**Carrier Notification
SN91083231**

Date: July 19, 2002

To: Competitive Local Exchange Carriers (CLECs)

Subject: CLECs – Update to the Local Exchange Navigation System (LENS) Users Guide, ENCORE Release 10.6, Summary of Changes

This is to advise that the current LENS Users Guide, ENCORE Release 10.5, is being re-issued to incorporate the following updates:

- **Electronic Partial Migration of Unbundled Network Element (UNE) Loops**
REQTYP A Partial Migration requests can now be processed electronically.
- **Electronic Processing of Unbundled Copper Loop Non-Designed (UCL-ND)**
LENS will allow requests for 2-wire UCL-ND service to be submitted electronically. These requests will be routed to the Local Carrier Service Center (LCSC) for manual handling.
- **Revised Local Exchange Ordering (LEO) Guide Statuses in Local Service Request (LSR)/Order Information**
When LEO statuses of **E** (Error) or **H** (LSR w/Errors) are passed to LENS, the status under the **LSR Status** column on the Purchase Order Number (PON) List and PON Details screen will show *Pending*. There will be no change to the way these orders are processed; the only change is to show *Pending* instead of codes **E** or **H**.
- **Mechanized Directory Delivery**
The quantities and types for up to 3 different directories can be specified on the Directory Delivery Page.

The updated statements are effective with the implementation of ENCORE Release 10.6 on August 25, 2002.

The LENS Users Guide can be found at the BellSouth Interconnection Services' Web site in the Customer Guides Section located at:

http://www.interconnection.bellsouth.com/gides/html/lens_tafi.html

Please contact your BellSouth Local Support Manager with any questions.

Sincerely,
