To: All Asynchronous Transfer Mode (ATM) and Frame Relay Customers

Subject: All ATM and Frame Relay Customers – (Product/Service) - Implementation of Special Provisioning Feature for ATM and Frame Relay Data Products

This is to announce the implementation of Special Provisioning for ATM and Frame Relay data products. The Special Provisioning feature enables the pairing of two (2) circuits together in a special provisioning relationship that is designed to minimize the risk that a single network element will result in a service interruption of both circuits.

This package will be posted to the BellSouth Interconnection Services' Web site on December 16, 2003.

For ordering information, please click on the Web site address listed below and click on the ATM or Frame Relay Ordering Guides.
