

## **Web Site News As Of September 05, 2007**

Welcome to the Performance Measurements web site for Illinois, Indiana, Michigan, Ohio & Wisconsin.

**July 2007 results are now available for Illinois, Indiana, Michigan, Ohio & Wisconsin.**

**Effective August 20:**

### ***Please Note:***

- Effective this month, with July 2007 results, the Affiliate result for PM 65.1 8.0 dB Loops in Michigan is reported. Restatement of the months March 2006 through June 2007 is expected to be made with September 5<sup>th</sup> reporting.
- As noted here with the April 20, 2006 posting, AT&T has discovered a problem with the Affiliate results for PM 65.1 8dB Loop measurement. The number of loops identified as "in-service" in calculating the Affiliate 8dB Trouble Report Rate has been found to be overstated. While the correct volume is being identified, the following steps have been taken: 1) March 2006 through May 2006 results are reported against the Retail compare only - no Affiliate result has been generated; and 2) Remedies for February 2006 through April 2006 have been calculated against Retail only, as Affiliate performance is expected to improve once the correct volume is determined and restatement is made. Once the correct in-service volume has been determined, February and March 2006 results (and any subsequent months affected) will be restated, with any additional remedies due CLECs, or overpayments made by AT&T, handled according to the terms of the applicable remedy plan.
