Date: October 18, 2002

To: Competitive Local Exchange Carriers (CLECs)

Subject: CLECs – **REVISED** - Service Order Freeze Dates for Scheduled BellSouth Operations Support System (OSS) Enhancement - Customer Number Manager (CNUM) Deployment (Originally posted May 29, 2002, and revised on August 6 and August 20, 2002)

This is to advise of a staggered date schedule for the deployment of an OSS enhancement in the BellSouth CNUM System. CNUM is an automated software system that supports the management and administration of telephone numbers. It will allow more efficiencies as location porting and number pooling become more prevalent. It also simplifies the administering and tracking of telephone numbers in a pooled/porting environment. The schedule below reflects the new Service Order Freeze dates associated with the CNUM deployment.

A service order freeze took place within specified states and certain Central Office (CO) Common Language Location Identification (CLLI) sites in the BellSouth Region beginning in June 2002, and will end in December 2002. The table below identifies the impacted state, number of CLLI sites involved and the **revised** service order freeze date for these areas. No service orders for any of the BellSouth Retail/Wholesale products may be dated using the dates specified for areas in the table below.

Local Service Requests (LSR) submitted to BellSouth should not reflect the Service Order Freeze Date for the respective states below as the Desired Due Date (DDD).
