Date: September 3, 2004

To: Competitive Local Exchange Carriers (CLEC)

Subject: CLECs – (Product/Service) - **REVISED** - Unbundled Network Element-Platform (UNE-P) Customers only - Manual Ordering for Basic and Non-Basic Inside Wiring (Latest revision posted on August 17, 2004)

This is to advise that effective immediately, Local Service Requests (LSRs) submitted for Basic and Non-Basic Inside Wiring and Jacks for REQ TYP M must be submitted manually to the BellSouth Local Carrier Service Center (LCSC). BellSouth will bill the mechanized charge (SOME C) on manual ordering requests for Basic and Non-Basic Inside Wiring and Jacks for REQ TYP M on LSRs ordinarily ordered via an electronic interface.

BellSouth will act in accordance with the Change Control Process (CCP) to enhance the electronic systems to accommodate ordering Basic and Non-Basic Inside Wiring and Jacks on the Port Service screen.

To qualify for the SOME C charge for Basic and Non-Basic Inside Wiring and Jacks for REQ TYP M, requests should be submitted as follows:

1. In addition to other fields required for processing Inside Wiring and Jacks, the following information should be populated on the Port Service (PS) page of the LSR and submitted manually:

- Feature and Feature Detail

Example:

If requesting a jack:

FA = **N**

FEATURE = RJ11C

If requesting wiring:

FA = **N**

FEATURE = VCA

If requesting a network interface:

FA = **N**

FEATURE = NW101

**FEATURE DETAIL – JK POS 99 JK NUM 1**

If requesting a Non Basic USOC:

FA = **N**

FEATURE = NONB6

2. In the REMARKS field of the LSR page, populate the following:

- SOMEK – Jacks/Wiring

This work-around is applicable to the products that are normally processed via the electronic systems. Products that do not qualify for electronic ordering will be billed the SOMAN charge.

Products ordering information can be found at the BellSouth Interconnection Services Web site in the Customer Guide Section located at:
