

Web Site News As Of June 20, 2003

Welcome to the SBC Midwest Performance Measurements web site.

May 2003 performance results for SBC Midwest performance measurements are now available.

Business Rules:

The SBC/Ameritech Performance Measurements User Guide Version 1.8 and the color-lined Version 1.9 have been moved to the Historical Business Rules section.

The "clean" SBC/Ameritech Performance Measurements User Guide Version 1.9 is accessible via the link shown below. All versions of the User Guide are accessible via the User Guide links at the bottom of the page.

SBC/Ameritech has identified a number of conflicts within the SBC/Ameritech Performance Measurement User Guide Version 1.9. The matrix outlining these know/identified business rules conflicts will be updated as needed and is located at **Conflict Matrix**. SBC Midwest expects to address these conflicts in the next six-month review collaborative.

The 2002 Six-Month Review Agreed-To Measurement Change Implementation Schedule indicates the results posting date that the changes were implemented and is located at **Six month schedule**.

Please note:

- The result titles for CLEC WI 11 have been edited to reflect the requirements of the Business Rules.
- The DSL Loops No Line Sharing disaggregation benchmark for ST 61 has been edited to reflect 6.5 days.
- Effective with May 2003 results, the calculation of the numerator for PM 114 has been updated to count as misses only orders with a SBC jeopardy code in the "S" jeopardy code position of the Cut String and to count as premature any cut that occurs 10 or more minutes prior to the time the CLEC calls, to address BearingPoint Observations 815 and 631.
