Carrier Notification**SN91083708**

Date: May 27, 2003

To: Competitive Local Exchange Carriers (CLECs)

Subject: CLECs - Updated BellSouth Unbundled Dedicated Transport -
Standalone Unbundled Network Elements (UNE) CLEC Information
Package, Version 10

This is to advise that the BellSouth Unbundled Dedicated Transport – Standalone UNE CLEC Information Package, Version 10, will be updated by May 30, 2003. The update will provide an added set of Service Rearrangements. Service Rearrangements to existing circuits consists of Change in Facility Assignment and Transfer of Ownership as define below.

Change in Facility Assignment is defined as moving a working CLEC circuit from one Connecting Facility Assignment (CFA) to another CFA. This assumes both the old and the new CFAs terminate at the same point of interface in the same building. Executing this service does not impact the minimum billing period.

Transfer of Ownership is defined as changing a facility for all impacted systems that are associated with a change in ownership of that facility for the new owner once the required Letter of Authorization (LOA) is submitted to BellSouth . Additionally, billing and network inventory records will be changed, the latter of which is most important when considering maintenance interface implications.

The Service Rearrangements listed above may be executed via a Local Service Request (LSR). For fifteen (15) or more circuits, a spreadsheet request may be submitted for either type of Service Rearrangement. BellSouth will issue the orders as well as project-manage the rearrangement. In order to implement these services, your company's Interconnection Agreement must be amended to include these services.

This document may be found at the BellSouth Interconnection Services' Web site Located at:
