Alternative Services for Flexible Call Forwarding (Originally posted on January 24,
2001 and revised on May 4, 2001)

On July 1, 2001, BellSouth will begin to eliminate Flexible Call Forwarding as a service offering. In Carrier Notification letter SN91082187 originally released on January 24, 2001, and revised on May 4, 2001, CLECs were advised of the alternative services available to replace Flexible Call Forwarding. **BellSouth has revised the effective dates for submitting Local Service Requests (LSRs) and Removal State Date. Also, Florida has been combined into one area instead of three separate areas. Please review the revised table below for new dates.** Therefore, it is important to begin notifying your company's customers that each must select an alternative service by the date specified in the table below. Should your customers fail to select an alternative service by the appropriate date, BellSouth will remove Flexible Call Forwarding from their account. CLECs must submit a Local Service Request (LSR) by the date specified in the **revised** table below.
