**Carrier Notification
SN91083569**

Date: January 24, 2003

To: Competitive Local Exchange Carriers (CLECs)

Subject: CLECs – Update to the BellSouth Local Exchange Navigation System (LENS) User Guide, ENCORE Release 12.0 - Summary of Changes

This is to advise that the LENS User Guide is being re-issued to incorporate the following changes:

- **Unbundled Network Element (UNE)-to-UNE Bulk Migrations**
Bulk orders can now be processed for Local Service Requests (LSR) that migrate existing port/loop combinations services to Loop with Local Number Portability (LNP) services (REQTYP B, ACT V, all LNA V).
- **Access Number for Enhanced MemoryCall®**
The Pre-Order function in LENS will display the access number (CFN-Call Forwarding Number) associated with the Enhanced MemoryCall features (USOCs EMS++) on the Available Features screens.
- **View Complex Customer Service Record (CSR) Sections**
LENS will allow the CLEC to view and print an entire complex CSR.
- **Required CHAN/PAIR2 Field**
LENS now requires the CLEC to enter the CHAN/PAIR2 field when submitting a request for certain 4-wire designed loops.

The updated statements are effective with the implementation of ENCORE Release 12.0 on March 30, 2003.

The updated LENS Users Guide will be available on January 27, 2003. It is recommended that a copy of this letter be placed in your company's current version of the LENS Users Guide until the changes are incorporated in the next update of the LENS Users Guide.

The current LENS Users Guide can be found at the BellSouth Interconnection Services' Web site in the Customer Guides Section at:
