AT&T Midwest PM Audit Reports:

AT&T Midwest PM Audit Reports are now available. These can be accessed by clicking the button at the bottom of this News Page.

Recalculated and Reposted Performance Measures:

Listed below are the measures for which previously reported results have been recalculated and reposted. AT&T Midwest makes available a listing of the recalculated and reposted performance measurement results that have also been restated (changed from the originally posted result) in the Reports section of this website. These reports are available for both CLEC-aggregate results and CLEC-specific results, and are accessed in the same manner as existing performance measurement reports.

- October 2004 results for performance measure 43 have been recalculated and reposted to correct a system processing problem that resulted in certain projects being flagged incorrectly and excluded from reporting.
- June 2005 results for performance measure 62 in Illinois have been recalculated and reposted to correct a system processing problem that resulted in the use of incorrect data files to produce results.
- November 2005 through January 2006 results for performance measure 58 have been recalculated and reposted to correct a coding error that resulted in certain DSL Loop orders being excluded from results.
- August through November 2005 results for performance measures 27, 28, 29, 30, and 32, and December 2005 results for performance measures 29 and 30 have been recalculated and reposted to correct for a logic problem that resulted in a number of Local Wholesale Complete orders being incorrectly included in aggregate reported UNE-P results.
- January 2006 results for performance measures 35, 37.1, 38, and 39 have been recalculated and reposted to remove Local Wholesale Complete orders erroneously included in Affiliate results due to the use of an outdated control table to process AT&T data.

- January and February 2006 results for performance measure 65.1 have been recalculated and reposted to correct a system processing problem that resulted in market area results not being reported.
- February 2006 results for performance measure 56 in the states of Indiana, Michigan, Ohio, and Wisconsin have been recalculated and reposted to correct a data input error that resulted in DS1 Loop disaggregation results not being displayed.
- October 2005 results for performance measures 27, 28, 29, 30, and 32 in Illinois have been recalculated and reposted to correct for a system processing problem that resulted in orders for a single day being excluded from reporting.
- August through December 2005 results for performance measures 54.1 and 65.1 have been recalculated and reposted to include records from a single reporting center omitted from results due to a logic problem.
