

Web Site News As Of September 05, 2008

Welcome to the Performance Measurements web site for Illinois, Indiana, Michigan, Ohio & Wisconsin.

July 2008 results are now available for Illinois, Indiana, Michigan, Ohio & Wisconsin.

Effective August 20:

2006 Six-Month Review Performance Measures Change Implementation:

Implementation of the 2006 Six-Month Review performance measurement changes in Michigan has taken place with July 2008 performance results. This completes implementation of all rules in AT&T operations in Illinois, Indiana, Michigan, Ohio, and Wisconsin.

Please Note:

- During processing of the July results for PM 62, a programming problem was discovered that results in an overstated retail denominator. Efforts to correct this problem for publication August 20, 2008 were unsuccessful. Work continues to resolve this problem and it is anticipated that corrected results will be posted with September 5, 2008 restatements.
- As noted here with the April 20, 2006 posting, AT&T has discovered a problem with the Affiliate results for PM 65.1 8dB Loop measurement for the states of Illinois, Indiana, Ohio, and Wisconsin. The number of loops identified as "in-service" in calculating the Affiliate 8dB Trouble Report Rate has been found to be overstated. While the correct volume is being identified, the following steps have been taken: 1) March 2006 through current results are reported against the Retail compare only - no Affiliate result has been generated; and 2) Remedies for February 2006 through current have been calculated against Retail only, as Affiliate performance is expected to improve once the correct volume is determined and restatement is made. Once the correct in-service volume has been determined, February and March 2006 results (and any subsequent months affected) will be restated, with any additional remedies due CLECs, or overpayments made by AT&T, handled according to the terms of the applicable remedy plan.
