Welcome to the SBC Midwest Performance Measurements web site.

September 2003 performance results for SBC Midwest performance measurements are now available.

Business Rules:

The SBC/Ameritech Performance Measurements User Guide Version 1.8, the color-lined Version 1.9 and the 2002 Six-Month Review Agreed-To Measurement Change Implementation Schedule have been moved to the Historical Business Rules section. The "clean" SBC/Ameritech Performance Measurements User Guide Version 1.9 is accessible via the link shown below. All versions of the User Guide are accessible via the User Guide links at the bottom of the page.

SBC/Ameritech has identified a number of conflicts within the SBC/Ameritech Performance Measurement User Guide Version 1.9. The matrix outlining these known/identified business rules conflicts will be updated as needed and is located at **Conflict Matrix**. SBC Midwest expects to address these conflicts in the next six-month review collaborative.

Recalculated and Reposted Performance Measures:

Listed below are the measures for which previously reported results have been recalculated and reposted. SBC Ameritech makes available a listing of the recalculated and reposted performance measurement results that have also been restated (changed from the originally posted result) in the Reports section of this website. These reports are available for both CLEC-aggregate results and CLEC-specific results, and are accessed in the same manner as existing performance measurement reports.

- *Recalculated for October 20, 2003 posting* -- Due to an error in applying the exclusion for Large Port Out Orders, August 2003 results for PMs 100 and 101 were recalculated and reposted on October 20, 2003.
- *Recalculated for November 5, 2003 posting* -- A processing error for PM 17 caused certain records to be measured in the wrong disaggregation. September 2003 results have been recalculated and reposted.

Please note:

- In response to Bearing Point Observation 847, effective with September 2003 results, for PM MI 14, the interval for the Manually Submitted UNE Loop disaggregation will be calculated using the "Trouble Ticket Closed Time"- "CLEC Notification Time."
