE FREEZE
  - 1J SPECIAL CONSTRUCTION
  - 1K NATURAL DISASTER
  - 1L FRAME DUE TIME CANNOT BE MET
  - 1M REQUESTED DD IS LESS THAN PUBLISHED INTERVAL
  - 1N DD AND FRAME DUE TIME CANNOT BE MET
  - 1P OTHER
  - 1Q ASSIGNMENT PROBLEM
  - 1R CUSTOMER COULD NOT BE REACHED AT REACH NUMBER
  - 1S BUILDING NOT READY, CUSTOMER WILL ADVISE
  - 1T POLE AT TRAILER SITE NOT SET

**36. STATUS MSG - Status Message (continued...)****CONDITIONS (continued):**

- 1W ENTRANCE FACILITIES REQUIRED
  - 1X NOT TECHNICALLY FEASIBLE
  - 1Y NO CENTRAL OFFICE EQUIPMENT AVAILABLE
  - 1Z LOOP REQUIRES INSTALLATION OF ADDITIONAL EQUIPMENT
  - 2A LSR ERROR INCORRECT OR MISSING INFORMATION
  - 2B FACILITY WORK ORDER PENDING NO BONA FIDE REQUEST (BFR) REQUIRED
  - 2C BUSY CABLE ID
  - 2E LOOP IS TOO LONG
  - 2F INVALID OR WORKING SPLITTER
  - 2G ADDRESS IS INVALID
  - 2H BASIC ADDRESS IS VALID BUT LOC IS NEEDED
  - 4Q TN(S) NOT ACTIVATED - SEND A SUPP OR ACTIVATE
  - 6C TN(S) NOT ACTIVATED ON DUE DATE
- 5.** When the STATUS CODE is CA and the AT&T Southeast service order status is MA the following response is populated in the STATUS-MSG field: MISSED APPOINTMENT ORDER -CA
- COMPANY ASSIGNMENT
- When the STATUS CODE is CA and the AT&T Southeast service order status is CA the following response is populated in the STATUS-MSG field: CANCELLED ORDER
- 6.** When the STATUS CODE is CB the following response is populated in the STATUS-MSG field:
- MISSED APPOINTMENT ORDER -CB
- COMPANY BUSINESS OFC
- 7.** When the STATUS CODE is CD the following response is populated in the STATUS-MSG field:
- MISSED APPOINTMENT ORDER -CD
- COMPANY DESIGNED
- 8.** When the STATUS CODE is CF the following response is populated in the STATUS-MSG field:
- MISSED APPOINTMENT ORDER -CF
- COMPANY FACILITIES
- 9.** When the STATUS CODE is CI the following response is populated in the STATUS-MSG field:
- MISSED APPOINTMENT ORDER -CI
- COMPANY INDEPENDENT
- 10.** When the STATUS CODE is CK the following response is populated in the STATUS-MSG field:
- MISSED APPOINTMENT ORDER -CK
- COMPANY FACILITIES - ISDN BRI SERVICE

**36. STATUS MSG - Status Message (continued...)****CONDITIONS (continued):**

11. When the STATUS CODE is CL the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CL  
COMPANY LOAD
12. When the STATUS CODE is CM the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CM  
COMPANY MECHANIZATION
13. When the STATUS CODE is CO the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CO  
COMPANY OTHER
14. When the STATUS CODE is CP and the AT&T Southeast service order status is CP, CPX or PCX the following response is populated in the STATUS-MSG field:  
Completed Order
15. When the STATUS CODE is CP and the AT&T Southeast service order status is HPCX or IPCX the following response is populated in the STATUS-MSG field:  
BILLING/RECORDS COMPLETE
16. When the STATUS CODE is CS the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CS  
COMPANY SWITCHING
17. When the STATUS CODE is CX the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CX  
COMPANY EXCEPTIONAL
18. When the STATUS CODE is CY the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -CY  
CUSTOMER DESIRED DUE DATE MISSED - FOC DATE TO FOLLOW
19. When the STATUS CODE is PD and the AT&T Southeast the following response is populated in the STATUS-MSG field:  
PENDING ORDER
20. When the STATUS CODE is PF and the AT&T Southeast the following response is populated in the STATUS-MSG field:  
PENDING FACILITIES ORDER
21. When the STATUS CODE is SA the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -SA  
SUBSCRIBER ACCESS 860 REQUIRED

---

## 36. STATUS MSG - Status Message (continued...)

**CONDITIONS** (continued):

22. When the STATUS CODE is SL the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -SL  
SUBSCRIBER REQUEST LATER DATE 860 REQUIRED
23. When the STATUS CODE is SO the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -SO  
SUBSCRIBER OTHER 860 REQUIRED
24. When the STATUS CODE is SR the following response is populated in the STATUS-MSG field:  
MISSED APPOINTMENT ORDER -SR  
SUBSCRIBER NOT READY 860 REQUIRED
25. ReqTyp C orders are Conditional and may not have the STATUS CODE and STATUS MESSAGE fields returned in those instances where it is not a Complex port.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 100

**Field Example:**

1J SPECIAL CONSTRUCTION

### 37. TEST PROD INDICATOR - Test Production Indicator

Identifies whether the transaction is production or test.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
P	Production
T	Test

**CONDITION:**

When returned, the system auto populates information in this field.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

T

## 38. TRANS ACK TYPE – Transaction Activity Type

Indicates a transaction activity.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
AC
AH
AT
NA
RD

### NOTE:

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

### CONDITIONS:

1. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AH, the return type is Clarification (860 required)
2. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AT, the return type is Accepted FOC.
3. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is RD, the return type is Reject (850 required)
4. When TRANS-SET-PURPOSE-CODE is 08 and the TRANS-ACK-TYPE is NA, the return type is Status or POS (Pending Order Status)  
No action required.
5. When TRANS-SET-PURPOSE-CODE is 21 and the TRANS-ACK-TYPE is AC, the return type is Jeopardy (New Due Desired Date Required)
6. When TRANS-SET-PURPOSE-CODE is 53 and the TRANS-ACK-TYPE is AT, the return type is Billing Completion.
7. When TRANS-SET-PURPOSE-CODE is CN and the TRANS-ACK-TYPE is AT, the return type is Completion.
8. When TRANS-SET-PURPOSE-CODE is CA and the TRANS-ACK-TYPE is AT, the return type is AT&T Cancel.

**Data Characteristics:** alpha characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

AC

## 39. TRANS SET PURPOSE CODE – Transaction Set Purpose Code

Identifies the transaction set purpose code.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
06
08
21
53
CN
CA

### NOTE:

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

### CONDITIONS:

1. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AH, the return type is Clarification (860 required)
2. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is AT, the return type is Accepted FOC.
3. When TRANS-SET-PURPOSE-CODE is 06 and the TRANS-ACK-TYPE is RD, the return type is Reject (850 required)
4. When TRANS-SET-PURPOSE-CODE is 08 and the TRANS-ACK-TYPE is NA, the return type is Status or POS (Pending Order Status) No action required.
5. When TRANS-SET-PURPOSE-CODE is 21 and the TRANS-ACK-TYPE is AC, the return type is Jeopardy (New Due Desired Date Required)
6. When TRANS-SET-PURPOSE-CODE is 53 and the TRANS-ACK-TYPE is AT, the return type is Billing Completion.
7. When TRANS-SET-PURPOSE-CODE is CN and the TRANS-ACK-TYPE is AT, the return type is Completion.
8. When TRANS-SET-PURPOSE-CODE is CA and the TRANS-ACK-TYPE is AT, the return type is AT&T Cancel.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

06

## 40. VER - Version Identification

Identifies the customer's version number.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
00 - 99
Blank or Space

**NOTE:**

When the VER field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the VER field on the LSR screen and populated in the VER field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

01

## 5.8 Firm Order Acknowledgment (Firm Order ACK)

### *Firm Order Acknowledgment (Firm Order ACK) Fields*

Field Abbreviation	Field #	Field Name
CC	1	Company Code
D/TSENT	2	Date and Time Sent
DDC MSG ID	3	Due Date Calendar Message ID
DDC MSG TEXT	4	Due Date Calendar Message Text
DUE DATE	5	Due Date
OUT DUE DATE	6	Out Due Date
PON	7	Purchase Order Number
PV INDICATOR	8	Premise Visit Indicator
TEST PROD INDICATOR	9	Test Production Indicator
VER	10	Version Identification

## 1. CC - Company Code

Identifies the exchange carrier initiating the transaction.

**Usage:** This field is required.

**NOTE:**

When the CC field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the CC field on the LSR screen and populated in the CC field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 4 - 4

**Field Example:**

1234

## 2. D/TSENT - Date and Time Sent

Identifies the date and time that the transaction is sent.

**Usage:** This field is required.

**Valid Entries:**

Valid Format:	
CCYYMMDDHHMMAA	
CC	Two Digit Century (00-99)
YY	Two Digit Year (00-99)
MM	Two Digit Month (01-12)
DD	Two Digit Day (01-31)
HH	Two Digit Hour (01-12)
MM	Two Digit Minute (00-59)
AA	AM or PM

**NOTE:**

For additional information regarding XML field mapping or formats, refer to the CLEC Online website under *CLEC Handbook / Select Handbook State / OSS or Guides/Tech Pubs / XML Support Website / Documentation*.

**CONDITION:**

When returned, the system will record this information from the date and time stamp that indicates the date the response was submitted to the system interfacing the CLEC. The system shall populate this date in the D/TSENT field on the response.

**Data Characteristics:** alpha / numeric characters

**Field Length (Min-Max):** 14 - 14

**Field Example:**

201103020125PM

### 3. DDC MSG ID - Due Date Calendar Message ID

Indicates the due date calendar system message contract return code for the condition encountered as a result of processing.

**Usage:** This field is required.

**NOTES:**

All special characters are allowed.

**CONDITION:**

When returned, the response information is obtained from the DDC system and populated in the DDC MSG ID field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 14

**Field Example:**

TAGT0411ALG

#### 4. DDC MSG TEXT - Due Date Calendar Message Text

Indicates the due date calendar system message contract return text, corresponding to the DDC MSG ID, pertaining to the output.

**Usage:** This field is required.

**NOTES:**

All special characters are allowed.

**CONDITION:**

When returned, the response information is obtained from the DDC system and populated in the DDC MSG TEXT field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 264

**Field Example:**

DUE DATE WILL BE RETRUNED ON THE FOC. LSR SUBMITTED SUCCESSFULLY

## 5. DUE DATE - Due Date

Identifies the first available service due date on or after the desired due date.

**Usage:** This field is conditional.

**CONDITIONS:**

1. When returned, the DUE DATE is returned in the following format: CCYYMMDD.
2. When ACT equals T, DUE DATE and OUT DUE DATE can be returned on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 8 - 8

**Field Example:**

20040710

## 6. OUT DUE DATE - Out Due Date

Identifies the first available service termination date on or after the desired due date out.

**Usage:** This field is conditional.

**CONDITIONS:**

1. When returned, the OUT DUE DATE is returned in the following format: CCYYMMDD.
2. When ACT equals T, DUE DATE and OUT DUE DATE can be returned on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 8 - 8

**Field Example:**

20040721

## 7. PON - Purchase Order Number

Identifies the customer's unique purchase order or requisition number that authorizes the issuance of this request or supplement.

**Usage:** This field is conditional.

**NOTE:**

The only valid special characters allowed are the apostrophe ('), blank ( ), comma (,) hyphen (-), period (.) and space ( ).

**CONDITION:** When returned, the response information is obtained from the PON field on the LSR screen and populated in the PON field on the response.

**Data Characteristics:** alpha / numeric / special characters

**Field Length (Min-Max):** 1 - 16

**Field Example:**

824Z9

## 8. PV INDICATOR - Premise Visit Indicator

Indicates whether a premise visit is required.

**Usage:** This field is conditional.

**Valid Entries:**

Valid Format:	
N	No Premise visit required
Y	Premise visit required

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

Y

## 9. TEST PROD INDICATOR - Test Production Indicator

Identifies whether the transaction is production or test.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:	
P	Production
T	Test

**NOTE:**

When returned, the system auto populates information in this field.

**Data Characteristics:** alpha character

**Field Length (Min-Max):** 1 - 1

**Field Example:**

T

## 10. VER - Version Identification

Identifies the customer's version number.

**Usage:** This field is required.

**Valid Entries:**

Valid Values:
00 - 99
Blank or Space

**NOTE:**

When the VER field on the LSR is not populated or blank, this field will be returned with all blanks.

**CONDITION:**

When returned, the response information is obtained from the VER field on the LSR screen and populated in the VER field on the response.

**Data Characteristics:** numeric characters

**Field Length (Min-Max):** 2 - 2

**Field Example:**

01

## 5c. AT&T Error Codes & Messages

This section provides a table of AT&T Southeast Error Messages and their associated numbers. This information will be for those error messages that contain XXXXXX, where the XXXXXX represents variable data. Your error text variable will be replaced with the actual information. For example: T0144, "xxxxxxxxxx is not a working number; Due Date could not be calculated" may be returned as T0144, "T0144 404 555-3605 is not a working number; Due Date could not be calculated". This error was returned because the field contained a telephone number which was not valid.

**Note:** Error codes may or may not contain a prefix and or a suffix.

PREFIX	TYPE	ACTION
<b>B</b>	<b>REJ / FATAL edits</b>	Errors classified as "REJECTS" or "FATAL" will be returned to the CLECs and a new LSR should be sent with the error corrected.
<b>D</b>	<b>REJ / FATAL edits</b>	Errors classified as "REJECTS" or "FATAL" will be returned to the CLECs and a new LSR should be sent with the error corrected.
<b>E</b>	<b>REJ / FATAL edits</b>	Errors classified as "REJECTS" or "FATAL" will be returned to the CLECs and a new LSR should be sent with the error corrected.
<b>G</b>	<b>AUTO CLAR edits</b>	Errors in this category will be returned to the CLECs and a supplement will have to be sent with the corrected information.
<b>H</b>	<b>REJ / FATAL edits</b>	Errors classified as "REJECTS" or "FATAL" will be returned to the CLECs and a new LSR should be sent with the error corrected.
<b>I</b>	<b>REJ / FATAL edits</b>	Errors classified as "REJECTS" or "FATAL" will be returned to the CLECs and a new LSR should be sent with the error corrected.
<b>L</b>	<b>REJ / FATAL edits</b>	Errors classified as "REJECTS" or "FATAL" will be returned to the CLECs and a new LSR should be sent with the error corrected.
<b>M</b>	<b>AUTO CLAR edits</b>	Errors in this category will be returned to the CLECs and a supplement will have to be sent with the corrected information.
<b>P</b>	<b>REJ / FATAL edits</b>	Errors classified as "REJECTS" or "FATAL" will be returned to the CLECs and a new LSR should be sent with the error corrected.
<b>R</b>	<b>REJ / FATAL edits</b>	Errors classified as "REJECTS" or "FATAL" will be returned to the CLECs and a new LSR should be sent with the error corrected.
<b>S</b>	<b>REJ / FATAL edits</b>	Errors classified as "REJECTS" or "FATAL" will be returned to the CLECs and a new LSR should be sent with the error corrected.
<b>T</b>	<b>REJ / FATAL edits</b>	Errors classified as "REJECTS" or "FATAL" will be returned to the CLECs and a new LSR should be sent with the error corrected.
<b>U</b>	<b>REJ / FATAL edits</b>	Errors classified as "REJECTS" or "FATAL" will be returned to the CLECs and a new LSR should be sent with the error corrected.

ERROR CODE	ERROR MESSAGE
0	TRANSACTION COMPLETED SUCCESSFULLY
3	INVALID DATA IN AGENCY AUTHORIZATION STATUS OR DATE OF AGENCY AUTHORIZATION

D4075	MAIN LISTING REQUIRED
D4080	RTY 2ND & 3RD CHARACTER OF SP PROHIBITED WHEN TOS = 2
D4081	WHEN ADI =O, RTY 2ND and 3RD CHARACTERS MUST BE AC, AL, AM, AS, CM, ML OR SP.
D4082	WHEN CR IS POPULATED IN ANY LTXTY FIELD, RTY 2ND & 3RD CHARACTERS MUST BE CR.
D4083	WHEN SP IS POPULATED IN ANY LTXTY FIELD, RTY 2ND & 3RD CHARACTERS MUST BE SP.

D4084	RTY 2ND & 3RD CHARACTERS CR PROHIBITED WHEN STYC = CI.
D4085	RTY MUST BE LML, LAL, LAC, LAM, LCM, FAC OR FAL WHEN STYC = SI OR CI
D4086	RTY MUST BE LML, LAL, LAM, LCM, OR FAL WHEN STYC = SH
D4087	RTY 2ND & 3RD CHARACTER OF AS PROHIBITED WHEN STATE = FL OR NC
D4090	DLNUM=\$DLNUM LTN=\$LTN VALID LTY REQUIRED
D4095	DLNUM=\$DLNUM LTN=\$LTN LTY AND RTY COMBINATION INVALID
D4097	DLNUM=\$DLNUM LTN=\$LTN LTY PROHIBITED WITH LACT Z
D4098	LTY MUST BE 1 WHEN STYC IS CI, SH, OR SI
D4099	LTY OF 2 OR 3 IS PROHIBITED, WHEN DL, DLB, OR DLS ARE POPULATED IN ANY LTXTY FIELD.
D4110	DLNUM=\$DLNUM LTN=\$LTN VALID STYC CI, SH, SI, OR SL REQUIRED
D4115	DLNUM=\$DLNUM LTN=\$LTN STYC PROHIBITED WITH LACT OF Z
D4116	STYC OF SI OR CI PROHIBITED WHEN WPP FIELD IS POPULATED
D4120	DLNUM=\$DLNUM LTN=\$LTN TOA B, R, RP OR BP REQUIRED.
D4125	DLNUM=\$DLNUM LTN=\$LTN TOA PROHIBITED WITH LACT OF Z
D4130	DLNUM=\$DLNUM LTN=\$LTN WPP REQUIRES TOA OF 'R
D4135	DLNUM=\$DLNUM LTN=\$LTN TOA DATA MUST BE BP
D4136	TOA OF R REQUIRED WHEN ANY LTXTY FIELD IS POPULATED WITH DL, DLB, OR DLS.
D4140	DLNUM=\$DLNUM LTN=\$LTN WPP PROHIBITED WITH LACT OF Z
D4145	DLNUM=\$DLNUM LTN=\$LTN WPP REQUIRES AN RTY FIRST CHARACTER OF 'L
D4146	LACT OF N, I OR O PROHIBITED WHEN RTY 1ST CHARACTER IS S.
D4147	RTY 2ND & 3RD CHARACTER OF CM PROHIBITED WHEN STATE IS LA.
D4149	DLNUM=\$DLNUM LTN=\$LTN INVALID COMBINATION FOR STYC OF CI, HS & RTY
D4150	DLNUM=\$DLNUM LTN=\$LTN VALID VALUES OF WPP ARE DB, DBP, DS, OR DSP
D4155	DLNUM=\$DLNUM LTN=\$LTN WPP PROHIBITED FOR STATE
D4156	WHEN RTY 2ND & 3RD CHARACTERS ARE AC, THEN AN ENTRY OF DBP & DSP ARE PROHIBITED IN THE WPP FIELD.
D4157	TOS 1ST CHARACTER MUST BE 2, WHEN WPP FIELD IS POPULATED.
D4158	WPP CANNOT BE ORDERED
D4161	DLNUM=\$DLNUM LTN=\$LTN DOI REQUIRED VALUE MUST BE 0-7
D4165	DLNUM=\$DLNUM LTN=\$LTN DOI PROHIBITED WITH LACT Z
D4170	DLNUM=\$DLNUM LTN=\$LTN DOI MUST BE 1
D4175	DLNUM=\$DLNUM LTN=\$LTN DOI MUST BE GREATER THAN ZERO
D4180	DLNUM=\$DLNUM LTN=\$LTN DOI VALUE MUST BE ZERO.
D4190	DLNUM=\$DLNUM LTN=\$LTN DOI VALUE INVALID FOR STYLE CODE
D4191	WHEN DOI IS 2 OR GREATER, STYC MUST = CI.
D4200	DLNUM=\$DLNUM LTN MUST BE 10 NUMERICS
D4205	DLNUM=\$DLNUM LTN REQUIRED
D4210	DLNUM=\$DLNUM LTN=\$LTN NSTN PROHIBITED WITH LACT Z
D4215	DLNUM=\$DLNUM LTN=\$LTN INVALID CHARACTERS FOR NSTN
D4216	NSTN PROHIBITED WITH RTY 2ND & 3RD CHARACTERS OF AS, CR, OR SP
D4217	NSTN MUST BE 3 NUMERICS, 11 OR 12 ALPHANUMERICS.
D4218	WHEN NSTN IS 3 NUMERICS, THE 2ND & 3RD NUMERICS MUST BE 11 OR 88.
D4219	NSTN OF A STYLIST NUMBER PROHIBITED IN NORTH CAROLINA OR ALABAMA
D4220	DLNUM=\$DLNUM LTN=\$LTN LNLN REQUIRED
D4221	DLNUM=\$DLNUM LTN=\$LTN THE FIRST THREE CHARACTERS OF NSTN MUST BE NUMERIC.
D4222	DLNUM=\$DLNUM LTN=\$LTN LNPL VALUE MUST BE L
D4223	DLNUM=\$DLNUM LTN=\$LTN INVALID CHARACTER FOR LNLN
D4224	DLNUM=\$DLNUM LTN=\$LTN INVALID FIRST CHARACTER FOR LNLN

D4225	DLNUM=\$DLNUM LTN=\$LTN LNLN PROHIBITED WITH LACT Z
D4226	LNLN MUST NOT BE ALL CAPITAL LETTERS WHEN TOA IS R OR BP.
D4227	DLNUM=\$DLNUM LTN=\$LTN TWO ALPHA CHARACTERS REQUIRED IN LNLN
D4228	DLNUM=\$DLNUM LTN=\$LTN ALPHA OR NUMERIC CHARACTER REQUIRED IN LNLN
D4230	DLNUM=\$DLNUM LTN=\$LTN LNFN PROHIBITED WITH LACT Z
D4231	LNFN REQUIRED WHEN TOA = R OR BP
D4232	INVALID LNFN FORMAT WHEN TOA IS R OR BP
D4233	DLNUM=\$DLNUM LTN=\$LTN INVALID CHARACTER FOR LNFN
D4240	DLNUM=\$DLNUM LTN=\$LTN LNPL PROHIBITED WITH LACT Z
D4245	DLNUM=\$DLNUM LTN=\$LTN LNPL PROHIBITED WHEN PLA IS POPULATED
D4246	DLNUM=\$DLNUM LTN=\$LTN SO = A PROHIBITED WHEN HS = N
D4250	DLNUM=\$DLNUM LTN=\$LTN PLA PROHIBITED WITH LACT Z
D4251	PLA REQUIRED WHEN LNLN CONTAINS NUMERICS
D4252	PLA REQUIRED WHEN LNFN CONTAINS NUMERICS
D4253	PLA PROHIBITED WHEN LNPL IS POPULATED
D4254	INVALID ENTRY FOR PLA
D4255	DLNUM=\$DLNUM LTN=\$LTN DES PROHIBITED WITH LACT Z
D4256	DES PROHIBITED WHEN TOS 1ST CHARACTER DOES NOT EQUAL 1, 3, OR 4.
D4265	DLNUM=\$DLNUM LTN=\$LTN TITLE OF LINEAGE INVALID
D4270	DLNUM=\$DLNUM LTN=\$LTN TL PROHIBITED WITH LACT Z
D4275	DLNUM=\$DLNUM LTN=\$LTN TITLE1 PROHIBITED WITH LACT Z
D4280	DLNUM=\$DLNUM LTN=\$LTN TITLE1 DATA INVALID
D4285	DLNUM=\$DLNUM LTN=\$LTN TITLE2 PROHIBITED WITH LACT Z
D4290	DLNUM=\$DLNUM LTN=\$LTN TITLE 2 DATA INVALID
D4291	TITLE1 REQUIRED WHEN TITLE2 IS POPULATED
D4295	DLNUM=\$DLNUM LTN=\$LTN NICK PROHIBITED WITH LACT Z
D4296	DLNUM=\$DLNUM LTN=\$LTN INVALID NICK DATA
D4300	DLNUM=\$DLNUM LTN=\$LTN LAPR PROHIBITED WITHOUT LANO
D4305	DLNUM=\$DLNUM LTN=\$LTN LAPR PROHIBITED WITH LACT Z
D4306	LAPR PROHIBITED WHEN ADI IS POPULATED.
D4307	LAPR PROHIBITED WHEN RTY 2ND & 3RD CHARACTER IS CR.
D4310	DLNUM=\$DLNUM LTN=\$LTN LANO PROHIBITED WITHOUT LASN
D4315	DLNUM=\$DLNUM LTN=\$LTN LANO PROHIBITED WITH LACT Z
D4316	LANO PROHIBITED WHEN ADI IS POPULATED.
D4317	LANO PROHIBITED WHEN RTY 2ND & 3RD CHARACTER IS CR.
D4320	DLNUM=\$DLNUM LTN=\$LTN LASF PROHIBITED WITHOUT LANO
D4325	DLNUM=\$DLNUM LTN=\$LTN LASF PROHIBITED WITH LACT Z
D4326	LASF PROHIBITED WHEN ADI IS POPULATED
D4327	LASF PROHIBITED WHEN RTY 2ND & 3RD CHARACTER IS CR.
D4330	DLNUM=\$DLNUM LTN=\$LTN LASD PROHIBITED WITH LACT Z
D4335	DLNUM=\$DLNUM LTN=\$LTN LASD ENTRY INVALID
D4340	DLNUM=\$DLNUM LTN=\$LTN LASD PROHIBITED WITHOUT LASN
D4341	LASD PROHIBITED WHEN ADI IS POPULATED
D4342	LASD PROHIBITED WHEN RTY 2ND AND 3RD CHARACTER IS CR
D4343	DLNUM=\$DLNUM LTN=\$LTN INVALID CHARACTER FOR LASN
D4344	DLNUM=\$DLNUM LTN=\$LTN SPACE REQUIRED BEFORE AND AFTER AMPERSAND IN LASN
D4345	DLNUM=\$DLNUM LTN=\$LTN LASN PROHIBITED WITH LACT Z
D4346	LASN PROHIBITED WHEN ADI IS POPULATED
D4347	LASN PROHIBITED WHEN RTY 2ND & 3RD CHARACTER IS CR

D4348	DLNUM=\$DLNUM LTN=\$LTN INVALID CHARACTER BEFORE OR AFTER HYPHEN IN LASN
D4349	DLNUM=\$DLNUM LTN=\$LTN INVALID CHARACTER BEFORE OR AFTER APOSTROPHE IN LASN
D4350	DLNUM=\$DLNUM LTN=\$LTN LATH PROHIBITED WITH LACT Z
D4355	DLNUM=\$DLNUM LTN=\$LTN LATH PROHIBITED WITHOUT LASN
D4356	LATH PROHIBITED WHEN ADI IS POPULATED
D4357	LATH PROHIBITED WHEN RTY 2ND AND 3RD CHARACTER IS CR.
D4360	DLNUM=\$DLNUM LTN=\$LTN LASS PROHIBITED WITH LACT Z
D4365	DLNUM=\$DLNUM LTN=\$LTN LASS ENTRY INVALID
D4370	DLNUM=\$DLNUM LTN=\$LTN LASS PROHIBITED WITHOUT LASN
D4371	LASS PROHIBITED WHEN ADI IS POPULATED
D4372	LASS PROHIBITED WHEN RTY 2ND AND 3RD CHARACTER IS CR
D4374	DLNUM=\$DLNUM LTN=\$LTN LALOC CANNOT BE POPULATED WITH ALL CAPITAL LETTERS
D4375	DLNUM=\$DLNUM LTN=\$LTN LALOC PROHIBITED WITH LACT Z
D4376	DLNUM=\$DLNUM LTN=\$LTN INVALID CHARACTER FOR LALOC
D4377	DLNUM=\$DLNUM LTN=\$LTN INVALID NUMBER OF CHARACTERS FOR LALOC
D4378	DLNUM=\$DLNUM LTN=\$LTN INVALID CHARACTER BEFORE OR AFTER HYPHEN IN LALOC
D4379	DLNUM=\$DLNUM LTN=\$LTN INVALID CHARACTER BEFORE OR AFTER APOSTROPHE IN LALOC
D4380	DLNUM=\$DLNUM LTN=\$LTN LALOC REQUIRED WITH FOREIGN LISTING
D4381	LALOC OR ADI REQUIRED WHEN RTY IS FAC, FAL, OR FSP
D4382	LALOC PROHIBITED WHEN ADI IS POPULATED.
D4383	LALOC PROHIBITED WHEN RTY 2ND AND 3RD CHARACTER IS CR.
D4385	DLNUM=\$DLNUM LTN=\$LTN INVALID LAST ENTRY
D4390	DLNUM=\$DLNUM LTN=\$LTN LAST PROHIBITED WITH LACT Z
D4395	DLNUM=\$DLNUM LTN=\$LTN LAST PROHIBITED WITH ADI.
D4396	LAST PROHIBITED WHEN RTY 2ND AND 3RD CHARACTER IS CR.
D4400	DLNUM=\$DLNUM LTN=\$LTN LTEXT PROHIBITED WITH LACT Z
D4405	DLNUM=\$DLNUM LTN=\$LTN INVALID CHARACTER FOR LTEXT
D4415	DLNUM=\$DLNUM LTN=\$LTN LTEXT MUST NOT EXCEED 90 CHARACTERS FOR SPECIAL TEXT.
D4416	INVALID LTEXT ENTRY
D4420	DLNUM=\$DLNUM LTN=\$LTN LTXTY PROHIBITED WITH LACT Z
D4430	DLNUM=\$DLNUM LTN=\$LTN INVALID LTXTY DATA
D4435	DLNUM=\$DLNUM LTN=\$LTN LTXTY AND RTY VALUES MUST MATCH.
D4436	DLNUM=\$DLNUM LTN=\$LTN LTXTY MUST BE AC WHEN RTY 2ND & 3RD CHARACTERS ARE AC
D4450	DLNUM=\$DLNUM LTN=\$LTN LTXTY INVALID FOR STATE
D4451	LTXTY CANNOT = CR, DL, DLB, OR DLS WHEN STYC = CI.
D4452	LTXTY REQUIRED WHEN STYC = CI or SI
D4453	LTXTY CANNOT = CR, SP, DL, DLB, OR DLS WHEN STYC = SI
D4454	INVALID LTXTY VALUE FOR STYC OF SI
D4455	LTXTY VALUE OF ITX VALID ONLY WHEN THE DOI FIELD IS GREATER THAN ZERO
D4456	LTXTY REQUIRED WHEN LTXNUM IS POPULATED.
D4457	DLNUM=\$DLNUM LTN=\$LTN WHEN LTXTY IS TT, LPHRASE MUST BE 45 OR 50
D4458	DLNUM=\$DLNUM LTN=\$LTN WHEN LTXTY IS OP, THE LPHRASE MUST NOT BE 45 OR 50
D4459	DLNUM=\$DLNUM LTN=\$LTN LPHRASE PROHIBITED WITH LACT Z
D4460	DLNUM=\$DLNUM LTN=\$LTN LTXNUM PROHIBITED WITH LACT Z
D4461	DLNUM=\$DLNUM LTN=\$LTN LPHRASE REQUIRED WHEN LTXTY = TT OR OP
D4462	LPHRASE PROHIBITED WHEN LTEXT IS POPULATED

D4463	LPHRASE MUST BE IN INCREASING NUMERICAL SEQUENCE
D4464	INVALID LPHRASE ENTRY
D4465	LPHRASE OF 33 ONLY ALLOWED FOR STATE OF FLORIDA
D4466	LPHRASE OF 103 OR 107 ONLY ALLOWED FOR STATES OF GEORGIA, NORTH CAROLINA,
D4467	LPHRASE OF 103 INVALID FOR TOS.
D4468	LPHRASE OF 107 INVALID WHEN TOS IS NOT 3.
D4470	DLNUM=\$DLNUM LTN=\$LTN LTXNUM MUST BE CONSECUTIVE AND UNIQUE WITHIN THE DLNUM.
D4471	LTXNUM REQUIRED WHEN LTXTY IS POPULATED.
D4475	DLNUM=\$DLNUM LTN=\$LTN INVALID YPH ENTRY
D4480	DLNUM=\$DLNUM LTN=\$LTN YPH PROHIBITED WITH LACT Z
D4481	DLNUM=\$DLNUM LTN=\$LTN YPH REQUIRED WITH TOS/RTY COMBINATION
D4482	DLNUM=\$DLNUM LTN=\$LTN YPH PROHIBITED WITH THIS TOS/RTY COMBINATION
D4483	DLNUM=\$DLNUM LTN=\$LTN YPH ENTRY MUST BE 999001 WHEN LTY IS 2 OR 3.
D4484	YPH ENTRY MUST BE 999001 WHEN RTY = LCM & THE STATE IS KY.
D4485	YPH PROHIBITED
D4486	DLNUM=\$DLNUM LTN=\$LTN LTXNUM VALUE MUST BE 2 NUMERICS
D4490	LTEXT REQUIRED WHEN LTXTY = ITX AND THE STYC IS NOT CI
D4491	LTXTY OF CR REQUIRES 'SEE' AS FIRST WORD IN LTEXT.
D4492	LTEXT PROHIBITED WHEN LPHRASE IS POPULATED
D4493	DLNUM=\$DLNUM LTN=\$LTN ADI VALID ENTRY IS O
D4501	DLNUM=\$DLNUM SIC REQUIRED WHEN ACT IS "N, T", OR "V WITH THE MI = A or C".
D4502	SIC PROHIBITED
D4503	SIC REQUIRED WHEN ACT IS WITH THE MI IS A OR C.
D4525	DLNUM=\$DLNUM LTN=\$LTN ADI PROHIBITED WITH LACT Z
D4530	DLNUM=\$DLNUM LTN=\$LTN ADI PROHIBITED WHEN LASN, LALOC, LAPR, LANO, LASF, LASD, LATH, LASS or LAST ARE POPULATED.
D4535	DLNUM=\$DLNUM LTN=\$LTN ADI PROHIBITED WITH CROSS REFERENCE.
D4536	DLNUM=\$DLNUM LTN=\$LTN ADI PROHIBITED WITH FOREIGN LISTINGS IN THE STATE OF GEORGIA.
D4537	WHEN STYC IS CI, LTXTY IS ITX, LTEXT IS BLANK, ADI CANNOT BE POPULATED
D4538	DLNUM=\$DLNUM LTN=\$LTN ADI PROHIBITED WHEN STYC = CI AND LTEXT IS BLANK
D4545	DLNUM=\$DLNUM LTN=\$LTN DIRNAME PROHIBITED WITH LACT Z
D4546	DLNUM=\$DLNUM LTN=\$LTN INVALID CHARACTER FOR DIRNAME
D4550	DLNUM=\$DLNUM LTN=\$LTN DIRNAME REQUIRED ON FOREIGN OR SECONDARY LISTING
D4554	DLNUM=\$DLNUM LTN=\$LTN INVALID CHARACTER FOR DIRSUB
D4555	DLNUM=\$DLNUM LTN=\$LTN DIRSUB PROHIBITED WITH LACT Z
D4556	DLNUM=\$DLNUM LTN=\$LTN PROHIBITED WITH RTY 2ND & 3RD CHARACTERS OF CR OR SP
D4560	DLNUM=\$DLNUM LTN=\$LTN ADV VALID ENTRY IS Y
D4565	DLNUM=\$DLNUM LTN=\$LTN ADV PROHIBITED WITH LACT Z
D4570	DLNUM=\$DLNUM LTN=\$LTN ADV IS PROHIBITED WHEN WPP POPULATED
D4575	DLNUM=\$DLNUM LTN=\$LTN ADV IS PROHIBITED WITH DESIGNER LISTINGS
D4580	DLNUM=\$DLNUM LTN=\$LTN FUTURE DUE DATE PROHIBITED WHEN REQTY = J AND ADV = Y
D4585	DLNUM=\$DLNUM LTN=\$LTN DML PROHIBITED WITH LACT Z
D4590	DLNUM=\$DLNUM LTN=\$LTN DLNM VALID ENTRY IS Y
D4595	DLNUM=\$DLNUM LTN=\$LTN DLNM PROHIBITED WITH LACT Z
D4596	DLNUM=\$DLNUM LTN=\$LTN AMPERSAND REQUIRED IN LNFN FIELD WHEN DLNM = Y
D4597	DLNM PROHIBITED WHEN TOS = 1, 3, OR 4
D4598	DLNM PROHIBITED WHEN TOA IS BP OR RP.

D4605	DLNUM=\$DLNUM LTN=\$LTN BRO MUST BE 'B' OR 'R'.
D4610	DLNUM=\$DLNUM LTN=\$LTN BRO PROHIBITED WITH LACT OF Z.
D4611	TOA MUST BE BP WHEN BRO IS POPULATED
D4623	DLNUM=\$DLNUM LTN=\$LTN SO VALID VALUE IS "A" OR "F"
D4624	DLNUM=\$DLNUM LTN=\$LTN SO MUST BE 'A' WHEN STYC = SI
D4625	DLNUM=\$DLNUM LTN=\$LTN SO PROHIBITED WITH LACT OF Z
D4626	DLNUM=\$DLNUM LTN=\$LTN SO = A PROHIBITED WHEN HS = N
D4630	DLNUM=\$DLNUM LTN=\$LTN FAINFO PROHIBITED WITH LACT OF Z
D4632	DLNUM=\$DLNUM LTN=\$LTN FATN PROHIBITED WITH LACT OF Z
D4633	DLNUM=\$DLNUM LTN=\$LTN FATN MUST BE 3 OR 10 NUMERICS
D4634	WHEN FATN IS 3 NUMERIC VALUE, THE 2 <sup>ND</sup> AND 3 <sup>RD</sup> CHARACTERS MUST BE 11 OR 88
D4635	DLNUM=\$DLNUM LTN=\$LTN FATN PROHIBITED WHEN FAINFO IS NOT POPULATED.
D4636	FATN REQUIRED WHEN STYC = SI AND SO = A
D4651	DLNUM=\$DLNUM LTN=\$LTN FAINFO REQUIRED WHEN THE SO FIELD = A
D4652	DLNUM=\$DLNUM LTN=\$LTN FAINFO PROHIBITED WHEN THE SO FIELD IS NOT A
D4653	DLNUM=\$DLNUM LTN=\$LTN INVALID CHARACTER FOR FAINFO
D4675	DLNUM=\$DLNUM LTN=\$LTN INVALID LVL VALUE
D4676	DLNUM=\$DLNUM LTN=\$LTN LVL VALUE CANNOT BE GREATER THAN OR EQUAL TO THE DOI VALUE
D4678	DLNUM=\$DLNUM LTN=\$LTN LVL PROHIBITED WHEN STYC = SI, SH, OR SL
D4680	DLNUM=\$DLNUM LTN=\$LTN LVL PROHIBITED WITH LACT OF Z
D4682	DLNUM=\$DLNUM LTN=\$LTN LVL ENTRIES MUST BE CONSECUTIVE, 1 - 6
D4684	DLNUM=\$DLNUM LTN=\$LTN LVL VALUE MISSING.
D4687	DLNUM=\$DLNUM LTN=\$LTN PLS PROHIBITED WHEN THE STYC IS SL OR SH.
D4695	DLNUM=\$DLNUM LTN=\$LTN PLS VALUE MUST BE 'E' OR 'N
D4700	DLNUM=\$DLNUM LTN=\$LTN PLS PROHIBITED WITH LACT OF Z
D4702	DLNUM=\$DLNUM LTN=\$LTN PLS = N REQUIRED WHEN PLSO = F
D4710	DLNUM=&DLNM LTN=<N INVALID HTN DATA
D4715	DLNUM=&DLNM LTN=<N HTN PROHIBITED WHEN THE STYC IS NOT SI OR SH
D4720	DLNUM=&DLNM LTN=<N HTN PROHIBITED WITH LACT OF Z
D4725	DLNUM=&DLNM LTN=<N INS1 VALUE MUST BE E OR N
D4730	DLNUM=&DLNM LTN=<N INS1 REQUIRED WHEN DOI IS GREATER THAN 1
D4735	DLNUM=&DLNM LTN=<N INS1 REQUIRED WHEN LVL IS GREATER THAN 1
D4740	DLNUM=&DLNM LTN=<N INS1 REQUIRED WHEN INTEXT OR INADDR IS POPULATED
D4741	DLNUM=\$DLNUM LTN=\$LTN PLS REQUIRED, WHEN THE LVL IS POPULATED & DIFFERENT THAN THE DOI FIELD.
D4742	VALID ENTRY OF N PROHIBITED WHEN CORRESPONDING PLTN IS POPULATED.
D4745	DLNUM=\$DLNUM LTN=\$LTN PLINFO REQUIRED WHEN LVL IS POPULATED
D4746	DLNUM=\$DLNUM LTN=\$LTN PLINFO PROHIBITED WITH LACT OF Z
D4749	PLINFO PROHIBITED WHEN STYC = SI
D4750	DLNUM=\$DLNM LTN=\$LTN INVALID CHARACTER FOR PLINFO
D4752	DLNUM=\$DLNUM LTN=\$LTN PLTN PROHIBITED WITH LACT OF Z
D4753	DLNUM=\$DLNUM LTN=\$LTN PLTN PROHIBITED WHEN PLINFO IS NOT POPULATED.
D4754	WHEN PLTN IS 3 NUMERIC, THE 2 <sup>ND</sup> AND 3 <sup>RD</sup> CHARACTERS MUST BE 11 OR 88
D4760	DLNUM=\$DLNM LTN=\$LTN PLTN PROHIBITED WHEN STYC = CI, PLSO = F AND PLINFO IS POPULATED
D4830	ONLY ONE DACT PER LSR
D4835	DACT ENTRY MUST BE 'N'.
D4837	DACT REQUIRED

D4840	NAME REQUIRED
D4841	INVALID CHARACTER FOR NAME
D4845	DDAPR PROHIBITED
D4850	DDANO PROHIBITED
D4855	DDASF PROHIBITED
D4860	DDASD PROHIBITED
D4865	DDASD INVALID ENTRY
D4870	DDASN IS REQUIRED
D4871	INVALID CHARACTER FOR DDASN

10210	TC TO SEC MUST BE DIFFERENT THEN THE NUMBER BEING REFERRED.
10211	TC TO SEC PROHIBITED WITH THIS REQ TYP/TACT COMBINATION.
10212	TC PER FORMAT MUST BE CCYYMMDD
10213	TC PER PROHIBITED WHEN RNUM TC OPT IS NOT ST OR TC.
10214	TC PER DATE INVALID MUST BE LATER THAN THE LSR RECEIPT DATE.
10215	TC PER CAN NOT BE MORE THAN 1 YEAR FROM DDD
10216	TC PER CAN NOT BE MORE THAN 90 DAYS FROM DDD
10217	TC PER PROHIBITED FOR REQ TYP/TACT COMBINATION
10218	TCID VALID ENTRY IS NUMERIC 01, OR 02.
10219	TCID IS PROHIBITED WHEN TC OPT DATA IS NOT ST.
10220	TCID 01 AND TCID 02 ARE REQUIRED WHEN TC OPT IS ST.
10221	TCID (01) AND TCID (02) CANNOT CONTAIN THE SAME VALUE.
10222	TCID PROHIBITED WITH THIS REQ TYP/TACT COMBINATION.
10223	BOTH TC NAME (01 AND 02) ARE REQUIRED WHEN TC OPT IS ST.
10224	TC NAME IS PROHIBITED WHEN TC OPT IS NOT ST.
10225	TC NAME INVALID.
10226	TC NAME PROHIBITED WITH THIS REQ TYP/TACT COMBINATION.
10227	TC FR IS REQUIRED WHEN TC OPT IS POPULATED AND TACT IS C, V, N, OR G AND REQ TYP IS N.
10228	TC FR MUST BE 10 NUMERICS.
10229	TC FR IS PROHIBITED WITH REQ TYP/TACT COMBINATION
10238	RNUM PROHIBITED WHEN REQ TYP IS A, B, C, E, F, J, OR M.
10240	LOCNUM IN THE FEATURE SECTION MUST MATCH COMMON SECTION LOCNUM
10241	RNUM MUST MATCH RNUM IN THE COMMON SECTION FOR THE FEATURE SECTION
10244	WHEN OTNS IS 15 ALPHANUMERICS, IT MUST HAVE A HYPHEN IN THE 11TH POSITION
10245	LOCNUM IN THE TRUNK SECTION MUST MATCH COMMON SECTION LOCNUM
10246	TACT MUST BE N, C, D, P, OR X WHEN ACT =C.
10247	TACT MUST BE D, N, V, G, P, W , OR X WHEN ACT = V.
10248	TERS MUST BE SEQUENTIAL.
10249	TELEPHONE NUMBER RANGE IN THE TRUNK SECTION PROHIBITED WHEN TERS AND/OR OTN FIELD IS POPULATED.
10250	PIC VALID ENTRIES ARE NONE, UNDC, NC, BLANK, OR A VALID PIC CODE WHEN TACT IS V, C OR X.
10251	PIC VALID ENTRIES ARE NONE, UNDC, OR A VALID PIC CODE WHEN TACT IS N, P, OR G.
10252	LPIC VALID ENTRIES ARE NONE, UNDC, OR A VALID PIC CODE WHEN TACT IS N, P, OR G.
10253	FEATURE REQUIRED WHEN FA FIELD IS POPULATED.

I0254	FEATURE MUST BE 3, 5, OR 6 ALPHANUMERIC.
I0255	RNUM IN THE TRUNK SECTION MUST MATCH RNUM IN THE COMMON SECTION
I0256	LOCNUM IN THE TRANSFER OF CALLS SECTION MUST BE UNIQUE
I0257	TNS RANGE IN THE DID TN SECTION MUST BE IN INCREMENTS OF 20
I0258	TNS IN THE TRUNK SECTION REQUIRED WITH THIS REQYP/TACT COMBINATION
I0259	TNS RANGE IN THE TRUNK SECTION MUST BE IN INCREMENTS OF 20
I0260	LOCNUM IN THE TRANSFER OF CALLS SECTION MUST BE 3 NUMERIC
I0265	OTNS RANGE MUST BE IN INCREMENTS OF 20
I0270	TC FR IS REQUIRED WHEN TC OPT IS POPULATED AND TNA IS C, V, OR N AND REQYP IS N.
I0275	BLOCK IN THE DID TN SECTION PROHIBITED WHEN BA IS BLANK.
I0280	LOCNUM IN THE FEATURE SECTION PROHIBITED FOR REQYP/TNA COMBINATION.
I0285	RNUM IN THE FEATURE SECTION PROHIBITED FOR REQYP/TNA COMBINATION.
I0290	FA PROHIBITED FOR REQYP/TNA COMBINATION.
I0300	FEATURE PROHIBITED FOR REQYP/TNA COMBINATION.
I0310	FEATURE DETAIL PROHIBITED FOR REQYP/TNA COMBINATION.
I0320	LOCNUM IN THE TRANSFER OF CALLS SECTION PROHIBITED FOR REQYP/TNA COMBINATION.
I0325	RNUM IN THE TRANSFER OF CALLS SECTION PROHIBITED FOR REQYP/TACT COMBINATION.
I0330	RNUM IN THE TRANSFER OF CALLS SECTION PROHIBITED FOR REQYP/TNA COMBINATION.
I0335	RNUM IN THE TRANSFER OF CALL SECTION IF POPULATED, MUST MATCH RNUM IN THE COMMON SECTION.
I0340	RNUM IN THE TRANSFER OF CALLS SECTION MUST BE 5 NUMERIC
I0345	LOCNUM IN THE TRANSFER OF CALLS SECTION MUST MATCH COMMON SECTION LOCNUM.
I0350	TGN IN THE TRUNK SECTION REQUIRED WHEN TACT IS POPULATED.
I0355	TC OPT PROHIBITED IF TC FR IS NOT POPULATED ON REQYP N, TNA = N, C, OR V.
I0360	TC OPT OF CA VALID WHEN TNA IS C, N, OR V.
I0365	LOCNUM IN THE DID TN SECTION MUST MATCH LOCNUM IN THE COMMON SECTION.
I0370	BA IN THE TRUNK SECTION VALID ENTRIES ARE A, D, N, Z, OR BLANK.
I0375	JK NUM PROHIBITED WHEN AD = A.
I0380	TNS IN THE TRUNK SECTION MUST BE 10N OR 15AN
I0385	RNUM AT THE DID TN LEVEL MUST MATCH RNUM IN THE COMMON SECTION.
L9070	NNSP ON SUP MUST BE SAME AS ORIGINAL LSR

R1355	TOS FIRST CHARACTER MUST BE 1, 2, 3, OR 4
R1357	THIRD AND FOURTH CHARACTER OF THE TOS FIELD MUST BE HYPHENS WHEN THE SECOND CHARACTER IS 9.
R1358	SPEC MUST BE 5 OR 7 ALPHANUMERIC
R1359	ALPHA CHARACTER OF "I" IS PROHIBITED IN THE SPEC FIELD
R1360	TOS SECOND CHARACTER MUST BE A, B, C, H, J, P, Q, R, 9 OR - (hyphen)
R1361	NUMERIC CHARACTER OF "0" IS PROHIBITED IN THE SPEC FIELD
R1362	SPEC FIELD MUST BE EITHER UNCVX, UNC1X, UNCSX, UNCDX, UNCNX OR UNC3X
R1363	SPEC PROHIBITED WITH THIS REQ TYP/ACT COMBINATION
R1365	TOS THIRD CHARACTER MUST BE M, F, G, OR - (HYPHEN)
R1370	TOS THIRD CHARACTER MUST NOT BE F IF REQ TYP IS FB
R1375	TOS FIRST CHARACTER IS "2", THE SECOND CHARACTER MUST BE A, B, H, J, P, R OR - HYPHEN (-)
R1377	EBD MUST BE A VALID DATE
R1384	TOS FIRST CHARACTER IS 4, SECOND CHARACTER MUST BE C, J, H OR - (HYPHEN) IF REQ TYP IS CB
R1385	TOS FIRST CHARACTER IS 4, SECOND CHARACTER MUST BE C
R1386	TOS INVALID FOR THIS REQ TYP /ACT COMBINATION .
R1388	TOS MUST BE 4CF FOR REQ TYP E NON-COMPLEX COIN SERVICE
R1389	TOS MUST BE 4CF FOR REQ TYP M NON-COMPLEX COIN SERVICE
R1391	TOS SECOND CHARACTER MUST BE J, WHEN REQ TYP IS NB. STOP EDIT

R1396	TOS MUST BE 1A OR 1B FOR REQ TYP A UNIVERSAL DIGITAL DESIGN CHANNEL (UDC)
R1397	TOS MUST BE 1A OR 1B FOR REQ TYP A NON DESIGNED UCL-ND
R1398	TOS NOT VALID FOR RCF SERVICE
R1400	SERVICE INQUIRY REQUIRED, MANUAL PROCESS
R1401	INVALID EELS SERVICE COMBINATION
R1402	RESID IS REQUIRED WITH THIS NC CODE
R1403	SERVICE INQUIRY REQUIRED FOR ACT=N INTEROFFICE CHANNEL (IOC) DS3/DTS-1, MANUAL PROCESS
R1405	RESID IS REQUIRED WITH THIS REQUEST
R1406	LSR'S WITH RESID CAN ONLY REFERENCE SERVICES AT ONE LOCATION
R1407	RESID IS REQUIRED FOR LINE SHARING AND LINE SPLITTING
R1408	RESID MUST BE ALPHAS OR NUMERICS ONLY WITH NO EMBEDDED SPACES UP TO 20 CHARACTERS
R1409	RESID CANNOT BE ALL X'S WHEN ANY LNA IS N OR T
R1410	LSP AUTH MUST BE 4 ALPHANUMBERICS
R1412	LSP AUTH REQUIRED WITH THIS REQ TYP/ACT COMBINATION
R1415	LSP AUTH DATE REQUIRED WHEN THE LSP AUTH FIELD IS POPULATED
R1416	RESID IS PROHIBITED FOR THIS REQ TYP/ACT COMBINATION
R1420	LSP AUTH DATE MUST BE A VALID DATE IN CCYYMMDD FORMAT
R1421	LSP AUTH DATE MUST BE A VALID FORMAT
R1422	LSP AUTH DATE REQUIRED WITH THIS REQ TYP/ACT COMBINATION
R1425	LSP AUTH NAME REQUIRED WHEN LSP AUTH IS POPULATED
R1427	LSP AUTH NAME REQUIRED WITH THIS REQ TYP/ACT COMBINATION
R1430	CIC IS REQUIRED WITH THIS REQ TYP/ACT TYPE COMBINATION
R1435	CIC MUST BE 4 NUMERICS.
R1440	CUST REQUIRED WHEN CCNA IS CUS
R1445	BI1 REQUIRED WHEN BAN1 AND BAN2 ARE POPULATED
R1446	BI1 VALID ENTRIES ARE D, L, M, N, P, R,
R1447	BI1 FIELD MUST BE "M" WITH LINE SPLITTING
R1450	BAN1 MUST BE "VOIP"
R1451	BAN1 MUST BE A 13 DIGIT ACCOUNT NUMBER
R1452	BAN1 AND BAN2 MUST NOT MATCH
R1453	BAN1 REQUIRED WITH THIS REQ TYP/ACT TYPE COMBINATION
R1454	DESIGN LOOP SERVICE REQUIRES "N" BILLING ACCOUNT NUMBER
R1455	BAN1 VALID ENTRY MUST BE IN A VALID FORMAT
R1456	CC ON LSR MUST MATCH CC ON BAN FIELD
R1457	BAN1 OF VOIP IS ONLY VALID FOR REQ TYP J, ACT N, R, OR D
R1458	ACCOUNT NUMBER IN AN FIELD MUST MATCH ACCOUNT NUMBER IN BAN FIELD
R1459	LINE SHARING REQUIRES C BILLING ACCOUNT NUMBER
R1470	BI2 REQUIRED WHEN BAN1 AND BAN2 ARE POPULATED
R1471	BI2 VALID ENTRIES ARE D, L, M, N, P, R,
R1481	BAN2 MUST BE A 13 DIGIT ACCOUNT NUMBER
R1485	BAN2 REQUIRED WHEN BI2 IS POPULATED
R1490	ACNA ? REQUIRED ON THIS REQ TYP-ACT TYPE COMBINATION.
R1495	ACNA MUST BE 3 ALPHAS
R1498	VTA INVALID
R1499	VTA = A PROHIBITED
R1500	VTA MUST BE ALPHANUMERIC
R1501	VTA REQUIRED

R1502	VTA PROHIBITED
R1503	INVALID VTA VALUE
R1504	VTA VALUE INVALID FORM NUMBER OF LINES
R1505	INIT REQUIRED WITH THIS REQTYP/ACT TYPE COMBINATION.
R1506	INIT-TEL NO REQUIRED WITH THIS REQTYP/ACT TYPE COMBINATION
R1507	INIT -TEL NO FORMAT MUST BE 10 NUMERICS OR UP TO 15 ALPHANUMERICS.
R1508	INIT-FAX NO REQUIRED WITH THIS REQTYP/ACT TYPE COMBINATION
R1509	INIT-FAX NO MUST BE 10 NUMERICS
R1530	IMPCON REQUIRED WITH THIS REQTYP/ACT TYPE COMBINATION
R1531	IMPCON-TELCON REQUIRED WHEN IMPCON IS POPULATED
R1532	IMPCON-TEL NO FORMAT MUST BE 10 NUMERICS IN THE FIRST TEN POSITIONS
R1534	ALT-IMPCON-TEL NO FORMAT MUST BE 10 NUMERICS IN THE FIRST TEN POSITIONS
R1560	DSGCON REQUIRED WHEN DRC POPULATED
R1565	DRC MUST BE LMU FOR THIS PRODUCT
R1570	DSGCON TEL NO REQUIRED WHEN THE DSGCON FIELD IS POPULATED
R1571	DSGCON-TEL NO FORMAT MUST BE 10 NUMERICS IN THE FIRST TEN POSITIONS
R1572	DSGCON-TEL NO FORMAT MUST BE 10 NUMERICS OR 15 ALPHANUMERICS
R1573	DSGCON-FAX NO MUST BE 10 NUMERICS
R1574	DSGCON -STREET REQUIRED WHEN DSGCON IS POPULATED
R1575	DSGCON- CITY REQUIRED WHEN DSGCON IS POPULATED
R1576	DSGCON -STATE IS REQUIRED WHEN DSGCON IS POPULATED
R1577	DSGCON-ZIP CODE REQUIRED WHEN DSGCON IS POPULATED
R1585	STREET-DSGCON REQUIRED WHEN DSGCON IS POPULATED
R1605	REMARKS VIRGULES (/) AND ASTERISKS (*) NOT ALLOWED IN THIS FIELD
R1610	PBT REQUIRED WITH THIS REQTYP/ACT TYPE COMBINATION
R1615	PBT VALID ENTRY IS A, B, OR C
R1620	BCS REQUIRED WITH REQTYP/ACT TYPE/TOS COMBINATION
R1625	BCS MUST BE 3 OR 5 ALPHANUMERICS
R1626	LMT VALUE DOES NOT MATCH ORIGINAL LSR
R1627	LMT NOT ON ORIGINAL LSR
R1628	PROJINDR CANNOT BE CHANGED ON A SUP
R1629	PROJECT FIELD CANNOT BE CHANGED ON SUP WHEN PROJINDR IS B
R1630	CANNOT SUP A PREVIOUSLY CANCELED LSR/PON.
R1635	LSR ORIGINATING SOURCE NOT SAME AS PRIOR VERSION
R1645	LSR/PON AGED OFF
R1650	LSR/PON COMPLETED
R1656	LSR IN CLARIFICATION CANNOT PROCESS SUP
R1659	RELATED PONS RETURNED FROM DDC BECAUSE CANNOT CHANGE DUE DATE
R1660	SUP 01 OR 02 NOT ALLOWED ON THIS ACCOUNT ACTIVITY TYPE
R1661	SUP 03 NOT ALLOWED ON THIS ACCOUNT ACTIVITY TYPE UNLESS REQUESTED BY AT&T
R1662	SUP NOT ALLOWED ON RESTORAL WHEN THE REASON WAS DENIED
R1663	CANNOT CANCEL OR CHANGE DUE DATE THIS CLOSE TO SCHEDULED RESTORE OF SERVICE
R1664	SUP 03 NOT ALLOWED ON THIS ACCOUNT ACTIVITY TYPE
R1665	Allow only cancel on SUP 01
R1666	DDD is same as previous DDD for SUP 02
R1667	DDD IS SAME AS PREVIOUS DDD FOR SUP 04
R1668	SUP 05 FAILED TO MAKE CHANGES

R1669	SUP 05 FAILED TO MAKE CHANGES OTHER THAN DUE DATE, USE SUP 04
R1670	SUP 01 INVALID WHEN SERVICE HAS BEEN CONNECTED AT NEW ADDRESS.
R1671	MEU MUST BE "A"
R1672	MEU MUST BE POPULATED WITH "A" WHEN LOCNUM IS GREATER THAN 000
R1673	MAXIMUM NUMBER OF RPONS EXCEEDED IN NOR FIELD
R1674	MEU PROHIBITED WITH THIS REQ TYP/ACT COMBINATION
R1675	RTR NOT ALLOWED WITH THIS REQ TYP/ACT COMBINATION
R1676	FACILITIES HAVE BEEN CHECKED AND A PF CONDITION EXISTS.
R1677	WHEN FIRST TWO POSITIONS OF NOR ARE 01 PON AND RPON MUST BE THE SAME
R1678	FIRST TWO POSITIONS OF NOR MUST BE LESS THAN OR EQUAL TO LAST TWO POSITIONS OF NOR FIELD.
R1679	LAST TWO POSITIONS OF THE NOR FIELD MUST BE THE SAME ON ALL LSRS IN RPON GROUP
R1680	SUP 02 OR SUP 03 NOT ALLOWED ON RPON GROUP THAT HAS NOT COMPLETED PROCESSING
R1681	NOR FIELD CANNOT BE CHANGED
R1682	CANNOT CHANGE ATN ON ACT T SUP
R1683	CANNOT CHANGE ADDRESS ON ACT T SUP
R1684	DDDO CHANGE PROHIBITED WHEN SERVICE HAS BEEN DISCONNECTED AT OLD ADDRESS
R1685	DDDO/TRANSFER OF CALL INFO CHANGE PROHIBITED WHEN SERVICE HAS BEEN DISCONNECTED AT OLD ADDRESS
R1686	CHANGE PROHIBITED WHEN SERVICE HAS BEEN CONNECTED AT NEW ADDRESS
R1699	MI MUST EQUAL C WITH REQ TYP J ACT V
R1700	MI FIELD VALID ENTRIES ARE A, B, C, OR D
R1701	MI REQUIRED WITH REQ TYP/ACT COMBINATION
R1702	MI PROHIBITED WITH REQ TYP/ACT COMBINATION
R1703	PARTIAL MIGRATION PROHIBITED FOR FX SERVICE
R1704	REQ TYP N-DID, ACT = V, AD = A, MI MUST BE B
R1706	MI INDICATOR MUST BE "C" OR "D" FOR THIS REQ TYP/ACT COMBINATION
R1707	LSCP IS INVALID FOR THIS REQ TYP/ACT COMBINATION
R1708	LSCP MUST BE "A" FOR THIS ACT
R1709	LSCP VALID ENTRIES ARE A OR B
R1710	LSCP INVALID FOR STATE
R1803	AN IS PROHIBITED
R2000	DFDT REQUIRED WHEN CHC IS Y
R2002	HTQTY PROHIBITED WITH REQ TYP/ACT COMBINATION
R2005	CHC REQUIRED WHEN DFDT IS POPULATED ON THIS NC CODE.
R2006	DQTY MUST BE 5 NUMERIC
R2008	MI OF A OR B PROHIBITED WHEN ELT POPULATED WITH A OR B
R2009	INVALID TOS FOR NC CODE
R2010	INVALID TOS FOR REQ TYP N-DID
R2011	TOS NOT VALID FOR FX SERVICE
R2012	TOS FIRST CHARACTER IS 2, SECOND CHARACTER MUST BE A, B, H, J OR (HYPHEN)
R2013	TOS THIRD AND FOURTH CHARACTER MUST BE A - (HYPHEN) IF REQ TYP IS BB
R2014	TOS THIRD CHARACTER MUST BE A - (HYPHEN) IF REQ TYP IS CB
R2015	TOS FOURTH CHARACTER MUST BE A - (HYPHEN) OR F WHEN REQ TYP IS CB
R2016	IMPCON TEL NO- FORMAT MUST BE A MINIMUM 10 NUMERIC OR A MAXIMUM OF 15 ALPHANUMERIC.

R2020	CONVERSION OF SERVICE IS NO LONGER SUPPORTED IN ASSOCIATION WITH EELS
R2025	ACT/LNA COMBINATION NOT SUPPORTED FOR EELS ?
R2026	LOCNUM=\$LCNM LNUM=\$LNUM ACT/LNA COMBINATION NOT SUPPORTED FOR INTEROFFICE CHANNEL (IOC)

R5112	THE NATN FIELD IS PROHIBITED WITH ACT=C. ?
R5113	INVALID REQ TYP WITH NATN.
R5114	INVALID TELEPHONE NUMBER IN THE NATN FIELD. ?
R5115	PROJECT MUST BE 15 ALPHANUMERICS
R5120	PROJECT FIELD MUST BE POPULATED WHEN PORTING 100 OR MORE NUMBERS
R5121	PROJECT FIELD IS REQUIRED
R5130	EXP IS PROHIBITED FOR REQ TYP/ACT COMBINATION
R5132	BI1 OF "L" REQUIRED FOR THIS REQ TYP/ACT COMBINATION
R5134	DDDO MUST MATCH DDD
R5135	INVALID ACT FOR RORD FOR LINE SHARE AND LINE SPLITTING
R5136	INVALID ENTRY FOR RORD FOR LINE SHARE AND LINE SPLITTING
R5137	RCC MUST BE 4 ALPHANUMERIC CHARACTERS
R5138	RPON FIELD REQUIRED WHEN RCC FIELD IS POPULATED
R5139	RCC FIELD REQUIRED WHEN RPON FIELD IS POPULATED
R5140	RCC DATA MUST EQUAL CC WHERE NOR EQUALS 01-XX

R5141	RCC PROHIBITED WITH THIS REQ TYP/ACT TYPE COMBINATION
R5142	FOR IOC SVC THE CFA AND SCFA MUST BE LOCATED WITHIN DIFFERENT WIRE CENTERS
R5148	ORDER COORDINATION NOT VALID WITH THIS REQUEST
R5149	INVALID ACT/MI COMBINATION WITH NATN
R5150	INVALID REQ TYP WITH NAN
R5151	INVALID ACT/MI COMBINATION WITH NAN
R5152	NAN MUST BE 10 NUMERIC CHARACTERS
R5170	PROJINDR VALID VALUES ARE A OR B
R5171	PROJINDR FIELD REQUIRED
R5172	PROJINDR OF B PROHIBITED FOR REQ TYP J
R5173	PROJINDR OF B REQUIRED
R6001	REMARKS - SPECIAL HANDLING IS NOT VALID WITH THIS REQUEST
R8003	LSR-TOS INVALID FOR REQ TYP K
R8004	LSR-TOS INVALID FOR REQ TYP P or X
R8006	LSR-TOS INVALID FOR REQ TYP S
R8007	LSR-TOS INVALID FOR REQ TYP T
R8008	LSR-TOS INVALID FOR REQ TYP W
R8009	LSR-TOS INVALID FOR REQ TYP Z
R8011	LSR-ACT INVALID, VALID ACTS ARE N, T, V, W, C, D, S OR B WHEN REQ TYP IS P OR X
R8012	LSR-ACT INVALID, VALID ACTS ARE N, T, V, W, C or D WHEN REQ TYP IS K, R, S, T, U, W, Y, Z OR 2.
R8013	LSR-PON REQUIRED
R8016	LSR-SUP-SUP TYPE 04 OR 05 PROHIBITED ON VERSION 99, REISSUE AS INITIAL
R8017	LSR-CC/PON SUP NOT ALLOWED, STATUS IS COMPLETED, POSTED, CANCELLED, ARCHIVED, OR KILLED, RE-ISSUE AS INITIAL
R8018	LSR-TOS INVALID FOR REQ TYP R
R8019	LSR-TOS INVALID FOR REQ TYP Y OR 2
R8279	RELATED PONS RETURNED.
R8280	LSR ORIGINATING APPLICATION MUST BE THE SAME FOR ALL LSRS IN RPON GROUP
R8281	LSR-REQ TYP B & C RPON INVALID WITH DIFFERENT REQ TYP
R8282	LSR-PROJECT IS NOT THE SAME WITHIN RPON GROUP
R8283	ACCOUNT INELIGIBLE FOR CONVERSION/RECONFIGURATION PER PENDING SCENARIO
R8284	REQUESTED ACTIVITY ALREADY PENDING
R9000	ONLY AN ACT OF V IS ALLOWED FOR REQ TYP B WHEN NPT IS D.
R9001	HNUM, DNUM, OR LNUM REQUIRED FOR THIS REQUEST
R9003	ACT OF SUP LSR IS DIFFERENT THAN ACT ON ORIGINAL LSR.
R9004	SUP VALID ENTRIES: 1, 2, OR 3 AND ELECTRONIC ARE 01, 04, OR 05.
R9005	INVALID ACT IF NPT IS D.
R9006	INVALID SUP, SUBSCRIPTION VERSION IN STATE THAT CANNOT BE CHANGED.
R9008	EAN INVALID FIELD CHANGE ON A SUP
R9010	AN IS REQUIRED FOR REQ TYP B.
R9021	AI VALID ENTRY IS C OR N
R9025	APOT MUST BE 11 ALPHANUMERICS
R9026	ATN REQUIRED WHEN LNLN IS POPULATED.
R9030	BAN1 REQUIRED WITH THE REQ TYP/ACT TYPE COMBINATION.
R9031	BI1 IS REQUIRED FOR REQ TYP B
R9032	FOR REQ TYP C, WHEN NPT IS D, AND IF THE BI1 FIELD IS POPULATED, IT IS REQUIRED TO BE N.

R9033	FOR REQ TYP B, WHEN NPT IS D, THE BI1 AND BI2 FIELDS MAY NOT CONTAIN THE SAME VALUE.
R9035	FOR REQ TYP B WHEN NPT IS D; L AND N ARE THE ONLY VALID ENTRIES.
R9036	FOR REQ TYP C, WHEN THE NPT IS D THE BI2 AND BAN2 FIELDS ARE PROHIBITED.
R9037	FOR REQ TYP B WHEN NPT IS D THE BI1 AND BI2 FIELDS MAY NOT CONTAIN THE SAME VALUE.
R9045	INVALID CC CODE FOR LNP
R9050	CHC OF Y IS REQUIRED WHEN NC IS LY
R9055	DFDT MUST BE VALID FORMAT OF HHMM OR HHMM-HHMM
R9056	INVALID FORMAT FOR THE DFDT FIELD
R9071	NNSP MUST BE 4 ALPHANUMERICS.
R9072	INVALID NNSP CODE FOR LNP.
R9073	NNSP REQUIRED FOR THIS REQ TYP/ACT COMBINATION
R9074	INVALID TOS FOR NC OF TXT-
R9075	TOS COMBINATION INVALID
R9076	TOS THIRD CHARACTER MUST BE ? (HYPHEN)
R9077	PBT IS NOT VALID WITH VIRTUAL COLLOCATION.
R9109	BAN1 IS REQUIRED WHEN LACT IS POPULATED
R9200	PROJECT FIELD MUST BE POPULATED WITH CAVEBILL OR CAVENOBILL
R9201	INVALID PROJECT FIELD VALUE IN CAVE
R9202	BAN1 AND BAN2 MUST NOT MATCH
R9205	BILLING AND PROVISIONING CURRENTLY NOT ALLOWED IN CAVE
R9206	BAN1 DOES NOT MATCH BAN IN THIS SITE FOR THIS REQ TYP
R9207	Q ACCOUNT IS NOT VALID FOR THIS REQ TYP.
R9208	BAN1 DOES NOT MATCH BAN IN THIS SITE FOR THIS REQ TYP.
R9210	TEST ACCOUNT CC AND AN OR ATN IS NOT REGISTERED CONTACT TEST MANAGER
R9215	CAVEBILL REQUEST NOT SUPPORTED FOR REQ TYP
R9220	CLEC IDENTIFIER IS REQUIRED
R9225	AAN MUST BE 13 ALPHANUMERICS WITH AN ALPHA IN THE 4TH POSITION
R9226	AAN PROHIBITED FOR THIS REQ TYP/ACT COMBINATION
R9230	NRI FIELD CAN ONLY BE SUBMITTED MANUALLY ON REQ TYP "E" LSR
R9240	NPDI REQUIRED FOR THIS REQ TYP/ACT COMBINATION
R9241	SUP INVALID. PREVIOUS VERSION UNRESOLVED
