Response Deadline:	<b>NA</b>	Contact:	<b>Account Team Manager</b>

On May 31, 2007, AT&T Southeast Region (AT&T) will begin consolidating its off-network Generic Name, a/k/a Calling Name (CNAM) query traffic onto the AT&T Diversified Group (AT&T DG\*) network. This consolidation will affect Transaction Capabilities Application Part (TCAP) messages that use Translation Type 005. However, companies that are connected to AT&T's Signaling System 7 (SS7) network but do not use AT&T's global title translations capabilities will not be affected by this consolidation.

Concurrent with this network consolidation, AT&T will cease querying the Syniverse CNAM database. As a result, companies currently using AT&T's SS7 network for global title translations capability for the Translation Type 005 are hereby advised of the potential need to make alternate arrangements by May 31, 2007, if they wish to continue querying the Syniverse CNAM database.

As this network consolidation continues, AT&T may cease querying other CNAM databases. AT&T will provide advance notice via an Accessible Letter prior to taking any such actions.

Please contact your AT&T account team manager if you have questions regarding this notice.

AT&T reserves the right to make any modifications to or to cancel the above changes and other information prior to the proposed effective date. Should any modifications be made to the changes or other information, these modifications will be reflected in a subsequent letter. Should the changes or other information be canceled, additional notification will be sent at the time of cancellation. AT&T will incur no liability to the CLECs if such changes or other information, mentioned above, is canceled or is not ultimately put into effect.

\*AT&T DG is an affiliated company that provides CCS/SS7 Hub services on a local, regional and national basis.
