Welcome to the SBC Performance Measurements web site.

New PMs 35.1, 124 and 124.1 were implemented with April 2003 results posted on May 20, 2003. However, these PMs were inadvertently omitted from the drop down selection list on the Performance Measurement Results selection window. These PMs have been added to the list and can be specifically selected. The inability to specifically select these PM results for display had no affect on results reported.
