
BellSouth Interconnection Services

675 West Peachtree Street
Atlanta, Georgia 30375

Carrier Notification**SN91083327**

Date: September 19, 2002

To: Competitive Local Exchange Carriers (CLECs)

Subject: CLECs – Line Class of Service (LNECLS SVC) Documentation Defect

This is to advise that changes to the LNECLS SVC field on the Port Service Screen were made with the ENCORE Release 10.6. These changes were inadvertently omitted from the Data Dictionary and also the Required/Conditional/Optional (R/C/O) tables of the BellSouth Business Rules for Local Ordering (BBR-LO). The Business Rules are associated with Change Request CR0931.

Effective September 13, 2002, the attached copies of the R/C/O tables and Data Dictionary pages should be used when submitting orders for Unbundled Network Element-Platform (UNE-P) Non-Complex (REQTYP M) Residence and Business service.

These changes will be reflected in the next BBR-LO update.

Please contact your BellSouth Local Support Manager with any questions.

Sincerely,

ORIGINAL SIGNED BY JERRY HENDRIX

Jerry Hendrix – Assistant Vice President
BellSouth Interconnection Services

Attachment

Insert in Port Service, Service Detail Section after the LNA field in the Data Element Dictionary.

LNECLS SVC - Line Class of Service

Identifies the type of service requested for this service location.

Valid Entries are:

Residence Basic Class of Service UEPRX

Data Characteristics: 3 or 5 alpha/numeric characters

Example:

UEPRL

UEPRC

Conditional Usage Notes: None

Business Rules:

Rule 1: When the REQTYTYP is M/ACT C/LNA C/TOS 1BM, 2BM, 1AM, or 2AM, to change the Class of Service, the new class of service must be populated in the LNECLS SVC field.

Rule 2: Required when the REQTYTYP M/ACT V, P, Q, or C/LNA N to add a new line.

Rule 3: If this field is not populated on REQTYTYP M/ACT V, P, and Q/ TOS 1BM, 2BM, 1AM or 2AM the line class of service USOC will be derived from the existing Retail USOC to the UNE- P equivalent.

Rule 4: When this field is populated on REQTYTYP M/TOS 1BM, 2BM, 1AM or 2AM with an invalid Line Class of Service USOC the request will be clarified.

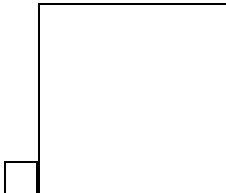

Rule 5: This field is prohibited when REQTYTYP M/LNA P or W.

Rule 6: The Line Class of Service USOC should not be populated in the feature detail section unless it is followed by a valid FID ex: UEPRC/RCU TWC. In this scenario the Line Class of Service USOC should be populated in the LNECLS SVC field and the Feature Detail field.
