

Welcome to the SBC Performance Measurements web site.

SBC Ameritech Performance Measurement results are in the process of being loaded. You may experience some difficulty in accessing accurate data during this load process. Your patience is appreciated.

For SBC Midwest FCC 11c and FCC 12c, the disaggregations for Subtending Channels 23D and Subtending Chanel (ID) are targeted to be combined with September 2003 results reported in October 2003; not with May 2003 results as currently indicated.

Eff. 8/7/03: The raw data for May 2003 for PM5 for L5OG4 transactions, as available via the raw data request process, is now complete and available for downloading.
