**Carrier Notification
SN91082582**

Date: October 2, 2001

To: Competitive Local Exchange Carriers (CLECs)

Subject: CLEC – **REVISED** - Electronic Interface System Downtime – ENCORE
               Release 10.0 and Local Number Portability (LNP) Release 6.3 (Originally posted
               on August 24, 2001, and revised on September 24, 2001)

This is to advise that the Electronic Data Interchange (EDI), Local Exchange Navigation System
(LENS) and Telecommunications Access Gateway (TAG) systems were unavailable for Local
Service Request (LSR) processing during the deployment of TAG, Version 7.6.2.1, Application
Program Interface (API) from 7:00 PM EDT, Friday, September 28, 2001, through 12:00 NOON,
Saturday, September 29, 2001.

**The following information is for TAG users upgrading to the 7.6.2.1 API that was
implemented on September 29, 2001:**

- **When using the Pre-order to request a reservation of a spare facility by specific
  cable and pair, the following error message "Mercator Mapping Error" will be
  received when none of the required TAG fields: segment number, cable id, and
  pair id are entered on the request.**

- **To avoid this error, please ensure that the required TAG fields: segment number,
  cable id, and pair id are entered on each request for reservation of a spare facility
  by specific cable and pair.**

- **The incorrect error message will be replaced in the next release of TAG, targeted
  for January 2002, with the appropriate error message indicating the field name of
  the fields failing validation.**

Additionally, the Local Number Portability (LNP) Gateway was unavailable to process LSRs and
Number Portability Administration Center (NPAC) messages on Sunday, September 30, 2001,
from 1:00 AM EDT through 1:00 PM EDT.

Please see the attached table for details of Release 10.0 and 6.3.
