**Carrier Notification**  
**SN91087071**

Date: April 26, 2007

To: All Business Markets Customers

Subject: All Business Markets Customers – (Billing, Product /Services and Tariff) –  
Enhancements to the Wavelength Dedicated Ring Service to Allow a WaveGate® II  
Service Capability

On June 2, 2007, BellSouth Telecommunications, Inc., d/b/a AT&T Southeast (AT&T) will enhance the BellSouth Tariff FCC No. 1, Section 29. This enhancement will broaden the Wavelength Dedicated Ring service to allow a WaveGate® II service capability. The WaveGate II service will offer two diversely routed Wavelengths on the Wavelength Dedicated Ring service with SONET OC-48 and OC-192 channelization capabilities at each end. The channelization can be between a customer location and a central office location, or between two central office locations on a Wavelength Dedicated Ring. This service will be available for both the single and dual bay configuration. The services derived from the WaveGate II offering will be associated with the LightGate® service (a/k/a SPA Point to Point Network) contained in BellSouth Tariff FCC No. 1, Section 7.

Ordering and implementation may begin on the tariff effective date. Carrier Access Billing System (CABS) bills will be rendered in the same manner that existing bills are rendered today. In addition, the CABS bill will reflect the appropriate Uniform Service Order Code (USOC) for the services ordered.

To take advantage of these offerings, or if you have any questions, please contact your AT&T account team representative.

Sincerely,

**ORIGINAL SIGNED BY KRISTEN E. SHORE**
