

Web Site News As Of January 20, 2005

Welcome to the SBC Midwest Performance Measurements web site.

December 2004 performance results for SBC Midwest performance measurements are now available.

Please Note:

- The Sub-Measure Names of the PM WI 9 disaggregations UNE-BRI Loop With Test Access and UNE-DS1 Loop With Test Access have been changed to UNE-BRI Loop Without Test Access and UNE-DS1 Loop Without Test Access to correspond with the Business Rules description.
- A display issue that occurred with the January 5, 2005 posting of recalculated results, preventing the display of restated months' aggregate results for performance measures 25 and MI 15, has been corrected. During this time the same results for these two PMs were available should a user have selected a display specifying a CLEC, rather than not specifying any CLEC.
- A display issue that occurred with the January 5, 2005 posting of recalculated results, displaying affiliate results in the retail results field, has been corrected. This display issue had no impact on determination of "make" or "miss" on any PMs for either Tier 1 or Tier 2 reporting.

Correction to Notice of Previously Recalculated and Reposted Performance Measures:

- The November 5, 2004 Recalculated and Reposted Performance Measures section of the News Page included an error. Performance measure 37.1 was inadvertently omitted from the list of performance measures recalculated and reposted for the months of April through July 2004 to exclude records for internal SBC company services. The corrected notice reads as follows:

April through July 2004 performance measures 35, 35.1, 37.1, 38, 39, 41, 46, 52, 53, 54.1, 59, 65.1, 66, 67, 68, 69, and WI 2 have been recalculated and reposted to exclude records for internal SBC company services.
