

## **Web Site News As Of September 22, 2003**

Welcome to the SBC Midwest Performance Measurements web site.

August 2003 performance results for SBC Midwest performance measurements are now available.

### ***Business Rules:***

The SBC/Ameritech Performance Measurements User Guide Version 1.8, the color-lined Version 1.9 and the 2002 Six-Month Review Agreed-To Measurement Change Implementation Schedule have been moved to the Historical Business Rules section. The “clean” SBC/Ameritech Performance Measurements User Guide Version 1.9 is accessible via the link shown below. All versions of the User Guide are accessible via the User Guide links at the bottom of the page.

SBC/Ameritech has identified a number of conflicts within the SBC/Ameritech Performance Measurement User Guide Version 1.9. The matrix outlining these known/identified business rules conflicts will be updated as needed and is located at **Conflict Matrix**. SBC Midwest expects to address these conflicts in the next six-month review collaborative.

### ***Recalculated and Reposted Performance Measures:***

Listed below are the measures for which previously reported results have been recalculated and reposted. SBC Ameritech makes available a listing of the recalculated and reposted performance measurement results that have also been restated (changed from the originally posted result) in the Reports section of this website. These reports are available for both CLEC-aggregate results and CLEC-specific results, and are accessed in the same manner as existing performance measurement reports.

- In response to Bearing Point Observations 642 and 849 and NR123, September 2002 results for PM MI14 were recalculated and reposted on September 22, 2003. These results were previously restated on July 7, 2003, however an incorrect file was used for this restatement for the manual disaggregations of resale and UNE-P.

### ***Please note:***

- Effective with August 2003 performance results, for PM 80 for Michigan only the benchmark display has been modified to show no benchmark, as is specified by the SBC/Ameritech Performance Measurements User Guide Version 1.9.

- In response to Bearing Point Observation 893, effective with August 2003 results, for PM 76, the exclusion for no access/delayed maintenance has been implemented as specified by the SBC/Ameritech Performance Measurements User Guide Version 1.9.
- Effective with August 2003 performance results, for diagnostic PM6, a program error affecting only the Electronically Received-Manually Processed UNE-P All Res and Bus submeasure has been corrected to calculate the duration appropriately. Previously, the duration was reported as one minute for each LSOG5 FOC.
