

## Web Site News As Of October 20, 2008

Welcome to the Performance Measurements web site for Illinois, Indiana, Michigan, Ohio & Wisconsin.

**August 2008 results are now available for Illinois, Indiana, Michigan, Ohio & Wisconsin.  
Effective October 06:**

### *Recalculated and Reposted Performance Measures:*

Listed below are the measures for which previously reported results have been recalculated and reposted. AT&T makes available a listing of the recalculated and reposted performance measurement results that have also been restated (changed from the originally posted result) in the Reports section of this website. These reports are available for both CLEC-aggregate results and CLEC-specific results, and are accessed in the same manner as existing performance measurement reports.

- June 2008 results for performance measures 37.1, 39, 41, 52, 53, 54.1, 65.1, 67, 69, 76, 115.2, 119, and WI 2 have been recalculated and reposted to include circuits in the retail denominator inadvertently omitted from reporting as the result of a data processing error.
- July through November 2007 results for performance measures 59, 60, 62, and 63 in all states have been recalculated and reposted to include orders inadvertently omitted from reporting due to a coding problem. December 2007 results in Michigan have been restated under these same Version 2.5 performance measures. December 2007 results in Illinois, Indiana, Ohio, and Wisconsin have been restated under Version 3.0 performance measures 29, 30, 35, 62, and 63.
- December 2007 through June 2008 results for performance measures 39, 52, 67, 76, 115.2, and 119 in the states of Illinois, Indiana, Ohio and Wisconsin have been recalculated and reposted to include an exclusion omitted with implementation of the 2006 Six-Month Review performance measurement changes.

### *Please Note:*

- The AT&T Raw Data Web Site was posted on September 5, 2008 and can be accessed via the link provided at the very bottom of this page (labeled "Raw Data Request Process"). July data is available for PMs 1.1, 1.3, 2, 4, 5, 6, 12, 13, 13.1, 22, 29, 30, 35, 37.1, 38-41, 62, 63, 69.1, 70, 97, 101, 102, 104, 107, 110, 114, 114.1, 115, 120, 124, 124.1, 126, CLEC WI 1, CLEC WI 9, C BLG 3, IN 1, MI 2, MI 15, WI 1, WI 2 and WI 9.
- As noted here with the April 20, 2006 posting, AT&T discovered a problem with the Affiliate results for PM 65.1 8dB Loop measurement for the states of Illinois, Indiana, Ohio, and Wisconsin. The number of loops identified as "in-service" in calculating the Affiliate 8dB Trouble Report Rate was found to be overstated. Therefore, February 2006 through June 2008 results were reported and remedies calculated against the Retail compare only. Once the correct in-service volume has been determined, February 2006 through June 2008 results (and any subsequent months affected) will be restated, with any additional remedies due CLECs, or overpayments made by AT&T, handled according to the terms of the applicable remedy

plan.
