**BellSouth Interconnection Services**

675 West Peachtree Street  
Atlanta, Georgia 30375

**Carrier Notification  
SN91084321**

Date: December 15, 2004

To: All Asynchronous Transfer Mode (ATM) Customers

Subject: All ATM Customers – (Product/Service) - Implementation of  
Asynchronous Transfer Mode (ATM) Circuit Emulation Service (CES)  
with Feature Group D (FG-D) Trunks

This is to advise that on December 21, 2004, BellSouth will allow FG-D trunk service to interwork with ATM-CES. The interworking of these two services will allow the traffic from FG-D Trunk service to be transported via the ATM network. Only Exchange Access ATM Service (XAATMS) CES is available for interworking with FG-D trunk service (i.e., Managed Shared ATM CES is not available for this application). XAATMS CES interworked with FG-D trunk service may be requested as Structured or Unstructured CES, depending upon the customer's specific transmission requirements.

The new ATM CES with FG-D Trunks Ordering Guide will be posted to the BellSouth Interconnection Services Web site on December 21, 2004, at the address listed below.
