
BellSouth Interconnection Services

675 West Peachtree Street
Atlanta, Georgia 30375

**Carrier Notification
SN91082157**

Date: March 26, 2001

To: Frame Relay Service and Connectionless Data Service Subscribers

Subject: Frame Relay Service and Connectionless Data Service Subscribers –
**REVISED: Broadband Switch Maintenance (Originally posted
January 9, 2001)**

The schedule of planned maintenance, originally posted in Carrier Notification Letter SN91082157 on January 9, 2001, has been modified so that fewer switches are upgraded each night. Please see the attached spreadsheet for the revised schedule of remaining maintenance.

BellSouth began performing maintenance on its broadband switches on January 9, 2001. The attached **revised** schedule identifies the maintenance date for each switch. Maintenance will be performed between the hours of 2:00 AM and 4:00 AM Eastern Time.

The work performed will include the loading of additional switch software. Frame Relay and Connectionless Data Service customers will experience a three-to-five minute service interruption when the switch is rebooted to activate the new software. If the interruption persists beyond this period, it should be reported to BellSouth through normal trouble reporting procedures. Asynchronous Transfer Mode (ATM) service customers will not be affected by this maintenance.

If you have any questions, please contact your BellSouth account team representative.

Sincerely,

ORIGINAL SIGNED BY JIM BRINKLEY

Jim Brinkley – Senior Director
BellSouth Interconnection Services
