

Web Site News As Of December 6, 2004

Welcome to the SBC Midwest Performance Measurements web site.

October 2004 performance results for SBC Midwest performance measurements are now available.

Recalculated and Reposted Performance Measures:

Listed below are the measures for which previously reported results have been recalculated and reposted. SBC/Midwest makes available a listing of the recalculated and reposted performance measurement results that have also been restated (changed from the originally posted result) in the Reports section of this website. These reports are available for both CLEC-aggregate results and CLEC-specific results, and are accessed in the same manner as existing performance measurement reports.

- October and November 2003 results for performance measures 55.1, 55.2, 96, 97, and 99 have been recalculated and reposted to correct a program coding error that impacted the identification of LNP and LNP with Loop orders.
- July 2004 results for performance measure 5 UNE-P submeasures have been recalculated and reposted to remove data for a single CLEC that was inadvertently included in UNE-P results.
- June, July, and August 2004 results for performance measures 10.4 and MI 2 have been recalculated and reposted to correct a data processing error which resulted in CLEC caused jeopardy notices being included in performance measure results.

Please Note:

- The SBC/Midwest Raw Data Web Site was posted on December 6, 2004 and can be accessed via the link provided at the very bottom of this page (labeled "Raw Data Request Process"). - ASI, effective October 20th, is no longer ordering DSL line share product from its ICA, but is using SBC Line Share One, which is a commercial agreement available to all CLECs. Accordingly there is no longer a parity comparison available for the Line Share and line splitting measurements. SBC believes no reporting of an Affiliate compare is now required under the PM plan, but will continue to report the ASI data for Line Share One on an interim basis until such time as a finding can be made that such a comparison is no longer required or a benchmark can be agreed upon.
