**Carrier Notification  
SN91084314**

Date: December 3, 2004

To: All Asynchronous Transfer Mode (ATM) and Frame Relay Interexchange Carriers (IXC)

Subject: All ATM and Frame Relay IXCs – (Documentation/Guides) - Implementation of Customer Configuration Management Capability

This is to announce that effective December 16, 2004, BellSouth will implement the Customer Configuration Management Capability, which gives the customer the ability to add, change and delete Permanent Virtual Connections (PVC) for Exchange Access Frame Relay Service (XAFRS) and Managed Shared Frame Relay Service (MSFRS) without submitting an Access Service Request (ASR).

Customer Configuration Management Capability is available only for Exchange Access Frame Relay Service (XAFRS) and Managed Shared Frame Relay Service (MSFRS) Network Interfaces equipped with Network Visibility Service (NVS).

The new Frame Relay Customer Configuration Management Capability Ordering Guide will be posted to the BellSouth Interconnection Services Web site on December 16, 2004.

For ordering information, please click on the Web site address listed below and click on the ATM and Frame Relay tab.
