

**BellSouth Interconnection Services**

675 West Peachtree Street  
Atlanta, Georgia 30375

**Carrier Notification  
SN91084170**

Date: July 21, 2004

To: Competitive Local Exchange Carriers (CLEC)

Subject: CLECs – (Documentation/Guides) - Update to the BellSouth Local Ordering Handbook (LOH) Version **16.0** for New Local Service Ordering Guide 6 (LSOG 6) and EDI Local Mechanization Specifications 6 (ELMS 6), Release 16.0

This is to advise that BellSouth has identified the following documentation defects in the LOH Version **16.0a** for ELMS 6, Release 16.0.

CCP Number	Description Of The Change
1858	Revised the Conditional Usage notes for the following: Hunting form/screen fields: HID, HLA, HNTYP, HNUM, HTN, LOCNUM (Detail Level), and NOTYP
1922	This update adds the new entry of Z in the Valid Entry note and adds Note 2
1946	Removed BI2, BAN2 and HTQTY where applicable
1947	Modifications to Data Dictionary CHAN/PAIR, CABLE ID, CFA and REQTYF R/C/O tables
1948	Changes are as follows <ul style="list-style-type: none"> <li>▪ For REQTYF A products please change all NCON references in ELMS 6 to NCON (m) and make the field optional.</li> <li>▪ FOR TCIF 9 remove NCON from any REQTYF A tables</li> </ul>
1949	Modified VE note on PROJECT field to (this note is for BOTH maps)  Note 1: For REQTYF B, when the JR field and/or NIDR is populated with Y, if this field is populated the entry in this field must be 15 alpha/numeric  Modified Ported Number field on NP for ELMS 6 only
1950	Modified business rule as follows:  From: Note 4: When the first character of the TOS is 2, the ACT is V with LNA of G and the telephone number being converted or migrated is not the only working line at the service address and the service address has at least one other residential line working, ADL must be populated in this field.  To: Note # When the first character of the TOS is 2, with LNA of G or LNA of N and the telephone number being added, converted or migrated is not the only working line at the service address, ADL must be populated in this field

Please refer to the attachments for specific details of the changes listed above.

These changes will be reflected in the next update of the ELMS 6 Release 16.0/LOH Version **16.0b**, scheduled to be posted on July 26, 2004.

A summary of all changes within this document will be listed in the **Summary of Changes** Section. This update can be found on the BellSouth Interconnection Services Web site in the Customer Guides Section at:

<http://www.interconnection.bellsouth.com/guides/html/leo.html>

Please contact your BellSouth local support manager with any questions.

Sincerely,

**ORIGINAL SIGNED BY JERRY HENDRIX**

Jerry Hendrix – Assistant Vice President  
BellSouth Interconnection Services

**CCP 1858 Attachment Listed Below****HID – Hunt Group Identifier****Hunting Form/Screen**

16.0B(LSOG6 / ELMS6 map)

*Updated: 07/06/04, CRB Issues included: None*Definition:

Identifies the hunt group.

**Definition Notes:**

None

Valid Entries:

N = New Hunt Group Identifier

or

Existing Hunt Group Indicator

Valid Entry Notes:

NOTE 1: When HNTYP is 1, 2, 3 or 4 HID must be N or Existing Hunt Group Indicator up to 3 alphas.

NOTE 2: When HNTYP is 1, 2, 3, 4, 5 or 6 and the HA is populated with N, the HID must be N.

NOTE 3: When HNTYP is 1, 2, 3 or 4 and HA is E, C or D, the HID must be populated with up to 3 alphas.

NOTE 4: When HNTYP is 5 or 6 and HA is D, the HID must be populated with up to 4 numerics.

Data Characteristics:

Up to 3 alpha characters or up to 4 numeric characters

Examples:

N

A (Existing Hunt Group Indicator)

30 (Existing Multiline Hunt Group Indicator)

Conditional Usage Notes:

Note 1: Required when HA is populated.

Note 2: Required when the MI field on the LSR is A, or B and the HA field is N or D.

~~Note 3: Prohibited when the MI field on the LSR is A or B and the HA field is E or C.~~Business Rules

None

## HLA – Hunt Line Activity

### Hunting Form/Screen

16.0B(LSOG6 / ELMS6 map)

Updated: 07/06/04, CRB Issues included: None

#### Definition:

Identifies the activity associated with the hunt group on this request.

#### **Definition Notes:**

None

#### Valid Entries:

Entry	Description
N	New / Install
E	Existing Line / No Change
D	Disconnect or Delete of Hunt Line

#### Valid Entry Notes:

NOTE 1: HLA of N prohibited when HA is E.

NOTE 2: HLA of E prohibited when HA is N.

NOTE 3: HLA of D prohibited when HA is N or E.

#### Data Characteristics:

1 alpha character

#### Examples:

E

#### Conditional Usage Notes:

Note 1: Required when the MI field on the LSR is A or B and the HA field is N.

Note 2: Prohibited when the MI field on the LSR is A or B and the HA field is E or C.

Note 3: Required when the ACT is N and the HA is N.

Note 4: Prohibited when the ACT is N and the HA is E, C or D.

Note 5: Required when the ACT is C and the HA is N, E, **or C.** ~~or D.~~

Note 6: Prohibited when the ACT is D and the HA is N, E, C or D.

Note 7: Required when the ACT is T and the HA is N.

Note 8: Prohibited when the ACT is T and the HA is E, C or D.

Note 9: Required when the ACT is V and the HA is N.

#### Business Rules

None

\*\*\*\*\* End of definition for HLA / Hunting form screen \*\*\*\*\*

## HNTYP – Hunt Type Code

### Hunting Form/Screen

16.0B(LSOG6 / ELMS6 map)

*Updated: 07/06/04, CRB Issues included: None*

Definition:

Identifies the type of hunting involved.

### Definition Notes:

None

Valid Entries:

Entry	Description
1	Preferential
2	Sequential Series Complete
3	Non-Sequential Series Complete
4	Circular
5	Multi-line series completion with terminal or maintenance numbers
6	Multi-line circular with terminal numbers

Valid Entry Notes:

None

Data Characteristics:

1 numeric character

Examples:

1

Conditional Usage Notes:

Note 1: Required when HA Field is N and the ACT is N, C, T or V.

Note 2: Required when HA Field is E, C or D and the ACT is C.

Note 3: Required when HA Field is D and the ACT is V.

~~Note 4: Prohibited when the MI field on the LSR is A or B and the HA field is E or C.~~

Note 54: Required when the MI field on the LSR is A or B and the HA field is N or D.

Business Rules

None

\*\*\*\*\* End of definition for HNTYP / Hunting form screen \*\*\*\*\*

## HNUM – Hunt Number

### Hunting Form/Screen

16.0B(LSOG6 / ELMS6 map)

*Updated: 07/06/04, CRB Issues included: None*

Definition:

SN9108

Identifies the Hunt Group as a unique number and each additional occurrence as a unique number.

**Definition Notes:**

NOTE 1: The values are to be assigned consecutively and must be unique throughout the request at the LOCNUM level.

Valid Entries:

None

Valid Entry Notes:

None

Data Characteristics:

5 numeric characters

Examples:

00003

Conditional Usage Notes:

Note 1: Required when the ACT is N or T and the HA is N.

Note 2: Required when the ACT is C and the HA field is populated.

Note 3: Required when the ACT is V and the HA field is populated with N or D.

Note 4: Required when the MI field on the LSR is A or B and the HA field is populated with N.

~~Note 5: Prohibited when the MI field on the LSR is A or B and the HA field is populated with E or C.~~

Business Rules

None

\*\*\*\*\* End of definition for HNUM / Hunting form screen \*\*\*\*\*

**HTN – Hunting Telephone Number****Hunting Form/Screen**

16.0B(LSOG6 / ELMS6 map)

Updated: 07/06/04, CRB Issues included: None

Definition:

Identifies the hunting number for this sequence position in the Hunt Group.

**Definition Notes:**

None

Valid Entries:

Telephone Number

Terminal Number

Valid Entry Notes:

None

Data Characteristics:

Up to 15 alpha/numeric characters

Examples:

T0001-0020

T0001

Conditional Usage Notes:

Note 1: Required when the HA is N, and the HLA is N.

Note 2: Prohibited when the HA is N and the HLA is E or D.

Note 3: Prohibited when the HA is E and the HLA is N or D.

Note 4: Required when the HA is E and the HLA is E.

Note 5: Required when the HA is C and the HLA is N, E ~~or D~~.

Note 6: Prohibited when the HA is D and the HLA is N or E.

Note 7: Required when the NOTYP field is populated.

Business Rules

Rule 1: When HNTYP is 1, 2, 3 or 4 and the HA is N the number of telephone numbers in this field must not exceed 16 in a given HID.

Rule 2: When 1st and 2nd characters of TOS is 2A, in Alabama, Georgia, Kentucky, Mississippi, South Carolina and North Carolina the number of telephone numbers in this field must not exceed 3 in a given hunt group (HID).

Rule 3: When the 1st and 2nd characters of TOS is 2A in Florida the number of telephone numbers in HTN must not exceed 5 in a given hunt group (HID).

Rule 4: When the 1st and 2nd characters of TOS is 2A in Louisiana the number of telephone numbers in HTN must not exceed 10 in a given hunt group (HID).

Rule 5: HTN not allowed in more than one HTSEQ when the HLA is N or E.

Rule 6: Telephone numbers or terminal numbers when scoped must be consecutive numbers.

\*\*\*\*\* End of definition for HTN / Hunting form screen \*\*\*\*\*  
end of definition for HTSEQ / Hunting form screen \*\*\*\*\*

## LOCNUM – Location Number [of Hunt Group] (Detail Level)

### Hunting Form/Screen

16.0B(LSOG6 / ELMS6 map)

*Updated: 07/06/04, CRB Issues included: None*Definition:

Identifies the service location number for the service requested.

### Definition Notes:

NOTE 1: The Location Number is assigned by the customer and is retained until the service is disconnected.

Valid Entries:

None

Valid Entry Notes:

None

Data Characteristics:

3 numeric characters

Examples:

002

Conditional Usage Notes:

~~Note 1: Required when the ACT is C, or V and the HA field is populated with D.~~

Business Rules

Rule 1: LOCNUM of Hunting, if populated, must be identical to LOCNUM of the End User location on this LSR.

\*\*\*\* End of definition for LOCNUM / Hunting form screen \*\*\*\*

## NOTYP – Number Type

### Hunting Form/Screen

16.0B(LSOG6 / ELMS6 map)

Updated: 07/06/04, CRB Issues included: None

Definition:

Identifies the type of number entered in the HTN field.

### Definition Notes:

None

Valid Entries:

Entry	Description
T	Telephone Number
L	Terminal Number

Valid Entry Notes:

NOTE 1: NOTYP must be "L" if HNTYP is 5 or 6.

NOTE 2: NOTYP must be "T" if HNTYP is 1, 2, 3 or 4.

Data Characteristics:

1 alpha character

Examples:

T

Conditional Usage Notes:

Note 1: Required when HTN is populated.

Note 2: Required when the HA is N and the HLA is N.

Note 3: Prohibited when the HA is N and the HLA is E or D.

Note 4: Prohibited when the HA is E and the HLA is N or D.

Note 5: Required when the HA is E and the HLA is E.

Note 6: Required when the HA is C and the HLA is N **or** E. ~~or D.~~

Note 7: Prohibited when the HA is D and the HLA is N, E or D.

Business Rules

None

\*\*\*\*\* End of definition for NOTYP / Hunting form screen \*\*\*\*\*

**CCP 1922 Attachment Listed Below****CABLE ID – Cable Identification****LS Form/Screen**

16.0B(LSOG6 / ELMS6 map)

*CRB Issues included: None***Definition:**

Identifies the provider's central office cable to be connected to the customer's collocated equipment.

Definition Notes:

None

**Valid Entries:**

None

Valid Entry Notes:

NOTE 1: The first character of the CABLE ID must be "P", "X", "Z" or "V".

**Data Characteristics:**

5 alpha/numeric characters

**Examples:**

PXX01

**Conditional Usage Notes:**

Note 1: For the following REQ TYP A products, CABLE ID must be populated when CHAN/PAIR is populated and CFA is not populated, however, CABLE ID must not be populated if CFA is populated:

- Analog Designed Loop
- Digital Data Designed Loop (DS0)
- Digital Designed Loop Basic Rate ISDN
- Universal Digital Channel (UDC)
- EELs 4W VG
- EELs 56/64 kbps.

Manual

Note 2: For the following REQ TYP A product, the CABLE ID, CHAN / PAIR and CFA must be populated when the LNA is N or V:

- Unbundled Sub Loop Feeder

## **CFA – Connecting Facility Assignment**

### **LS Form/Screen**

16.0B(LSOG6 / ELMS6 map)

*CRB Issues included: None*

#### **Definition:**

Identifies the provider's carrier system and channel to be used.

#### **Definition Notes:**

NOTE 1: The range of assignments should be provided on the DL (Design Layout) during the provisioning of the service.

NOTE 2: The customer specifies the particular carrier system and channel or channels to be utilized.

NOTE 3: All element entries of the Connecting Facility Assignment are left justified with no trailing spaces.

#### **Valid Entries:**

Facility Identification: Description

Facility Designation: Uniquely identifies a particular facility type between two terminal locations (up to 5 characters followed by a delimiter).

Facility Type: Usually identified through the use of a code set found in the Telcordia Technologies (formerly known as BellCore) Practice BR-795-450-100 (up to 6 characters followed by a delimiter).

Channel/Pair Number: Number of the facility that is being used to provide the service (up to 5 characters followed by a delimiter).

"A" Location: Location of the facility termination that has the lower alphanumeric CLLI code (8-11 characters, followed by a delimiter).

"Z" Location: Location of the facility termination that has the higher alphanumeric CLLI code (8-11 characters).

#### **Valid Entry Notes:**

NOTE 1: Virgules ( / ) are used as delimiters to separate the different elements of the CFA.

#### **Data Characteristics:**

Up to 42 alpha/numeric characters

#### **Examples:**

101/T1/3/BSTMAGTOGO/BSTMATCG0

#### **Conditional Usage Notes:**

Note 1: Required when utilizing Hi-Cap facilities and the customer has assignment control, otherwise optional.

Note 2: For the following REQTYP A products, CFA must be populated when CABLE ID and CHAN/PAIR are not populated, however, CFA must not be populated if CABLE ID and CHAN/PAIR are populated:

- Analog Designed Loop
- Digital Data Designed Loop (DS0)
- Digital Designed Loop Basic Rate ISDN
- Universal Digital Channel (UDC)
- EELs 4W VG
  - EELs 56/64 kbps.

Manual

**Note: For the following REQTYP A product, the CABLE ID, CHAN / PAIR and CFA must be populated when the LNA is N or V:**

- Unbundled Sub Loop Feeder

### ***Business Rules***

Manual:

Rule 1: When ordering a DS-1, DS-3 or STS-1 Interoffice Channel (IOC), 2 TxTIE CFAs are required. Show the termination CFA in the REMARKS field on the LS form as "SCFA" (Secondary CFA).

Electronic:

Rule 2: For REQTYP A Digital Designed DS-1 Loop and for all CFAs on the LSR either the (LOC A) CLLI value in CFA or the (LOC Z) CLLI value in CFA must match the value of ACTL.

## CHAN/PAIR – Channel/Pair

### LS Form/Screen

16.0B(LSOG6 / ELMS6 map)

*CRB Issues included: None*

#### **Definition:**

Identifies the specific channel or pair within the provider's cable to be used for connection.

#### Definition Notes:

None

#### **Valid Entries:**

None

#### Valid Entry Notes:

Note 1: When the 2nd character of the TOS is P or R, this field must be 4 alpha/numerics.

Note 2: When populated BellSouth allows only a 4 numeric CHAN/PAIR to be populated in this field.

#### **Data Characteristics:**

Up to 5 alpha/numeric characters

#### **Examples:**

24

#### **Conditional Usage Notes:**

Note 1: For the following REQTYP A products, CHAN/PAIR must be populated when CABLE ID is populated and CFA is not populated, however, CHAN/PAIR must not be populated if CFA is populated:

- Analog Designed Loop
- Digital Data Designed Loop (DS0)
- Digital Designed Loop Basic Rate ISDN
- Universal Digital Channel (UDC)
- EELs 4W VG
  - EELs 56/64 kbps.

Manual

**Note:** For the following REQTYP A product, the CABLE ID, CHAN / PAIR and CFA must be populated when the LNA is N or V:

- Unbundled Sub Loop Feeder

#### **Business Rules**

Electronic:

Rule 1: When the 2nd character of the TOS is P or R (DLEC Owned Splitter) this field must not match the information populated in the CHAN/PAIR 2 field.

\*\*\*\*\* End of definition for CHAN/PAIR / LS form screen \*\*\*\*\*

**ELMS 6 Unbundled Sub-Loop Feeder**

**Product Description**

The Unbundled Sub-Loop Feeder (USLF) is a dedicated transmission facility that BellSouth provides from a termination point, Main Distribution Frame (MDF) or central office terminal (COT), in the BellSouth central office to a cross-connect point within the BellSouth remote terminal (RT), cross-connect box or other remote structure. This element will allow for the connection of the CLEC's loop distribution elements onto BellSouth's feeder system.

The USLF can be configured in the same manner as Unbundled Voice Loops and Unbundled Digital

Loops as listed below:

- 2 Wire Voice USLF
- 4 Wire Voice USLF
- 2 Wire ISDN USLF
- 2 Wire UDC USLF
- 4 Wire DS0 USLF (2.4, 4.8, 9.2, 19.2, 56 & 64 Kbps)
- 4 Wire DS1 USLF

Product Listing

Unbundled Sub-Loop Feeder (DS1 and below)

Tables to request Unbundled Sub-Loop Feeder are located in this section.

Ordering Forms/Screens

The following chart illustrates the required, conditional and optional forms/screens for ordering this service. Detailed information will follow to assist you in filling out each of these forms/screens.

Forms/Screens Unbundled Sub-Loops												
SI	LSR	Hunting	EU	DL	RS	DRS	PS	NP	LS	LSNP	RPL	Proprietary
R	R		R						R			
R = Required C = Conditional O = Optional												

Completing the DL Form/Screen

If directory listings are required, refer to **REQTYP J** for more information on completing the DL forms/screens.

Completing the LSR and EU Forms/Screens

**Account level activities (ACT) apply to the entire account.** A complete list of ACTs and their definition can be found in the Data Dictionary entry for ACT.

The following chart shows all of the valid account level activities for this service.

Valid Account Level Activities Unbundled Sub-Loops										
N	C	D	T	R	V	S	B	W	L	Y
X		X	-	-	X	-	-	-	-	-
"X" denotes valid account level activities. A dash (-) indicates a non-valid account level activity.										

The Required, Conditional and Optional (R/C/O) fields on the LSR and EU forms/screens will be given for every valid ACT code in the **ACT Tables** section.

Completing the LS Form/Screen

The Loop Service (LS) form/screen may be required or invalid depending on the account level activity. Each account level activity has valid Line Level Activities (LNAs). These LNAs determine how, or if, the LS form/screen should be populated. A complete list of LNAs and their definition can be found in the Data Dictionary entry for LNA.

The following chart gives the valid LNAs for each account level activity (ACT) and the associated LS form/screen usage for this service.

If ACT is:	Then LNA is:	And LS form is:
N	N	Required
D	D	Required
V	V	Required

The Required, Conditional and Optional (R/C/O) fields for the Loop Service (LS) form/screen are listed according to the Line Level Activity (LNA) in the **LNA Tables** Section.

## CCP 1946 Attachment Listed Below

### Reqtyp N

#### *DID/DOD/PBX*

BellSouth utilizes a modified version of the OBF LSOG 6/ELMS 6 DID/DOD/PBX form/screen effective with the ELMS 6 implementation. This new and improved form allows ordering for the following platforms (UNE Port, UNE- P/WLP and Resale) utilizing REQTYP N for all three products.

The P (Product) field on the LSR identifies the type of platform product being ordered (e.g., Resale).

#### **Form Restriction:**

Separate forms/screens are required for each platform (EX: Resale, UNE Port and UNE- P/WLP may not be combined on the same LSR request)

#### **Form Attributes:**

The form is uniquely divided into sections, which accommodate the following ordering scenarios:

- Telephone number requests
- Trunk Requests
- Trunk and Telephone number requests

#### Form Structure

**Common Section**-This section contains fields that are specific to both trunks and telephone numbers and is always required. The AD field in this section determines whether the TNA, TACT, or TACT/TNA R/C/O table is used to complete the LSR package.

**Telephone Number Section**-This section is used to order blocks or individual telephone numbers for DID/DOD, when no trunk or other service order activity is involved.

**Trunk Service Detail Section**-The trunk detail section is used to order trunks.

**Feature Section**-This section may be used in conjunction with the trunk section and is not applicable for the telephone number section.

**Transfer of Calls Detail Section**-This section may be used in conjunction with the Telephone Number or Trunk Service Detail Section.

The R/C/O tables are divided into the following categories:

**TNA**- Telephone Number Section

**TACT**-Trunk Service Detail Section

**TACT/TNA**-Telephone Number Section and Trunk Detail Section

**Note:** The Common Section, Feature Section, and Transfer of Calls Detail Section fields are incorporated in the appropriate TNA, TACT or a combination of TNA/TACT.

Forms/Screens for DID/DOD/PBX	
AD	A
TNA	N C D V W X

Forms/Screens for DID/DOD/PBX	
AD	B
TACT	N C D V W X P

Forms/Screens for DID/DOD/PBX	
AD	C
TACT/TNA	N C D V W X P

**NOTE: When the AD is C both TNA and TACT are applicable. Use the R/C/O Tables at the TNA and TACT level to complete the form.**

The following chart gives the valid TNA(S) for each account level activity (ACT)

If ACT is:	Then TNA is:	DDPS Form/Screen is:
N	N	Required
C	N, C, D or X	Required
D	N/A	N/A
V	D, N, V or X	Required
T	N or C	Required
W	N/A	N/A

If ACT is:	Then TACT is:	DDPS Form/Screen is:
N	N	Required
C	N, C, D, P or X	Required
D	N/A	N/A
V	D, N, V, G, P, W or X	Required
T	N or C	Required
W	N/A	N/A

Note: A combination of TNA and TACT may be used when the AD=C.

***DID Resale Service***

*Product Listing*

DID Resale

Direct Inward Dialing (DID) service is an inward only, trunk side service that enables customers to have fewer DID trunks/NARs than telephone numbers, while bypassing the PBX attendant.

With Non-DID PBX Service, inward or combination trunks originate in the central office and terminate in the customer's PBX common equipment. The PBX equipment generally switches each call to the PBX attendant, who screens the call and transfers it to the desired station.

With DID service, each PBX station to be dialed directly is assigned a seven-digit exchange telephone number. When one of these DID numbers is dialed directly, the central office equipment:

- Determines the signaling needed by the PBX
- Determines the number of digits to send
- Determines the trunks/NARs for sending the message
- Routes the incoming call to an inward trunk
- Passes dialed digit information to the customer's PBX so that the PBX may route the call directly to the desired station.

There are three major components of DID service:

- DID numbers (sold in blocks of 20)
- DID trunks or NARs
- DID terminations (one per DID trunk or NAR).

DID numbers and DID trunks are combined to provide DID Service. The number of DID trunks per DID station is dependent on the volume of anticipated incoming traffic. If the customer wants a combination of DID trunks and other trunks that go to an attendant, two or more Trunk Groups must be arranged.

A customer who anticipates growth may also reserve blocks of DID numbers. For example, if the customer's working DID numbers range from 6500 to 6559, the customer may wish to reserve two more blocks of 20 numbers, 6560 to 6599, so that their DID numbers may remain consecutive as the business grows. Rules and billing for reserved numbers vary by state. Refer to the State Tariffs for additional information.

DID is generally available in most central offices; however PSIMS should be checked for available facilities and the CRSG will provide the Route Index and Trunk Group Number required for ordering and provisioning. The customer is responsible for providing interception of calls to vacant or non-working assigned DID numbers.

When ordering new DID arrangements the customer must provide the following:

Type Of Start Dial Signal:

- **Wink Start:** The PBX can identify the first 3 or 4 digits of the station number being accessed. In order to identify the last 3 or 4 digits the central office must signal back to the PBX to prepare to accept these digits. The PBX then signals back to the central office to send the digits
- **Immediate Start:** As soon as the central office seizes a trunk, the central office machine immediately sends the called station digits back to the PBX for decoding
- **Delay Dial:** Same as Wink Start except signals are not used. Delayed time intervals are used in place of signals to perform the identification process.

Other Optional Types Of Signaling:

- **Dial Pulse:** transmits pulses that equate to rotary dial service. This is an automatic default that does not require an additional USOC
- **Multi-Frequency:** transmits tones that are similar to TouchTone.
- **Dual Tone Multi-Frequency:** transmits faster TouchTone signaling than Multi-frequency.

Ordering Forms/Screens

The following chart illustrates the required, conditional and optional forms/screens for ordering this service. Detailed information will follow to assist you in filling out each of these forms/screens.

Forms/Screens DID Resale Service											
LSR	Hunting	EU	DL	RS	DDPS	PS	NP	LS	LSNP	RPL	
R		R	C [1]		R						
R = Required C = Conditional O = Optional											

[1] = DL form/screen is required when the ACT is N or T.

Completing the DL Form/Screen

If directory listings are required, refer to **REQTYP J** for more information on completing the DL form/screen.

Completing the LSR and EU Forms/Screens

**Account level activities (ACT)** apply to the entire account. A complete list of ACTs and their definition can be found in the Data Dictionary entry for ACT.

The following chart shows all of the valid account level activities for this service.

Valid Account Level Activities DID Resale Service
--

N	C	D	R	V	S	B	W	L	T	Y
X	X	X		X			X		X	
Note: "X" denotes valid account level activities. A dash (-) indicates a non-valid account level activity.										

**Electronic**

**Note:** For REQ TYP N ACT C (Resale) the only valid request are:

- Adding Telephone Numbers to an existing Block of Numbers
- Adding a Block of Telephone Numbers to an existing Block of Numbers.

The Required, Conditional and Optional (R/C/O) fields on the LSR and EU forms/screens will be given for every valid ACT code in the **ACT Tables** section.

RCO Tables

*The following tables show the Required, Conditional and Optional (R/C/O) fields on the valid forms/screens for this product. All unmentioned fields are either invalid, not applicable, prohibited or not supported. When fields are populated which are not supported by BellSouth, these not supported fields will be ignored. Populating any other fields may result in a fatal reject or a clarification of the service request.*

Please note the following codes:

- Optional fields marked with an asterisk (\*) force at least one of the conditional fields to become required when populated.
- Fields used only for manual orders are followed by (M).
- Fields used only for electronic orders are followed by (E).
- For fields marked with a DOUBLE asterisk (\*\*) please refer to the Data Dictionary for clarification.

See the Data Dictionary Section for additional information on each field.

***UNE-P/WLP 2-Wire Direct Inward Dial (DID) Trunk Port and Voice Grade Loop Combination (2-wire DID UNE Combination)***

Product Listing

***UNE-P/WLP 2-Wire Direct Inward Dial (DID) Trunk Port and Voice Grade Loop Combination (2-wire DID UNE Combination)***

The 2-Wire DID trunk Port and Voice Grade Loop Combination is a **DESIGNED** service that combines a 2-Wire DID Trunk Port, Switching functionality, and a voice grade loop to create and end user to end user transmission path that provides DID local exchange service. This service is *only available* when a combination of elements currently exists on the BellSouth® network at the premise location. CLECs requesting service where the combination of elements to do exists at the premise location must combine the UNEs themselves in their collocation space.

**Note:** When both PBX and DID Trunks are on the same request, the second character of the TOS should be "Q".

Ordering Forms/Screens

The following chart illustrates the required, conditional and optional forms/screens for ordering this service. Detailed information will follow to assist you in filling out each of these forms/screens.

Forms/Screens											
UNE-P/WLP DID UNE Combination											
LSR	Hunting	EU	DL	RS		PS	NP	LS	LSNP	RPL	

					DDPS						
R		R	C [1]		R						
R = Required C = Conditional O = Optional											

[1] = DL form/screen is required when the ACT is N ~~or T~~.

Completing the DL Form/Screen

If directory listings are required, refer to **REQTYP J** for more information on completing the DL form/screen.

Completing the LSR and EU Forms/Screens

**Account level activities (ACT) apply to the entire account.** A complete list of ACTs and their definition can be found in the Data Dictionary entry for ACT.

The following chart shows all of the valid account level activities for this service.

Valid Account Level Activities UNE-P/WLP DID UNE Combination										
N	C	D	R	V	S	B	W	L	T	Y
X	X	X		X						
Note: "X" denotes valid account level activities. A dash (-) indicates a non-valid account level activity.										

**Electronic**

**Note:** For REQTYP N ACT C (Resale) the only valid request are:

- Adding Telephone Numbers to an existing Block of Numbers
- Adding a Block of Telephone Numbers to an existing Block of Numbers.

The Required, Conditional and Optional (R/C/O) fields on the LSR and EU forms/screens will be given for every valid ACT code in the **ACT Tables** section.

RCO Tables

*The following tables show the Required, Conditional and Optional (R/C/O) fields on the valid forms/screens for this product. All unmentioned fields are either invalid, not applicable, prohibited or not supported. When fields are populated which are not supported by BellSouth, these not supported fields will be ignored. Populating any other fields may result in a fatal reject or a clarification of the service request.*

*Please note the following codes:*

- Optional fields marked with an asterisk (\*) force at least one of the conditional fields to become required when populated.
- Fields used only for manual orders are followed by (M).
- Fields used only for electronic orders are followed by (E).
- For fields marked with a DOUBLE asterisk (\*\*) please refer to the Data Dictionary for clarification.

See the Data Dictionary Section for additional information on each field.

**PBX Resale Service**
**UNE- Port Service (PBX Stand Alone Port)**
Product Listing
Port Service (PBX Stand Alone Port)

A port is a point of access facility for signal transmission from the distribution frame in the central office to the switch, including the line card.

Ordering Forms/Screens

The following chart illustrates the required, conditional and optional forms/screens for ordering this service. Detailed information will follow to assist you in filling out each of these forms/screens.

Forms/Screens UNE- PBX										
LSR	Hunting	EU	DL	RS	DDPS	PS	NP	LS	LSNP	RPL
R	O [1]	R	C [2]	<del>C</del> [3]	R					
R = Required C = Conditional O = Optional										

[1] = Hunting is optional only when ACT is N, C, ~~T~~ or V. Otherwise, Hunting is prohibited.

[2] = DL form/screen is required when the ACT is N ~~or T~~.

~~[3] = RS form/screen is required only when the ACT is N, C, T or V. Otherwise, the RS form/screen is not required.~~

Completing the DL Form/Screen

If directory listings are required, refer to **REQTYP J** for more information on completing the DL form/screen.

Completing the HUNTING Section on the LSR-HGI Form/Screen

Hunting is an optional feature only when the ACT is N, C, T or V. For more information on Hunting, refer to the Hunting Section.

**Note:** When ordering Hunting Service in conjunction with other service(s) refer to the Hunting section of the LOH-Local Ordering Handbook for processing the hunting portion of the LSR request.

Completing the LSR and EU Forms/Screens

**Account level activities (ACT)** apply to the entire account. A complete list of ACTs and their definition can be found in the Data Dictionary entry for ACT.

The following chart shows all of the valid account level activities for this service.

Valid Account Level Activities UNE-PBX Stand Alone Port										
N	C	D	R	V	S	B	W	L	T	Y
X	X	X								
Note: "X" denotes valid account level activities. A dash (-) indicates a non-valid account level activity.										

The Required, Conditional and Optional (R/C/O) fields on the LSR and EU forms/screens will be given for every valid ACT code in the **ACT Tables** section.

### RCO Tables

The following tables show the Required, Conditional and Optional (R/C/O) fields on the valid forms/screens for this product. All unmentioned fields are either invalid, not applicable, prohibited or not supported. When fields are populated which are not supported by BellSouth, these not supported fields will be ignored. Populating any other fields may result in a fatal reject or a clarification of the service request.

Please note the following codes:

- Optional fields marked with an asterisk (\*) force at least one of the conditional fields to become required when populated.
- Fields used only for manual orders are followed by (M).
- Fields used only for electronic orders are followed by (E).
- For fields marked with a DOUBLE asterisk (\*\*) please refer to the Data Dictionary for clarification.

See the Data Dictionary Section for additional information on each field.

**UNE-P/WLP- PBX UNE Combo (2-wire Voice Grade Port and Voice Grade Loop Combination)**

Product Listing

UNE-P/WLP PBX UNE Combo (2-wire Voice Grade Port and Voice Grade Loop Combination)

This service is defined as a combined unbundled 2-Wire line termination Loop and Port UNE Combination. The 2-Wire voice grade port and voice grade loop combination is an offering that combines a 2 Wire voice grade **measured** port switching functionality shared interoffice transport tandem switching across a connect and a voice grade loop to create an end user to end user transmission path that provides basic local exchange service. This service includes access to all of the features, functions and capabilities that the central office switch is capable of providing. This service emulates the BellSouth® Retail PBX offering. This service is available for New, Subsequent Activity, Disconnect, Conversion/Switch-As-Is, and Conversion/Switch As Specified. This service will provide the equivalent of:

- 2-way PBX Business Combination Trunks
- 1-way PBX Business Out-Dial Trunks
- 1-way PBX Business Inward Trunks (Non-DID)
- Residence PBX Service - (2-way Trunk).

**Note:** When both PBX and DID Trunks are on the same request, the second character of the TOS should be "Q".

Based on the service, the following matrix indicates the proper department to receive the order request forms.

When ordering services through the LCSC, the CLEC should submit the LSR, EU, Port Service (PS) (or product specific form for complex services), and Directory Listing / Directory Service Caption Request forms/screens (if applicable).

The sections are ordered as follows:

- 2-wire Voice Grade Port, and
- Voice Grade Loop Combination.

Ordering Forms/Screens

The following chart illustrates the required, conditional and optional forms/screens for ordering this service. Detailed information will follow to assist you in filling out each of these forms/screens.

Forms/Screens UNE-P/WLP PBX										
LSR	Hunting	EU	DL	RS	DDPS	PS	NP	LS	LSNP	RPL
R	O [1]	R	C [2]	<del>R</del> [3]	R					
R = Required C = Conditional O = Optional										

[1] = Hunting is optional only when ACT is N, C, ~~T~~ or V. Otherwise, Hunting is prohibited.

[2] = DL form/screen is required when the ACT is N ~~or T~~.

~~[3] = RS form/screen is required only when the ACT is N, C, T or V. Otherwise, the RS form/screen is not required.~~

Completing the DL Form/Screen

If directory listings are required, refer to **REQTYP J** for more information on completing the DL form/screen.

Completing the HUNTING Section on the LSR-HGI Form/Screen

Hunting is an optional feature only when the ACT is N, C, ~~T~~ or V. For more information on Hunting, refer to the Hunting Section.

**Note:** When ordering Hunting Service in conjunction with other service(s) refer to the Hunting section of the LOH-Local Ordering Handbook for processing the hunting portion of the LSR request.

Completing the LSR and EU Forms/Screens

**Account level activities (ACT)** apply to the entire account. A complete list of ACTs and their definition can be found in the Data Dictionary entry for ACT.

The following chart shows all of the valid account level activities for this service.

Valid Account Level Activities UNE-P/WLP PBX UNE Combo										
N	C	D	R	V	S	B	W	L	T	Y
X	X	X		X						

Note: "X" denotes valid account level activities. A dash (-) indicates a non-valid account level activity.

The Required, Conditional and Optional (R/C/O) fields on the LSR and EU forms/screens will be given for every valid ACT code in the **ACT Tables** section.

**RCO Tables**

The following tables show the Required, Conditional and Optional (R/C/O) fields on the valid forms/screens for this product. All unmentioned fields are either invalid, not applicable, prohibited or not supported. When fields are populated which are not supported by BellSouth, these not supported fields will be ignored. Populating any other fields may result in a fatal reject or a clarification of the service request.

Please note the following codes:

- Optional fields marked with an asterisk (\*) force at least one of the conditional fields to become required when populated.
- Fields used only for manual orders are followed by (M).
- Fields used only for electronic orders are followed by (E).
- For fields marked with a DOUBLE asterisk (\*\*) please refer to the Data Dictionary for clarification.

See the Data Dictionary Section for additional information on each field.

**PBX Resale Service**

Product Listing

Private Branch Exchange service (PBX) Resale Service

Resale Services are those bundled services where the service provider is different from the network provider. Competitive Local Exchange Carriers (CLECs) can purchase telecommunications products, features and services from Local Exchange Carriers such as BellSouth®, for resale to their customers.

Private Branch Exchange Service, commonly known as PBX Service, provides various arrangements of switching and control equipment connecting users to local, long distance and private networks in addition to supporting communication between station users. The PBX System switching and control equipment is located on the customer side of the network interface. The customer is responsible for ordering services and options that are compatible with their PBX switch and maintaining hardware and software changes from the Network Interface to the PBX Switch as needed.

**Note:** When both PBX and DID Trunks are on the same request, the second character of the TOS should be "Q".

Ordering Forms/Screens

The following chart illustrates the required, conditional and optional forms/screens for ordering this service. Detailed information will follow to assist you in filling out each of these forms/screens.

Forms/Screens PBX										
LSR	Hunting	EU	DL	RS	DDPS	PS	NP	LS	LSNP	RPL
R	O [1]	R	C [2]	€ [3]	R					
R = Required C = Conditional O = Optional										

[1] = Hunting is optional only when ACT is N, C, T or V. Otherwise, Hunting is prohibited.

[2] = DL form/screen is required when the ACT is N or T.

~~[3] = RS form/screen is required only when the ACT is N, C, T or V. Otherwise, the RS form/screen is not required.~~

Completing the DL Form/Screen

If directory listings are required, refer to **REQTYP J** for more information on completing the DL form/screen.

Completing the HUNTING Section on the LSR-HGI Form/Screen

Hunting is an optional feature only when the ACT is N, C, T or V. For more information on Hunting, refer to the Hunting Section.

**Note:** When ordering Hunting Service in conjunction with other service(s) refer to the Hunting section of the LOH-Local Ordering Handbook for processing the hunting portion of the LSR request.

Completing the LSR and EU Forms/Screens

**Account level activities (ACT) apply to the entire account.** A complete list of ACTs and their definition can be found in the Data Dictionary entry for ACT.

The following chart shows all of the valid account level activities for this service.

Valid Account Level Activities PBX Resale Service										
N	C	D	R	V	S	B	W	L	T	Y
X	X	X		X			X		X	

Note: "X" denotes valid account level activities. A dash (-) indicates a non-valid account level activity.

The Required, Conditional and Optional forms/screens will be given Note to documenter: Please be aware there may be multiple issues on this PRODUCT. section.

RCO Tables

The following tables show the Required, Conditional and Optional (R/C/O) fields on the valid forms/screens for this product. All unmentioned fields are either invalid, not applicable, prohibited or not supported. When fields are populated which are not supported by BellSouth, these not supported fields will be ignored. Populating any other fields may result in a fatal reject or a clarification of the service request.

Please note the following codes:

- Optional fields marked with an asterisk (\*) force at least one of the conditional fields to become required when populated.
- Fields used only for manual orders are followed by (M).
- Fields used only for electronic orders are followed by (E).
- For fields marked with a DOUBLE asterisk (\*\*) please refer to the Data Dictionary for clarification.

See the Data Dictionary Section for additional information on each field.

## RCO Tables

The following tables show the Required, Conditional and Optional (R/C/O) fields on the valid forms/screens for this product. All unmentioned fields are either invalid, not applicable, prohibited or not supported. When fields are populated which are not supported by BellSouth, these not supported fields will be ignored. Populating any other fields may result in a fatal reject or a clarification of the service request.

Please note the following codes:

- Optional fields marked with an asterisk (\*) force at least one of the conditional fields to become required when populated.
- Fields used only for manual orders are followed by (M).
- Fields used only for electronic orders are followed by (E).
- For fields marked with a DOUBLE asterisk (\*\*) please refer to the Data Dictionary for clarification.

See the Data Dictionary Section for additional information on each field.

PBX Resale Service

Product Listing

Private Branch Exchange service (PBX) Resale Service

Resale Services are those bundled services where the service provider is different from the network provider. Competitive Local Exchange Carriers (CLECs) can purchase telecommunications products, features and services from Local Exchange Carriers such as BellSouth®, for resale to their customers.

Private Branch Exchange Service, commonly known as PBX Service, provides various arrangements of switching and control equipment connecting users to local, long distance and private networks in addition to supporting communication between station users. The PBX System switching and control equipment is located on the customer side of the network interface. The customer is responsible for ordering services and options that are compatible with their PBX switch and maintaining hardware and software changes from the Network Interface to the PBX Switch as needed.

**Note:** When both PBX and DID Trunks are on the same request, the second character of the TOS should be "Q".

Ordering Forms/Screens

The following chart illustrates the required, conditional and optional forms/screens for ordering this service. Detailed information will follow to assist you in filling out each of these forms/screens.

Forms/Screens PBX										
LSR	Hunting	EU	DL	RS	DDPS	PS	NP	LS	LSNP	RPL
R	O [1]	R	C [2]	C [3]	R					
R = Required C = Conditional O = Optional										

[1] = Hunting is optional only when ACT is N, C, T or V. Otherwise, Hunting is prohibited.

[2] = DL form/screen is required when the ACT is N or T.

[3] = RS form/screen is required only when the ACT is N, C, T or V. Otherwise, the RS form/screen is not required.

Completing the DL Form/Screen

If directory listings are required, refer to **REQTYP J** for more information on completing the DL form/screen.

Completing the HUNTING Section on the LSR-HGI Form/Screen

Hunting is an optional feature only when the ACT is N, C, T or V. For more information on Hunting, refer to the Hunting Section.

**Note:** When ordering Hunting Service in conjunction with other service(s) refer to the Hunting section of the LOH-Local Ordering Handbook for processing the hunting portion of the LSR request.

Completing the LSR and EU Forms/Screens

**Account level activities (ACT) apply to the entire account.** A complete list of ACTs and their definition can be found in the Data Dictionary entry for ACT.

The following chart shows all of the valid account level activities for this service.

Valid Account Level Activities PBX Resale Service										
N	C	D	R	V	S	B	W	L	T	Y
X	X	X		X			X		X	

Note: "X" denotes valid account level activities. A dash (-) indicates a non-valid account level activity.

The Required, Conditional and Optional (R/C/O) fields on the LSR and EU forms/screens will be given for every valid ACT code in the **ACT Tables** section.

RCO Tables

*The following tables show the Required, Conditional and Optional (R/C/O) fields on the valid forms/screens for this product. All unmentioned fields are either invalid, not applicable, prohibited or not supported. When fields are populated which are not supported by BellSouth, these not supported fields will be ignored. Populating any other fields may result in a fatal reject or a clarification of the service request.*

Please note the following codes:

- Optional fields marked with an asterisk (\*) force at least one of the conditional fields to become required when populated.
- Fields used only for manual orders are followed by (M).
- Fields used only for electronic orders are followed by (E).
- For fields marked with a DOUBLE asterisk (\*\*) please refer to the Data Dictionary for clarification.

See the Data Dictionary Section for additional information on each field.

Port Service (PBX Stand Alone Port)

Product Listing

Port Service (PBX Stand Alone Port)

A port is a point of access facility for signal transmission from the distribution frame in the central office to the switch, including the line card.

Ordering Forms/Screens

The following chart illustrates the required, conditional and optional forms/screens for ordering this service. Detailed information will follow to assist you in filling out each of these forms/screens.

Forms/Screens PBX										
LSR	Hunting	EU	DL	RS	DDPS	PS	NP	LS	LSNP	RPL
R	O [1]	R	C [2]	C [3]	R					
R = Required C = Conditional O = Optional										

[1] = Hunting is optional only when ACT is N, C, T or V. Otherwise, Hunting is prohibited.

[2] = DL form/screen is required when the ACT is N or T.

[3] = RS form/screen is required only when the ACT is N, C, T or V. Otherwise, the RS form/screen is not required.

Completing the DL Form/Screen

If directory listings are required, refer to **REQTYP J** for more information on completing the DL form/screen.

Completing the HUNTING Section on the LSR-HGI Form/Screen

Hunting is an optional feature only when the ACT is N, C, T or V. For more information on Hunting, refer to the Hunting Section.

**Note:** When ordering Hunting Service in conjunction with other service(s) refer to the Hunting section of the LOH-Local Ordering Handbook for processing the hunting portion of the LSR request.

Completing the LSR and EU Forms/Screens

**Account level activities (ACT) apply to the entire account.** A complete list of ACTs and their definition can be found in the Data Dictionary entry for ACT.

The following chart shows all of the valid account level activities for this service.

Valid Account Level Activities PBX Stand Alone Port										
N	C	D	R	V	S	B	W	L	T	Y
X	X	X								
Note: "X" denotes valid account level activities. A dash (-) indicates a non-valid account level activity.										

The Required, Conditional and Optional (R/C/O) fields on the LSR and EU forms/screens will be given for every valid ACT code in the **ACT Tables** section.

**RCO Tables**

The following tables show the Required, Conditional and Optional (R/C/O) fields on the valid forms/screens for this product. All unmentioned fields are either invalid, not applicable, prohibited or not supported. When fields are populated which are not supported by BellSouth, these not supported fields will be ignored. Populating any other fields may result in a fatal reject or a clarification of the service request.

Please note the following codes:

- Optional fields marked with an asterisk (\*) force at least one of the conditional fields to become required when populated.
- Fields used only for manual orders are followed by (M).
- Fields used only for electronic orders are followed by (E).
- For fields marked with a DOUBLE asterisk (\*\*) please refer to the Data Dictionary for clarification.

See the Data Dictionary Section for additional information on each field.

**CCP 1947 Attachment Listed Below****CHAN/PAIR – Channel/Pair****LSNP Form/Screen**

16.0B(LSOG6 / ELMS6 map)

*Updated: 07/06/04, CRB Issues included: None*Definition:

Identifies the specific channel or pair within the provider's cable to be used for connection.

**Definition Notes:**

None

Valid Entries:

None

Valid Entry Notes:

~~Note 1: When populated BellSouth allows only a 4 numeric CHAN/PAIR to be populated in this field.~~

Data Characteristics:~~Up to 5 alpha/numeric characters~~

Up to 4 numerics

Examples:

24

Conditional Usage Notes:

Manual:

Note 1: For the following Reqty B products, when the LNA is N, CHAN/PAIR must be populated

when CABLE ID is populated and CFA is not populated, however, CHAN/PAIR must not be

populated if CFA is populated:

- Design Analog Loop with INP
- Design Analog Loop with LNP.

Note 2: For the following Reqty B products, when the LNA is N and V, CHAN/PAIR must be

populated when CABLE ID is populated and CFA is not populated, however, CHAN/PAIR must

not be populated if CFA is populated:

- INP with Designed Digital Basic Rate ISDN
- LNP with Designed Digital Basic Rate ISDN.

Note 3: Required when CABLE ID is populated.

Note 4: Required when the LNA is N or V for the following products:

- Analog Voice Non-Designed
- HDSL 2W and 4W Designed
- UCL-Non Designed.

*Business Rules*

Electronic:

Rule 1: [BULK] Conditional for UNE to UNE Bulk Migration, based on current REQTYP B rules/notes and populated once per Ported TN (PORTED NBR).

\*\*\*\* End of definition for CHAN/PAIR / LSNP form screen \*\*\*\*

## CHAN/PAIR 2 – Channel/Pair 2

### LSNP Form/Screen

16.0B(LSOG6 / ELMS6 map)

*Updated: 07/06/04, CRB Issues included: None*

#### Definition:

Identifies the specific second channel or second pair within the provider's cable to be used for four wire loops.

#### **Definition Notes:**

None

#### Valid Entries:

None

#### Valid Entry Notes:

~~Note 1: When populated BellSouth allows only a 4 numeric CHAN/PAIR2 to be populated in this field.~~

#### Data Characteristics:

~~Up to 5 alpha/numeric characters~~

Up to 4 numerics

#### Examples:

24

#### Conditional Usage Notes:

Note 1: Prohibited when the NCI 2nd character is '2'.

Note 2: Required when the NCI and SECNCI 1st and 2nd character is the number '04' , unless the CFA field is populated, then prohibited.

#### Business Rules

Electronic:

Rule 1: [BULK] Conditional for UNE to UNE Bulk Migration, based on current REQTYP B rules/notes and populated once per Ported TN (PORTED NBR).

\*\*\*\*

## CHAN/PAIR – Channel/Pair

### LS Form/Screen

16.0B(LSOG6 / ELMS6 map)

*Updated: 07/06/04, CRB Issues included: None*

#### Definition:

Identifies the specific channel or pair within the provider's cable to be used for connection.

#### **Definition Notes:**

None

#### Valid Entries:

None

#### Valid Entry Notes:

~~Note 1: When the 2nd character of the TOS is P or R, this field must be 4 alpha/numerics.~~

~~Note 2: When populated BellSouth allows only a 4 numeric CHAN/PAIR to be populated in this field.~~

#### Data Characteristics:

~~Up to 5 alpha/numeric characters~~

UP to 4 numerics

#### Examples:

24

#### Conditional Usage Notes:

Note 1: For the following REQTYP A products, CHAN/PAIR must be populated when CABLE ID is populated and CFA is not populated, however, CHAN/PAIR must not be populated if CFA is populated:

- Analog Designed Loop
- Digital Data Designed Loop (DS0)
- Digital Designed Loop Basic Rate ISDN
- Universal Digital Channel (UDC)
- EELs 4W VG
- EELs 56/64 kbps.

#### Business Rules

Electronic:

Rule 1: When the 2nd character of the TOS is P or R (DLEC Owned Splitter) this field must not match the information populated in the CHAN/PAIR 2 field.

\*\*\*\*\* End of definition for CHAN/PAIR / LS form screen \*\*\*\*\*

## CHAN/PAIR 2 – Channel/Pair 2

### LS Form/Screen

16.0B(LSOG6 / ELMS6 map)

*Updated: 07/06/04, CRB Issues included: None*

#### Definition:

Identifies the specific second channel or second pair within the provider's cable to be used for connection.

#### **Definition Notes:**

None

#### Valid Entries:

None

#### Valid Entry Notes:

~~Note 1: When populated BellSouth allows only a 4 numeric CHAN/PAIR2 to be populated in this field.~~

#### Data Characteristics:

~~Up to 5 alpha/numeric characters~~ Up to 4 numerics

#### Examples:

24

#### Conditional Usage Notes:

Note 1: Required when CABLD ID is populated and the first 2 characters of the NCI and SECNCI fields is '04'.

Electronic:

Note 2: Prohibited when the 2nd character of the TOS field is R (BellSouth® owned splitter) and the LNA is N, C, D or V.

Note 3: Prohibited when the REQTYP is A, the product is UCL-ND and the LNA is N, C, V, or G.

Note 4: Required when the 2nd character of the TOS field is P (BellSouth owned splitter) and the LNA is N or C.

Note 5: Prohibited when the 2nd character of the TOS is P or R and the 1st character of the CABLE ID field is X (Remote Site LineShare/Line Splitting).

#### Business Rules

Electronic:

Rule 1: When the 2nd character of the TOS is P or R (DLEC Owned Splitter) this field must not match the information populated in the CHAN/PAIR field.

\*\*\*\*\* End of definition for CHAN/PAIR 2 / LS form screen \*\*\*\*\*

## CHAN/PAIR – Channel/Pair

### PS Form/Screen

16.0B(LSOG6 / ELMS6 map)

*Updated: 07/06/04, CRB Issues included: None*

#### Definition:

Identifies the specific channel or pair within the provider's cable to be used for connection.

This field is not supported by BellSouth ® in this practice.

#### **Definition Notes:**

None

#### Valid Entries:

None

#### Valid Entry Notes:

None

#### Data Characteristics:

Up to 5 alpha/numeric characters

#### Examples:

24

#### Conditional Usage Notes:

Note 1: Required when CABLE ID is populated.

#### Business Rules

None

*\*\*\*\* End of definition for CHAN/PAIR / PS form screen \*\*\*\**

## CABLE ID – Cable Identification

### PS Form/Screen

16.0B(LSOG6 / ELMS6 map)

Updated: 07/06/04, CRB Issues included: None

#### Definition:

Identifies the provider's central office cable to be connected to the customer's collocated equipment.

This field is not supported by BellSouth® in this practice.

#### **Definition Notes:**

None

#### Valid Entries:

None

#### Valid Entry Notes:

**NOTE 1: The first character of the CABLE ID must be "P" or "V".**

#### Data Characteristics:

5 alpha/numeric characters

#### Examples:

PXX01

#### Conditional Usage Notes:

**Manual:**

**Note 1: For all Reqtyp F products, CABLE ID and CHAN/PAIR must be populated when CFA is not populated, however, CABLE ID and CHAN/PAIR must not be populated if CFA is populated.**

**Note 2: For REQ TYP F required when CHANPAIR is populated.**

**Note 3: Prohibited when the REQ TYP is M.**

#### Business Rules

None

**\*\*\*\* End of definition for CABLE ID / PS form screen \*\*\*\***

## CFA – Connecting Facility Assignment

### PS Form/Screen

16.0B(LSOG6 / ELMS6 map)

Updated: 07/06/04, CRB Issues included: None

Definition:

Identifies the provider's carrier system and channel to be used.  
This field is not supported by BellSouth® in this practice.

**Definition Notes:**

~~NOTE 1: The range of assignments should be provided on the DL (Design Layout) during the provisioning of the service.~~

~~NOTE 2: The customer specifies the particular carrier system and channel or channels to be utilized.~~

~~NOTE 3: All element entries of the Connecting Facility Assignment are left justified with no trailing spaces.~~

~~Facility Identification: Description~~

~~Facility Designation: Uniquely identifies a particular facility type between two terminal locations (up to 5 characters followed by a delimiter).~~

~~Facility Type: Usually identified through the use of a code set found in the Telcordia Technologies (formerly known as BellCore) Practice BR-795-450-100 (up to 6 characters followed by a delimiter).~~

~~Channel/Pair Number: Number of the facility that is being used to provide the service (up to 5 characters followed by a delimiter).~~

~~"A" Location: Location of the facility termination that has the lower alphanumeric CLLI code (8-11 characters, followed by a delimiter).~~

~~"Z" Location: Location of the facility termination that has the higher alphanumeric CLLI code (8-11 characters).~~

~~NOTE 4: Virgules (/) are used as delimiters to separate the different elements of the CFA.~~

~~Valid Entries:~~

~~None~~

~~Valid Entry Notes:~~

~~None~~

~~Data Characteristics:~~

~~Up to 42 alpha/numeric characters~~

~~Examples:~~

~~101/T1/3/BSTMAGTOGO/BSTMATCG0~~

~~Conditional Usage Notes:~~

~~Note 1: For all Reqtyp F products, CFA must be populated when CABLE ID and CHAN/PAIR are not populated, however, CFA must not be populated if CABLE ID and CHAN/PAIR are populated.~~

~~Business Rules~~

~~None~~

~~\*\*\*\* End of definition for CFA / PS form screen \*\*\*\*~~

## Reqtyp F

### Port Service

#### Product Listing

#### Port Service

A port is a point of access facility for signal transmission from the distribution frame in the central office to the switch, including the line card.

#### Ordering Forms/Screens

The following chart illustrates the required, conditional and optional forms/screens for ordering this service. Detailed information will follow to assist you in filling out each of these forms/screens.

The following chart illustrates the Required, Conditional and Optional forms/screens for ordering this service. Detailed information will follow to assist you in filling out each of these forms/screens.

Forms/Screens Port Service										
LSR	Hunting	EU	DL	RS	DRS	PS	NP	LS	LSNP	RPL
R	O [1]	R	C [2]			C				
R = Required C = Conditional O = Optional										

[1] = Hunting is optional only when ACT is N, C, T or V. Otherwise, Hunting is prohibited.

[2] = DL form/screen is required when the ACT is N or T.

Completing the DL Form/Screen

If directory listings are required, refer to **REQTYP J** for more information on completing the DL form/screen.

Completing the Hunting Section on the LSR Form/Screen

Hunting is an optional feature only when the ACT is N, C or V. For more information on Hunting, refer to the Hunting Section.

**Note 1:** ELECTRONIC ORDERS - When ACT is V, if Hunting exists on the account being converted and the CLEC wishes to *keep the EXISTING hunting*, the HA field should be populated with "E" and all other required fields populated, **or** the HA field should **not be populated** (NO Hunting Page submitted electronically).

**Note 2:** When ordering Hunting Service in conjunction with other service(s); refer to the hunting section of the LOH-Local Ordering Handbook, for processing the hunting portion of the LSR request.

Completing the LSR and EU Forms/Screens

**Account level activities (ACT)** apply to the entire account. A complete list of ACTs and their definition can be found in the Data Dictionary entry for ACT.

The following chart shows all of the valid account level activities for this service.

Valid Account Level Activities Port Service									
N	C	D	T	V	S	B	W	L	Y
X	X	X	-	X	X	X	-	X	-
Note: "X" denotes valid account level activities. A dash (-) indicates a non-valid account level activity.									

The Required, Conditional and Optional (R/C/O) fields on the LSR and EU forms/screens will be given for every valid ACT code in the **ACT Tables** section.

Completing the PS Form/Screen

The Port Service (PS) form/screen may be required or invalid depending on the account level activity. Each account level activity has valid Line Level Activities (LNAs). These LNAs determine how, or if, the PS form/screen should be populated. A complete list of LNAs and their definition can be found in the Data Dictionary entry for LNA.

The following chart gives the valid LNAs for each account level activity (ACT) and the associated PS form/screen usage for this service.

If ACT is:	Then LNA is:	And PS form/screen is:
N	N	Required
C	N, C, D, P or X	Required
D	Prohibited	Not Required
V	N, D, G, V, W, P or X	Required
T	N	Required
S	L or B	Required
B	Prohibited	Not Required
L	Prohibited	Not Required
Y	Prohibited	Not Required

The Required, Conditional and Optional (R/C/O) fields for the PS form/screen are listed according to the Line Level Activity (LNA) in the **LNA Tables** Section.

RCO Tables

*The following tables show the Required, Conditional and Optional (R/C/O) fields on the valid forms/screens for this product. All unmentioned fields are either invalid, not applicable, prohibited or not supported. When fields are populated which are not supported by BellSouth, these not supported fields will be ignored. Populating any other fields may result in a fatal reject or a clarification of the service request.*

Please note the following codes:

- Optional fields marked with an asterisk (\*) force at least one of the conditional fields to become required when populated.
- Fields used only for manual orders are followed by (M).
- Fields used only for electronic orders are followed by (E).
- For fields marked with a DOUBLE asterisk (\*\*) please refer to the Data Dictionary for clarification.

See the Data Dictionary Section for additional information on each field.

**Hunting**
Product Listing
Hunting

Hunting Service, also known as Grouping and Rotary Service, is a feature offered to Residence or Business customers who have more than one (1) line arranged for incoming calls at the same location. When an incoming call is generated to a line that is busy, the

call flows to the next line in the Hunting Group. Hunting provides maximum utilization of lines to handle incoming calls and prevent unnecessary busy signals.

Series Completion and Multi-line Hunting are the two basic types of Hunting. Both types of hunting provide the same basic functions. The primary difference in the two types is the number of telephone numbers required to provide the service. Series Hunting requires each line to have a unique Telephone Number. Series Hunting is normally offered to customers with less than 16 lines. Multi-line Hunting arrangements require just one Telephone Number for the entire group. Each line in a Multi-line Hunting Group is assigned a Group Identifier and a Terminal Number along with the Telephone Number to provide a unique identifier. Customers with 17 or more lines in a Hunting arrangement are typically offered Multi-line Hunting to minimize the number of telephone numbers required to provide the service.

Hunting Group Activities

Additionally, each Hunt Group Activity (HA) has valid Hunting Line Activities (HLA).

The following chart shows what HLAs are valid for each HA.

If HA is:	Then Hunting Line Activity (HLA) is:
N	N
E	E
C	N, E or D
D	Prohibited
NOT POPULATED (NO Hunting Page Submitted Electronically)	Prohibited

RCO Tables

*The following tables show the Required, Conditional and Optional (R/C/O) fields on the valid forms/screens for this product. All unmentioned fields are either invalid, not applicable, prohibited or not supported. When fields are populated which are not supported by BellSouth, these not supported fields will be ignored. Populating any other fields may result in a fatal reject or a clarification of the service request.*

Please note the following codes:

- Optional fields marked with an asterisk (\*) force at least one of the conditional fields to become required when populated.
- Fields used only for manual orders are followed by (M).
- Fields used only for electronic orders are followed by (E).
- For fields marked with a DOUBLE asterisk (\*\*) please refer to the Data Dictionary for clarification.

See the Data Dictionary Section for additional information on each field.

**CCP 1949 Attachment Listed Below****PORTED NBR – Ported Telephone Number****NP Form/Screen**

16.0B(LSOG6 / ELMS6 map)

*Updated: 07/06/04, CRB Issues included: None*Definition:

Identifies the telephone number to be ported.

**Definition Notes:**

None

Valid Entries:

None

Valid Entry Notes:

Note 1: When a range of numbers is populated in the PORTED NBR field, the range must be consecutive DID numbers).

Note 2: When a consecutive range of telephone numbers is populated in this field the REQ TYP must be C and the NPT must be D.

Note 3: A range of numbers is prohibited for REQ TYP B.

Note 4: The 2nd character of the TOS must be **D** Q -when submitting a consecutive range of number.~~Note 6: The second character of the TOS field must be D when submitting a consecutive range of numbers.~~ (DUPLICATE OF NOTE 4)

Note 75: The LSR shall not exceed 2000 telephone numbers.

Electronic:

Note 6: The 11th character, if populated in the PORTED NBR field must be a hyphen followed by four numerics when entering a range of telephone numbers. (UR16076-0035)

Data Characteristics:

Manual: Up to 15 numeric characters (excluding optional hyphens)

Electronic: ~~Up to 15 alpha/numeric characters~~

10 numeric characters or 15 alpha/numeric characters (UR16076-0031)

Examples:Manual: 2016991234 201-699-1234 201-699-1234-~~5678~~ 3234

Electronic: 2016991234 2016991234-1254

Conditional Usage Notes:

None

Business Rules

Rule 1: When NPT is not "D" (LNP), this field indicates a number being disconnected when porting a multi-line account not all numbers are to be ported.

Manual:

Rule 2: Telephone numbers may be sent in consecutive ranges on a fax LSR.

Electronic:

Rule 3: When a range of telephone numbers is populated in this field the LEAN or LEATN field is prohibited.

## PROJECT – Project Identification

### LSR Form/Screen

16.0B(LSOG6 / ELMS6 map)

Updated: 07/06/04, CRB Issues included: None

Definition:

Identifies the project to which the request is to be associated.

### Definition Notes:

None

Valid Entries:

None

Valid Entry Notes:

Note 1: For REQTYP B, ~~W~~when the JR field and/or NIDR is populated with Y, if this field is populated the entry in this field must be 15 alpha/numerics.

Manual

Note 2: When the REQTYP is E, M, or N with ACT of R and the request submitted is for address correction this field must be populated with ADDR COR.

Data Characteristics:

Up to 16 alpha/numeric characters

Examples:

BST 736119

Conditional Usage Notes:

Note 1: The PROJECT field is required when the service requested on the LSR is indicated as Project Managed in the BellSouth® Product and Services Interval Guide.

Electronic:

Note 2: Required when the quantity in the IWJQ field is populated with 16 or greater.

Business Rules

Rule 1: The customer must contact the BellSouth® Project Manager prior to submitting the LSR to obtain a project identification number .

Rule 2: All requests submitted, meeting project criteria, must have a BellSouth project identification number populated in the PROJECT field.

Rule 3: If a customer obtains a BellSouth® project identification number and the customer determines, prior to submitting the LSR(s), that the scope of the request changes and no longer qualifies as a project, the customer must not populate the BellSouth® project identification number in the PROJECT field.

Rule 4: All due dates and frame due times will be negotiated with the BellSouth® Project Manager.

Rule 5: Changes that affect the scope of the project must be referred to the BellSouth® Project Manager prior to submitting the SUP to update the service request (e.g., adding or deleting lines).

Rule 6: Project Identification number is valid for 30 days from the date of issuance.

Rule 7: Type 1 Wireless Ports over 50 numbers, REQTYP C, must be Project Managed (contact the Bellsouth Project Manager prior to submitting LSR).

Rule 8: For All Type 1 Wireless Ports over 50 numbers, REQTYP C, if CC or NNSP is a Wireless or CLEC OCN, a Project ID must be populated.

Rule 9: When this field is populated for REQTYP B(NPT=D) the DDD cannot be Saturday, Sunday or a holiday.

## Electronic:

Rule 10: [BULK] On All BULK Requests, the PROJECT field will be populated by BellSouth® with the "Bulk Order Package Identifier" followed by the word "BULK" and shall be mapped to the PROJECT ID field on the individual LSRs associated with the BULK Package.
