

AT&T Southeast Pre-Ordering Transaction Availability

The following is a high level reference for the pre-ordering transaction. This matrix can be used as a quick reference for the pre-ordering transactions and their availability across the XML and Verigate transmission options. Transaction naming can vary between the different interfaces, along with various inputs to run the transactions; therefore, the user should refer to the actual XML and Verigate detailed execution instructions. Also, additional information can be found in specific user guides: For XML, please refer to the Southeast LSPOR. For Verigate, please refer to the Enhanced Verigate User Guide.
