

## **Web Site News As Of May 22, 2006**

Welcome to the Performance Measurements web site for AT&T operations in Illinois, Indiana, Michigan, Ohio, and Wisconsin.

April 2006 performance results for AT&T performance measurements are now available.

### ***AT&T PM Audit Reports:***

AT&T PM Audit Reports are now available. These can be accessed by clicking the button at the bottom of this News Page.

### ***Please Note:***

As noted here last posting date, AT&T has discovered a problem with the Affiliate results for PM 65.1 8dB Loop measurement. The number of loops identified as "in-service" in calculating the Affiliate 8dB Trouble Report Rate has been found to be overstated. While the correct volume is being identified, the following steps have been taken: 1) March 2006 results are reported against the Retail compare only – no Affiliate result has been generated; and 2) Remedies for February 2006 have been calculated against Retail only, as Affiliate performance is expected to improve once the correct volume is determined and restatement is made. Once the correct in-service volume has been determined, February and March 2006 results (and any subsequent months affected) will be restated, with any additional remedies due CLECs, or overpayments made by AT&T, will be handled according to the terms of the applicable remedy plan.
