

Web Site News As Of November 7, 2005

Welcome to the SBC Midwest Performance Measurements web site.

September 2005 performance results for SBC Midwest performance measurements are now available.

Recalculated and Reposted Performance Measures:

Listed below are the measures for which previously reported results have been recalculated and reposted. SBC/Midwest makes available a listing of the recalculated and reposted performance measurement results that have also been restated (changed from the originally posted result) in the Reports section of this website. These reports are available for both CLEC-aggregate results and CLEC-specific results, and are accessed in the same manner as existing performance measurement reports.

- March 2005 results for performance measures 35, 35.1, 37.1, 38, 39, 40, 41, 54.1, 65.1, 52, 53, 66, 67, 68, and 69 have been recalculated and reposted to include certain trouble reports inadvertently identified as subsequent reports and subsequently omitted from reported results.
- March 2005 results for performance measures 37.1 and 41 have been recalculated and reposted to correct for coding logic that did not properly exclude and include certain trouble reports in the results.
- May, June and July 2005 results for performance measure 65.1 have been recalculated and reposted to correct a logic problem that caused trouble reports to be included incorrectly in the results of certain CLEC's.
- August 2005 results for performance measures 16 and 19 have been recalculated and reposted to exclude data from another month that was inadvertently included in the results due to a processing error.
- July 2005 results for performance measure 97 in Wisconsin have been recalculated and reposted to correct for a processing error that resulted in certain orders being reported as not having the 10-digit trigger set on time, when in fact it was set on time.
