SBC Midwest CLEC Web Site Update - March 4, 2003

Results for PMs 14, 20, 21.1, 22, 24.1, 25, 79, 80, 81 and 82 for January 2003 for Illinois, Michigan, Ohio and Wisconsin; and June 2002 thru January 2003 for Indiana are being re-displayed at the aggregate level, as required. Results for these company level measures were posted to each individual CLEC report last month. Results for these company level measures can not be differentiated at the CLEC or affiliate level of reporting. The actual company level results do not change.

In certain situations, a zero is appearing in the CLEC denominator when there is no data to report. The display is being modified so that a blank appears in the CLEC denominator where there is no volume. This changes the display for January 2003 for Illinois, Michigan, Ohio and Wisconsin; June 2002 thru January 2003 results for Indiana.
