**Carrier Notification
SN91086205**

Date: November 1, 2006

To: Competitive Local Exchange Carriers (CLEC) and Wireless Service Providers (WSP)

Subject: CLECs and WSPs - (OSS and Maintenance) – **REVISED** – Update to the Operations Support System Hours of Availability Schedule (Originally posted on September 13, 2006)

This is to advise that, on **December 3, 2006**, BellSouth will publish an updated version of its Operations Support System (OSS) Hours of Availability Schedule **with an effective date of December 10, 2006**. The OSS Hours of Availability Schedule has been updated to reflect a revision to the Maintenance Window for the Customer Record Information System (CRIS). This revised Maintenance Window for CRIS will impact the CLEC's ability to send Local Service Requests (LSR) **to BellSouth, as well as invoke changes to the Local Exchange Service Order Generator (LSOG) and Local Number Portability (LNP) Gateway systems**, during the new maintenance hours. **BellSouth revised this window to better accommodate ordering while allowing BellSouth to perform maintenance during non-peak hours.**

The updated version of the OSS Hours of Availability Schedule will be posted on **December 3, 2006, with an effective date of December 10, 2006**. **The Schedule** can be found on the BellSouth Interconnection Services Web site at:

http://www.interconnection.bellsouth.com/alerts_and_notifications/network/oss/assets/pdf/oss_hours.pdf

The Schedule reflects the updated Maintenance Window for the CRIS system for individual systems as well as categorizing availability times by interface and transaction type.

If you have any questions, please contact your BellSouth electronic commerce account team.

Sincerely,
