**Carrier Notification
SN91082929**

Date: April 12, 2002

To: Competitive Local Exchange Carriers (CLECs) and Interexchange Carriers (IXCs)

Subject: CLECs and IXCs – **REVISED**: Carrier DS1 Terminated to Primary Rate Interface in BellSouth Centrex (Originally posted on March 11, 2002)

This is to advise that effective March 4, 2002, the BellSouth Interexchange Carrier Service Center (ICSC) began accepting orders for Special Access DS1 service terminating into a Primary Rate Interface – Integrated Services Digital Network (PRI-ISDN) in the BellSouth Centrex with a new Network Channel (NC) code: **HCEI**

The new NC code will be valid with a Network Channel Interface (NCI) code of **04DS9.1S**. No Secondary Network Channel Interface (SECNCI) will be required on the carrier's Access Service Request (ASR).

A PRI Common Language Location Identification (CLLI) code will be required for the Secondary Location (SECLOC)/termination. This information will be required from the carrier upon submission of an ASR. The information must be provided to the carrier by the end user customer as a result of negotiations with the end user customer's BellSouth (Retail) Account Team.

DS1 services terminated to the new PRI in the BellSouth Centrex will take approximately 25 business days from receipt of an accurate ASR.

If you have any questions, please contact your BellSouth Account Team Representative.

Sincerely,
