

## Web Site News As Of February 7, 2005

Welcome to the SBC Midwest Performance Measurements web site.

December 2004 performance results for SBC Midwest performance measurements are now available.

### ***Recalculated and Reposted Performance Measures:***

Listed below are the measures for which previously reported results have been recalculated and reposted. SBC/Midwest makes available a listing of the recalculated and reposted performance measurement results that have also been restated (changed from the originally posted result) in the Reports section of this website. These reports are available for both CLEC-aggregate results and CLEC-specific results, and are accessed in the same manner as existing performance measurement reports.

- November 2004 results for performance measures CLEC Billing 4 and CLEC Billing 5 have been recalculated and reposted to exclude activity from October 2004 that had inadvertently been included in the published results.
- 

Please Note:

- December 2004 results, and those results restated on January 5, 2005, that required a parity comparison to the SBC affiliate's performance did not have the Z-score displayed properly. This "display-only" issue has been corrected. The issue did not affect determination of pass or fail on any measures and had no affect on remedy payments or assessments.
- December 2004 results, and those results restated on January 5, 2005, for CLECs who participate in the Compromise Remedy Plan were inadvertently only posted under the State Performance Measures option. As the PMs are the same, the results do not differ between the two plans. Those results have now been posted for December 2004, and PMs restated on January 5, 2005, under the Compromise Plan selection as well as the State performance Measures selection.
- The SBC/Midwest Raw Data Web Site was posted on February 7, 2005 and can be accessed via the link provided at the very bottom of this page (labeled "Raw Data Request Process").
