

Welcome to the SBC Performance Measurements web site.

April 10, 2003:

Restated February 2003 results have been posted today for PM W1 1. Changes have been made to the wholesale numerator, wholesale result and calculated Z-value fields. The previously-posted Restatement Report has been revised to include this restatement.

April 8, 2003:

The Restatement Report has been revised for PM 46 (DDS and DS1) sub-measures to properly reflect a 'NO' in the 'Display only' column.

The title for PM 56.1: % Installations Completed Within the Customer Requested Due Date for Loop With LNP, previously shown as >20 loops for CHC and FDT, has been updated to match the SBC Midwest Business Rules v1.9 and are now shown as 21-24 loops, for both the CHC and FDT disaggregations. This had no impact on the posted results.
