

## **Web Site News As Of September 22, 2008**

Welcome to the Performance Measurements web site for Illinois, Indiana, Michigan, Ohio & Wisconsin.

**July 2008 results are now available for Illinois, Indiana, Michigan, Ohio & Wisconsin.  
Effective September 05:**

### ***Recalculated and Reposted Performance Measures:***

Listed below are the measures for which previously reported results have been recalculated and reposted. AT&T makes available a listing of the recalculated and reposted performance measurement results that have also been restated (changed from the originally posted result) in the Reports section of this website. These reports are available for both CLEC-aggregate results and CLEC-specific results, and are accessed in the same manner as existing performance measurement reports.

- December 2007 through March 2008 results for performance measures 30, 47, and 60 have been recalculated and reposted to correct a coding problem that prevented the display of Retail results.
- June 2008 results for performance measure 107 have been recalculated and reposted to include ten projects omitted from reporting as the result of an improperly updated database.
- June 2008 results for performance measures 37.1, 54.1, 62, and 65.1 have been recalculated and reposted to correct a data processing error that prevented the display of results.

### ***Please Note:***

- The AT&T Raw Data Web Site was posted on September 5, 2008 and can be accessed via the link provided at the very bottom of this page (labeled "Raw Data Request Process"). July data is available for PMs 1.1, 1.3, 2, 4, 5, 6, 12, 13, 13.1, 22, 29, 30, 35, 37.1, 38-41, 62, 63, 69.1, 70, 97, 101, 102, 104, 107, 110, 114, 114.1, 115, 120, 124, 124.1, 126, CLEC WI 1, CLEC WI 9, C BLG 3, IN 1, MI 2, MI 15, WI 1, WI 2 and WI 9.
- As noted here with the April 20, 2006 posting, AT&T discovered a problem with the Affiliate results for PM 65.1 8dB Loop measurement for the states of Illinois, Indiana, Ohio, and Wisconsin. The number of loops identified as "in-service" in calculating the Affiliate 8dB Trouble Report Rate was found to be overstated. Therefore, February 2006 through June 2008 results were reported and remedies calculated against the Retail compare only. Once the correct in-service volume has been determined, February 2006 through June 2008 results (and any subsequent months affected) will be restated, with any additional remedies due CLECs, or overpayments made by AT&T, handled according to the terms of the applicable remedy plan.
