Date: January 22, 2001

To: Interexchange Carriers (IXCs)

Subject: IXCs - Billing Option Change for Indiantown - ITS Telephone Company in Florida

This letter is to advise IXCs of a new billing option being implemented between Indiantown - ITS Telephone Company (EC/OCN 0331) in South Florida and BellSouth.

Multiple billing occurs when one Local Exchange Carrier (LEC) owns the wire center that serves the IXC and another LEC owns the wire center that serves the end-user. In this environment, each LEC may bill the IXCs for its portion of the access service (multiple bill) or one LEC may be designated as the Initial Billing Company (IBC) and render a single bill for both companies (single bill/multiple tariff). The Multiple Exchange Carrier Access Billing (MECAB) document, prepared by the Ordering and Billing Forum (OBF), establishes the guidelines for billing when multiple local exchange carriers are involved in providing access.

Effective with switched access usage generated as of February 16, 2001, the billing option will change from a single bill/multiple tariff option, with Indiantown - ITS billing for BellSouth, to a multiple bill arrangement. Special access services are already multiple billed. Indiantown - ITS' last bill for both companies will be for switched access usage through February 15, 2001 and will be billed on the March 2001 bill.

Indiantown - ITS Telephone Company will also notify customers of this change.

All payments for bills reflecting usage from February 16, 2001, or any IBC bill date after March 2001, should be sent to the company rendering the bill. The first bill received from BellSouth under the new option will be generated beginning late March to mid-April 2001, depending upon your company's billing cycle and the date that BellSouth receives the usage from Indiantown - ITS.

Please refer any questions or concerns regarding this subject to your Interexchange Carrier Service Center.

Sincerely,
